## Preface

---

### About This Edition of *Accounting Trends & Techniques*

*Accounting Trends & Techniques* (*Trends*) compiles annual reporting and disclosure data and examples from a survey of the annual reports of publicly-traded entities. *Trends* provides accounting professionals with an invaluable resource for incorporating new and existing accounting and reporting guidance into financial statements using presentation techniques adopted by some of the most recognized entities headquartered in the United States.

### Organization and Content

This 2011 edition of *Trends* surveyed annual reports of 500 carefully selected non-regulated entities with fiscal periods ending between January and December 2010. The industry classifications of survey entities (as shown in Table 1-1) were obtained from Morningstar, Inc.

To provide you with the most useful and comprehensive look at current financial reporting techniques and methods, *Trends* is topically organized and offers the following:

- Descriptive guidance that includes current reporting requirements under U.S. generally accepted accounting principles (GAAP). U.S. GAAP is generally considered to be the requirements of the Financial Accounting Standards Board (FASB) *Accounting Standards Codification*<sup>TM</sup> (ASC). Select Securities and Exchange Commission (SEC) guidance is also included.
- Statistical tables that track reporting trends.
- Illustrative examples from the surveyed annual reports showing reporting techniques.
- Detailed indexes.

### Guidance

*Trends* offers discerning, plain English guidance covering the significant U.S. GAAP accounting and financial statement reporting requirements in narrative form. These narratives use common headings (recognition and measurement, presentation, and disclosure) to achieve a consistent presentation throughout all the sections. Although not a substitute for the authoritative accounting and reporting standards, *Trends*' reporting guidance boils down the complex requirements with a focus on your clear understanding of the content. The related authoritative sources for each requirement are cited within the narratives (for example, FASB ASC 310, *Receivables*, or Regulation S-K).

SEC rules and interpretative releases may expand, modify, or decrease accounting and disclosure requirements for foreign private issuers, regardless of whether they file their annual financial statements with the SEC in Forms 10-K, 20-F, or 40-F (Canadian issuers). Therefore, it is critical to consider SEC requirements, as well as those of FASB ASC, when reviewing the financial statements of SEC registrants. A general reference to FASB ASC in this publication does not include the SEC materials. When requirements are taken from an SEC rule or regulation, that rule or regulation will be cited directly.

### Reporting Trends

Statistical tables throughout *Trends* present reporting trends across the available choices in recognition, measurement, presentation, and disclosure in such diverse reporting matters as financial statement format and terminology and the treatment of transactions and events reflected in the financial statements. To distinguish them from content excerpted from a survey entity's financial statements, these tables are presented with a shaded background.

## ***Illustrative Reporting Examples***

*Trends* presents carefully selected excerpts from the annual reports of the survey entities to illustrate current reporting techniques and various presentation practices already subjected to the audit requirements mandated by the Public Company Accounting Oversight Board (PCAOB). Every edition of *Trends* includes all new annual report excerpts that were chosen to be particularly relevant and useful to financial statement preparers in illustrating current reporting practices.

Because survey entities may present disclosures on specific topics within different footnotes in their annual filings, including those ostensibly about a separate accounting topic, the excerpts presented in *Trends* to illustrate a given topic may have been taken from footnotes about other topics.

## ***Indexes***

Indexes in this edition include the “Appendix of 500 Entities,” which alphabetically lists each of the 500 survey entities included in the current edition and notes where in the text excerpts from their annual reports can be found; the “Index of Authoritative Accounting & Auditing Guidance,” which provides for easy cross-referencing of pronouncements to the applicable descriptive narratives; and a detailed “Subject Index,” which is fully cross-referenced to all significant topics included throughout the narratives.

## ***FASB ASC***

Because FASB ASC is the source of authoritative U.S. GAAP for nongovernmental entities, in addition to guidance issued by the SEC, the guidance within *Trends* refers only to the appropriate FASB ASC reference for all standards.

Note that the effective dates of recently released guidance affect the timing of its inclusion in the financial statements of the survey entities, thereby affecting the availability of illustrative excerpts for potential inclusion in each edition of *Trends*. This 2011 edition of *Trends* includes survey entities having fiscal years ending within calendar year 2010. Technical guidance for which this edition supplies illustrative annual report excerpts includes the following, among other recently issued guidance:

- Accounting Standards Update (ASU) No. 2010-28, *Intangibles-Goodwill and Other (Topic 350): When to Perform Step 2 of the Goodwill Impairment Test for Reporting Units with Zero or Negative Carrying Amounts (a consensus of the FASB Emerging Issues Task Force)*
- ASU No. 2010-06, *Fair Value Measurements and Disclosures (Topic 820): Improving Disclosures about Fair Value Measurements*
- ASU No. 2009-17, *Consolidations (Topic 810): Improvements to Financial Reporting by Enterprises Involved with Variable Interest Entities*
- ASU No. 2009-16, *Transfers and Servicing (Topic 860): Accounting for Transfers of Financial Assets*
- ASU No. 2009-15, *Accounting for Own-Share Lending Arrangements in Contemplation of Convertible Debt Issuance or Other Financing—a consensus of the FASB Emerging Issues Task Force*

## ***Convergence of U.S. GAAP and IFRSs***

Converging the standards of FASB and the International Accounting Standards Board (IASB) has been the primary focus of both organizations’ boards throughout 2011. The commitment for global convergence gained momentum in 2002, when FASB and the IASB signed what is known as the Norwalk Agreement. At that meeting, FASB and IASB pledged to use their best efforts to (a) make their existing financial reporting standards fully compatible as soon as is practicable, and (b) coordinate their future work programs to ensure that, once achieved, compatibility is maintained. That agreement was reaffirmed in a February 2006 Memorandum of Understanding (MoU), which was based on the following three principles:

- Convergence of accounting standards can best be achieved through the development of high quality, common standards over time.
- Trying to eliminate differences between two standards that are in need of significant improvement is not the best use of FASB’s and IASB’s resources—instead, a new common standard should be developed that improves the financial information reported to investors.

- Serving the needs of investors means that FASB and IASB should seek convergence by replacing standards in need of improvement with jointly developed new standards.

At a joint meeting in April 2008, FASB and the IASB again affirmed their commitment to developing common, high quality standards, and agreed on a path to completing the MoU projects, including projected completion dates. In September 2008, and again in April 2011, the two boards jointly published an update of their 2006 MoU to report the progress they had made since. During 2011, the boards regularly updated project completion dates as difficulties in completing projects arose. Some projects (for example, Income Taxes) were removed from the convergence schedules when the boards agreed that convergence was unlikely to be achieved in the short time available, whereas other projects have reached the exposure draft milestone. Each board believes that these standards, when completed, would improve the quality, consistency, and comparability of financial information for investors and capital markets around the world.

Lastly, in May 2011, the SEC produced a work plan to outline how convergence efforts may be carried out. Many of the panelists favored the “condorsement” approach, whereby FASB would endorse new IFRSs one at a time as part of the convergence process, instead of following a “Big Bang” approach of converging several IFRSs at one time. Both IASB and FASB provide extensive information about convergence projects and other projects on their respective web sites, often with links to the relevant page on the opposite partner’s site.

### ***Private Company Financial Reporting***

In October 2011, the Financial Accounting Federation (FAF) board of trustees announced a plan to establish a new Private Company Standards Improvement Council (PCSIC) that would identify, propose, deliberate, and formally vote on specific exceptions or modifications to U.S. GAAP for private companies. The PCSIC, jointly with FASB, would develop a set of specific criteria to determine whether and when exceptions or modifications to U.S. GAAP are warranted for private companies. Based on those criteria, the PCSIC would identify aspects of existing U.S. GAAP that its members believe require exceptions or modifications and then vote on specific changes. Any proposed changes to existing U.S. GAAP would be subject to ratification by FASB and undergo thorough due process, including public comment. The PCSIC would be overseen by the FAF board of trustees. The trustees seek public comment on the plan to establish a PCSIC until January 2012; a final decision will be made on the plan following the end of the comment period.

### **Related Products**

*Trends* presents and analyzes financial reporting information for public, nonregulated entities across many sectors. To see a similar presentation and analysis for IFRSs, employee benefit plans, not-for-profit entities, and state and local governments, please see the related publications in the AICPA’s *Trends & Techniques* series:

- *IFRS Accounting Trends & Techniques*
- *Employee Benefit Plans Accounting Trends & Techniques*
- *Not-for-Profit Entities Accounting Trends & Techniques*
- *State and Local Governments Accounting Trends & Techniques*

AICPA also recently launched *eXacct: Financial Reporting Tools & Techniques*, a powerful new Web-based tool that builds on the *Trends* framework to holistically address accounting, financial reporting, and enhanced business reporting. *eXacct* provides all the content you’ve come to expect from *Trends*—the guidance, reporting trends, and illustrative reporting examples—in an interactive, online format. *eXacct* augments the print edition of *Trends* by providing complete annual reports—in multiple formats—for all of the 500 *Trends* survey companies, as well as all available XBRL filings from the survey companies and full XBRL tag information. *eXacct*’s XBRL functionality makes XBRL tags and content fully searchable, highlighting company extensions with the click of a button, giving you the analytical tools to inform your own XBRL reporting. A subscription to this robust online tool allows you to search, browse, filter, download, and use *Trends*, annual report, and XBRL data exactly as you need them and is available at [www.cpa2biz.com](http://www.cpa2biz.com).

## Notice

*Trends* is a nonauthoritative practice aid and is not designed to provide a comprehensive understanding of all the requirements contained in U.S. GAAP. The guidance provided herein may not discuss all relevant accounting guidance on a given topic and should not be relied upon for its completeness. Users are encouraged to consult FASB ASC for complete, authoritative discussion of U.S. GAAP. Users are also encouraged to consult the complete body of SEC rules and regulations for regulatory requirements. In addition, *Trends* does not include reporting requirements relating to other matters such as internal control or agreed-upon procedures.

Authoritative guidance on accounting treatments in accordance with U.S. GAAP can be made only by reference to the FASB ASC, which is copyright of the FAF and can be acquired directly from FASB.

*Trends* has not been reviewed, approved, disapproved, or otherwise acted on by any senior technical committee of the AICPA and does not represent official positions or pronouncements of the AICPA. The financial statement excerpts selected for inclusion in *Trends* are provided herein only as a reference. In as much as these excerpts originate from various sources beyond the control of the AICPA, neither the authors nor the publisher endorse them and AICPA specifically disclaims any liability with regard to their use. All such information is provided without warranty of any kind.

The use of this publication requires the exercise of individual professional judgment. It is not a substitute for the original authoritative accounting and auditing guidance. Users are urged to refer directly to applicable authoritative pronouncements, when appropriate. As an additional resource, users may call the AICPA Technical Hotline at 1.877.242.7212.

## Feedback

We hope that you find this year's edition of *Trends* to be informative and useful. Please let us know! What features do you like? What do you think can be improved or added? We encourage you to give us your comments and questions about all aspects of *Trends*. Please direct your feedback to Keira Kraft, using the following contact information. All feedback is greatly appreciated and kept strictly confidential.

## Section 1: General Topics

### SURVEY ENTITIES

**1.01** In years prior to fiscal year 2008, 600 entities were used in the survey. All tables of significant accounting trends will be based on a survey of 500 entities for the 2008–10 fiscal years and 600 entities for the years prior to fiscal year 2008.

**1.02** All 500 entities included in the survey are registered with the Securities and Exchange Commission (SEC). Many of the survey entities have securities traded on one of the major stock exchanges: 80 percent on the New York Stock Exchange and 19 percent on NASDAQ. The remaining entities were traded on the American Stock Exchange or “over-the-counter” exchanges.

**1.03** Each year, entities are selected from the latest Fortune 1000 listing to replace those entities that were deleted from the survey (see the “Appendix of 500 Entities” for a comprehensive listing of the 500 entities, as well as those that were added and removed in this edition). Generally, entities are deleted from the survey when they are acquired; become privately held and, therefore, are no longer registered with the SEC; fail to timely issue a report; or cease operations.

#### 1.04

**TABLE 1-1: INDUSTRY CLASSIFICATIONS OF SURVEY ENTITIES**

|                                                    | 2010 |
|----------------------------------------------------|------|
| Basic Materials/Agricultural Inputs.....           | 3    |
| Basic Materials/Aluminum.....                      | 1    |
| Basic Materials/Building Materials.....            | 10   |
| Basic Materials/Chemicals.....                     | 9    |
| Basic Materials/Coal.....                          | 2    |
| Basic Materials/Copper.....                        | 1    |
| Basic Materials/Gold.....                          | 1    |
| Basic Materials/Industrial Metals & Minerals.....  | 2    |
| Basic Materials/Lumber & Wood Production.....      | 2    |
| Basic Materials/Paper & Paper Products.....        | 7    |
| Basic Materials/Specialty Chemicals.....           | 7    |
| Basic Materials/Steel.....                         | 8    |
| Communication Services/Pay TV.....                 | 3    |
| Communication Services/Telecom Services.....       | 7    |
| Consumer Cyclical/Rubber & Plastics.....           | 1    |
| Consumer Cyclical/Advertising Agencies.....        | 2    |
| Consumer Cyclical/Apparel Manufacturing.....       | 9    |
| Consumer Cyclical/Apparel Stores.....              | 4    |
| Consumer Cyclical/Auto & Truck Dealerships.....    | 2    |
| Consumer Cyclical/Auto Manufacturers.....          | 1    |
| Consumer Cyclical/Auto Parts.....                  | 8    |
| Consumer Cyclical/Broadcasting—TV.....             | 1    |
| Consumer Cyclical/Department Stores.....           | 6    |
| Consumer Cyclical/Footwear & Accessories.....      | 7    |
| Consumer Cyclical/Home Furnishings & Fixtures..... | 10   |

| <b>Total Entities.....</b>                          | <b>500</b> |

Note: Because the industry classifications used in Accounting Trends & Techniques changed in 2010, no prior year data are available.

## 1.05

**TABLE 1-2: SIZE OF SURVEY ENTITIES BY AMOUNT OF REVENUE**

Table 1-2 indicates the relative size of the survey entities as measured by dollar amount of revenue.

|                                                   | 2010       | 2009       | 2008       |
|---------------------------------------------------|------------|------------|------------|
| Less than \$100,000,000.....                      | 3          | 3          | 3          |
| Between \$100,000,000 and \$500,000,000.....      | 9          | 13         | 10         |
| Between \$500,000,000 and \$1,000,000,000.....    | 18         | 19         | 8          |
| Between \$1,000,000,000 and \$2,000,000,000.....  | 72         | 75         | 53         |
| Between \$2,000,000,000 and \$3,000,000,000.....  | 63         | 67         | 65         |
| Between \$3,000,000,000 and \$4,000,000,000.....  | 52         | 44         | 53         |
| Between \$4,000,000,000 and \$5,000,000,000.....  | 42         | 42         | 37         |
| Between \$5,000,000,000 and \$10,000,000,000..... | 96         | 93         | 105        |
| More than \$10,000,000,000.....                   | 145        | 144        | 166        |
| <b>Total Entities.....</b>                        | <b>500</b> | <b>500</b> | <b>500</b> |

## GENERAL FINANCIAL STATEMENT CONSIDERATIONS

### RECOGNITION AND MEASUREMENT

**1.06** Financial Accounting Standards Board (FASB) *Accounting Standards Codification* (ASC) 105-10-05-2 explains that if the necessary guidance for a transaction or event is not specified within a source of authoritative U.S. generally accepted accounting principles (GAAP), an entity should first consider accounting principles for similar transactions or events within a source of authoritative U.S. GAAP for that entity and then consider nonauthoritative guidance from other sources. When those accounting principles either prohibit the application of the accounting treatment to the particular transaction or event or indicate that the accounting treatment should not be applied by analogy, an entity should not follow those accounting principles.

**1.07** FASB ASC 105-10-05-3 explains that accounting and financial reporting practices not included in FASB ASC are nonauthoritative. FASB Concept Statements are not considered authoritative sources of U.S. GAAP, and no preference is given to the FASB Concept Statements over other nonauthoritative sources. FASB ASC does not state that consistency with the FASB Concept Statements in connection with an entity's application of an accounting treatment is necessary. Sources of nonauthoritative accounting guidance include the following:

- Practices that are widely recognized and prevalent, either generally or in the industry
- FASB Concept Statements
- AICPA Issues Papers
- International Financial Reporting Standards of the International Accounting Standards Board
- Pronouncements of professional associations or regulatory agencies

- Technical Questions and Answers included in AICPA *Technical Practice Aids*
- Accounting textbooks, handbooks, and articles

The appropriateness of other sources of accounting guidance depends on its relevance to particular circumstances, the specificity of the guidance, the general recognition of the issuer or author as an authority, and the extent of its use in practice.

**1.08** As discussed in FASB ASC 105-10-05-1, U.S. GAAP, as codified in FASB ASC, includes the rules and interpretive releases of the SEC as sources of authoritative GAAP as a convenience to SEC registrants. In addition to SEC rules and interpretive releases, the SEC staff issues Staff Accounting Bulletins that represent practices that the staff follows when administering SEC disclosure requirements. SEC staff announcements and observer comments made at meetings of the Emerging Issues Task Force publicly announce the staff's views on certain accounting issues for SEC registrants.

**1.09** In June 2009, FASB issued the last FASB statement referenced in that form: FASB Statement No. 168, *The FASB Accounting Standards Codification™ and the Hierarchy of Generally Accepted Accounting Principles—a replacement of FASB Statement No. 162*. This standard established FASB ASC as the source of authoritative U.S. accounting and reporting standards for nongovernmental companies, in addition to guidance issued by the SEC, and was effective for financial statements issued for interim and annual periods ending after September 15, 2009.

**1.10** In FASB ASC's Notice to Constituents (NTC), FASB suggests the use of plain English references to describe broad FASB ASC topics going forward in financial statements and related footnote disclosures. FASB provides the following example of plain English references in the NTC when referring to the requirements of FASB ASC 815, *Derivatives and Hedging*: "as required by the Derivatives and Hedging Topic of the FASB Accounting Standards Codification."

**1.11** A natural business year is the period of 12 consecutive months that end when the business activities of an entity have reached the lowest point in their annual cycle. In many instances, the natural business year of an entity ends December 31.

## 1.12

**TABLE 1-3: FASB ASC REFERENCING**

Table 1-3 indicates the method in which the survey entities referenced FASB ASC.

|                                                                                                                                     | Number of Entities |            |
|-------------------------------------------------------------------------------------------------------------------------------------|--------------------|------------|
|                                                                                                                                     | 2010               | 2009       |
| Plain English references throughout.....                                                                                            | 350                | 236        |
| Specific FASB ASC references throughout.....                                                                                        | 78                 | 98         |
| Dual Referencing (use of both plain English and specific references in the same paragraph, typically by using a parenthetical)..... | 34                 | 35         |
| Mix of both plain English and FASB ASC references.....                                                                              | 38                 | —          |
| Legacy referencing to old standard names only (for example, SFAS No. 157).....                                                      | —                  | 2          |
| Pre-codification financial statements.....                                                                                          | —                  | 129        |
| <b>Total Entities.....</b>                                                                                                          | <b>500</b>         | <b>500</b> |

## PRESENTATION

**1.13** Rule 14a-3 of the Securities Exchange Act of 1934 states that annual reports furnished to stockholders in connection with the annual meetings of stockholders should include audited financial statements: balance sheets as of the end of the two most recent fiscal years and statements of income and cash flows for each of the three most recent fiscal years. Rule 14a-3 also states that the following information, as specified in SEC Regulation S-K should be included in the annual report to stockholders:

- Selected quarterly financial data
- Changes in, and disagreements with, accountants on accounting and financial disclosure
- Summary of selected financial data for the last five years
- Description of business activities
- Segment information
- Listing of company directors and executive officers
- Market price of, and dividends on, the company's common stock for each quarterly period within the two most recent fiscal years
- Management's discussion and analysis (MD&A) of financial condition and results of operations
- Quantitative and qualitative disclosures about market risk

**1.14** FASB ASC 205-10-45-2 states only that it is ordinarily desirable for an entity to present the statement of financial position; the income statement; and the statement of changes in equity for one or more preceding years, in addition to those of the current year.

**1.15** Paragraphs 3–4 of FASB ASC 205-10-45 require these statements to be comparable, and any exceptions to comparability should be described as required by FASB ASC 250, *Accounting Changes and Error Corrections*. An entity is required to repeat, or at least refer to, any notes to financial statements,

other explanations, or accountants' reports that contain qualifications for prior years that appeared in the comparative statements when originally issued, to the extent this information remains significant. Multiple rules set forth in SEC Regulation S-X provide guidance to SEC registrants on the form and ordering of financial statements, the presentation of amounts, the omission of certain items, and requirements for supplemental schedules. Rule 14a-3 requires that annual reports to stockholders should include comparative balance sheets and statements of income and cash flows for each of the three most recent fiscal years. All the survey entities are SEC registrants and conformed to the aforementioned requirements of Rule 14a-3.

**1.16** FASB ASC permits an entity to offset a liability with an asset only when the following certain conditions discussed in FASB ASC 210-20-45-1 are met:

- Each of two parties owes the other determinable amounts.
- The reporting party has the right to set off the amount owed with the amount owed by the other party.
- The reporting party intends to set off.
- The right of setoff is enforceable by law.

## DISCLOSURE

**1.17** SEC Regulations S-X and S-K and AU section 431, *Adequacy of Disclosure in Financial Statements* (AICPA, *Professional Standards*), state the need for adequate disclosure in financial statements. Normally, the financial statements alone cannot present all information necessary for adequate disclosure without considering appended notes that disclose information. All surveyed entities provided footnote disclosures to their financial statements.

**1.18** FASB ASC 235, *Notes to Financial Statements*, sets forth guidelines about the content and format of disclosures of accounting policies. FASB ASC 235-10-50-1 requires that the significant accounting policies of an entity be presented as an integral part of the financial statements of the entity. FASB ASC 235-10-50-6 states that the preferable format is to present a summary of significant accounting policies preceding notes to financial statements or as the initial note under the same or a similar title.

**1.19** FASB ASC 205-10-50-1 requires an entity to provide information explaining changes due to reclassifications or other reasons that affect the manner of, or basis for, presenting corresponding items for two or more periods. FASB ASC 250-10 does not require an entity to present an opening balance sheet of the earliest period presented when an entity retrospectively applies a change in accounting policy or restates to correct an error.

**1.20** FASB ASC 275, *Risks and Uncertainties*, requires reporting entities to disclose information about the risks and uncertainties resulting from the nature of their operations, the use of estimates in preparing financial statements, and significant concentrations in certain aspects of the entity's operations.

## 1.21

**TABLE 1-4: DISCLOSURE OF ACCOUNTING POLICIES**

Table 1-4 shows the nature of information frequently disclosed in summaries of accounting policies and the number of survey entities disclosing such information.

|                                      | Number of Entities |      |      |
|--------------------------------------|--------------------|------|------|
|                                      | 2010               | 2009 | 2008 |
| Revenue recognition.....             | 491                | 485  | 486  |
| Consolidation policy.....            | 473                | 477  | 481  |
| Use of estimates.....                | 476                | 476  | 469  |
| Property.....                        | 484                | 475  | 453  |
| Cash equivalents.....                | 485                | 474  | 475  |
| Depreciation methods.....            | 488                | 456  | 469  |
| Amortization of intangibles.....     | 395                | 456  | 451  |
| Interperiod tax allocation.....      | 314                | 449  | 438  |
| Impairment.....                      | 457                | 436  | 415  |
| Financial instruments.....           | 433                | 435  | 440  |

| Capitalization of interest.....      | 114                | 98   | 86   |

## PRESENTATION AND DISCLOSURE EXCERPTS

### Plain English References

#### 1.22

SCHNITZER STEEL INDUSTRIES, INC. (AUG)

#### NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

##### Note 3—Recent Accounting Pronouncements (in part)

##### Recently Adopted Accounting Standards

In September 2006, the Financial Accounting Standards Board ("FASB") issued guidance that defines fair value, establishes a framework for measuring fair value, and expands fair value measurement disclosure. This guidance, as it relates to non-financial assets and liabilities that are recognized or disclosed at fair value in the financial statements on a non-recurring basis, was effective for the Company for the fiscal year ended August 31, 2010. Assets acquired through business combinations completed during the year ended August 31, 2010 were valued in accordance with this guidance. Non-recurring, non-financial asset fair value measurements also include those used in the Company's test of

recoverability of goodwill and indefinite-lived intangible assets, in which the Company determines whether fair values of its applicable reporting segments exceed their carrying values.

In December 2007, the FASB issued amended guidance regarding business combinations, establishing principles and requirements for how an acquirer recognizes and measures identifiable assets acquired, liabilities assumed, any resulting goodwill and any noncontrolling interest in an acquiree in its financial statements, as well as requiring that all transaction costs be expensed as incurred. This guidance also provides for disclosures to enable users of the financial statements to evaluate the nature and financial effects of a business combination. This amended guidance became effective for the Company beginning September 1, 2009 and has been applied prospectively to all business combinations completed in fiscal 2010. Transaction costs of \$1 million related to acquisitions that had not been completed at the time of adoption were expensed and all subsequent transaction costs have been expensed as incurred.

In December 2007, the FASB issued new guidance regarding the accounting and reporting for noncontrolling interests in subsidiaries. This guidance clarifies that noncontrolling interests in subsidiaries should be accounted for as a component of equity separate from the parent's equity. Additionally, the guidance requires that income from noncontrolling interests be presented below net income to derive a net income figure attributable to the parent entity. This guidance became effective for the Company beginning September 1, 2009 and the applicable classification and presentation provisions were applied retrospectively.

In December 2008, the FASB issued guidance relating to an employer's disclosures about the plan assets of a defined benefit pension or post retirement plan. The guidance requires additional disclosure regarding investment policies and strategies, fair value of each major asset category based on risks of the assets, inputs and valuation techniques used to estimate fair value, fair value measurement hierarchy for each asset category and significant concentrations of risk information. This guidance was effective for the Company for the fiscal year ended August 31, 2010 and the disclosures have been incorporated accordingly. See Note 15—Employee Benefits.

In June 2009, the FASB established the FASB Accounting Standards Codification (the "Codification") as the single source of authoritative US GAAP for all non-governmental entities. The Codification changes the referencing and organization of accounting guidance and became effective for us beginning September 1, 2009. There were no changes to US GAAP as a result of the issuance of the FASB Codification.

In January 2010, an accounting standards update was issued by the FASB to improve disclosure requirements related to fair value measurement. This update requires additional disclosures relating to significant transfers in and out of Levels 1 and 2 fair value measurements, along with the reason for the transfer and separate presentation of purchases, sales, issuances and settlements in the reconciliation of Level 3 fair value measurements. The update was effective for the Company in the third quarter of the fiscal year ended August 31, 2010, except for disclosures relating to Level 3 activity, which will be effective for the fiscal year ending August 31, 2012 and will be applied prospectively and thus will not have any impact on previously issued financial information. See Note 14—Derivative Financial Instruments and Fair Value Measurements.

In February 2010, the FASB issued amended guidance on subsequent events. Under this amended guidance, SEC filers are no longer required to disclose the date through which subsequent events have been evaluated in originally issued and revised financial statements. This guidance was effective immediately and the Company adopted these new requirements in the second quarter of fiscal 2010. In preparing the accompanying audited financial statements the Company has reviewed events that occurred after August 31, 2010, the balance sheet date, noting no material subsequent events.

### APPLIED MATERIALS, INC. (OCT)

#### NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

##### *Note 1. Summary of Significant Accounting Policies (in part)*

##### *Recent Accounting Pronouncements*

In March 2010, the FASB issued updated authoritative guidance that amends the requirements for evaluating whether a decision maker or service provider has a variable interest entity and clarified that a quantitative approach should not be the sole consideration in assessing the criteria for variable interest entity determination. The guidance also clarifies that related parties should be considered in applying all of the decision maker and service provider criteria. This is in addition to the authoritative guidance the FASB issued in June 2009 that applies to determining whether an entity is a variable interest entity and requiring an enterprise to perform an analysis to determine whether the enterprise's variable interest or interests give it a controlling financial interest in a variable interest entity. Under this guidance, an enterprise has a controlling financial interest when it has (1) the power to direct the activities of a variable interest entity that most significantly impact the entity's economic performance and (2) the obligation to absorb losses of the entity or the right to receive benefits from the entity that could potentially be significant to the variable interest entity. The guidance also requires an enterprise to assess whether it has an implicit financial responsibility to ensure that a variable interest entity operates as designed when determining whether it has power to direct the activities of the variable interest entity that most significantly impact the entity's economic performance. The guidance also requires ongoing assessments of whether an enterprise is the primary beneficiary of a variable interest entity, requires enhanced disclosures, and eliminates the scope exclusion for qualifying special-purpose entities. This guidance is effective for Applied beginning in the first quarter of fiscal 2011. The implementation of this authoritative guidance is not expected to have a material impact on Applied's financial position or results of operations.

In January 2010, the FASB issued authoritative guidance for fair value measurements, which requires additional disclosures and clarifications to existing disclosures. This authoritative guidance requires a reporting entity to disclose separately the amounts of significant transfers in and out of Level 1 and Level 2 fair value measurements and also to describe the reasons for these transfers. This authoritative guidance also requires enhanced disclosure of activity in

Level 3 fair value measurements. The new disclosures and clarifications of existing disclosures for Level 1 and Level 2 fair value measurements became effective for Applied in the second quarter of fiscal 2010. Disclosures regarding activity within Level 3 fair value measurements become effective the first interim reporting period after December 15, 2010 and will be effective for Applied in the second quarter of fiscal 2011. Applied is evaluating the potential impact of the implementation of this authoritative guidance on its consolidated financial statements. See Note 4 for information and related disclosures regarding Applied's fair value measurements.

In June 2009, the FASB issued authoritative guidance on variable interest entities, which requires revised evaluations of whether entities represent variable interest entities, ongoing assessments of control over such entities, and additional disclosures for variable interests. In December 2009, the FASB issued authoritative guidance on the financial reporting by entities involved with variable interest entities which amends previously issued guidance on variable interest entities. The amendments in this authoritative guidance replace the quantitative-based risks and rewards calculation for determining which reporting entity, if any, has a controlling financial interest in a variable interest entity with an approach focused on identifying which reporting entity has the power to direct the activities of a variable interest entity that most significantly impact the entity's economic performance and (1) the obligation to absorb losses of the entity or (2) the right to receive benefits from the entity. This authoritative guidance becomes effective for Applied in fiscal 2011. The implementation of this authoritative guidance is not expected to have a material impact on Applied's financial position or results of operations.

AUTODESK, INC. (JAN)

#### NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

*Note 1. Business and Summary of Significant Accounting Policies (in part)*

##### *Accounting Standards Adopted in Fiscal 2010*

With the exception of those discussed below, there have been no recent accounting pronouncements or changes in accounting pronouncements during the fiscal year ended January 31, 2010 that are of significance, or potential significance to the Company.

In June 2009, the Financial Accounting Standards Board ("FASB") issued The FASB Accounting Standards Codification and the Hierarchy of Generally Accepted Accounting Principles. This statement, which became effective on July 1, 2009, established the Accounting Standards Codification ("ASC") as the source of authoritative GAAP recognized by the FASB to be applied by nongovernmental entities, and is codified in ASC Topic 105, "Generally Accepted Accounting Principles." The ASC did not change GAAP, but instead reorganizes the U.S. GAAP pronouncements into accounting Topics. As the ASC did not change GAAP, the adoption of ASC Topic 105 did not have a material effect on Autodesk's

consolidated financial position, results of operations or cash flows.

In February 2010, the FASB issued Accounting Standards Update ("ASU") 2010-09 regarding ASC Topic 855 "Subsequent Events." This ASU removes the requirement for SEC filers to disclose the date through which management evaluated subsequent events in the financial statements, and was effective upon its issuance. Autodesk adopted the ASU upon issuance. The adoption did not have an impact on Autodesk's consolidated financial position, results of operations or cash flows.

In August 2009, the FASB issued ASU 2009-05 regarding ASC Topic 820, "Fair Value Measurements and Disclosures." This ASU provides guidance on how to measure liabilities at fair value within the scope of ASC Topic 820. This Update provides clarification that in circumstances in which a quoted price in an active market for the identical liability is not available, a reporting entity is required to measure fair value using one or more of the following techniques: 1) A valuation technique that uses: a. The quoted price of the identical liability when traded as an asset, or b. Quoted prices for similar liabilities or similar liabilities when traded as assets, or 2) Another valuation technique that is consistent with the principles of ASC Topic 820. Two examples would be an income approach or a market approach. Autodesk adopted the changes represented by this ASU during Autodesk's fiscal quarter ended October 31, 2009. The adoption of ASU 2009-05 did not have a material impact on Autodesk's consolidated financial position, results of operations or cash flows.

In April 2009, the FASB issued three related FASB Staff Positions ("FSP"): (i) FSP 157-4, "Determining Fair Value When the Volume and Level of Activity for the Asset or Liability Have Significantly Decreased and Identifying Transactions That Are Not Orderly" ("FSP 157-4"), (ii) FSP Statement of Financial Accounting Standard ("SFAS") 115-2 and SFAS 124-2, "Recognition and Presentation of Other-Than-Temporary Impairments" ("FSP SFAS 115-2" and "SFAS 124-2"), and (iii) FSP SFAS 107-1 and Accounting Principles Board ("APB") 28-1, "Interim Disclosures about Fair Value of Financial Instruments" ("FSP SFAS 107" and "APB 28-1"). FSP 157-4 provides guidance on how to determine the fair value of assets and liabilities under SFAS 157, "Fair Value Measurements" ("SFAS 157") in the current economic environment and reemphasizes that the objective of a fair value measurement remains the determination of an exit price. If Autodesk were to conclude that there has been a significant decrease in the volume and level of activity of the asset or liability in relation to normal market activities, quoted market values may not be representative of fair value and the Company may conclude that a change in valuation technique or the use of multiple valuation techniques may be appropriate. FSP SFAS 115-2 and SFAS 124-2 modify the requirements for recognizing other-than-temporarily impaired debt securities and revise the existing impairment model for such securities by modifying the current intent and ability indicator in determining whether a debt security is other-than-temporarily impaired. FSP SFAS 107 and APB 28-1 enhance the disclosure of instruments under the scope of SFAS 157 for both interim and annual periods. Autodesk adopted these FSPs during the quarter ended July 31, 2009. The adoption did not have a material effect on the Company's consolidated financial position, results of operations or cash flows.

In April 2009, the FASB issued FSP 141R-1, "Accounting for Assets Acquired and Liabilities Assumed in a Business Combination That Arise from Contingencies" ("FSP 141R-1").

FSP 141R-1 amends the provisions in Statement of Financial Accounting Standards No. 141 (revised 2007) “Business Combinations” (“SFAS 141R”) for the initial recognition and measurement, subsequent measurement and accounting, and disclosures for assets and liabilities arising from contingencies in business combinations. FSP 141R-1 eliminates the distinction between contractual and non-contractual contingencies, including the initial recognition and measurement criteria in SFAS 141R and instead carries forward most of the provisions in SFAS 141 for acquired contingencies. FSP 141R-1 was effective for Autodesk for contingent assets and contingent liabilities acquired in business combinations for which the acquisition date was on or after February 1, 2009. The adoption of FSP 141R-1 did not have a material effect on the Company’s consolidated financial position, results of operations or cash flows.

#### *Recently Issued Accounting Standards*

In January 2010, the FASB issued ASU 2010-06 regarding ASC Topic 820 “Fair Value Measurements and Disclosures.” This ASU requires additional disclosure regarding significant transfers in and out of Levels 1 and 2 fair value measurements and the reasons for the transfers. In addition, this ASU requires the Company to present separately information about purchases, sales, issuances, and settlements, (on a gross basis rather than as one net number), in the reconciliation for fair value measurements using significant unobservable inputs (Level 3). ASU 2010-06 clarifies existing disclosures regarding fair value measurement for each class of assets and liabilities and the valuation techniques and inputs used to measure fair value for recurring and nonrecurring fair value measurements that fall in either Level 2 or Level 3. This update also includes conforming amendments to the guidance on employers’ disclosures about postretirement benefit plan asset (Subtopic 715-20). The changes under ASU 2010-06 will be effective for Autodesk’s fiscal year beginning February 1, 2010, except for the disclosures about purchases, sales, issuances and settlements in the roll forward of activity in Level 3 fair value measurements, which are effective for Autodesk’s fiscal year beginning February 1, 2011. Autodesk believes that the adoption of these new accounting pronouncements will not have a material impact on its consolidated financial position, results of operations or cash flows.

In October 2009, the FASB issued ASU 2009-13 regarding ASC Subtopic 605-25 “Revenue Recognition—Multiple-element Arrangements.” This ASU addresses criteria for separating the consideration in multiple-element arrangements. ASU 2009-13 will require companies to allocate the overall consideration to each deliverable by using a best estimate of the selling price of individual deliverables in the arrangement in the absence of vendor-specific objective evidence or other third-party evidence of the selling price. In October 2009, the FASB also issued ASU 2009-14 regarding ASC Topic 985 “Software: Certain Revenue Arrangements That Include Software Elements.” This ASU modifies the scope of ASC Subtopic 965-605, “Software Revenue Recognition,” to exclude (a) non-software components of tangible products and (b) software components of tangible products that are sold, licensed, or leased with tangible products when the software components and non-software components of the tangible product function together to deliver the tangible product’s essential functionality. The changes under ASU 2009-13 and 2009-14 will be effective prospectively for revenue arrange-

ments entered into or materially modified in fiscal years beginning on or after June 15, 2010, and early adoption is permitted. Autodesk currently plans to adopt the changes under ASU 2009-13 and 2009-14 effective February 1, 2011. Autodesk is currently assessing the impact that the adoption of these new accounting pronouncements will have on its consolidated financial position, results of operations or cash flows.

In June 2009, the FASB issued SFAS 166, “Accounting for Transfers of Financial Assets—an amendment of FASB Statement No. 140” and SFAS 167, “Amendments to FASB Interpretation No. 46(R),” which update accounting for securitizations and special-purpose entities. SFAS 166 eliminates the concept of a “qualifying special-purpose entity,” changes the requirements for derecognizing financial assets and requires additional disclosures. SFAS 167 amends the evaluation criteria to identify the primary beneficiary of a variable interest entity provided by FASB Interpretation No. 46(R), “Consolidation of Variable Interest Entities—An Interpretation of ARB No. 51.” This statement also amends the consolidation guidance applicable to variable interest entities. Additionally, SFAS 167 requires ongoing reassessments of whether an enterprise is the primary beneficiary of the variable interest entity. These statements will be effective for Autodesk’s fiscal year beginning February 1, 2010. Autodesk believes that the adoption of SFAS 166 or 167 will not have a material effect on its consolidated financial position, results of operations and cash flows.

### THOR INDUSTRIES, INC. (JUL)

#### *NOTES TO CONSOLIDATED FINANCIAL STATEMENTS*

##### *A. Summary of Significant Accounting Policies (in part)*

##### *Accounting Pronouncements*

In June 2009, the FASB issued SFAS No. 167, “Amendments to FASB Interpretation No. 46(R)” (SFAS 167). SFAS No. 167 amends ASC 810-10 (formerly FASB Interpretation No. 46(R)) by adding previously considered qualifying special purpose entities (the concept of these entities was eliminated by SFAS No. 166). In addition, companies must perform an analysis to determine whether the Company’s variable interest or interests give it a controlling financial interest in a variable interest entity. Companies must also reassess on an ongoing basis whether the Company is the primary beneficiary of a variable interest entity. SFAS 167 is effective for fiscal years beginning after November 15, 2009. The Company does not expect the adoption of SFAS 167 to have a material impact on the Company’s financial statements.

In January 2010, the FASB issued Accounting Standards Update (“ASC”) 2010-06 (Financial Reporting Considerations Related to Fair Value Measurement Disclosures), which amends ASC 820 (formerly Statement 157). The ASU was issued in response to requests from financial statement users for additional information about fair value measurements. Under the ASU:

- A reporting entity is now required to disclose separately the amounts of, and reasons for, significant transfers (1)

between Level 1 and Level 2 of the fair value hierarchy and (2) into and out of Level 3 of the fair value hierarchy for the reconciliation of Level 3 measurements.

- A reporting entity is no longer permitted to adopt a policy recognizing transfers into Level 3 as of the beginning of the reporting period and transfers out of Level 3 as of the end of the reporting period. Rather, an entity must disclose and follow a consistent policy for determining when transfers between levels are recognized.

The Company adopted this ASU effective April 30, 2010. The adoption of the ASU did not have a material impact on the financial statements.

### *B. Investments and Fair Value Measurements (in part)*

ASC 820-10, Fair Value Measurements and Disclosures, defines fair value, establishes a framework for measuring fair value under generally accepted accounting principles and enhances disclosures about fair value measurements. Fair value is defined as the exchange price that would be received for an asset or paid to transfer a liability (i.e., an exit price) in the principal or most advantageous market for the asset or liability in an orderly transaction between market participants on the measurement date. Valuation techniques used to measure fair value must maximize the use of observable inputs and minimize the use of unobservable inputs. The stan-

dard describes a fair value hierarchy based on three levels of inputs, of which the first two are considered observable and the last unobservable, that may be used to measure fair value which are the following:

Level 1—Quoted prices in active markets for identical assets or liabilities.

Level 2—Inputs other than Level 1 that are observable, either directly or indirectly, such as quoted prices for similar assets or liabilities; quoted prices in markets that are not active; or other inputs that are observable or can be corroborated by observable market data for substantially the full term of the assets or liabilities.

Level 3—Unobservable inputs that are supported by little or no market activity and that are significant to the fair value of the assets or liabilities.

| Shares used in per share calculation—diluted                                 | 1,406,510                     | 1,414,295                    | 1,424,854                     | 1,416,974                    | 1,413,432                     | 1,390,240                    | 1,343,094                     | 1,311,682                    |

<sup>(1)</sup> Net income attributable to Yahoo! Inc. for the quarter ended March 31, 2009 includes net restructuring charges of \$5 million.

<sup>(2)</sup> Net income attributable to Yahoo! Inc. for the quarter ended June 30, 2009 includes a pre-tax gain of \$67 million in connection with the Company's sale of its Gmarket shares and net restructuring charges of \$65 million.

<sup>(3)</sup> Net income attributable to Yahoo! Inc. for the quarter ended September 30, 2009 includes Yahoo!'s gain on sale of the Company's direct investment in Alibaba.com of \$98 million and net restructuring charges of \$17 million.

<sup>(4)</sup> Net income attributable to Yahoo! Inc. for the quarter ended December 31, 2009 includes net restructuring charges of \$40 million.

<sup>(5)</sup> Net income attributable to Yahoo! Inc. for the quarter ended March 31, 2010 includes a pre-tax gain of \$66 million in connection with the sale of Zimbra, Inc. and net restructuring charges of \$4 million. During the quarter ended March 31, 2010, Yahoo! recorded \$43 million for the reimbursement of transition costs incurred in 2009.

<sup>(6)</sup> Net income attributable to Yahoo! Inc. for the quarter ended June 30, 2010 includes net restructuring charges of \$10 million.

<sup>(7)</sup> Net income attributable to Yahoo! Inc. for the quarter ended September 30, 2010 includes a pre-tax gain of \$186 million in connection with the sale of HotJobs and net restructuring charges of \$6 million.

<sup>(8)</sup> Net income attributable to Yahoo! Inc. for the quarter ended December 31, 2010 includes net restructuring charges of \$38 million. Beginning in the fourth quarter of 2010 when Yahoo! completed the transition of algorithmic and paid search services to the Microsoft platform in the U.S. and Canada, revenue was impacted by the required change in revenue presentation and the revenue share with Microsoft associated with the transition pursuant to the Search Agreement. For transitioned markets, Yahoo! now reports an 88 percent revenue share for search advertising services provided by Microsoft. Yahoo!'s income tax provision was also reduced by the effect of certain tax benefits as discussed in Note 9—"Income Taxes" in the Notes to the consolidated financial statements.

<sup>(1)</sup> Computed on weighted-average number of shares outstanding.

<sup>(2)</sup> Computed on weighted-average number of shares outstanding diluted by assumed exercise of stock-based compensation awards, using the treasury stock method.

<sup>(3)</sup> Represents profit divided by average stockholders' equity (beginning of year stockholders' equity plus end of year stockholders' equity divided by two).

<sup>(4)</sup> Profit attributable to common stockholders.

<sup>(5)</sup> Effective January 1, 2009, we changed the manner in which we accounted for noncontrolling interests. Prior periods have been revised, as applicable.

<sup>(6)</sup> In 2007 we changed the manner in which we accounted for uncertain tax positions.

(1) Includes the impact of the following items: a \$15.6 million pre-tax charge for subleasing excess space in our New York facilities, a \$10.6 million pre-tax restructuring charge, a \$7.3 million pre-tax gain on the sale of certain equity interests at our Standard & Poor's segment and a \$3.8 million pre-tax gain on the sale of McGraw-Hill Education's Australian secondary education business.

(2) Includes the impact of the following items: a \$15.2 million net pre-tax restructuring charge, a \$13.8 million pre-tax loss on the sale of Vista Research, Inc. and a \$10.5 million pre-tax gain on the sale of *BusinessWeek*.

(3) Includes a \$73.4 million pre-tax restructuring charge.

(4) Includes the impact of the following items: a \$43.7 million pre-tax restructuring charge and a \$17.3 million pre-tax gain on sale of the mutual fund data business.

(5) Includes the impact of the following items: a \$31.5 million pre-tax restructuring charge, a \$21.1 million pre-tax reduction in operating profit related to the transformation of Sweets from a primarily print catalogue to bundled print and online services, and stock-based compensation expense of \$136.2 million incurred as a result of a new accounting standard for share-based payments (included in this expense is a one-time charge for the elimination of our restoration stock option program of \$23.8 million).

## **Management's Discussion and Analysis of Financial Condition and Results of Operations**

**1.30****APPLE INC. (SEP)**

### ***MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS***

***Item 7***

This section and other parts of this Form 10-K contain forward-looking statements that involve risks and uncertainties. Forward-looking statements can also be identified by words such as "anticipates," "expects," "believes," "plans," "predicts," and similar terms. Forward-looking statements are not guarantees of future performance and the Company's actual results may differ significantly from the results discussed in the forward-looking statements. Factors that might

cause such differences include, but are not limited to, those discussed in the subsection entitled "Risk Factors" above, which are incorporated herein by reference. The following discussion should be read in conjunction with the consolidated financial statements and notes thereto included in Item 8 of this Form 10-K. All information presented herein is based on the Company's fiscal calendar. Unless otherwise stated, references in this report to particular years or quarters refer to the Company's fiscal years ended in September and the associated quarters of those fiscal years. The Company assumes no obligation to revise or update any forward-looking statements for any reason, except as required by law.

***Executive Overview***

The Company designs, manufactures, and markets a range of personal computers, mobile communication and media devices, and portable digital music players, and sells a variety of related software, services, peripherals, networking solutions, and third-party digital content and applications. The Company's products and services include Mac computers,

iPhone, iPad, iPod, Apple TV, Xserve, a portfolio of consumer and professional software applications, the Mac OS X and iOS operating systems, third-party digital content and applications through the iTunes Store, and a variety of accessory, service and support offerings. The Company sells its products worldwide through its retail stores, online stores, and direct sales force, and third-party cellular network carriers, wholesalers, retailers, and value-added resellers. In addition, the Company sells a variety of third-party Mac, iPhone, iPad and iPod compatible products, including application software, printers, storage devices, speakers, headphones, and various other accessories and peripherals through its online and retail stores. The Company sells to SMB, education, enterprise, government, and creative markets.

The Company is committed to bringing the best user experience to its customers through its innovative hardware, software, peripherals, services, and Internet offerings. The Company's business strategy leverages its unique ability to design and develop its own operating systems, hardware, application software, and services to provide its customers new products and solutions with superior ease-of-use, seamless integration, and innovative industrial design. The Company believes continual investment in research and development is critical to the development and enhancement of innovative products and technologies. In conjunction with its strategy, the Company continues to build and host a robust platform for the discovery and delivery of third-party digital content and applications through the iTunes Store. Within the iTunes Store, the Company has expanded its offerings through the App Store and iBookstore, which allow customers to browse, search for, and purchase third-party applications and books through either a Mac or Windows-based computer or by wirelessly downloading directly to an iPhone, iPad or iPod touch. The Company also works to support a community for the development of third-party software and hardware products and digital content that complement the Company's offerings. Additionally, the Company's strategy includes expanding its distribution network to effectively reach more customers and provide them with a high-quality sales and post-sales support experience. The Company is therefore uniquely positioned to offer superior and well-integrated digital lifestyle and productivity solutions.

The Company participates in several highly competitive markets, including personal computers with its Mac computers; mobile communications and media devices with its iPhone, iPad and iPod product families; and distribution of third-party digital content and applications with its online iTunes Store. While the Company is widely recognized as a leading innovator in the markets where it competes, these markets are highly competitive and subject to aggressive pricing. To remain competitive, the Company believes that increased investment in research and development and marketing and advertising is necessary to maintain or expand its position in the markets where it competes. The Company's research and development spending is focused on further developing its existing Mac line of personal computers; the Mac OS X and iOS operating systems; application software for the Mac; iPhone, iPad and iPod and related software; development of new digital lifestyle consumer and professional software applications; and investing in new product areas and technologies. The Company also believes increased investment in marketing and advertising programs is critical to increasing product and brand awareness.

The Company utilizes a variety of direct and indirect distribution channels, including its retail stores, online stores,

and direct sales force, and third-party cellular network carriers, wholesalers, retailers, and value-added resellers. The Company believes that sales of its innovative and differentiated products are enhanced by knowledgeable salespersons who can convey the value of the hardware, software, and peripheral integration, demonstrate the unique digital lifestyle solutions that are available on its products, and demonstrate the compatibility of the Mac with the Windows platform and networks. The Company further believes providing direct contact with its targeted customers is an effective way to demonstrate the advantages of its products over those of its competitors and providing a high-quality sales and after-sales support experience is critical to attracting new and retaining existing customers. To ensure a high-quality buying experience for its products in which service and education are emphasized, the Company continues to expand and improve its distribution capabilities by expanding the number of its own retail stores worldwide. Additionally, the Company has invested in programs to enhance reseller sales by placing high quality Apple fixtures, merchandising materials and other resources within selected third-party reseller locations. Through the Apple Premium Reseller Program, certain third-party resellers focus on the Apple platform by providing a high level of integration and support services, and product expertise.

#### *Critical Accounting Policies and Estimates*

The preparation of financial statements and related disclosures in conformity with U.S. generally accepted accounting principles ("GAAP") and the Company's discussion and analysis of its financial condition and operating results require the Company's management to make judgments, assumptions and estimates that affect the amounts reported in its consolidated financial statements and accompanying notes. Note 1, "Summary of Significant Accounting Policies" of Notes to Consolidated Financial Statements in this Form 10-K describes the significant accounting policies and methods used in the preparation of the Company's consolidated financial statements. Management bases its estimates on historical experience and on various other assumptions it believes to be reasonable under the circumstances, the results of which form the basis for making judgments about the carrying values of assets and liabilities. Actual results may differ from these estimates and such differences may be material.

Management believes the Company's critical accounting policies and estimates are those related to revenue recognition, valuation and impairment of marketable securities, inventory valuation and inventory purchase commitments, warranty costs, income taxes, and legal and other contingencies. Management considers these policies critical because they are both important to the portrayal of the Company's financial condition and operating results, and they require management to make judgments and estimates about inherently uncertain matters. The Company's senior management has reviewed these critical accounting policies and related disclosures with the Audit and Finance Committee of the Company's Board of Directors.

#### *Revenue Recognition*

Net sales consist primarily of revenue from the sale of hardware, software, digital content and applications, peripherals, and service and support contracts. The Company recognizes revenue when persuasive evidence of an arrangement exists,

delivery has occurred, the sales price is fixed or determinable, and collection is probable. Product is considered delivered to the customer once it has been shipped and title and risk of loss have been transferred. For most of the Company's product sales, these criteria are met at the time the product is shipped. For online sales to individuals, for some sales to education customers in the U.S., and for certain other sales, the Company defers recognition of revenue until the customer receives the product because the Company retains a portion of the risk of loss on these sales during transit. The Company recognizes revenue from the sale of hardware products (e.g., Macs, iPhones, iPads, iPods and peripherals), software bundled with hardware that is essential to the functionality of the hardware, and third-party digital content sold on the iTunes Store in accordance with general revenue recognition accounting guidance. The Company recognizes revenue in accordance with industry specific software accounting guidance for the following types of sales transactions: (i) standalone sales of software products, (ii) sales of software upgrades and (iii) sales of software bundled with hardware not essential to the functionality of the hardware.

For multi-element arrangements that include tangible products containing software essential to the tangible product's functionality and undelivered software elements relating to the tangible product's essential software, the Company allocates revenue to all deliverables based on their relative selling prices. In such circumstances, the Company uses a hierarchy to determine the selling price to be used for allocating revenue to deliverables: (i) vendor-specific objective evidence of fair value ("VSOE"), (ii) third-party evidence of selling price ("TPE") and (iii) best estimate of the selling price ("ESP"). VSOE generally exists only when the Company sells the deliverable separately and is the price actually charged by the Company for that deliverable. ESPs reflect the Company's best estimates of what the selling prices of elements would be if they were sold regularly on a stand-alone basis.

For all past and current sales of iPhone, iPad, Apple TV and for sales of iPod touch beginning in June 2010, the Company indicated it might from time-to-time provide future unspecified software upgrades and features free of charge to customers. The Company has identified two deliverables in arrangements involving the sale of these devices. The first deliverable is the hardware and software essential to the functionality of the hardware device delivered at the time of sale. The second deliverable is the embedded right included with the purchase of iPhone, iPad, iPod touch and Apple TV to receive on a when-and-if-available basis, future unspecified software upgrades and features relating to the product's essential software. The Company has allocated revenue between these two deliverables using the relative selling price method. Because the Company has neither VSOE nor TPE for the two deliverables, the allocation of revenue has been based on the Company's ESPs. Amounts allocated to the delivered hardware and the related essential software are recognized at the time of sale provided the other conditions for revenue recognition have been met. Amounts allocated to the embedded unspecified software upgrade right are deferred and recognized on a straight-line basis over the 24-month estimated life of each of these devices. All product cost of sales, including estimated warranty costs, are recognized at the time of sale. Costs for engineering and sales and marketing are expensed as incurred. If the estimated life of the hardware product should change, the future rate of amortization of the revenue allocated to the software upgrade right will also change.

The Company's process for determining its ESP for deliverables without VSOE or TPE involves management's judgment. The Company's process considers multiple factors that may vary depending upon the unique facts and circumstances related to each deliverable. The Company believes its customers, particularly consumers, would be reluctant to buy unspecified software upgrade rights related to iPhone, iPad, iPod touch and Apple TV. This view is primarily based on the fact that unspecified upgrade rights do not obligate the Company to provide upgrades at a particular time or at all, and do not specify to customers which upgrades or features will be delivered. Therefore, the Company has concluded if it were to sell upgrade rights on a standalone basis, including those rights associated with iPhone, iPad, iPod touch and Apple TV, the selling price would be relatively low. Key factors considered by the Company in developing the ESPs for these upgrade rights include prices charged by the Company for similar offerings, the Company's historical pricing practices, the nature of the upgrade rights (e.g., unspecified and when-and-if-available), and the relative ESP of the upgrade rights as compared to the total selling price of the product. The Company may also consider, when appropriate, the impact of other products and services, including advertising services, on selling price assumptions when developing and reviewing its ESPs for software upgrade rights and related deliverables. The Company may also consider additional factors as appropriate, including the pricing of competitive alternatives if they exist, and product-specific business objectives. If the facts and circumstances underlying the factors considered change or should future facts and circumstances lead the Company to consider additional factors, the Company's ESP for software upgrades related to future sales for these devices could change.

Beginning in the third quarter of 2010 in conjunction with the announcement of iOS 4, the Company's ESPs for the embedded software upgrade rights included with iPhone, iPad and iPod touch reflect the positive financial impact expected by the Company as a result of its introduction of a mobile advertising platform for these devices and the expectation of customers regarding software that includes or supports an advertising component. iOS 4 supports iAd, the Company's new mobile advertising platform, which enables applications on iPhone, iPad and iPod touch to feature media-rich advertisements within applications.

The Company records reductions to revenue for estimated commitments related to price protection and for customer incentive programs, including reseller and end-user rebates, and other sales programs and volume-based incentives. For transactions involving price protection, the Company recognizes revenue net of the estimated amount to be refunded, provided the refund amount can be reasonably and reliably estimated and the other conditions for revenue recognition have been met. The Company's policy requires that, if refunds cannot be reliably estimated, revenue is not recognized until reliable estimates can be made or the price protection lapses. For customer incentive programs, the estimated cost of these programs is recognized at the later of the date at which the Company has sold the product or the date at which the program is offered. The Company also records reductions to revenue for expected future product returns based on the Company's historical experience. Future market conditions and product transitions may require the Company to increase customer incentive programs and incur incremental price protection obligations that could result in additional reductions to revenue at the time such programs

are offered. Additionally, certain customer incentive programs require management to estimate the number of customers who will actually redeem the incentive. Management's estimates are based on historical experience and the specific terms and conditions of particular incentive programs. If a greater than estimated proportion of customers redeem such incentives, the Company would be required to record additional reductions to revenue, which would have a negative impact on the Company's results of operations.

#### *Valuation and Impairment of Marketable Securities*

The Company's investments in available-for-sale securities are reported at fair value. Unrealized gains and losses related to changes in the fair value of investments are included in accumulated other comprehensive income, net of tax, as reported in the Company's Condensed Consolidated Balance Sheets. Changes in the fair value of investments impact the Company's net income only when such investments are sold or an other-than-temporary impairment is recognized. Realized gains and losses on the sale of securities are determined by specific identification of each security's cost basis. The Company regularly reviews its investment portfolio to determine if any investment is other-than-temporarily impaired due to changes in credit risk or other potential valuation concerns, which would require the Company to record an impairment charge in the period any such determination is made. In making this judgment, the Company evaluates, among other things, the duration and extent to which the fair value of an investment is less than its cost, the financial condition of the issuer and any changes thereto, and the Company's intent to sell, or whether it is more likely than not it will be required to sell, the investment before recovery of the investment's amortized cost basis. The Company's assessment on whether an investment is other-than-temporarily impaired or not, could change in the future due to new developments or changes in assumptions related to any particular investment.

#### *Inventory Valuation and Inventory Purchase Commitments*

The Company must order components for its products and build inventory in advance of product shipments. The Company records a write-down for inventories of components and products, including third-party products held for resale, which have become obsolete or are in excess of anticipated demand or net realizable value. The Company performs a detailed review of inventory each fiscal quarter that considers multiple factors including demand forecasts, product life cycle status, product development plans, current sales levels, and component cost trends. The industries in which the Company competes are subject to a rapid and unpredictable pace of product and component obsolescence and demand changes. If future demand or market conditions for the Company's products are less favorable than forecasted or if unforeseen technological changes negatively impact the utility of component inventory, the Company may be required to record additional write-downs, which would negatively affect its results of operations in the period when the write-downs were recorded.

The Company records accruals for estimated cancellation fees related to component orders that have been cancelled or are expected to be cancelled. Consistent with industry practice, the Company acquires components through a combination of purchase orders, supplier contracts, and open orders based on projected demand information. These com-

mitments typically cover the Company's requirements for periods ranging from 30 to 150 days. If there is an abrupt and substantial decline in demand for one or more of the Company's products or an unanticipated change in technological requirements for any of the Company's products, the Company may be required to record additional accruals for cancellation fees that would negatively affect its results of operations in the period when the cancellation fees are identified and recorded.

#### *Warranty Costs*

The Company provides for the estimated cost of hardware and software warranties at the time the related revenue is recognized based on historical and projected warranty claim rates, historical and projected cost-per-claim, and knowledge of specific product failures that are outside of the Company's typical experience. Each quarter, the Company reevaluates its estimates to assess the adequacy of its recorded warranty liabilities considering the size of the installed base of products subject to warranty protection and adjusts the amounts as necessary. If actual product failure rates or repair costs differ from estimates, revisions to the estimated warranty liability would be required and could materially affect the Company's results of operations.

The Company periodically provides updates to its applications and operating system software to maintain the software's compliance with specifications. The estimated cost to develop such updates is accounted for as warranty cost that is recognized at the time related software revenue is recognized. Factors considered in determining appropriate accruals related to such updates include the number of units delivered, the number of updates expected to occur, and the historical cost and estimated future cost of the resources necessary to develop these updates.

#### *Income Taxes*

The Company records a tax provision for the anticipated tax consequences of the reported results of operations. In accordance with GAAP, the provision for income taxes is computed using the asset and liability method, under which deferred tax assets and liabilities are recognized for the expected future tax consequences of temporary differences between the financial reporting and tax bases of assets and liabilities, and for operating losses and tax credit carryforwards. Deferred tax assets and liabilities are measured using the currently enacted tax rates that apply to taxable income in effect for the years in which those tax assets are expected to be realized or settled. The Company records a valuation allowance to reduce deferred tax assets to the amount that is believed more likely than not to be realized.

The Company only recognizes the tax benefit from an uncertain tax position if it is more likely than not that the tax position will be sustained on examination by the taxing authorities, based on the technical merits of the position. The tax benefits recognized in the financial statements from such positions are then measured based on the largest benefit that has a greater than 50% likelihood of being realized upon ultimate settlement.

Management believes it is more likely than not that forecasted income, including income that may be generated as a result of certain tax planning strategies, together with future reversals of existing taxable temporary differences, will be sufficient to fully recover the deferred tax assets. In the event

that the Company determines all or part of the net deferred tax assets are not realizable in the future, the Company will make an adjustment to the valuation allowance that would be charged to earnings in the period such determination is made. In addition, the calculation of tax liabilities involves significant judgment in estimating the impact of uncertainties in the application of GAAP and complex tax laws. Resolution of these uncertainties in a manner inconsistent with management's expectations could have a material impact on the Company's financial condition and operating results.

#### *Legal and Other Contingencies*

As discussed in Part I, Item 3 of this Form 10-K under the heading "Legal Proceedings" and in Note 8 "Commitments and Contingencies" in Notes to Consolidated Financial Statements, the Company is subject to various legal proceedings and claims that arise in the ordinary course of business. In accordance with GAAP, the Company records a liability when it is probable that a loss has been incurred and the amount is

reasonably estimable. There is significant judgment required in both the probability determination and as to whether an exposure can be reasonably estimated. In management's opinion, the Company does not have a potential liability related to any current legal proceedings and claims that would individually or in the aggregate materially adversely affect its financial condition or operating results. However, the outcomes of legal proceedings and claims brought against the Company are subject to significant uncertainty. Should the Company fail to prevail in any of these legal matters or should several of these legal matters be resolved against the Company in the same reporting period, the operating results of a particular reporting period could be materially adversely affected.

#### *Net Sales*

Fiscal years 2010, 2009 and 2008 each spanned 52 weeks. An additional week is included in the first fiscal quarter approximately every six years to realign fiscal quarters with calendar quarters.

The following table summarizes net sales and Mac unit sales by operating segment and net sales and unit sales by product during the three years ended September 25, 2010 (in millions, except unit sales in thousands and per unit amounts):

|                                                          | 2010     | Change | 2009     | Change | 2008     |
|----------------------------------------------------------|----------|--------|----------|--------|----------|
| <b>Net Sales by Operating Segment:</b>                   |          |        |          |        |          |
| Americas net sales                                       | \$24,498 | 29%    | \$18,981 | 15%    | \$16,552 |
| Europe net sales                                         | 18,692   | 58%    | 11,810   | 28%    | 9,233    |
| Japan net sales                                          | 3,981    | 75%    | 2,279    | 32%    | 1,728    |
| Asia-Pacific net sales                                   | 8,256    | 160%   | 3,179    | 18%    | 2,686    |
| Retail net sales                                         | 9,798    | 47%    | 6,656    | (9)%   | 7,292    |
| Total net sales                                          | \$65,225 | 52%    | \$42,905 | 14%    | \$37,491 |
| <b>Mac Unit Sales by Operating Segment:</b>              |          |        |          |        |          |
| Americas Mac unit sales                                  | 4,976    | 21%    | 4,120    | 4%     | 3,980    |
| Europe Mac unit sales                                    | 3,859    | 36%    | 2,840    | 13%    | 2,519    |
| Japan Mac unit sales                                     | 481      | 22%    | 395      | 2%     | 389      |
| Asia-Pacific Mac unit sales                              | 1,500    | 62%    | 926      | 17%    | 793      |
| Retail Mac unit sales                                    | 2,846    | 35%    | 2,115    | 4%     | 2,034    |
| Total Mac unit sales                                     | 13,662   | 31%    | 10,396   | 7%     | 9,715    |
| <b>Net Sales by Product:</b>                             |          |        |          |        |          |

<sup>(a)</sup> Includes iMac, Mac mini, Mac Pro and Xserve product lines.

<sup>(b)</sup> Includes MacBook, MacBook Air and MacBook Pro product lines.

<sup>(c)</sup> Includes iTunes Store sales, iPod services, and Apple-branded and third-party iPod accessories.

<sup>(d)</sup> Includes revenue recognized from iPhone sales, carrier agreements, services, and Apple-branded and third-party iPhone accessories.

<sup>(e)</sup> Includes revenue recognized from iPad sales, services and Apple-branded and third-party iPad accessories.

<sup>(f)</sup> Includes sales of displays, wireless connectivity and networking solutions, and other hardware accessories.

<sup>(g)</sup> Includes sales of Apple-branded operating system and application software, third-party software, Mac and Internet services.

<sup>(h)</sup> Derived by dividing total product-related net sales by total product-related unit sales.

NM = Not Meaningful

### Fiscal Year 2010 Versus 2009

Net sales during 2010 increased \$22.3 billion or 52% compared to 2009. Several factors contributed positively to these increases, including the following:

- Net sales of iPhone and related products and services were \$25.2 billion in 2010 representing an increase of \$12.1 billion or 93% compared to 2009. Net sales of iPhone and related products and services accounted for 39% of the Company's total net sales for the year. iPhone unit sales totaled 40 million in 2010, which represents an increase of 19.3 million or 93% compared to 2009. iPhone year-over-year growth was attributable primarily to continued growth from existing carriers, expanded distribution with new international carriers and resellers, and strong demand for iPhone 4, which was released in the U.S. in June 2010 and in many other countries over the remainder of 2010. As of September 25, 2010, the Company distributed iPhone in 89 countries through 166 carriers.
- Net sales of iPad and related products and services were \$5.0 billion and unit sales of iPad were 7.5 million during 2010. iPad was released in the U.S. in April 2010 and in various other countries over the remainder of 2010. As of September 25, 2010, the Company distributed iPad in 26 countries. The Company distributes iPad through its direct channels, certain cellular network carriers' distribution channels and certain third-party resellers. Net sales of iPad and related products and services accounted for 8% of the Company's total net sales for 2010, reflecting the strong demand for iPad during the five months following its release.
- Mac net sales increased by \$3.6 billion or 26% in 2010 compared to 2009, and Mac unit sales increased by 3.3 million or 31% in 2010 compared to 2009. Net sales per Mac unit sold decreased by 4% in 2010 compared to 2009 due primarily to lower average selling prices of Mac portable systems. Net sales of the Company's Macs accounted for 27% of the Company's total net sales in 2010 compared to 32% in 2009. During 2010, net sales and unit sales of the Company's Mac

portable systems increased by 18% and 25%, respectively, primarily attributable to strong demand for MacBook Pro, which was updated in April 2010. Net sales and unit sales of the Company's Mac desktop systems increased by 43% and 45%, respectively, as a result of higher sales of iMac, which was updated in July 2010.

- Net sales of other music related products and services increased \$912 million or 23% during 2010 compared to 2009. This increase was due primarily to growth of the iTunes Store which generated total net sales of \$4.1 billion for 2010. The results of the iTunes Store reflect growth of the iTunes App Store, continued growth in the installed base of iPhone, iPad, and iPod customers, and the expansion of third-party audio and video content available for sale and rent via the iTunes Store. The Company continues to expand its iTunes content and applications offerings around the world. Net sales of other music related products and services accounted for 8% of the Company's total net sales for 2010.
- Net sales of iPods increased \$183 million or 2% during 2010, while iPod unit sales declined by 7% during 2010 compared to 2009. Net sales per iPod unit sold increased by 10% to \$164 in 2010 compared to 2009, due to a shift in product mix toward iPod touch. iPod touch had strong growth in each of the Company's reportable operating segments. Net sales of iPods accounted for 13% of the Company's total net sales for the year compared to 19% in 2009.

### Fiscal Year 2009 Versus 2008

Net sales during 2009 increased \$5.4 billion or 14% compared to 2008. Several factors contributed positively to these increases, including the following:

- iPhone revenue and net sales of related products and services amounted to \$13.0 billion in 2009, an increase of \$6.3 billion or 93% compared to 2008. The year-over-year iPhone revenue growth is largely attributable to the year-over-year increase in iPhone handset unit sales. iPhone handset unit sales totaled 20.7 million during 2009, which represents an increase of 9.1 million or 78% during 2009 compared to 2008. This growth is

attributed primarily to expanded distribution and strong overall demand for iPhones. iPhone 3GS was released in the U.S. on June 19, 2009 and in many other countries over the remainder of 2009.

- Net sales of other music-related products and services increased \$696 million or 21% during 2009 compared to 2008. The increase was due predominantly to increased net sales of third-party digital content and applications from the iTunes Store, which experienced double-digit growth in each of the Company's geographic segments during 2009 compared to the same period in 2008. The Company believes this is attributable primarily to continued interest in and growth of the iTunes App Store, continued growth in the Company's base of iPhone, iPad, and iPod customers, and the expansion of third-party audio and video content available for sale and rent via the iTunes Store.

Partially offsetting the favorable factors discussed above, net sales during 2009 were negatively impacted by certain factors, including the following:

- Net sales of iPods decreased \$1.1 billion or 12% during 2009 compared to 2008. iPod unit sales decreased by 1% during 2009 compared to 2008. Net sales per iPod unit sold decreased 11% to \$149 in 2009 compared to 2008, resulting from lower average selling prices across all of the iPod product lines, due primarily to price reductions taken with the introduction of new iPods in September 2009 and September 2008 and a stronger U.S. dollar, offset partially by a higher mix of iPod touch sales.
- Mac net sales declined 3% during 2009 compared to 2008, while Mac unit sales increased by 7% over the same period. Net sales per Mac unit sold decreased by 10% during 2009 compared to 2008, due primarily to lower average selling prices across all Mac portable and desktop systems and a stronger U.S. dollar. Net sales of Macs accounted for 32% of the Company's total net sales for 2009. During 2009, Mac portable systems net sales and unit sales increased by 9% and 20%, respectively, compared to 2008. This growth was driven by strong demand for MacBook Pro, which was updated in June 2009 and October 2008, and which experienced double-digit net sales and unit growth in each of the Company's reportable operating segments compared to the same period in 2008. The Company also had a higher mix of Mac portable systems sales, which is consistent with overall personal computer market trends. Net sales and unit sales of the Company's Mac desktop systems decreased by 23% and 14%, respectively, during 2009 compared to 2008. The decrease in net sales of Mac desktop systems was due mainly to a shift in product mix towards lower-priced desktops, lower average selling prices across all Mac desktop systems and a stronger U.S. dollar.

#### *Segment Operating Performance*

The Company manages its business primarily on a geographic basis. The Company's reportable operating and reporting segments consist of the Americas, Europe, Japan, Asia-Pacific and Retail operations. The Americas, Europe, Japan and Asia-Pacific reportable segment results do not include the results of the Retail segment. The Americas segment includes both North and South America. The Europe segment includes European countries as well as the Middle

East and Africa. The Asia-Pacific segment includes Australia and Asia, but does not include Japan. The Retail segment operates Apple retail stores in 11 countries, including the U.S. Each reportable operating segment provides similar hardware and software products and similar services. Further information regarding the Company's operating segments may be found in Note 9, "Segment Information and Geographic Data" in Notes to Consolidated Financial Statements of this Form 10-K.

#### *Americas*

During 2010, net sales in the Americas segment increased \$5.5 billion or 29% compared to 2009. This increase in net sales was driven by increased iPhone revenue, strong demand for iPad, continued demand for Mac desktop and portable systems, and higher sales of third-party digital content and applications from the iTunes Store. Americas Mac net sales and unit sales increased 18% and 21%, respectively, during 2010 compared to 2009, largely due to strong demand for MacBook Pro. The Americas segment represented 37% and 44% of the Company's total net sales in 2010 and 2009, respectively.

During 2009, net sales in the Americas segment increased \$2.4 billion or 15% compared to 2008. The increase in net sales during 2009 was attributable to the significant year-over-year increase in iPhone revenue, higher sales of third-party digital content and applications from the iTunes Store, and increased sales of Mac portable systems, partially offset by a decrease in sales of Mac desktop systems and iPods. Americas Mac net sales decreased 6% due primarily to lower average selling prices, while Mac unit sales increased by 4% on a year-over-year basis. The increase in Mac unit sales was due primarily to strong demand for the MacBook Pro. The Americas segment represented approximately 44% of the Company's total net sales in both 2009 and 2008.

#### *Europe*

During 2010, net sales in Europe increased \$6.9 billion or 58% compared to 2009. The growth in net sales was due mainly to a significant increase in iPhone revenue attributable to continued growth from existing carriers and country and carrier expansion, increased sales of Mac desktop and portable systems and strong demand for iPad, partially offset by a stronger U.S. dollar. Europe Mac net sales and unit sales increased 32% and 36%, respectively, during the year due to strong demand for MacBook Pro and iMac. The Europe segment represented 29% and 28% of the Company's total net sales in 2010 and 2009, respectively.

During 2009, net sales in Europe increased \$2.6 billion or 28% compared to 2008. The increase in net sales was due mainly to increased iPhone revenue and strong sales of Mac portable systems, offset partially by lower net sales of Mac desktop systems, iPods, and a stronger U.S. dollar. Mac unit sales increased 13% in 2009 compared to 2008, which was driven primarily by increased sales of Mac portable systems, particularly MacBook Pro, while total Mac net sales declined as a result of lower average selling prices across all Mac products. iPod net sales decreased year-over-year as a result of lower average selling prices, partially offset by increased unit sales of the higher priced iPod touch. The Europe segment represented 28% and 25% of total net sales in 2009 and 2008, respectively.

## Japan

During 2010, Japan's net sales increased \$1.7 billion or 75% compared to 2009. The primary contributors to this growth were significant year-over-year increases in iPhone revenue, strong demand for iPad, and to a lesser extent strength in the Japanese Yen. Mac net sales increased by 8% driven by a 22% increase in unit sales due primarily to strong demand for MacBook Pro and iMac, partially offset by lower average selling prices in Japan on a year-over-year basis. The Japan segment represented 6% and 5% of the Company's total net sales for 2010 and 2009, respectively.

Japan's net sales increased \$551 million or 32% in 2009 compared to 2008. The primary contributors to this growth were increased iPhone revenue, stronger demand for certain Mac portable systems and iPods, and strength in the Japanese Yen, partially offset by decreased sales of Mac desktop systems. Net sales and unit sales of Mac portable systems increased during 2009 compared to 2008, driven primarily by stronger demand for MacBook Pro. Net sales and unit sales of iPods increased during 2009 compared to 2008, driven by strong demand for iPod touch and iPod nano. The Japan segment represented approximately 5% of the Company's total net sales in both 2009 and 2008.

## Asia-Pacific

Net sales in Asia-Pacific increased \$5.1 billion or 160% during 2010 compared to 2009. The significant growth in Asia-Pacific net sales was due mainly to increased iPhone revenue, which was primarily attributable to country and carrier expansion and continued growth from existing carriers. Asia-Pacific net sales were also favorably affected by strong demand for Mac portable and desktop systems and for iPad. Particularly strong year-over-year growth was experienced in China, Korea and Australia. The Asia-Pacific segment represented 13% and 7% of the Company's total net sales for 2010 and 2009, respectively.

Net sales in Asia-Pacific increased \$493 million or 18% during 2009 compared to 2008 reflecting strong growth in sales of iPhone and Mac portable systems, offset partially by a decline in sales of iPods and Mac desktop systems, as well as a strengthening of the U.S. dollar against the Australian dollar and other Asian currencies. Mac net sales and unit sales grew in the Asia-Pacific region by 4% and 17%, respectively, due to increased sales of the MacBook Pro. The Asia-Pacific segment represented approximately 7% of the Company's total net sales in both 2009 and 2008.

## Retail

Retail net sales increased \$3.1 billion or 47% during 2010 compared to 2009. The increase in net sales was driven primarily by strong demand for iPad, increased sales of Mac desktop and portable systems and a significant year-over-year increase in iPhone revenue. Mac net sales and unit sales grew in the Retail segment by 25% and 35%, respectively, during 2010. The Company opened 44 new retail stores during the year, 28 of which were international stores, ending the year with 317 stores open compared to 273 stores at the end of 2009. With an average of 288 stores and 254 stores opened during 2010 and 2009, respectively, average revenue per store increased to \$34.1 million in 2010, compared to \$26.2 million in 2009. The Retail segment represented 15% and 16% of the Company's total net sales in 2010 and 2009, respectively.

Retail net sales decreased \$636 million or 9% during 2009 compared to 2008. The decline in net sales was driven largely by a decrease in net sales of iPhones, iPods and Mac desktop systems, offset partially by strong demand for Mac portable systems. The year-over-year decline in Retail net sales was attributable to continued third-party channel expansion, particularly in the U.S. where most of the Company's stores are located, and also reflects the challenging consumer-spending environment in 2009. The Company opened 26 new retail stores during 2009, including 14 international stores, ending the year with 273 stores open. This compares to 247 stores open as of September 27, 2008. With an average of 254 stores and 211 stores opened during 2009 and 2008, respectively, average revenue per store decreased to \$26.2 million for 2009 from \$34.6 million in 2008.

The Retail segment reported operating income of \$2.4 billion during 2010 and \$1.7 billion during both 2009 and 2008. The increase in Retail operating income during 2010 compared to 2009 was attributable to higher overall net sales. Despite the decline in Retail net sales during 2009 compared to 2008, the Retail segment's operating income was flat at \$1.7 billion in 2009 compared to 2008 due primarily to a higher gross margin percentage in 2009 consistent with that experienced by the overall company.

Expansion of the Retail segment has required and will continue to require a substantial investment in fixed assets and related infrastructure, operating lease commitments, personnel, and other operating expenses. Capital asset purchases associated with the Retail segment since its inception totaled \$2.2 billion through the end of 2010. As of September 25, 2010, the Retail segment had approximately 26,500 full-time equivalent employees and had outstanding lease commitments associated with retail space and related facilities of \$1.7 billion. The Company would incur substantial costs if it were to close multiple retail stores and such costs could adversely affect the Company's financial condition and operating results.

## Gross Margin

Gross margin for the three years ended September 25, 2010, are as follows (in millions, except gross margin percentages):

|                         | 2010     | 2009     | 2008     |
|-------------------------|----------|----------|----------|
| Net sales               | \$65,225 | \$42,905 | \$37,491 |
| Cost of sales           | 39,541   | 25,683   | 24,294   |
| Gross margin            | \$25,684 | \$17,222 | \$13,197 |
| Gross margin percentage | 39.4%    | 40.1%    | 35.2%    |

The gross margin percentage in 2010 was 39.4% compared to 40.1% in 2009. This decline in gross margin is primarily attributable to new products that have higher cost structures, including iPad, partially offset by a more favorable sales mix of iPhone, which has a higher gross margin than the Company average.

The gross margin percentage in 2009 was 40.1% compared to 35.2% in 2008. The primary contributors to the increase in 2009 as compared to 2008 were a favorable sales mix toward products with higher gross margins and lower commodity and other product costs, which were partially offset by product price reductions.

The Company expects its gross margin percentage to decrease in future periods compared to levels achieved during

2010 and anticipates gross margin levels of about 36% in the first quarter of 2011. This expected decline is largely due to a higher mix of new and innovative products that have higher cost structures and deliver greater value to customers, and expected and potential future component cost and other cost increases.

The foregoing statements regarding the Company's expected gross margin percentage are forward-looking and could differ from anticipated levels because of several factors, including but not limited to certain of those set forth below in Part I, Item 1A, "Risk Factors" under the subheading *"Future operating results depend upon the Company's ability to obtain key components including but not limited to microprocessors, NAND flash memory, DRAM and LCDs at favorable prices and in sufficient quantities,"* which is incorporated herein by reference. There can be no assurance that targeted gross margin percentage levels will be achieved. In general, gross margins and margins on individual products will remain under downward pressure due to a variety of factors, including continued industry wide global product pricing pressures, increased competition, compressed product life cycles, product transitions and expected and potential increases in the cost of key components including but not limited to microprocessors, NAND flash memory, DRAM and LCDs, as well as potential increases in the costs of outside manufacturing services and a potential shift in the Company's sales mix towards products with lower gross margins. In response to these competitive pressures, the Company expects it will continue to take product pricing actions, which would adversely affect gross margins. Gross margins could also be affected by the Company's ability to manage product quality and warranty costs effectively and to stimulate demand for certain of its products. Due to the Company's significant international operations, financial results can be significantly affected in the short-term by fluctuations in exchange rates.

### Operating Expenses

Operating expenses for the three years ended September 25, 2010, are as follows (in millions, except for percentages):

|                                     | 2010    | 2009    | 2008    |
|-------------------------------------|---------|---------|---------|
| Research and development            | \$1,782 | \$1,333 | \$1,109 |
| Percentage of net sales             | 2.7%    | 3.1%    | 3.0%    |
| Selling, general and administrative | \$5,517 | \$4,149 | \$3,761 |
| Percentage of net sales             | 8.5%    | 9.7%    | 10.0%   |

### Research and Development Expense ("R&D")

R&D expense increased 34% or \$449 million to \$1.8 billion in 2010 compared to 2009. This increase was due primarily to an increase in headcount and related expenses in the current year to support expanded R&D activities. Also contributing to this increase in R&D expense in 2010 was the capitalization in 2009 of software development costs of \$71 million related to Mac OS X Snow Leopard. Although total R&D expense increased 34% during 2010, it declined as a percentage of net sales given the 52% year-over-year increase in net sales in 2010. The Company continues to believe that focused investments in R&D are critical to its future growth and competitive position in the marketplace and are directly related to timely development of new and enhanced products that are central to the Company's core business strategy. As such, the Com-

pany expects to make further investments in R&D to remain competitive.

R&D expense increased 20% or \$224 million to \$1.3 billion in 2009 compared to 2008. This increase was due primarily to an increase in headcount in 2009 to support expanded R&D activities and higher stock-based compensation expenses. Additionally, \$71 million of software development costs were capitalized related to Mac OS X Snow Leopard and excluded from R&D expense during 2009, compared to \$11 million of software development costs capitalized during 2008. Although total R&D expense increased 20% during 2009, it remained relatively flat as a percentage of net sales given the 14% increase in revenue in 2009.

### Selling, General and Administrative Expense ("SG&A")

SG&A expense increased \$1.4 billion or 33% to \$5.5 billion in 2010 compared to 2009. This increase was due primarily to the Company's continued expansion of its Retail segment, higher spending on marketing and advertising programs, increased stock-based compensation expenses and variable costs associated with the overall growth of the Company's net sales.

SG&A expenses increased \$388 million or 10% to \$4.1 billion in 2009 compared to 2008. This increase was due primarily to the Company's continued expansion of its Retail segment in both domestic and international markets, higher stock-based compensation expense and higher spending on marketing and advertising.

### Other Income and Expense

Other income and expense for the three years ended September 25, 2010, are as follows (in millions):

|                                | 2010   | 2009  | 2008  |
|--------------------------------|--------|-------|-------|
| Interest income                | \$ 311 | \$407 | \$653 |
| Other income (expense), net    | (156)  | (81)  | (33)  |
| Total other income and expense | \$ 155 | \$326 | \$620 |

Total other income and expense decreased \$171 million or 52% to \$155 million during 2010 compared to \$326 million and \$620 million in 2009 and 2008, respectively. The overall decrease in other income and expense is attributable to the significant declines in interest rates on a year-over-year basis, partially offset by the Company's higher cash, cash equivalents and marketable securities balances. The weighted average interest rate earned by the Company on its cash, cash equivalents and marketable securities was 0.75%, 1.43% and 3.44% during 2010, 2009 and 2008, respectively. Additionally the Company incurred higher premium expenses on its foreign exchange option contracts, which further reduced the total other income and expense. During 2010, 2009 and 2008, the Company had no debt outstanding and accordingly did not incur any related interest expense.

### Provision for Income Taxes

The Company's effective tax rates were 24%, 32% and 32% for 2010, 2009 and 2008, respectively. The Company's effective rates for these periods differ from the statutory federal income tax rate of 35% due primarily to certain undistributed foreign earnings for which no U.S. taxes are provided because such earnings are intended to be indefinitely

reinvested outside the U.S. The lower effective tax rate in 2010 as compared to 2009 is due primarily to an increase in foreign earnings on which U.S. income taxes have not been provided as such earnings are intended to be indefinitely reinvested outside the U.S.

As of September 25, 2010, the Company had deferred tax assets arising from deductible temporary differences, tax losses, and tax credits of \$2.4 billion, and deferred tax liabilities of \$5.0 billion. Management believes it is more likely than not that forecasted income, including income that may be generated as a result of certain tax planning strategies, together with future reversals of existing taxable temporary differences, will be sufficient to fully recover the deferred tax assets. The Company will continue to evaluate the realizability of deferred tax assets quarterly by assessing the need for and amount of a valuation allowance.

The Internal Revenue Service (the "IRS") has completed its field audit of the Company's federal income tax returns for the years 2004 through 2006 and proposed certain adjustments. The Company has contested certain of these adjustments through the IRS Appeals Office. The IRS is currently examining the years 2007 through 2009. All IRS audit issues for years prior to 2004 have been resolved. During the third quarter of 2010, the Company reached a tax settlement with the IRS for the years 2002 through 2003. In addition, the Company is subject to audits by state, local, and foreign tax authorities. Management believes that adequate provision has been made for any adjustments that may result from tax examinations. However, the outcome of tax audits cannot be predicted with certainty. If any issues addressed in the Company's tax audits are resolved in a manner not consistent with management's expectations, the Company could be required to adjust its provision for income taxes in the period such resolution occurs.

#### *Liquidity and Capital Resources*

The following table presents selected financial information and statistics as of and for the three years ended September 25, 2010 (in millions):

|                                                  | 2010     | 2009     | 2008     |
|--------------------------------------------------|----------|----------|----------|
| Cash, cash equivalents and marketable securities | \$51,011 | \$33,992 | \$24,490 |
| Accounts receivable, net                         | \$ 5,510 | \$ 3,361 | \$ 2,422 |
| Inventories                                      | \$ 1,051 | \$ 455   | \$ 509   |
| Working capital                                  | \$20,956 | \$20,049 | \$18,645 |
| Annual operating cash flow                       | \$18,595 | \$10,159 | \$ 9,596 |

As of September 25, 2010, the Company had \$51 billion in cash, cash equivalents and marketable securities, an increase of \$17 billion from September 26, 2009. The principal

component of this net increase was the cash generated by operating activities of \$18.6 billion, which was partially offset by payments for acquisition of property, plant and equipment of \$2 billion and payments made in connection with business acquisitions, net of cash acquired, of \$638 million.

The Company's marketable securities investment portfolio is invested primarily in highly rated securities, generally with a minimum rating of single-A or equivalent. As of September 25, 2010 and September 26, 2009, \$30.8 billion and \$17.4 billion, respectively, of the Company's cash, cash equivalents and marketable securities were held by foreign subsidiaries and are generally based in U.S. dollar-denominated holdings. The Company believes its existing balances of cash, cash equivalents and marketable securities will be sufficient to satisfy its working capital needs, capital asset purchases, outstanding commitments and other liquidity requirements associated with its existing operations over the next 12 months.

#### *Capital Assets*

The Company's capital expenditures were \$2.6 billion during 2010, consisting of approximately \$404 million for retail store facilities and \$2.2 billion for other capital expenditures, including product tooling and manufacturing process equipment and corporate facilities and infrastructure. The Company's actual cash payments for capital expenditures during 2010 were \$2 billion.

The Company anticipates utilizing approximately \$4.0 billion for capital expenditures during 2011, including approximately \$600 million for retail store facilities and approximately \$3.4 billion for product tooling and manufacturing process equipment, and corporate facilities and infrastructure, including information systems hardware, software and enhancements.

Historically the Company has opened between 25 and 50 new retail stores per year. During 2011, the Company expects to open 40 to 50 new stores, over half of which are expected to be located outside of the U.S.

#### *Off-Balance Sheet Arrangements and Contractual Obligations*

The Company has not entered into any transactions with unconsolidated entities whereby the Company has financial guarantees, subordinated retained interests, derivative instruments, or other contingent arrangements that expose the Company to material continuing risks, contingent liabilities, or any other obligation under a variable interest in an unconsolidated entity that provides financing, liquidity, market risk, or credit risk support to the Company.

The following table presents certain payments due by the Company under contractual obligations with minimum firm commitments as of September 25, 2010 and excludes amounts already recorded on the Consolidated Balance Sheet (in millions):

|                      | Total    | Payments Due in Less Than 1 Year | Payments Due in 1–3 Years | Payments Due in 4–5 Years | Payments Due in More Than 5 Years |
|----------------------|----------|----------------------------------|---------------------------|---------------------------|-----------------------------------|
| Operating leases     | \$ 2,089 | \$ 266                           | \$ 527                    | \$ 470                    | \$ 826                            |
| Purchase obligations | 8,700    | 8,700                            | 0                         | 0                         | 0                                 |
| Other obligations    | 1,096    | 912                              | 176                       | 6                         | 2                                 |
| Total                | \$11,885 | \$9,878                          | \$ 703                    | \$ 476                    | \$ 828                            |

### *Lease Commitments*

As of September 25, 2010, the Company had total outstanding commitments on noncancelable operating leases of \$2.1 billion, \$1.7 billion of which related to the lease of retail space and related facilities. The Company's major facility leases are typically for terms not exceeding 10 years and generally provide renewal options for terms not exceeding five additional years. Leases for retail space are for terms ranging from five to 20 years, the majority of which are for ten years, and often contain multi-year renewal options.

### *Purchase Commitments with Contract Manufacturers and Component Suppliers*

The Company utilizes several contract manufacturers to manufacture sub-assemblies for the Company's products and to perform final assembly and test of finished products. These contract manufacturers acquire components and build product based on demand information supplied by the Company, which typically covers periods ranging from 30 to 150 days. The Company also obtains individual components for its products from a wide variety of individual suppliers. Consistent with industry practice, the Company acquires components through a combination of purchase orders, supplier contracts, and open orders based on projected demand information.

Such purchase commitments typically cover the Company's forecasted component and manufacturing requirements for periods ranging from 30 to 150 days. As of September 25, 2010, the Company had outstanding off-balance sheet third-party manufacturing commitments and component purchase commitments of \$8.2 billion.

The Company has entered into prepaid long-term supply agreements to secure the supply of certain inventory components, which generally expire between 2011 and 2015. In August 2010, the Company entered into a long-term supply agreement under which it has committed to prepay \$500 million in 2011. These prepayments will be applied to certain inventory component purchases made over the life of each respective agreement.

### *Other Obligations*

Other outstanding obligations were \$1.1 billion as of September 25, 2010, which related to advertising, research and development, product tooling and manufacturing process equipment, Internet and telecommunications services and other obligations.

The Company's other non-current liabilities in the Consolidated Balance Sheets consist primarily of deferred tax liabilities, gross unrecognized tax benefits and the related gross interest and penalties. As of September 25, 2010, the Company had non-current deferred tax liabilities of \$4.3 billion. Additionally, as of September 25, 2010, the Company had gross unrecognized tax benefits of \$943 million and an additional \$247 million for gross interest and penalties classified as non-current liabilities. At this time, the Company is unable to make a reasonably reliable estimate of the timing of payments in connection with these tax liabilities; therefore, such amounts are not included in the above contractual obligation table.

### *Indemnifications*

The Company generally does not indemnify end-users of its operating system and application software against legal claims that the software infringes third-party intellectual property rights. Other agreements entered into by the Company sometimes include indemnification provisions under which the Company could be subject to costs and/or damages in the event of an infringement claim against the Company or an indemnified third-party. However, the Company has not been required to make any significant payments resulting from such an infringement claim asserted against it or an indemnified third-party and, in the opinion of management, does not have a liability related to unresolved infringement claims subject to indemnification that would materially adversely affect its financial condition or operating results. Therefore, the Company did not record a liability for infringement costs as of either September 25, 2010 or September 26, 2009.

The Company has entered into indemnification agreements with its directors and executive officers. Under these agreements, the Company has agreed to indemnify such individuals to the fullest extent permitted by law against liabilities that arise by reason of their status as directors or officers and to advance expenses incurred by such individuals in connection with related legal proceedings. It is not possible to determine the maximum potential amount of payments the Company could be required to make under these agreements due to the limited history of prior indemnification claims and the unique facts and circumstances involved in each claim. However, the Company maintains directors and officers liability insurance coverage to reduce its exposure to such obligations, and payments made under these agreements historically have not materially adversely affected the Company's financial condition or operating results.

## **Forward-Looking Information**

### **1.31**

#### **VISTEON CORPORATION (DEC)**

### *FORWARD-LOOKING STATEMENTS*

Certain statements contained or incorporated in this Annual Report on Form 10-K which are not statements of historical fact constitute "Forward-Looking Statements" within the meaning of the Private Securities Litigation Reform Act of 1995 (the "Reform Act"). Forward-looking statements give current expectations or forecasts of future events. Words such as "anticipate," "expect," "intend," "plan," "believe," "seek," "estimate" and other words and terms of similar meaning in connection with discussions of future operating or financial performance signify forward-looking statements. These statements reflect the Company's current views with respect to future events and are based on assumptions and estimates, which are subject to risks and uncertainties including those discussed in Item 1A under the heading "Risk Factors" and elsewhere in this report. Accordingly, undue reliance should not be placed on these forward-looking statements. Also, these forward-looking statements represent the

Company's estimates and assumptions only as of the date of this report. The Company does not intend to update any of these forward-looking statements to reflect circumstances or events that occur after the statement is made and qualifies all of its forward-looking statements by these cautionary statements.

You should understand that various factors, in addition to those discussed elsewhere in this document, could affect the Company's future results and could cause results to differ materially from those expressed in such forward-looking statements, including:

- Visteon's ability to satisfy its future capital and liquidity requirements; Visteon's ability to access the credit and capital markets at the times and in the amounts needed and on terms acceptable to Visteon; Visteon's ability to comply with covenants applicable to it; and the continuation of acceptable supplier payment terms.
- Visteon's ability to satisfy its pension and other postretirement employee benefit obligations, and to retire outstanding debt and satisfy other contractual commitments, all at the levels and times planned by management.
- Visteon's ability to access funds generated by its foreign subsidiaries and joint ventures on a timely and cost effective basis.
- Changes in the operations (including products, product planning and part sourcing), financial condition, results of operations or market share of Visteon's customers.
- Changes in vehicle production volume of Visteon's customers in the markets where it operates, and in particular changes in Ford's and Hyundai Kia's vehicle production volumes and platform mix.
- Increases in commodity costs or disruptions in the supply of commodities, including steel, resins, aluminum, copper, fuel and natural gas.
- Visteon's ability to generate cost savings to offset or exceed agreed upon price reductions or price reductions to win additional business and, in general, improve its operating performance; to achieve the benefits of its restructuring actions; and to recover engineering and tooling costs and capital investments.
- Visteon's ability to compete favorably with automotive parts suppliers with lower cost structures and greater ability to rationalize operations; and to exit non-performing businesses on satisfactory terms, particularly due to limited flexibility under existing labor agreements.
- Restrictions in labor contracts with unions that restrict Visteon's ability to close plants, divest unprofitable, noncompetitive businesses, change local work rules and practices at a number of facilities and implement cost-saving measures.
- The costs and timing of facility closures or dispositions, business or product realignments, or similar restructuring actions, including potential asset impairment or other charges related to the implementation of these actions or other adverse industry conditions and contingent liabilities.
- Significant changes in the competitive environment in the major markets where Visteon procures materials, components or supplies or where its products are manufactured, distributed or sold.
- Legal and administrative proceedings, investigations and claims, including shareholder class actions, in-

quiries by regulatory agencies, product liability, warranty, employee-related, environmental and safety claims and any recalls of products manufactured or sold by Visteon.

- Changes in economic conditions, currency exchange rates, changes in foreign laws, regulations or trade policies or political stability in foreign countries where Visteon procures materials, components or supplies or where its products are manufactured, distributed or sold.
- Shortages of materials or interruptions in transportation systems, labor strikes, work stoppages or other interruptions to or difficulties in the employment of labor in the major markets where Visteon purchases materials, components or supplies to manufacture its products or where its products are manufactured, distributed or sold.
- Changes in laws, regulations, policies or other activities of governments, agencies and similar organizations, domestic and foreign, that may tax or otherwise increase the cost of, or otherwise affect, the manufacture, licensing, distribution, sale, ownership or use of Visteon's products or assets.
- Possible terrorist attacks or acts of war, which could exacerbate other risks such as slowed vehicle production, interruptions in the transportation system or fuel prices and supply.
- The cyclical and seasonal nature of the automotive industry.
- Visteon's ability to comply with environmental, safety and other regulations applicable to it and any increase in the requirements, responsibilities and associated expenses and expenditures of these regulations.
- Visteon's ability to protect its intellectual property rights, and to respond to changes in technology and technological risks and to claims by others that Visteon infringes their intellectual property rights.
- Visteon's ability to quickly and adequately remediate control deficiencies in its internal control over financial reporting.
- Other factors, risks and uncertainties detailed from time to time in Visteon's Securities and Exchange Commission filings.

## Liquidity and Capital Resources

### 1.32

PULTEGROUP, INC. (DEC)

#### *LIQUIDITY AND CAPITAL RESOURCES*

We finance our land acquisitions, development, and construction activities by using internally-generated funds and existing credit arrangements. We routinely monitor current and expected operational requirements and financial market conditions to evaluate the use of available financing sources, including securities offerings. Based on our current financial condition and credit relationships, we believe that our operations and borrowing resources are sufficient to provide

for our current and foreseeable capital requirements. However, we continue to evaluate the impact of market conditions on our liquidity and may determine that modifications are appropriate if the current difficult market conditions extend beyond our expectations or if we incur additional land-related charges.

At December 31, 2010, we had cash and equivalents of \$1.5 billion and no borrowings outstanding under our unsecured revolving credit facility (the "Credit Facility"). We also had \$3.4 billion of senior notes outstanding. Other financing included limited recourse land-collateralized financing totaling \$0.6 million. Sources of our working capital include our cash and equivalents, our Credit Facility, and our unsecured letter of credit facility (the "LOC Agreement"). An additional source of liquidity during 2010 was the receipt of federal tax refunds aggregating \$934.7 million. Such refunds resulted primarily from the carryback of taxable losses provided by the Worker, Homeownership, and Business Assistance Act of 2009.

We follow a diversified investment approach for our cash and equivalents by maintaining such funds with a diversified portfolio of banks within our group of relationship banks in high quality, highly liquid, short-term investments, generally money market funds and federal government or agency securities. We monitor our investments with each bank on a daily basis and do not believe our cash and equivalents are exposed to any material risk of loss. However, given the volatility in the global financial markets, there can be no assurances that losses of principal balance on our cash and equivalents will not occur.

Our ratio of debt to total capitalization, excluding our land-collateralized debt, was 61.4% at December 31, 2010, and 47.4% net of cash and equivalents.

In June 2009, we entered into the LOC Agreement, a five-year, unsecured letter of credit facility that permits the issuance of up to \$200.0 million of letters of credit. The LOC Agreement supplements our existing letter of credit capacity included in our Credit Facility (described below). At December 31, 2010, \$167.2 million of letters of credit were outstanding under the LOC Agreement.

Given the difficult conditions in the homebuilding industry in recent years, we have reduced the borrowing capacity under the Credit Facility as the result of a combination of reduced working capital needs and challenges in meeting the Credit Facility's financial covenants. On December 23, 2010, we entered into the Fifth Amendment to Third Amended and Restated Credit Agreement (the "Fifth Amendment"), which decreased the borrowing capacity under the Credit Facility from \$750.0 million to \$250.0 million and also reduced the required level of cash and equivalents to be maintained in certain liquidity reserve accounts. Previously, on December 11, 2009, we entered into the Fourth Amendment and Waiver to Third Amended and Restated Credit Agreement, which reduced the borrowing capacity under the Credit Facility from \$1.2 billion to \$750.0 million, replaced the maximum debt to capitalization ratio with a maximum debt to tangible capital limit, reduced the tangible net worth minimum, and waived any default under the previous Credit Facility resulting from failure to comply with the tangible net worth financial covenant.

Under the terms of the Credit Facility, we have the capacity to issue letters of credit totaling up to \$250.0 million. Borrowing availability is reduced by the amount of letters of credit outstanding. The Credit Facility includes a borrowing

base limitation when we do not have an investment grade senior unsecured debt rating from at least two of Fitch Ratings, Moody's Investor Service, and Standard and Poor's Corporation (the "Rating Agencies"). We currently do not have investment grade ratings from any of the Rating Agencies and are therefore subject to the borrowing base limitation. Given the uncertainty of current market conditions, we anticipate operating under the borrowing base limitation for the remainder of the Credit Facility's term. Under the borrowing base limitation, the sum of our senior debt and the amount drawn on the Credit Facility may not exceed an amount based on certain percentages of various categories of our unencumbered inventory and other assets. At December 31, 2010, we had no borrowings outstanding and full availability of the remaining \$28.4 million under the Credit Facility after consideration of \$221.6 million of outstanding letters of credit. As a result, the borrowing base limitation did not restrict our borrowing availability at December 31, 2010.

We are also required to maintain certain liquidity reserve accounts in the event we fail to satisfy an interest coverage test. Specifically, if the interest coverage ratio (as defined in the Credit Facility) is less than 2.0 to 1.0, we are required to maintain cash and equivalents in designated accounts with certain banks. While our access to and utilization of cash and equivalents maintained in liquidity reserve accounts is not restricted, failure to maintain sufficient balances within the liquidity reserve accounts restricts our ability to utilize the Credit Facility. We maintained the required cash and equivalents of \$250.0 million within the liquidity reserve accounts at December 31, 2010, calculated under the Credit Facility as two times the amount by which the interest incurred over the last four quarters exceeds interest income over the last four quarters, excluding Financial Services, with a maximum amount of \$250.0 million to be maintained in the liquidity reserve accounts effective with the Fifth Amendment. Additionally, failure to satisfy the interest coverage test can also result in an increase to LIBOR margin and letter of credit pricing. Our interest coverage ratio for the quarter ended December 31, 2010 was negative 0.66. For the period ending March 31, 2011, we will be required to maintain cash and equivalents of \$250.0 million within the liquidity reserve accounts.

The Credit Facility contains certain financial covenants. We are required to not exceed a debt to tangible capital ratio as well as to meet a tangible net worth covenant each quarter. At December 31, 2010, our debt to tangible capital ratio (as defined in the Credit Facility) was 57.5% (compared with the requirement not to exceed 60.0%) while our tangible net worth (as defined in the Credit Facility) cushion was \$436.2 million. Accordingly, we were in compliance with all of the covenants under the Credit Facility as of December 31, 2010. However, the required debt to tangible capital ratio adjusts to 57.5% as of both March 31 and June 30, 2011 and 55.0% as of the end of each quarter thereafter. In the event we are not able to reduce our debt to tangible capital ratio below our current level, our compliance with the required covenant levels may be adversely impacted. Violations of the financial covenants in the Credit Facility, if not waived by the lenders or cured, could result in an optional maturity date acceleration by the lenders, which might require repayment of any borrowings and replacement or cash collateralization of any letters of credit outstanding under the Credit Facility. In the event these violations were not waived by the lenders or cured, the violations could also result in a default under our

\$3.4 billion of senior notes. Based on current market conditions, we believe that we may need to take action in order to avoid violating the debt to tangible capital ratio, potentially as early as March 31, 2011. Possible actions could include: negotiating changes to the Credit Facility's financial covenants with our group of lenders or arranging a new credit facility; terminating the Credit Facility, which would release the funds currently maintained in the liquidity reserve accounts (\$250.0 million) and using our available cash to collateralize required letters of credit (\$221.6 million at December 31, 2010); or replacing the Credit Facility with a separate letter of credit facility, similar to our existing LOC Agreement. While there can be no assurances that we could complete any of these actions given the uncertainties in the homebuilding industry and the financial markets, we believe that the combination of these potential actions will allow us to avoid any violations of covenants under either the Credit Facility or senior notes for the near term.

Pulte Mortgage provides mortgage financing for many of our home sales and uses its own funds and borrowings made available pursuant to certain third party and intercompany borrowings. Pulte Mortgage uses these resources to finance its lending activities until the mortgage loans are sold to third party investors, generally within 30 days. At December 31, 2009, Pulte Mortgage had a combination of repurchase lending agreements in place with various banks that provided borrowing capacity totaling \$175.0 million. Given our strong liquidity and the cost of third party financing relative to existing mortgage rates, Pulte Mortgage allowed each of its third party borrowing arrangements to expire during 2010 and began funding its operations using internal Company resources. At December 31, 2010, we elected to fund \$74.5 million of Pulte Mortgage's financing needs via a repurchase agreement with the Company. In order to satisfy regulatory requirements in certain states, Pulte Mortgage also maintains a \$2.5 million repurchase lending agreement with a bank that expires in October 2011. There were no borrowings outstanding under this facility as of December 31, 2010.

Pursuant to the two \$100 million stock repurchase programs authorized by our Board of Directors in October 2002 and 2005, and the \$200 million stock repurchase authorization in February 2006 (for a total stock repurchase authorization of \$400 million), we have repurchased a total of 9,688,900 shares for a total of \$297.7 million. There have been no repurchases under these programs since 2006. We had remaining authorization to purchase common stock aggregating \$102.3 million at December 31, 2010.

For the last three years, we have generated significant positive cash flow primarily through the liquidation of land inventory without a corresponding level of reinvestment combined with refunds of income taxes paid in prior years. We have used this positive cash flow to, among other things, increase our cash reserves as well as retire outstanding debt. Over the last three years, we have retired \$3.1 billion of debt, including debt assumed with the Centex merger (see Note 8 to the Consolidated Financial Statements for additional details regarding these retirements). The majority of this debt was retired prior to its stated maturity. In the fourth quarter of 2010, we retired \$898.5 million of senior notes. Additionally, we voluntarily used \$111.2 million to repurchase at a discount prior to their maturity certain community development district obligations with an aggregate principal balance of \$124.1 million in order to improve the future financial performance of the related communities (see Note 16 to the

Consolidated Financial Statements) and also voluntarily used \$74.5 million of Company funds to finance Pulte Mortgage's lending operations rather than continue to use third party financing arrangements. However, we do not anticipate that we will be able to continue to generate positive cash flow at these same levels in the near future. Additionally, should growth conditions return to the homebuilding industry, we will need to invest significant capital into our operations to support such growth.

Our net cash provided by operating activities amounted to \$580.3 million in 2010, \$738.9 million in 2009 and \$1.2 billion in 2008. During 2010, we received federal income tax refunds of \$934.7 million compared with \$362.0 million and \$212.1 million in 2009 and 2008, respectively. After adjusting for these tax refunds, operating cash flow was negative for 2010. Generally, the primary drivers of cash flow from operations are inventory levels and profitability. For the years ended 2008 through 2010, our net losses were largely attributable to non-cash asset impairments, including land-related charges and goodwill impairments. Cash flows from operations in 2010 were negatively impacted by the voluntary repurchase of certain community development district obligations for \$111.2 million (see above) and using \$74.5 million to internally finance Pulte Mortgage's lending operations. During 2010, inventory levels and residential mortgage loans available-for-sale decreased slightly while operating cash flows in 2009 and 2008 benefited from a significant net decrease in inventory and residential mortgage loans available-for-sale.

Net cash used by investing activities was \$19.5 million at December 31, 2010, compared to net cash provided by investing activities of \$1.7 billion in 2009 and net cash used in investing activities of \$55.9 million in 2008. The net cash used in 2010 was primarily the result of investments in unconsolidated entities and capital expenditures, partially offset by distributions from unconsolidated entities and a reduction in residential mortgage loans held for investment. Our contributions to unconsolidated entities and investments in capital expenditures have declined in recent years as the result of the reduction in our overall land investments. Substantially all of the cash provided by investing activities in 2009 was the result of cash acquired through the Centex merger. For 2008, the majority of the cash used by investing activities related to contributions to our unconsolidated entities.

Net cash used in financing activities totaled \$948.4 million, \$2.2 billion, and \$567.7 million in 2010, 2009, and 2008, respectively. Net cash used in 2010 was primarily the result of the repurchase of senior notes as mentioned above as well as repayments made under Financial Services credit arrangements. The large increase in net cash used in financing activities in 2009 was largely attributable to \$2.0 billion used to retire outstanding debt combined with reductions in amounts outstanding under our Financial Services credit arrangements. Net cash used in 2008 was largely attributable to the repurchase of outstanding senior notes combined with reductions in amounts outstanding under our Financial Services credit arrangements.

On November 24, 2008, our Board of Directors discontinued the regular quarterly dividend on our common stock effective in the first quarter of 2009.

#### *Inflation*

We, and the homebuilding industry in general, may be adversely affected during periods of high inflation because of

higher land and construction costs. Inflation may also increase our financing, labor, and material costs. In addition, higher mortgage interest rates significantly affect the affordability of permanent mortgage financing to prospective homebuyers. While we attempt to pass to our customers increases in our costs through increased sales prices, the current industry conditions have resulted in lower sales prices in substantially all of our markets. If we are unable to raise sales prices enough to compensate for higher costs, or if mortgage interest rates increase significantly, affecting our prospective homebuyers' willingness or ability to adequately finance home purchases, our revenues, gross margins, and net income would be adversely affected.

### *Seasonality*

We experience variability in our quarterly results from operations due to the seasonal nature of the homebuilding industry. Historically, we have experienced significant increases in revenues and cash flow from operations during the fourth quarter based on the timing of home settlements. However, the challenging market conditions experienced since early 2006 have lessened the seasonal variations of our results. Given the current significant uncertainty in the homebuilding industry, we can make no assurances as to when and whether our historical seasonality will recur.

## **New Accounting Standards**

### **1.33**

#### **URS CORPORATION (DEC)**

#### *ADOPTED AND OTHER RECENTLY ISSUED ACCOUNTING STANDARDS*

A new accounting standard on transfers of financial assets became effective for us at the beginning of our 2010 fiscal year. This standard eliminates the concept of a qualifying special-purpose entity, limits the circumstances under which a financial asset is derecognized and requires additional disclosures concerning a transferor's continuing involvement with transferred financial assets. The adoption of this standard did not have a material impact on our consolidated financial statements.

A new accounting standard on consolidation of VIEs became effective for us at the beginning of our 2010 fiscal year. This standard amends the accounting and disclosure requirements for the consolidation of a VIE. It requires additional disclosures about the significant judgments and assumptions used in determining whether to consolidate a VIE, the restrictions on a consolidated VIE's assets and on the settlement of a VIE's liabilities, the risk associated with involvement in a VIE, and the financial impact on a company due to its involvement with a VIE. As the standard requires ongoing quarterly evaluation of the application of the new requirements, changes in circumstances could result in the identification of additional VIEs to be consolidated or existing VIEs to be deconsolidated in any reporting period. We adopted this standard prospectively and based on the carrying values of the entities at the date of adoption. The adoption of this standard did not have

a material impact on our consolidated financial statements. For additional disclosures, see Note 5, "Joint Ventures," to our "Consolidated Financial Statements and Supplementary Data" included under Item 8 of this report.

An accounting standard update related to recurring and nonrecurring fair value measurements was issued. This update requires new disclosures on significant transfers of assets and liabilities between Level 1 and Level 2 of the fair value hierarchy (including the reasons for these transfers) and the reasons for any transfers in or out of Level 3. It also requires a reconciliation of recurring Level 3 measurements including purchases, sales, issuances and settlements on a gross basis. The accounting update clarifies certain existing disclosure requirements and requires fair value measurement disclosures for each class of assets and liabilities as opposed to each major category of assets and liabilities. It also clarifies that entities are required to disclose information about both the valuation techniques and inputs used in estimating Level 2 and Level 3 fair value measurements. Except for the disclosures on the reconciliation of recurring Level 3 measurements, the other new disclosures and clarifications of existing disclosures were effective for us beginning with the first quarter of our 2010 fiscal year. The adoption of this standard did not have a material impact on our consolidated financial statements. See Note 10, "Fair Values of Debt Instruments, Investments and Derivative Instruments," to our "Consolidated Financial Statements and Supplementary Data" included under Item 8 of this report for our fair value measurement disclosure. The information about the activity in Level 3 fair value measurements on a gross basis will be effective for us beginning with the first quarter of our 2011 fiscal year. We currently do not expect that the adoption of this portion of the standard will have a material impact on our consolidated financial statements.

An accounting standard update related to disclosures about the credit quality of financing receivables and the allowance for credit losses was issued. This update is intended to provide additional disclosures on a disaggregated basis about the nature of credit risk inherent in the company's portfolio of financing receivables, how the risk is analyzed and assessed in arriving at the allowance for credit losses, and the changes and reasons for those changes in the allowance for credit losses. We adopted the additional disclosures required by this accounting standard update at the end of our 2010 fiscal year. See Note 1, "Business, Basis of Presentation, and Accounting Policies" to our "Consolidated Financial Statements and Supplementary Data" included under Item 8 of this report for the additional disclosures. The adoption of this standard did not have a material impact on our consolidated financial statements. The additional disclosures related to the activity during the reporting period will be effective for us beginning with the first quarter of our 2011 fiscal year. We do not expect that the adoption of this portion of the standard will have a material impact on our consolidated financial statements.

An accounting standard update related to the way companies test for impairment of goodwill was issued. Pursuant to this accounting update, goodwill of the reporting unit is not impaired if the carrying amount of a reporting unit is greater than zero and its fair value exceeds its carrying amount. Hence, the second step of the impairment test is not required. However, if the carrying amount of a reporting unit is zero or negative, the second step of the impairment test is required to be performed to measure the amount of impairment loss,

if any, when it is more likely than not that goodwill impairment exists. In considering whether it is more likely than not that a goodwill impairment exists, a company must evaluate whether there are adverse qualitative factors. Consistent with before, this test must be performed annually or in the interim if an event occurs or circumstances exist that indicate that it is more likely than not that goodwill impairment exists. This standard is effective for us beginning in the first quarter of our 2011 fiscal year. We currently do not expect that the adoption of this standard will have a material impact on our consolidated financial statements.

## Market Risk Information

### 1.34

TRW AUTOMOTIVE HOLDINGS CORP. (DEC)

#### QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISKS

##### Item 7A

Our primary market risk arises from fluctuations in foreign currency exchange rates, interest rates and commodity prices. We manage foreign currency exchange rate risk, interest rate risk and, to a lesser extent, commodity price risk by utilizing various derivative instruments. We limit the use of such instruments to hedging activities; we do not use such instruments for speculative or trading purposes. If we did not use derivative instruments, our exposure to such risks would be higher. We are exposed to credit loss in the event of non-performance by the counterparty to the derivative financial instruments. We attempt to manage this exposure by entering into agreements directly with a number of major financial institutions that meet our credit standards and that are expected to fully satisfy their obligations under the contracts. However, given historical disruptions in the financial markets,

including the bankruptcy, insolvency or restructuring of certain financial institutions, there is no guarantee that the financial institutions with whom we contract will be able to fully satisfy their contractual obligations.

**Foreign Currency Exchange Rate Risk.** We utilize derivative financial instruments to manage foreign currency exchange rate risks. We enter into forward contracts and, to a lesser extent, options to hedge portions of our foreign currency denominated forecasted revenues, purchases and the subsequent cash flow from adverse movements in exchange rates. Foreign currency exposures are reviewed monthly and any natural offsets are considered prior to entering into a derivative financial instrument.

During 2010, we repaid approximately \$520 million of our U.S. dollar-denominated debt resulting in an increase in the percentage of debt denominated in foreign currencies compared to total debt. As of December 31, 2010, approximately 24% of our total debt was in foreign currencies, as compared to 19% as of December 31, 2009.

**Interest Rate Risk.** We are subject to interest rate risk in connection with variable- and fixed-rate debt. In order to manage interest costs, we may occasionally utilize interest rate swap agreements to exchange fixed- and variable-rate interest payment obligations over the life of the agreements. As of December 31, 2010, approximately 1% of our total debt was at variable interest rates, as compared to 18% (or 5% when considering the effect of interest rate swaps) as of December 31, 2009.

**Commodity Price Risk.** From time to time, we may utilize derivative financial instruments to manage select commodity price risks. Forward purchase agreements generally meet the criteria to be accounted for as normal purchases. Forward purchase agreements which do not or no longer meet these criteria are classified and accounted for as derivatives.

**Sensitivity Analysis.** We utilize a sensitivity analysis model to calculate the fair value, cash flows or statement of operations impact that a hypothetical 10% change in market rates would have on our debt and derivative instruments. For derivative instruments, we utilized applicable forward rates in effect as of December 31, 2010 to calculate the fair value or cash flow impact resulting from this hypothetical change in market rates. The analyses also do not factor in a potential change in the level of variable rate borrowings or derivative instruments outstanding that could take place if these hypothetical conditions prevailed. The results of the sensitivity model calculations follow:

| (Dollars in millions)                                                        | Assuming a 10% U.S.\$<br>Strengthening | Assuming a 10% U.S.\$<br>Weakening | Favorable (Unfavorable)<br>Change in |

| — Variable rate                   | \$—                                 | \$—                                 | Cash flow                            |

## Critical Accounting Policies

### 1.35

TIME WARNER INC. (DEC)

#### NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

##### 1. Description of Business, Basis of Presentation and Summary of Significant Accounting Policies (in part)

###### Summary of Critical and Significant Accounting Policies

The following is a discussion of each of the Company's critical accounting policies, including information and analysis of estimates and assumptions involved in their application, and other significant accounting policies.

The Securities and Exchange Commission ("SEC") considers an accounting policy to be critical if it is important to the Company's financial condition and results of operations and if it requires significant judgment and estimates on the part of management in its application. The development and selection of these critical accounting policies have been determined by Time Warner's management and the related disclosures have been reviewed with the Audit and Finance Committee of the Board of Directors of the Company. Due to the significant judgment involved in selecting certain of the assumptions used in these areas, it is possible that different parties could choose different assumptions and reach different conclusions. The Company considers the policies relating to the following matters to be critical accounting policies:

- Impairment of Goodwill and Intangible Assets (see pages 82 to 83);
- Multiple-Element Transactions (see page 88);
- Income Taxes (see pages 89 to 90);
- Film Cost Recognition, Participations and Residuals and Impairments (see page 87);
- Gross versus Net Revenue Recognition (see pages 88 to 89); and
- Sales Returns, Pricing Rebates and Uncollectible Accounts (see pages 79 to 80).

## Disclosure of Accounting Policies

### 1.36

JOY GLOBAL INC. (OCT)

#### NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

##### 2. Significant Accounting Policies

Our significant accounting policies are as follows:

**Basis of Presentation and Principles of Consolidation**—The Consolidated Financial Statements are presented in accordance with accounting principles generally accepted in the United States ("GAAP"). The Consolidated Financial Statements include the accounts of Joy Global Inc. and our subsidiaries, all of which are wholly owned. All significant intercompany balances and transactions have been eliminated.

**Use of Estimates**—The preparation of financial statements in conformity with GAAP requires us to make estimates and assumptions that affect the reported amounts of assets and liabilities at the date of the financial statements, and the reported amounts of revenues and expenses during the reporting period. Ultimate realization of assets and settlement of liabilities in the future could differ from those estimates.

**Cash Equivalents**—All highly liquid investments with original maturities of three months or less when issued are considered cash equivalents. These primarily consist of money market funds and to a lesser extent, certificates of deposit and commercial paper. Cash equivalents were \$517.7 million and \$201.7 million at October 29, 2010 and October 30, 2009, respectively.

**Inventories**—Our inventories are carried at the lower of cost or net realizable value using the first-in, first-out ("FIFO") method for all inventories. We evaluate the need to record adjustments for inventory on a regular basis. Our policy is to evaluate all inventories including raw material, work-in-process, finished goods, and spare parts. Inventory in excess of our estimated usage requirements is written down to its estimated net realizable value. Inherent in the estimates of net realizable value are estimates related to our future manufacturing schedules, customer demand, possible alternative uses and ultimate realization of potentially excess inventory.

**Property, Plant and Equipment**—Property, plant and equipment are stated at historical cost. Expenditures for major renewals and improvements are capitalized, while maintenance and repair costs that do not significantly improve the related asset or extend its useful life are charged to expense as incurred. For financial reporting purposes, plant and equipment are depreciated primarily by the straight-line method

over the estimated useful lives of the assets which generally range from 5 to 45 years for improvements, from 10 to 45 years for buildings, from 3 to 12 years for machinery and equipment and 3 to 5 years for software. Depreciation expense was \$51.5 million, \$49.3 million and \$48.8 million for 2010, 2009, and 2008, respectively. Depreciation claimed for income tax purposes is computed by accelerated methods.

**Impairment of Long-Lived Assets**—We assess the realizability of our held and used long-lived assets to evaluate such assets for impairment whenever events or circumstances indicate that the carrying amount of such assets (or group of assets) may not be recoverable. Impairment is determined to exist if the estimated future undiscounted cash flows related to such assets are less than the carrying value. If impairment is determined to exist, any related impairment loss is calculated based on the fair value of the asset compared to its carrying value.

**Goodwill and Intangible Assets**—Intangible assets include drawings, patents, trademarks, technology, customer relationships and other specifically identifiable assets. Indefinite-lived intangible assets are not being amortized. Assets not subject to amortization are evaluated for impairment annually or more frequently if events or changes occur that suggest impairment in carrying value. Finite-lived intangible assets are amortized to reflect the pattern of economic benefits consumed, which is primarily the straight-line method. Intangible assets that are subject to amortization are evaluated for potential impairment whenever events or circumstances indicate that the carrying amount may not be recoverable.

Goodwill represents the excess of the purchase price over the fair value of identifiable net assets acquired in a business combination. Goodwill is tested for impairment using the two-step approach, in accordance with Accounting Standards Codification ("ASC") No. 350, "Goodwill and Other." Goodwill is assigned to specific reporting units, which we have identified as our operating segments, and tested for impairment at least annually, during the fourth quarter of our fiscal year, or more frequently upon the occurrence of an event or when circumstances indicate that a reporting unit's carrying amount is greater than its fair value. We recognize an impairment charge if the carrying amount of a reporting unit exceeds its fair value and the carrying amount of the reporting unit's goodwill exceeds the implied fair value of that goodwill. The fair value of goodwill is established using the discounted cash flow method and market approach. We performed our goodwill impairment testing in the fourth quarter of fiscal 2010 and no impairment was identified.

**Risks and Uncertainties**—As of October 29, 2010, we employed 11,900 employees worldwide, with 5,600 employed in the United States. Collective bargaining agreements or similar type arrangements cover 37% of our U.S. workforce and 30% of our international employees. In 2011, union agreements are to expire for 3% of our employees with the largest covering the AMICUS union at our facilities in the United Kingdom and the Teamster Union at our facility in Meadowlands, Pennsylvania.

**Foreign Currency Translation**—Exchange gains or losses incurred on transactions conducted by one of our operations in a currency other than the operation's functional currency are normally reflected in cost of sales in our Consolidated Statement of Income. An exception is made where the transaction is a long-term intercompany loan that is not expected to be repaid in the foreseeable future, in which case the transaction gain or loss is included in shareholders' equity as an

element of accumulated other comprehensive income (loss). Assets and liabilities of international operations that have a functional currency that is not the U.S. dollar are translated into U.S. dollars at year-end exchange rates and revenue and expense items are translated using weighted average exchange rates. Any adjustments arising on translations are included in shareholders' equity as an element of accumulated other comprehensive income (loss). Assets and liabilities of operations which have the U.S. dollar as their functional currency (but which maintain their accounting records in local currency) have their values remeasured into U.S. dollars at year-end exchange rates, except for non-monetary items for which historical rates are used. Exchange gains or losses arising on remeasurement of the values into U.S. dollars are recognized in cost of sales. Pre-tax foreign exchange gains included in operating income were \$5.7 million, \$0.4 million, and \$3.3 million in 2010, 2009, and 2008, respectively.

**Foreign Currency Hedging and Derivative Financial Instruments**—We enter into derivative contracts, primarily foreign currency forward contracts, to protect against fluctuations in exchange rates. These contracts are for committed transactions, and receivables and payables denominated in foreign currencies and not for speculative purposes. ASC No. 815, "Derivatives and Hedging," requires companies to record derivatives on the balance sheet as assets or liabilities, measured at fair value, if certain designation and documentation requirements are established at hedge inception. Any changes in fair value of these instruments are recorded in the income statement as cost of sales or in the balance sheet as other comprehensive income (loss).

**Revenue Recognition**—We recognize revenue on aftermarket products and services when the following criteria are satisfied: persuasive evidence of an arrangement exists, product delivery and title transfer has occurred or the services have been rendered, the price is fixed and determinable, and collectability is reasonably assured. We recognize revenue on long-term contracts, such as for the manufacture of mining shovels, drills, draglines, roof support systems and conveyor systems, using the percentage-of-completion method. We generally recognize revenue using the percentage-of-completion method for original equipment. When using the percentage-of-completion method, sales and gross profit are recognized as work is performed based on the relationship between actual costs incurred and total estimated costs at completion. Sales and gross profit are adjusted prospectively for revisions in estimated total contract costs and contract values. Estimated losses are recognized in full when identified.

We have life cycle management contracts with customers to supply parts and service for terms of 1 to 13 years. These contracts are established based on the conditions the equipment will be operating in, the time horizon that the program will cover, and the expected operating cycle that will be required for the equipment. Based on this information, a model is created representing the projected costs and revenues of servicing the respective machines over the specified contract terms. Accounting for these contracts requires us to make various estimates, including estimates of the relevant machine's long-term maintenance requirements. Under these contracts, customers are generally billed monthly based on hours of operation or units of production achieved by the equipment, with the respective deferred revenues recorded when billed. Revenue is recognized in the period in which parts are supplied or services provided. These contracts are

reviewed quarterly by comparison of actual results to original estimates or most recent analysis, with revenue recognition adjusted appropriately for future estimated costs. If a loss is expected at any time, the full amount of the loss is recognized immediately.

We have customer agreements that are multiple element arrangements as defined by ASC No. 605-25 "Multiple-Element Arrangements." The agreements are assessed for multiple elements based on the following criteria: the delivered item has value to the customer on a standalone basis, there is objective and reliable evidence of the fair value of the undelivered item and the arrangement includes a general right of return relative to the delivered item and delivery or performance of the undelivered item is considered probable and substantially in the control of the vendor. Revenue is then allocated to each identified unit of accounting based on our estimate of their relative fair values.

Revenue recognition involves judgments, including assessments of expected returns, the likelihood of nonpayment, and estimates of expected costs and profits on long-term contracts. We analyze various factors, including a review of specific transactions, historical experience, credit-worthiness of customers, and current market and economic conditions, in determining when to recognize revenue. Changes in judgments on these factors could impact the timing and amount of revenue recognized with a resulting impact on the timing and amount of associated income.

**Comprehensive Income (Loss)**—ASC No. 220, "Comprehensive Income," requires the reporting of comprehensive income in addition to net income. Comprehensive income is a more inclusive financial reporting method that includes disclosure of financial information that historically has not been recognized in the calculation of net income. We have chosen to report Comprehensive Income (Loss) and Accumulated Other Comprehensive Income (Loss) which encompasses net income, foreign currency translation, unrecognized pension obligations, and unrealized gain (loss) on derivatives in the Consolidated Statement of Shareholders' Equity. Accumulated other comprehensive loss consists of the following:

| (In millions)                                             | October 29, 2010 | October 30, 2009 | October 31, 2008 |
|-----------------------------------------------------------|------------------|------------------|------------------|
| Unrecognized pension and other postretirement obligations | \$(436.1)        | \$(500.6)        | \$(278.0)        |
| Unrealized gain (loss) on derivatives                     | 2.7              | (0.6)            | (19.9)           |
| Foreign currency translation                              | 53.8             | 29.0             | (48.0)           |
| Accumulated other comprehensive loss                      | \$(379.6)        | \$(472.2)        | \$(345.9)        |

The unrecognized pension and other postretirement obligation is net of a \$103.5 million, \$125.6 and \$47.3 million income tax benefit as of October 29, 2010, October 30, 2009 and October 31, 2008, respectively. Unrealized (loss) gain on derivatives is net of \$1.4 million, \$(0.3) million, and \$(11.9) million of income tax effects at October 29, 2010, October 30, 2009 and October 31, 2008, respectively.

**Sales Incentives**—In accordance with ASC No. 605-50, "Customer Payments and Incentives," we account for cash consideration (such as sales incentives and cash discounts) given to our customers or resellers as a reduction of net sales.

**Allowance for Doubtful Accounts**—We establish an allowance for doubtful accounts on a specific account identification basis through a review of several factors, including the aging status of our customers accounts', financial condition of our customers, and historical collection experience.

**Shipping and Handling Fees and Costs**—We account for shipping and handling fees and costs in accordance with ASC No. 605-45, "Principal Agent Considerations." Under ASC No. 605-45, amounts billed to a customer in a sale transaction related to shipping costs are reported as net sales and the related costs incurred for shipping are reported as cost of sales.

**Income Taxes**—Deferred income taxes are recognized for the tax consequences of temporary differences by applying enacted statutory tax rates applicable to future years to differences between the financial statement carrying amounts and the tax bases of existing assets and liabilities, and for tax loss carryforwards. Valuation allowances are provided for deferred tax assets where it is considered more likely than not that we will not realize the benefit of such assets. Certain tax benefits existed as of our emergence from protection under Chapter 11 of the U.S. Bankruptcy Code in 2001 but were

offset by valuation allowances. Realization of net operating loss, tax credits, and other deferred tax benefits from pre-emergence attributes will be credited to additional paid in capital.

**Research and Development Expenses**—Research and development costs are expensed as incurred. Such costs incurred in the development of new products or significant improvements to existing products amounted to \$29.8 million, \$22.3 million and \$16.4 million for fiscal 2010, 2009, and 2008, respectively.

**Earnings Per Share**—Basic earnings per share is computed by dividing net earnings by the weighted average number of common shares outstanding during the reporting period. Diluted earnings per share is computed similar to basic earnings per share except that the weighted average number of shares outstanding is increased to include additional shares from the assumed exercise of stock options, performance shares, and restricted stock units if dilutive. See Note 9—Earnings Per Share for further information.

**Accounting For Share-Based Compensation**—We account for awards of stock in accordance with ASC No. 718, "Compensation—Stock Compensation." ASC No. 718 requires measurement of the cost of employee services received in exchange for an award of equity instruments based on the grant date fair value of the award. Compensation expense is recognized using the straight-line method over the vesting period of the award.

**Reclassifications**—Certain prior year amounts have been reclassified to conform to the current year presentation. The reclassifications did not impact net income or earnings per share.

**New Accounting Pronouncements**—In December 2009, the Financial Accounting Standards Board ("FASB") issued

Accounting Standards Update (“ASU”) No. 2009-17, “Consolidations (Topic 810): Improvements to Financial Reporting by Enterprises Involved with Variable Interest Entities.” ASU No. 2009-17 clarifies how a company determines when an entity that is insufficiently capitalized or is not controlled through voting should be consolidated. This statement is effective for us beginning in the first quarter of fiscal 2011 (which commenced on October 30, 2010). We do not expect a material impact from the adoption of ASU No. 2009-17 on our consolidated financial statements.

In October 2009, FASB issued ASU No. 2009-13, “Revenue Recognition (Topic 605): Multiple-Deliverable Revenue Arrangements—a consensus of the FASB Emerging Issues Task Force.” ASU No. 2009-13 establishes the accounting and reporting guidance for arrangements under which a vendor will perform multiple revenue-generating activities. Specifically, this ASU addresses how to separate deliverables and how to measure and allocate arrangement consideration to one or more units of accounting. This statement is effective for us beginning in the first quarter of fiscal 2011 (which commenced on October 30, 2010) and, when adopted, will change our accounting treatment for multiple-element revenue arrangements on a prospective basis. We do not expect a material impact from the adoption of ASU No. 2009-13 on our consolidated financial statements.

In June 2009, FASB issued SFAS No. 167, “Amendments to FASB Interpretation No. 46(R).” SFAS No. 167 changes how a company determines when an entity that is insufficiently capitalized or is not controlled through voting should be consolidated. The determination of whether a company is required to consolidate an entity is based on, among other things, an entity’s purpose and design and a company’s ability to direct the activities of the entity that most significantly impact the entity’s economic performance. This statement is effective for us in fiscal 2011. We do not expect a material impact from the adoption of SFAS No. 167 on our consolidated financial statements.

In December 2007, FASB issued ASC No. 805, “Business Combinations.” ASC No. 805 requires the measurement at fair value of assets acquired, the liabilities assumed, and any non-controlling interest in the acquiree as of the acquisition date. ASC No. 805 also requires that acquisition related costs and costs to restructure the acquiree be expensed as incurred. ASC No. 805 became effective for us beginning in fiscal 2010. The adoption of ASC No. 805 did not have a significant effect on our consolidated financial statements and related disclosures.

In December 2007, FASB issued ASC No. 810, “Consolidation.” The objective of ASC No. 810 is to improve the transparency and comparability of financial information that is provided as it relates to a parent and non-controlling interests. ASC No. 810 requires clear identification of ownership interests in subsidiaries held by other parties and the amount of consolidated net income attributable to the parent and other parties. The codification also requires changes in parent ownership interests to be accounted for consistently, while the parent retains its controlling interest in the subsidiary. ASC No. 810 became effective for us beginning in fiscal 2010. The adoption of ASC No. 810 did not have a significant effect on our consolidated financial statements and related disclosures.

## Nature of Operations

### 1.37

#### COLGATE-PALMOLIVE COMPANY (DEC)

##### NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

###### 1. Nature of Operations

The Company manufactures and markets a wide variety of products in the U.S. and around the world in two distinct business segments: Oral, Personal and Home Care; and Pet Nutrition. Oral, Personal and Home Care products include toothpaste, toothbrushes and mouth rinses, bar and liquid hand soaps, shower gels, shampoos, conditioners, deodorants and antiperspirants, laundry and dishwashing detergents, fabric conditioners, household cleaners, bleaches and other similar items. These products are sold primarily to wholesale and retail distributors worldwide. Pet Nutrition products include specialty pet nutrition products manufactured and marketed by Hill’s Pet Nutrition. The principal customers for Pet Nutrition products are veterinarians and specialty pet retailers. Principal global and regional trademarks include Colgate, Palmolive, Mennen, Speed Stick, Lady Speed Stick, Softsoap, Irish Spring, Protex, Sorriso, Kolynos, Elmex, Tom’s of Maine, Ajax, Axion, Fabuloso, Soupline, Suavitel, Hill’s Science Diet and Hill’s Prescription Diet.

The Company’s principal classes of products accounted for the following percentages of worldwide sales for the past three years:

|               | 2010 | 2009 | 2008 |
|---------------|------|------|------|
| Oral Care     | 43%  | 41%  | 41%  |
| Home Care     | 22%  | 23%  | 23%  |
| Personal Care | 22%  | 22%  | 22%  |
| Pet Nutrition | 13%  | 14%  | 14%  |
| Total         | 100% | 100% | 100% |

### 1.38

#### MERCK & CO., INC. (DEC)

##### NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

###### 1. Nature of Operations

The Company is a global health care company that delivers innovative health solutions through its prescription medicines, vaccines, biologic therapies, animal health, and consumer care products, which it markets directly and through its joint ventures. The Company’s operations are principally managed on a products basis and are comprised of four operating segments, which are the Pharmaceutical, Animal Health, Consumer Care and Alliances segments, and one reportable segment, which is the Pharmaceutical segment. The Pharmaceutical segment includes human health pharmaceutical and vaccine products marketed either directly by the Company or through joint ventures. Human health pharmaceutical products consist of therapeutic

and preventive agents, sold by prescription, for the treatment of human disorders. The Company sells these human health pharmaceutical products primarily to drug wholesalers and retailers, hospitals, government agencies and managed health care providers such as health maintenance organizations, pharmacy benefit managers and other institutions. Vaccine products consist of preventive pediatric, adolescent and adult vaccines, primarily administered at physician offices. The Company sells these human health vaccines primarily to physicians, wholesalers, physician distributors and government entities. The Company also has animal health operations that discover, develop, manufacture and market animal health products, including vaccines, which the Company sells to veterinarians, distributors and animal producers. Additionally, the Company has consumer care operations that develop, manufacture and market over-the-counter, foot care and sun care products, which are sold through wholesale and retail drug, food chain and mass merchandiser outlets in the United States and Canada.

On November 3, 2009, Merck & Co., Inc. ("Old Merck") and Schering-Plough Corporation ("Schering-Plough") merged (the "Merger"). In the Merger, Schering-Plough acquired all of the shares of Old Merck, which became a wholly-owned subsidiary of Schering-Plough and was renamed Merck Sharp & Dohme Corp. Schering-Plough continued as the surviving public company and was renamed Merck & Co., Inc. ("New Merck" or the "Company"). However, for accounting purposes only, the Merger was treated as an acquisition with Old Merck considered the accounting acquirer. Accordingly, the accompanying financial statements reflect Old Merck's stand-alone operations as they existed prior to the completion of the Merger. The results of Schering-Plough's business have been included in New Merck's financial statements only for periods subsequent to the completion of the Merger. Therefore, New Merck's financial results for 2009 do not reflect a full year of legacy Schering-Plough operations. References in these financial statements to "Merck" for periods prior to the Merger refer to Old Merck and for periods after the completion of the Merger to New Merck.

## Description of Business

### 1.39

YUM! BRANDS, INC. (DEC)

#### NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

##### Note 1—Description of Business

YUM! Brands, Inc. and Subsidiaries (collectively referred to as "YUM" or the "Company") comprises the worldwide operations of KFC, Pizza Hut, Taco Bell, Long John Silver's ("LJS") and A&W All-American Food Restaurants ("A&W") (collectively the "Concepts"). YUM is the world's largest quick service restaurant company based on the number of system units, with more than 37,000 units of which approximately 48% are located outside the U.S. in more than 110 countries and territories. YUM was created as an independent, publicly-owned company on October 6, 1997 (the "Spin-off Date") via a tax-free distribution by our former parent, PepsiCo, Inc., of our Common Stock to its shareholders.

References to YUM throughout these Consolidated Financial Statements are made using the first person notations of "we," "us" or "our."

Through our widely-recognized Concepts, we develop, operate, franchise and license a system of both traditional and non-traditional quick service restaurants. Each Concept has proprietary menu items and emphasizes the preparation of food with high quality ingredients as well as unique recipes and special seasonings to provide appealing, tasty and attractive food at competitive prices. Our traditional restaurants feature dine-in, carryout and, in some instances, drive-thru or delivery service. Non-traditional units, which are principally licensed outlets, include express units and kiosks which have a more limited menu and operate in non-traditional locations like malls, airports, gasoline service stations, convenience stores, stadiums, amusement parks and colleges, where a full-scale traditional outlet would not be practical or efficient. We also operate multibrand units, where two or more of our Concepts are operated in a single unit. In addition, we continue to pursue the combination of Pizza Hut and WingStreet, a flavored chicken wings concept we have developed.

YUM consists of six operating segments: KFC-U.S., Pizza Hut-U.S., Taco Bell-U.S., LJS/A&W-U.S., YUM Restaurants International ("YRI" or "International Division") and YUM Restaurants China ("China Division"). For financial reporting purposes, management considers the four U.S. operating segments to be similar and, therefore, has aggregated them into a single reportable operating segment ("U.S."). The China Division includes mainland China ("China"), and the International Division includes the remainder of our international operations.

At the beginning of 2010 we began reporting information for our Thailand and KFC Taiwan businesses within our International Division as a result of changes to our management reporting structure. These businesses now report to the President of YRI, whereas previously they reported to the President of the China Division. While this reporting change did not impact our consolidated results, segment information for previous periods has been restated to be consistent with the current period presentation throughout the Financial Statements and Notes thereto. For the years ended December 26, 2009 and December 27, 2008 this restatement resulted in decreases in Company sales of \$270 million and \$282 million, respectively, and decreases in Operating profit of \$6 million and \$9 million, respectively, for the China Division. Any impact of the restatement on the China Division reported figures was offset by the impact to the International Division reported figures.

## Use of Estimates

### 1.40

VIAD CORP (DEC)

#### NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

##### Note 1. Summary of Significant Accounting Policies (in part)

##### Significant Accounting Policies

*Use of Estimates.* The preparation of financial statements in conformity with GAAP requires management to make

estimates and assumptions that affect the amounts reported in the consolidated financial statements and accompanying notes. These estimates and assumptions include, but are not limited to:

- Estimated fair value of Viad's reporting units used to perform annual impairment testing of recorded goodwill;
- Estimated fair value of intangible assets with indefinite lives, for purposes of impairment testing;
- Estimated allowances for uncollectible accounts receivable;
- Estimated provisions for income taxes, including uncertain tax positions;
- Estimated valuation allowances related to deferred tax assets;
- Estimated liabilities for losses related to self-insured liability claims;
- Estimated liabilities for losses related to environmental remediation obligations;
- Estimated sublease income associated with restructuring liabilities;
- Assumptions used to measure pension and postretirement benefit costs and obligations;
- Assumptions used to determine share-based compensation costs under the fair value method; and
- Allocation of purchase price of acquired businesses.

Actual results could differ from these and other estimates.

## 1.41

### XEROX CORPORATION (DEC)

#### NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

##### Note 1—Summary of Significant Accounting Policies (in part)

##### Use of Estimates

The preparation of our Consolidated Financial Statements, in accordance with accounting principles generally accepted in the United States of America, requires that we make estimates and assumptions that affect the reported amounts of assets and liabilities, as well as the disclosure of contingent assets and liabilities at the date of the financial statements, and the reported amounts of revenues and expenses during the reporting period. Significant estimates and assumptions are used for, but not limited to: (i) allocation of revenues and fair values in leases and other multiple element arrangements; (ii) accounting for residual values; (iii) economic lives of leased assets; (iv) revenue recognition for services under the percentage-of-completion method; (v) allowance for doubtful accounts; (vi) inventory valuation; (vii) restructuring and related charges; (viii) asset impairments; (ix) depreciable lives of assets; (x) useful lives of intangible assets; (xi) amortization period for customer contract costs (xii) pension and post-retirement benefit plans; (xiii) income tax reserves and valuation allowances; and (xiv) contingency and litigation reserves. Future events and their effects cannot be predicted with certainty; accordingly, our accounting estimates require the exercise of judgment. The accounting estimates used in the preparation of our Consolidated Financial Statements will change as new events occur, as more experience is acquired, as additional information is obtained and as our operating environment changes. Actual results could differ from those estimates.

The following table summarizes certain significant charges that require management estimates for the three years ended December 31, 2010:

| (In millions)                                                  | Years Ended December 31 |        |       |
|----------------------------------------------------------------|-------------------------|--------|-------|
|                                                                | 2010                    | 2009   | 2008  |
| <b>Expense/(Income)</b>                                        |                         |        |       |
| Restructuring provisions and asset impairments                 | \$483                   | \$ (8) | \$429 |
| Provisions for receivables <sup>(1)</sup>                      | 180                     | 289    | 199   |
| Provisions for litigation and regulatory matters               | (4)                     | 9      | 781   |
| Provisions for obsolete and excess inventory                   | 31                      | 52     | 115   |
| Depreciation and obsolescence of equipment on operating leases | 313                     | 329    | 298   |
| Depreciation of buildings and equipment                        | 379                     | 247    | 257   |
| Amortization of internal use software                          | 70                      | 53     | 56    |
| Amortization of product software                               | 7                       | 5      | —     |
| Amortization of acquired intangible assets <sup>(2)</sup>      | 316                     | 64     | 58    |
| Amortization of customer contract costs                        | 12                      | —      | —     |
| Defined pension benefits—net periodic benefit cost             | 304                     | 232    | 174   |
| Other post-retirement benefits—net periodic benefit cost       | 32                      | 26     | 77    |
| Deferred tax asset valuation allowance provisions              | 22                      | (11)   | 17    |

<sup>(1)</sup> Includes net receivable adjustments of \$(8), \$(2) and \$11 for 2010, 2009 and 2008, respectively.

<sup>(2)</sup> Includes amortization of \$4 for patents, which is included in cost of sales for each period presented.

**1.42**

W. R. GRACE &amp; CO. (DEC)

**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS****1. Basis of Presentation and Summary of Significant Accounting and Financial Reporting Policies (in part)**

*Use of Estimates*—The preparation of financial statements in conformity with U.S. generally accepted accounting principles (U.S. GAAP) requires management to make estimates and assumptions that affect the reported amount of assets and liabilities and disclosure of contingent assets and liabilities at the date of the Consolidated Financial Statements, and the reported amounts of revenues and expenses for the periods presented. Actual amounts could differ from those estimates, and the differences could be material. Changes in estimates are recorded in the period identified. Grace's accounting measurements that are most affected by management's estimates of future events are:

- Contingent liabilities, which depend on an assessment of the probability of loss and an estimate of ultimate resolution cost, such as asbestos-related matters (see Notes 2 and 3), income taxes (see Note 10), environmental remediation (see Note 13), and litigation (see Note 13);
- Pension and postretirement liabilities that depend on assumptions regarding participant life spans, future inflation, discount rates and total returns on invested funds (see Note 11);
- Realization values of net deferred tax assets and insurance receivables, which depend on projections of future income and cash flows and assessments of insurance coverage and insurer solvency; and
- Recoverability of goodwill, which depends on assumptions used to value reporting units, such as observable market inputs, projections of future cash flows and weighted average cost of capital.

The accuracy of management's estimates may be materially affected by the uncertainties arising under Grace's Chapter 11 proceeding.

**Significant Accounting Policies and Estimates****1.43**

THE PROCTER &amp; GAMBLE COMPANY (JUN)

**SIGNIFICANT ACCOUNTING POLICIES AND ESTIMATES (in part)**

In preparing our financial statements in accordance with U.S. GAAP, there are certain accounting policies that may require a choice between acceptable accounting methods or may require substantial judgment or estimation in their application. These include income taxes, certain employee benefits and acquisitions, goodwill and intangible assets. We believe these accounting policies, and others set forth in Note 1 to the Consolidated Financial Statements, should be reviewed

as they are integral to understanding the results of operations and financial condition of the Company.

The Company has discussed the selection of significant accounting policies and the effect of estimates with the Audit Committee of the Company's Board of Directors.

**Income Taxes**

Our annual tax rate is determined based on our income, statutory tax rates and the tax impacts of items treated differently for tax purposes than for financial reporting purposes. Tax law requires certain items to be included in the tax return at different times than the items are reflected in the financial statements. Some of these differences are permanent, such as expenses that are not deductible in our tax return, and some differences are temporary, reversing over time, such as depreciation expense. These temporary differences create deferred tax assets and liabilities.

Deferred tax assets generally represent the tax effect of items that can be used as a tax deduction or credit in future years for which we have already recorded the tax benefit in our income statement. Deferred tax liabilities generally represent tax expense recognized in our financial statements for which payment has been deferred, the tax effect of expenditures for which a deduction has already been taken in our tax return but has not yet been recognized in our financial statements or assets recorded at fair value in business combinations for which there was no corresponding tax basis adjustment.

Inherent in determining our annual tax rate are judgments regarding business plans, planning opportunities and expectations about future outcomes. Realization of certain deferred tax assets is dependent upon generating sufficient taxable income in the appropriate jurisdiction prior to the expiration of the carry-forward periods. Although realization is not assured, management believes it is more likely than not that our deferred tax assets, net of valuation allowances, will be realized.

We operate in multiple jurisdictions with complex tax policy and regulatory environments. In certain of these jurisdictions, we may take tax positions that management believes are supportable, but are potentially subject to successful challenge by the applicable taxing authority. These interpretational differences with the respective governmental taxing authorities can be impacted by the local economic and fiscal environment. We evaluate our tax positions and establish liabilities in accordance with the applicable accounting guidance on uncertainty in income taxes. We review these tax uncertainties in light of changing facts and circumstances, such as the progress of tax audits, and adjust them accordingly. We have a number of audits in process in various jurisdictions. Although the resolution of these tax positions is uncertain, based on currently available information, we believe that the ultimate outcomes will not have a material adverse effect on our financial position, results of operations or cash flows.

Because there are a number of estimates and assumptions inherent in calculating the various components of our tax provision, certain changes or future events such as changes in tax legislation, geographic mix of earnings, completion of tax audits or earnings repatriation plans could have an impact on those estimates and our effective tax rate.

### *Employee Benefits*

We sponsor various post-employment benefits throughout the world. These include pension plans, both defined contribution plans and defined benefit plans, and other post-employment benefit (OPEB) plans, consisting primarily of health care and life insurance for retirees. For accounting purposes, the defined benefit pension and OPEB plans require assumptions to estimate the projected and accumulated benefit obligations, including the following variables: discount rate; expected salary increases; certain employee-related factors, such as turnover, retirement age and mortality; expected return on assets and health care cost trend rates. These and other assumptions affect the annual expense and obligations recognized for the underlying plans. Our assumptions reflect our historical experiences and management's best judgment regarding future expectations. In accordance with U.S. GAAP, the net amount by which actual results differ from our assumptions is deferred. If this net deferred amount exceeds 10% of the greater of plan assets or liabilities, a portion of the deferred amount is included in expense for the following year. The cost or benefit of plan changes, such as increasing or decreasing benefits for prior employee service (prior service cost), is deferred and included in expense on a straight-line basis over the average remaining service period of the employees expected to receive benefits.

The expected return on plan assets assumption is important, since many of our defined benefit pension plans and our primary OPEB plan are funded. The process for setting the expected rates of return is described in Note 8 to the Consolidated Financial Statements. For 2010, the average return on assets assumptions for pension plan assets and OPEB assets were 7.1% and 9.1%, respectively. A change in the rate of return of 0.5% for both pension and OPEB assets would impact annual after-tax benefit expense by less than \$45 million.

Since pension and OPEB liabilities are measured on a discounted basis, the discount rate is a significant assumption. Discount rates used for our U.S. defined benefit pension and OPEB plans are based on a yield curve constructed from a portfolio of high quality bonds for which the timing and amount of cash outflows approximate the estimated payouts of the plan. For our international plans, the discount rates are set by benchmarking against investment grade corporate bonds rated AA or better. The average discount rate on the defined benefit pension plans of 5.0% represents a weighted average of local rates in countries where such plans exist. A 0.5% change in the discount rate would impact annual after-tax defined benefit pension expense by less than \$65 million. The average discount rate on the OPEB plan of 5.4% reflects the higher interest rates generally applicable in the U.S., which is where a majority of the plan participants receive benefits. A 0.5% change in the discount rate would impact annual after-tax OPEB expense by less than \$30 million.

Certain defined contribution pension and OPEB benefits in the U.S. are funded by the Employee Stock Ownership Plan (ESOP), as discussed in Note 8 to the Consolidated Financial Statements.

### *Acquisitions, Goodwill and Intangible Assets*

We account for acquired businesses using the purchase method of accounting. Under the purchase method, our Con-

solidated Financial Statements reflect the operations of an acquired business starting from the completion of the acquisition. In addition, the assets acquired and liabilities assumed must be recorded at the date of acquisition at their respective estimated fair values, with any excess of the purchase price over the estimated fair values of the net assets acquired recorded as goodwill.

Significant judgment is required in estimating the fair value of intangible assets and in assigning their respective useful lives. Accordingly, we typically obtain the assistance of third-party valuation specialists for significant items. The fair value estimates are based on available historical information and on future expectations and assumptions deemed reasonable by management, but are inherently uncertain.

We typically use an income method to estimate the fair value of intangible assets, which is based on forecasts of the expected future cash flows attributable to the respective assets. Significant estimates and assumptions inherent in the valuations reflect a consideration of other marketplace participants, and include the amount and timing of future cash flows (including expected growth rates and profitability), the underlying product or technology life cycles, economic barriers to entry, a brand's relative market position and the discount rate applied to the cash flows. Unanticipated market or macroeconomic events and circumstances may occur, which could affect the accuracy or validity of the estimates and assumptions.

Determining the useful life of an intangible asset also requires judgment. Certain brand intangibles are expected to have indefinite lives based on their history and our plans to continue to support and build the acquired brands. Other acquired intangible assets (e.g., certain trademarks or brands, customer relationships, patents and technologies) are expected to have determinable useful lives. Our assessment as to brands that have an indefinite life and those that have a determinable life is based on a number of factors including competitive environment, market share, brand history, underlying product life cycles, operating plans and the macroeconomic environment of the countries in which the brands are sold. Our estimates of the useful lives of determinable-lived intangibles are primarily based on these same factors. All of our acquired technology and customer-related intangibles are expected to have determinable useful lives.

The costs of determinable-lived intangibles are amortized to expense over their estimated life. The value of indefinite-lived intangible assets and residual goodwill is not amortized, but is tested at least annually for impairment. Our impairment testing for goodwill is performed separately from our impairment testing of indefinite-lived intangibles. We test goodwill for impairment by reviewing the book value compared to the fair value at the reportable unit level. We test individual indefinite-lived intangibles by reviewing the individual book values compared to the fair value. We determine the fair value of our reporting units and indefinite-lived intangible assets based on the income approach. Under the income approach, we calculate the fair value of our reporting units based on the present value of estimated future cash flows. Considerable management judgment is necessary to evaluate the impact of operating and macroeconomic changes and to estimate future cash flows to measure fair value. Assumptions used in our impairment evaluations, such as forecasted growth rates and cost of capital, are consistent with internal projections and operating plans. We believe such assumptions and estimates are also comparable to those that would be used by other marketplace participants. When certain events or

changes in operating conditions occur, indefinite-lived intangible assets may be reclassified to a determinable life asset and an additional impairment assessment may be performed. We did not recognize any material impairment charges for goodwill or intangible assets during the years presented.

Our annual impairment testing for both goodwill and indefinite-lived intangible assets indicated that all reporting unit and intangible asset fair values exceeded their respective recorded values. However, future changes in the judgments, assumptions and estimates that are used in our impairment testing for goodwill and indefinite-lived intangible assets, including discount and tax rates or future cash flow projections, could result in significantly different estimates of the fair values. A significant reduction in the estimated fair values could result in impairment charges that could materially affect the financial statements in any given year. The recorded value of goodwill and intangible assets from recently acquired businesses are derived from more recent business operating plans and macroeconomic environmental conditions and therefore are more susceptible to an adverse change that could require an impairment charge.

For example, because the Gillette intangible and goodwill amounts represent values as of a relatively more recent acquisition date, such amounts are more susceptible to an impairment risk if business operating results or macroeconomic conditions deteriorate. Gillette indefinite-lived intangible assets represent approximately 89% of the \$26.5 billion of indefinite-lived intangible assets at June 30, 2010. Goodwill allocated to stand-alone reporting units consisting primarily of businesses purchased as part of the Gillette acquisition represents 42% of the \$54.0 billion of goodwill at June 30, 2010. This includes the Male Grooming and Appliance businesses, which are components of the Grooming segment, and the Batteries business, which is part of the Fabric Care and Home Care segment.

With the exception of our Appliances and Salon Professional businesses, all of our other reporting units have fair values that significantly exceed recorded values. As noted above, the Appliances business was acquired as part of the Gillette acquisition and is a stand-alone goodwill reporting unit. The Salon Professional business consists primarily of operations acquired in the Wella acquisition and is part of the Beauty segment. As a result of the organization changes to the structure of the Beauty GBU effected on July 1, 2009 (see the Recent Business Developments section and Note 11 to our Consolidated Financial Statements), the Salon Professional business recently became a new stand-alone goodwill reporting unit. These businesses represent some of our more discretionary consumer spending categories. The Appliances business has goodwill of \$1.5 billion, while the Salon Professional business has a goodwill balance of \$809 million. The estimated fair values of our Appliances and Salon Professional businesses exceed their carrying values by 18% and 20%, respectively. Because these businesses are more discretionary in nature, their operations and underlying fair values were disproportionately impacted by the economic downturn that began in fiscal 2009, which led to a reduction in home and personal grooming appliance purchases and in visits to hair salons. Our valuation of the Appliances and Salon Professional businesses has them returning to sales and earnings growth rates consistent with our long-term business plans. Failure to achieve these business plans or a further deterioration of the macroeconomic conditions could result in a valuation that would trigger an impairment of the goodwill and intangible assets of these businesses.

## Vulnerability Due to Certain Concentrations

### 1.44

VISHAY INTERTECHNOLOGY, INC. (DEC)

#### NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

##### Note 14—Current Vulnerability Due to Certain Concentrations

###### Market Concentrations

While no single customer comprises greater than 10% of net revenues, a material portion of the Company's revenues are derived from the worldwide communications and computer markets. These markets have historically experienced wide variations in demand for end products. If demand for these end products should decrease, the producers thereof could reduce their purchases of the Company's products, which could have a material adverse effect on the Company's results of operations and financial position.

###### Credit Risk Concentrations

Financial instruments with potential credit risk consist principally of cash and cash equivalents, accounts receivable, and notes receivable. The Company maintains cash and cash equivalents with various major financial institutions. Concentrations of credit risk with respect to receivables are generally limited due to the Company's large number of customers and their dispersion across many countries and industries. At December 31, 2010 and 2009, the Company had no significant concentrations of credit risk.

###### Sources of Supplies

Many of the Company's products require the use of raw materials that are produced in only a limited number of regions around the world or are available from only a limited number of suppliers. The Company's consolidated results of operations may be materially and adversely affected if the Company has difficulty obtaining these raw materials, the quality of available raw materials deteriorates, or there are significant price increases for these raw materials. For periods in which the prices of these raw materials are rising, the Company may be unable to pass on the increased cost to the Company's customers, which would result in decreased margins for the products in which they are used. For periods in which the prices are declining, the Company may be required to write down its inventory carrying cost of these raw materials which, depending on the extent of the difference between market price and its carrying cost, could have a material adverse effect on the Company's net earnings.

From time to time, there have been short-term market shortages of raw materials utilized by the Company. While these shortages have not historically adversely affected the Company's ability to increase production of products containing these raw materials, they have historically resulted in higher raw material costs for the Company. The Company cannot assure that any of these market shortages in the future would not adversely affect the Company's ability to increase production, particularly during periods of growing demand for the Company's products.

### Tantalum

Vishay is a major consumer of the world's annual production of tantalum. Tantalum, a metal purchased in powder or wire form, is the principal material used in the manufacture of tantalum capacitors. There are few suppliers that process tantalum ore into capacitor grade tantalum powder.

The Company was obligated under two contracts entered into in 2000 with Cabot Corporation to make purchases of tantalum through 2006. The Company's purchase commitments were entered into at a time when market demand for tantalum capacitors was high and tantalum powder was in short supply. Since that time, the price of tantalum has decreased significantly, and accordingly, the Company wrote down the carrying value of its tantalum inventory on-hand and recognized losses on purchase commitments. As of December 31, 2006, the Company has fulfilled all obligations under the Cabot contracts and is no longer required to purchase tantalum from Cabot at prices fixed by the contracts.

Our minimum tantalum purchase commitments under the contracts with Cabot exceeded our production requirements for tantalum capacitors over the term of the contract. Tantalum powder and wire have an indefinite shelf life; therefore, we believe that we will eventually use all of the material in our inventory. At December 31, 2010 and 2009, the Company had tantalum with a book value of \$0 and \$13,032,000, respectively, classified as other assets, representing the value of quantities which were not expected to be used within one year.

### Geographic Concentration

We have operations outside the United States, and, excluding VPG, approximately 77% of our revenues during 2010 were derived from sales to customers outside the United States. Some of our products are produced in countries which are subject to risks of political, economic, and military instability. This instability could result in wars, riots, nationalization of industry, currency fluctuations, and labor unrest. These conditions could have an adverse impact on our ability to operate in these regions and, depending on the extent and severity of these conditions, could materially and adversely affect our overall financial condition and operating results.

Our business has been in operation in Israel for 40 years. We have never experienced any material interruption in our operations attributable to these factors, in spite of several Middle East crises, including wars. However, we might be adversely affected if events were to occur in the Middle East that interfered with our operations in Israel.

## 1.45

### AK STEEL HOLDING CORPORATION (DEC)

#### NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

#### Note 1—Summary of Significant Accounting Policies (in part)

**Concentrations of Credit Risk:** The Company operates in a single business segment and is primarily a producer of carbon, stainless and electrical steels and steel products, which are sold to a number of markets, including automotive, in-

dustrial machinery and equipment, construction, power distribution and appliances. The following presents net sales by product line:

| (In millions)                        | 2010      | 2009      | 2008      |
|--------------------------------------|-----------|-----------|-----------|
| Stainless and electrical             | \$2,136.9 | \$1,736.2 | \$3,234.5 |
| Carbon                               | 3,620.1   | 2,207.6   | 4,188.4   |
| Tubular                              | 210.7     | 131.7     | 221.4     |
| Other, primarily conversion services | 0.6       | 1.3       | —         |
| Total                                | \$5,968.3 | \$4,076.8 | \$7,644.3 |

The following sets forth the percentage of the Company's net sales attributable to various markets:

|                                  | Year Ended December 31 |      |      |
|----------------------------------|------------------------|------|------|
|                                  | 2010                   | 2009 | 2008 |
| Automotive                       | 36%                    | 36%  | 32%  |
| Infrastructure and Manufacturing | 25%                    | 31%  | 29%  |
| Distributors and Converters      | 39%                    | 33%  | 39%  |

No customer accounted for more than 10% of net sales of the Company during 2010, 2009 or 2008. The Company sells domestically to customers primarily in the Midwestern and Eastern United States and to foreign customers, primarily in Canada, Mexico and Western Europe. Net sales to customers located outside the United States totaled \$823.3 million, \$767.0 million and \$1,267.9 million for 2010, 2009 and 2008, respectively. Approximately 28% and 29% of trade receivables outstanding at December 31, 2010 and 2009, respectively, are due from businesses associated with the U.S. automotive industry. Except in a few situations where the risk warrants it, collateral is not required on trade receivables. While the Company believes its recorded trade receivables will be collected, in the event of default the Company would follow normal collection procedures.

## 1.46

### ARDEN GROUP, INC. (DEC)

#### NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

#### 5. Significant Supplier

During 2010, the Company procured approximately 15% of its product through Unified Grocers, Inc. (Unified), a grocery wholesale cooperative. As a member-patron, the Company is required to provide Unified with certain minimum deposits in order to purchase product from the cooperative. As of January 1, 2011, the Company had approximately \$1,628,000 on deposit with Unified in addition to approximately \$694,000 related to ownership of equity shares in Unified. There is no established public trading market for Unified's shares. The deposit and equity ownership are recorded under other assets on the Consolidated Balance Sheets.

Unified pays dividends annually in December of each year. Dividends are paid in arrears and are based on a percentage of the Company's qualifying purchases from Unified, which percentage is typically established by Unified at or after the

end of each year. The Company accrues patronage dividend income as a reduction of cost of sales ratably throughout the year based on a review of prior dividend history, projected purchase volume and an estimate of Unified's current year patronage earnings. The accrual is adjusted each year, as needed, based on the actual amount received from Unified in December.

## 1.47

### THE BOEING COMPANY (DEC)

#### NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

##### Note 18—Significant Group Concentrations of Risk

###### *Credit Risk (in millions)*

Financial instruments involving potential credit risk are predominantly with commercial aircraft customers and the U.S. government. Of the \$10,496 in gross accounts receivable and gross customer financing included in the Consolidated Statements of Financial Position as of December 31, 2010, \$4,996 related to commercial aircraft customers (\$570 of accounts receivable and \$4,426 of customer financing) and \$2,969 related to the U.S. government. Of the \$5,033 in gross customer financing, \$4,310 related to customers we believe have less than investment-grade credit. AirTran Airways, American Airlines, Continental Airlines and Hawaiian Airlines were associated with 27%, 16%, 9% and 8%, respectively, of our financing portfolio. Financing for aircraft is collateralized by security in the related asset. As of December 31, 2010, there was \$9,865 of financing commitments related to aircraft on order including options and proposed as part of sales campaigns described in Note 11, of which \$8,490 related to customers we believe have less than investment-grade credit.

###### *BDS Fixed-Price Development Contracts*

Fixed-price development work is inherently uncertain and subject to significant variability in estimates of the cost and time required to complete the work. Significant BDS fixed-price development contracts include AEW&C, P-8I, KC-767 International Tanker and commercial and military satellites. The operational and technical complexities of these contracts create financial risk, which could trigger termination provisions, order cancellations or other financially significant exposure. Changes to cost and revenue estimates could also result in lower margins or a material charge for reach-forward losses in 2011.

###### *Commercial Airplane Development Programs*

Significant risks are inherent throughout the development of new commercial airplanes and new commercial airplane derivatives. Currently both the 787-8 and 747-8 freighter are in the demanding flight test and certification stages of program development. The 787-9 and 747-8 Intercontinental airplanes are also in development. These programs require substantial investments and research and development as well as investments in working capital and infrastructure. They also entail significant commitments to customers and suppliers

and require substantial internal resources. Performance issues on these programs could have a material adverse impact on our consolidated results and financial position in 2011.

###### *Other Risk*

As of December 31, 2010, approximately 36% of our total workforce was represented by collective bargaining agreements and approximately 1% of our total workforce was represented by agreements expiring during 2011.

## SEGMENT REPORTING

### PRESENTATION

**1.48** FASB ASC 280, *Segment Reporting*, requires that a public business enterprise report a measure of segment profit or loss, certain specific revenue and expense items, and segment assets. FASB ASC 280-10-05-1 requires that all public business enterprises report information about the revenues derived from the enterprise's products or services or groups of similar products and services; about the countries in which the enterprise earns revenues and holds assets; and about major customers, regardless of whether that information is used in making operating decisions. Even if a public company has only one operating segment, FASB ASC 280 requires that it report information about geographic areas and major customers. However, FASB ASC does not require an enterprise to report information that is impracticable to present because the necessary information is not available, and the cost to develop it would be excessive.

**1.49** According to FASB ASC 280-10-50-1, an operating segment of a public entity has all of the following characteristics:

- It engages in business activities from which it may earn revenues and incur expenses, including revenues and expenses relating to transactions with other components of the same public entity.
- Its operating results are regularly reviewed by the public entity's chief operating decision maker to make decisions about resources to be allocated to the segment and assess its performance.
- Its discrete financial information is available.

**1.50** FASB ASC 280-10-50-30 requires reconciliations of total segment revenues, total segment profit or loss, total segment assets, and other amounts disclosed for segments to corresponding amounts in the enterprise's general-purpose financial statements. FASB ASC 350-20-50-1 states that entities that report segment information should provide information about the changes in the carrying amount of goodwill during the period for each reportable segment.

## 1.52

PALL CORPORATION (JUL)

*NOTES TO CONSOLIDATED FINANCIAL STATEMENTS*

*NOTE 18—Segment Information and Geographies  
(in thousands)*

The Company serves customers through two global vertically integrated businesses: Life Sciences and Industrial.

Refer to Note 1, Accounting Policies and Related Matters, regarding the Company reorganization of its operating segments during the fourth quarter of fiscal year 2010. Based on this reorganization, segment information for prior periods has been restated to reflect these changes. All discussions and amounts reported in this report are based on the reorganized segment structure.

The Life Sciences business group is focused on developing, manufacturing and selling products to customers in the Medical, BioPharmaceuticals and Food & Beverage markets. The Industrial business group is focused on developing, manufacturing and selling products to customers in the Aeropower, Microelectronics and Energy & Water markets. The chief executive officer manages the Company and makes key decisions about the allocation of Company resources based on the two businesses. The Company's reportable segments, which are also its operating segments, consist of its two vertically integrated businesses, Life Sciences and Industrial.

The Company's subsidiaries sell both Life Sciences and Industrial products. As such, certain overhead costs of these subsidiaries are shared by the businesses. Additionally these business groups are supported by shared and corporate services groups that facilitate the Company's corporate governance and business activities globally.

Cash and cash equivalents, short-term investments, investments and retirement benefit assets and income taxes all of which are managed at the Corporate level, are included in Corporate/Shared Services assets. Furthermore assets not specifically identified to a business group are also included in Corporate/Shared Services assets. Accounts receivable and inventory are in all cases specifically identified to a business group.

Expenses associated with the corporate operations, interest expense, net, the provision for income taxes, as well as restructuring and other charges are currently excluded from the measurement and evaluation of the profitability of the Company's reportable segments.

## SYSCO CORPORATION (JUN)

## NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

## 19. Business Segment Information

The company has aggregated its operating companies into a number of segments, of which only Broadline and SYGMA are reportable segments as defined in the accounting literature related to disclosures about segments of an enterprise. The Broadline reportable segment is an aggregation of the company's United States, Canadian and European Broadline segments. Broadline operating companies distribute a full line of food products and a wide variety of non-food products to its customers. SYGMA operating companies distribute a full line of food products and a wide variety of non-food products to certain chain restaurant customer locations. "Other" financial information is attributable to the company's other operating segments, including the company's specialty produce, custom-cut meat and lodging industry segments and a company that distributes to international customers.

The accounting policies for the segments are the same as those disclosed by Sysco. Intersegment sales represent specialty produce and meat company products distributed by the Broadline and SYGMA operating companies. The segment results include certain centrally incurred costs for shared services that are charged to our segments. These centrally incurred costs are charged based upon the relative level of service used by each operating company consistent with how Sysco's management views the performance of its operating segments. Management evaluates the performance of each of our operating segments based on its respective operating income results, which include the allocation of certain centrally incurred costs.

Included in corporate expenses, among other items, are:

- Gains and losses recognized to adjust corporate-owned life insurance policies to their cash surrender values;
- Share-based compensation expense;
- Expenses related to the company's Business Transformation Project; and
- Corporate-level depreciation and amortization expense.

The following table sets forth the financial information for Sysco's business segments:

| (In thousands)                 | Fiscal Year     |              |              |

**1.54****WASTE MANAGEMENT, INC. (DEC)****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS****21. Segment and Related Information**

We currently manage and evaluate our operations primarily through our Eastern, Midwest, Southern, Western and Wheelabrator Groups. These five Groups are presented below as our reportable segments. Our four geographic operating Groups provide collection, transfer, disposal (in both solid waste and hazardous waste landfills) and recycling services. Our fifth Group is the Wheelabrator Group, which provides waste-to-energy services and manages waste-to-energy facilities and independent power production plants. We serve residential, commercial, industrial, and municipal customers throughout North America. The operations not managed through our five operating Groups are presented herein as "Other."

Summarized financial information concerning our reportable segments for the respective years ended December 31 is shown in the following table (in millions):

(a) Our "Other" net operating revenues and "Other" income from operations include (i) the effects of those elements of our in-plant services, landfill gas-to-energy operations, and third-party subcontract and administration revenues managed by our Upstream®, Renewable Energy and Strategic Accounts organizations, respectively, that are not included with the operations of our reportable segments; (ii) our recycling brokerage and electronic recycling services; and (iii) the impacts of investments that we are making in expanded service offerings such as portable self-storage and fluorescent lamp recycling. In addition, our "Other" income from operations reflects the impacts of (i) non-operating entities that provide financial assurance and self-insurance support for the Groups or financing for our Canadian operations; and (ii) certain year-end adjustments recorded in consolidation related to the reportable segments that were not included in the measure of segment profit or loss used to assess their performance for the periods disclosed.

(b) Corporate operating results reflect the costs incurred for various support services that are not allocated to our five Groups. These support services include, among other things, treasury, legal, information technology, tax, insurance, centralized service center processes, other administrative functions and the maintenance of our closed landfills. Income from operations for "Corporate and other" also includes costs associated with our long-term incentive program and any administrative expenses or revisions to our estimated obligations associated with divested operations.

(c) Intercompany operating revenues reflect each segment's total intercompany sales, including intercompany sales within a segment and between segments. Transactions within and between segments are generally made on a basis intended to reflect the market value of the service.

(d) For those items included in the determination of income from operations, the accounting policies of the segments are the same as those described in Note 3.

(e) The income from operations provided by our four geographic Groups is generally indicative of the margins provided by our collection, landfill, transfer and recycling businesses. The operating margins provided by our Wheelabrator Group (waste-to-energy facilities and independent power production plants) have historically been higher than the margins provided by our base business generally due to the combined impact of long-term disposal and energy contracts and the disposal demands of the regions in which our facilities are concentrated. However, the revenues and operating results of our Wheelabrator Group have been unfavorably affected by a significant decrease in the rates charged for electricity under our power purchase contracts, which correlate with natural gas prices in the markets where we operate. Exposure to market fluctuations in electricity prices increased for the Wheelabrator Group in 2009 due in large part to the expiration of several long-term energy contracts. Additionally, the Company's current focus on the expansion of our waste-to-energy business both internationally and domestically has increased Wheelabrator's costs and expenses, which has negatively affected the comparability of their operating results for the periods presented. From time to time the operating results of our reportable segments are significantly affected by certain transactions or events that management believes are not indicative or representative of our results. Refer to Note 12 and Note 13 for an explanation of transactions and events affecting the operating results of our reportable segments.

(f) Includes non-cash items. Capital expenditures are reported in our reportable segments at the time they are recorded within the segments' property, plant and equipment balances and, therefore, may include amounts that have been accrued but not yet paid.

(g) The reconciliation of total assets reported above to "Total assets" in the Consolidated Balance Sheets is as follows (in millions):

|                                                      | December 31 |          |          |
|------------------------------------------------------|-------------|----------|----------|
|                                                      | 2010        | 2009     | 2008     |
| Total assets, as reported above                      | \$22,169    | \$21,801 | \$20,810 |
| Elimination of intercompany investments and advances | (693)       | (647)    | (583)    |
| Total assets, per Consolidated Balance Sheets        | \$21,476    | \$21,154 | \$20,227 |

(h) Goodwill is included within each Group's total assets. As discussed above, for segment reporting purposes, our material recovery facilities and secondary processing facilities are included as a component of their respective geographic Group and our recycling brokerage business and electronics recycling services are included as part of our "Other" operations. The following table shows changes in goodwill during 2009 and 2010 by reportable segment (in millions):

|                                                | Eastern | Midwest | Southern | Western | Wheelabrator | Other | Total   |
|------------------------------------------------|---------|---------|----------|---------|--------------|-------|---------|
| Balance, December 31, 2008                     | \$1,488 | \$1,300 | \$643    | \$1,208 | \$788        | \$35  | \$5,462 |
| Acquired goodwill                              | 10      | 45      | 36       | 7       | —            | 27    | 125     |
| Divested goodwill, net of assets held-for-sale | 2       | —       | —        | —       | —            | —     | 2       |
| Translation adjustments                        | —       | 37      | —        | 6       | —            | —     | 43      |
| Balance, December 31, 2009                     | 1,500   | 1,382   | 679      | 1,221   | 788          | 62    | 5,632   |
| Acquired goodwill                              | 4       | 17      | 4        | 20      | —            | 32    | 77      |
| Divested goodwill, net of assets held-for-sale | —       | —       | —        | —       | —            | —     | —       |
| Translation and other adjustments              | —       | 15      | —        | 2       | —            | —     | 17      |
| Balance, December 31, 2010                     | \$1,504 | \$1,414 | \$683    | \$1,243 | \$788        | \$94  | \$5,726 |

The table below shows the total revenues by principal line of business (in millions):

|                             | Years Ended December 31 |          |          |
|-----------------------------|-------------------------|----------|----------|
|                             | 2010                    | 2009     | 2008     |
| Collection                  | \$ 8,247                | \$ 7,980 | \$ 8,679 |
| Landfill                    | 2,540                   | 2,547    | 2,955    |
| Transfer                    | 1,318                   | 1,383    | 1,589    |
| Wheelabrator                | 889                     | 841      | 912      |
| Recycling                   | 1,169                   | 741      | 1,180    |
| Other <sup>(a)</sup>        | 314                     | 245      | 207      |
| Intercompany <sup>(b)</sup> | (1,962)                 | (1,946)  | (2,134)  |
| Operating revenues          | \$12,515                | \$11,791 | \$13,388 |

<sup>(a)</sup> The "Other" line-of-business includes landfill gas-to-energy operations, Port-O-Let ® services, portable self-storage and fluorescent lamp recycling.

<sup>(b)</sup> Intercompany revenues between lines of business are eliminated within the Consolidated Financial Statements included herein.

Net operating revenues relating to operations in the United States and Puerto Rico, as well as Canada are as follows (in millions):

|                               | Years Ended December 31 |          |          |
|-------------------------------|-------------------------|----------|----------|
|                               | 2010                    | 2009     | 2008     |
| United States and Puerto Rico | \$11,784                | \$11,137 | \$12,621 |
| Canada                        | 731                     | 654      | 767      |
| Total                         | \$12,515                | \$11,791 | \$13,388 |

Property and equipment (net) relating to operations in the United States and Puerto Rico, as well as Canada are as follows (in millions):

|                               | December 31 |          |          |
|-------------------------------|-------------|----------|----------|
|                               | 2010        | 2009     | 2008     |
| United States and Puerto Rico | \$10,558    | \$10,251 | \$10,355 |
| Canada                        | 1,310       | 1,290    | 1,047    |
| Total                         | \$11,868    | \$11,541 | \$11,402 |

### ORACLE CORPORATION (MAY)

#### NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

##### 16. Segment Information

ASC 280, *Segment Reporting*, establishes standards for reporting information about operating segments. Operating segments are defined as components of an enterprise about which separate financial information is available that is evaluated regularly by the chief operating decision maker, or decision making group, in deciding how to allocate resources and in assessing performance. Our chief operating decision maker is our Chief Executive Officer. We are organized geographically and by line of business. While our Chief Executive Officer evaluates results in a number of different

ways, the line of business management structure is the primary basis for which the allocation of resources and financial results are assessed. As a result of our acquisition of Sun, we entered into a new hardware systems business with two operating segments as described further below. We have three businesses—software, hardware systems and services—which are further divided into seven operating segments. Our software business is comprised of two operating segments: (1) new software licenses and (2) software license updates and product support. Our hardware systems business is comprised of two operating segments: (1) hardware systems products and (2) hardware systems support. Our services business is comprised of three operating segments: (1) consulting, (2) On Demand and (3) education.

The new software licenses line of business is engaged in the licensing of database and middleware software as well as our applications software. Database and middleware software includes database management software, application server software, business intelligence software, identification and access management software, content management software, portal and user interaction software, Service-Oriented Architecture and business process management software, data integration software and development tools. As a result of our acquisition of Sun, we acquired certain software technologies that expanded and enhanced our existing database and middleware software product offerings, including Java, which is a global software development platform used in a wide range of computers, networks and devices. Applications software provides enterprise information that enables companies to manage their business cycles and provide intelligence in functional areas such as customer relationship management, financials, human resources, maintenance management, manufacturing, marketing, order fulfillment, product lifecycle management, enterprise project portfolio management, enterprise performance management, procurement, sales, services, enterprise resource planning and supply chain planning.

The software license updates and product support line of business provides customers with rights to unspecified software product upgrades and maintenance releases, internet access to technical content, as well as internet and telephone access to technical support personnel during the support period.

The hardware systems products line of business consists primarily of computer server and storage product offerings. Most of our computer servers are based on our SPARC family of microprocessors and on Intel Xeon microprocessors. Our servers range from high performance computing servers to cost efficient, entry-level servers, and run with our Solaris Operating System, Linux and certain other operating systems environments. Our storage products are designed to securely manage, protect, archive and restore customers' data assets and consist of tape, disk and networking solutions for open systems and mainframe server environments. Customers that purchase our hardware systems products may also elect to purchase our hardware systems support offerings. Our hardware systems support offerings provide customers with software updates for the software components that are essential to the functionality of our hardware systems and storage products and can include product repairs, maintenance services, and technical support services.

The consulting line of business primarily provides services to customers in business strategy and analysis, business process simplification, solutions integration and the implementation, enhancement and upgrade of our database,

middleware and applications software. On Demand includes Oracle On Demand and Advanced Customer Services. Oracle On Demand provides multi-featured software and hardware management and maintenance services for customers that are delivered at our data center facilities, select partner data centers or customer facilities. Advanced Customer Services consists of solution lifecycle management services, industry-specific solution support centers, hardware systems expert services, packaged offerings that support the

installation and optimization of our hardware products and remote and on-site expert services. The education line of business provides instructor-led, media-based and internet-based training in the use of our software and hardware products.

We do not track our assets by operating segments. Consequently, it is not practical to show assets by operating segments results.

The following table presents a summary of our businesses' and operating segments' results:

| (In millions)                                        | Year Ended May 31 |          |          |
|------------------------------------------------------|-------------------|----------|----------|
|                                                      | 2010              | 2009     | 2008     |
| New software licenses:                               |                   |          |          |
| Revenues <sup>(1)</sup>                              | \$ 7,525          | \$ 7,112 | \$ 7,501 |
| Sales and distribution expenses                      | 3,980             | 4,006    | 4,040    |
| Margin <sup>(2)</sup>                                | \$ 3,545          | \$ 3,106 | \$ 3,461 |
| Software license updates and product support:        |                   |          |          |
| Revenues <sup>(1)</sup>                              | \$13,175          | \$11,997 | \$10,507 |
| Software license update and product support expenses | 958               | 1,012    | 933      |
| Margin <sup>(2)</sup>                                | \$12,217          | \$10,985 | \$ 9,574 |
| Total software business:                             |                   |          |          |
| Revenues <sup>(1)</sup>                              | \$20,700          | \$19,109 | \$18,008 |
| Expenses                                             | 4,938             | 5,018    | 4,973    |
| Margin <sup>(2)</sup>                                | \$15,762          | \$14,091 | \$13,035 |
| Hardware systems products:                           |                   |          |          |
| Revenues                                             | \$ 1,493          | \$ —     | \$ —     |
| Hardware systems products expenses                   | 850               | —        | —        |
| Sales and distribution expenses                      | 307               | —        | —        |
| Margin <sup>(2)</sup>                                | \$ 336            | \$ —     | \$ —     |
| Hardware systems support:                            |                   |          |          |
| Revenues <sup>(1)</sup>                              | \$ 912            | \$ —     | \$ —     |
| Hardware systems support expenses                    | 408               | —        | —        |
| Margin <sup>(2)</sup>                                | \$ 504            | \$ —     | \$ —     |
| Total hardware systems business:                     |                   |          |          |
| Revenues <sup>(1)</sup>                              | \$ 2,405          | \$ —     | \$ —     |
| Expenses                                             | 1,565             | —        | —        |

| Total services business:                             |                   |          |          |
| Revenues <sup>(1)</sup>                              | \$ 3,929          | \$ 4,386 | \$ 4,601 |
| Services expenses                                    | 3,245             | 3,534    | 3,797    |
| Margin <sup>(2)</sup>                                | \$ 684            | \$ 852   | \$ 804   |
| Totals:                                              |                   |          |          |
| Revenues <sup>(1)</sup>                              | \$27,034          | \$23,495 | \$22,609 |
| Expenses                                             | 9,748             | 8,552    | 8,770    |
| Margin <sup>(2)</sup>                                | \$17,286          | \$14,943 | \$13,839 |

<sup>(1)</sup> Operating segment revenues differ from the external reporting classifications due to certain software license products that are classified as service revenues for management reporting purposes. Software license updates and product support revenues for management reporting included \$86 million, \$243 million and \$179 million of revenues that we did not recognize in the accompanying consolidated statements of operations in fiscal 2010, 2009 and 2008, respectively. In addition, we did not recognize hardware systems support revenues related to hardware systems support contracts that would have otherwise been recorded by Sun as an independent entity, in the amount of \$128 million in fiscal 2010. See Note 10 for an explanation of these adjustments and the following table for a reconciliation of operating segment revenues to total revenues.

<sup>(2)</sup> The margins reported reflect only the direct controllable costs of each line of business and do not include allocations of product development, information technology, marketing and partner programs, and corporate and general and administrative expenses incurred in support of the lines of business. Additionally, the margins do not reflect the amortization of intangible assets, acquisition related and other expenses, restructuring costs, or stock-based compensation.

The following table reconciles operating segment revenues to total revenues as well as operating segment margin to income before provision for income taxes:

| (In millions)                                                        | Year Ended May 31 |          |          |
|----------------------------------------------------------------------|-------------------|----------|----------|
|                                                                      | 2010              | 2009     | 2008     |
| Total revenues for reportable segments                               | \$27,034          | \$23,495 | \$22,609 |

| Marketing and partner program expenses                               | (503)             | (439)    | (460)    |
| Corporate and general and administrative expenses                    | (755)             | (634)    | (677)    |
| Amortization of intangible assets                                    | (1,973)           | (1,713)  | (1,212)  |
| Acquisition related and other                                        | (154)             | (117)    | (124)    |
| Restructuring                                                        | (622)             | (117)    | (41)     |
| Stock-based compensation                                             | (421)             | (340)    | (257)    |
| Interest expense                                                     | (754)             | (630)    | (394)    |
| Non-operating income (expense), net                                  | (139)             | 108      | 351      |
| Income before provision for income taxes                             | \$ 8,243          | \$ 7,834 | \$ 7,834 |

<sup>(1)</sup> Software license updates and product support revenues for management reporting include \$86 million, \$243 million and \$179 million of revenues that we did not recognize in the accompanying condensed consolidated statements of operations for fiscal 2010, 2009 and 2008, respectively. In addition, we did not recognize hardware systems support revenues related to hardware systems support contracts that would have otherwise been recorded by Sun as an independent entity, in the amount of \$128 million for fiscal 2010. See Note 10 for an explanation of these adjustments and this table for a reconciliation of operating segment revenues to total revenues.

<sup>(2)</sup> Represents the effects of fair value adjustments to our inventories acquired from Sun that were sold to customers in the periods presented. Business combination accounting rules require us to account for inventories assumed from our acquisitions at their fair values. The amount included in hardware systems products expenses above is intended to adjust these expenses to the hardware systems products expenses that would have been otherwise recorded by Sun as a standalone entity upon the sale of these inventories. If we assume inventories in future acquisitions, we will be required to assess their fair values, which may result in fair value adjustments to those inventories.

### Geographic Information

Disclosed in the table below is geographic information for each country that comprised greater than three percent of our total revenues for fiscal 2010, 2009 or 2008.

| (In millions)   | As of and for the Year Ended May 31 |                                  |          |                                  |          |                                  |

<sup>(1)</sup> Long-lived assets exclude goodwill, intangible assets, equity investments and deferred taxes, which are not allocated to specific geographic locations as it is impracticable to do so.

## ACCOUNTING CHANGES AND ERROR CORRECTIONS

### PRESENTATION

**1.56** FASB ASC 250 defines various types of accounting changes, including a change in accounting principle, and provides guidance on the manner of reporting each type of change.

**1.57** Paragraphs 1–2 of FASB ASC 250-10-45 include the presumption that, once adopted, an entity should not change an accounting principle (policy) to account for events and transactions of a similar type. FASB ASC 250-10-45-2 permits an entity to change an accounting principle in certain circumstances, such as when required to do so by new authoritative accounting guidance that mandates the use of a new accounting principle, interprets an existing principle, expresses a preference for an accounting principle, or rejects a specific principle. This paragraph also permits an entity to change an accounting principle if it can justify the use of an allowable alternative accounting principle on the basis that it is preferable.

**1.58** FASB ASC 250-10-45-1 does not consider the following to be changes in accounting principle:

- Initial adoption of an accounting principle for new events or transactions
- Initial adoption of an accounting principle for new events or transactions that previously were immaterial in their effect
- Adoption or modification of an accounting principle for substantively different transactions or events from those occurring previously

**1.59** FASB ASC 250-10-45-5 requires an entity to apply a change in accounting principle retrospectively to all prior periods, unless it is impracticable to do so. Retrospective application requires cumulative adjustments to the carrying amounts of assets and liabilities at the beginning of the earliest period presented; an adjustment, if any, to the opening balance of retained earnings or other relevant equity account; and adjusted financial statements for each individual prior period presented to reflect the period-specific effects of applying the new accounting principle. FASB ASC 250-10-45-7 provides an impracticability exception for period-specific effects or all periods. However, FASB ASC 250-10-45-8 permits only direct effects of the change, including any related income tax effects, to be included in the retrospective adjustment and prohibits an entity from including indirect effects that would have been recognized if the newly adopted accounting principle had been followed in prior periods. If indirect effects are actually incurred and recognized, an entity should only report for those indirect effects in the period in which the accounting change is made.

**1.60** FASB ASC 250-10-45-17 requires an entity to account for a change in accounting estimate prospectively in the period of change if the change affects that period only or in the period of change and future periods if the change affects both.

**1.61** Paragraphs 18–19 of FASB ASC 250-10-45 recognize that it may be difficult to distinguish between a change in an accounting principle and a change in an accounting estimate. Additional guidance is provided for those circumstances when an entity's change in estimate is affected by a change in accounting principle, recognizing that the effect of a change in accounting principle or the method of applying it may be inseparable from the effect of the change in accounting estimate. An example of such change is a change in the method of depreciation, amortization, or depletion for long-lived nonfinancial assets. Although an entity is permitted to apply this change prospectively as a change in accounting estimate, an entity should only make a change in accounting estimate affected by a change in accounting principle if the entity can justify the new accounting principle on the basis that it is preferable.

**1.62** Paragraphs 23–24 of FASB ASC 250-10-45 require an entity to correct any error in the financial statements of a prior period discovered after the financial statements are issued or available to be issued by restating the prior-period financial statements. Such errors are required to be reported as an error correction by restating the prior-period financial statements retrospectively with adjustments to the financial statements.

### DISCLOSURE

**1.63** As discussed in FASB ASC 250-10-50, among the required disclosures for a change in accounting principle, the reason should be disclosed, including an explanation about why the new method is preferable. Specific disclosures are also required for a change in accounting estimate, a change in reporting entity, correction of an error in previously-issued financial statements, and error corrections related to prior interim periods of the current fiscal year. As indicated in Table 1-6, most of the accounting changes disclosed by the survey entities were changes made to conform to requirements stated in newly Accounting Standards Updates.

## 1.64

**TABLE 1-6: ACCOUNTING CHANGES AND ERROR CORRECTIONS\***

Table 1-6 lists the accounting changes and error corrections disclosed by the survey entities.

## 1.65

## THE CLOROX COMPANY (JUN)

*NOTES TO CONSOLIDATED FINANCIAL STATEMENTS**Note 1. Summary of Significant Accounting Policies (in part)**New Accounting Pronouncements (in part)*

On July 1, 2009, the Company adopted a new accounting standard that provides that unvested share-based payment awards that contain nonforfeitable rights to dividends or dividend equivalents, whether paid or unpaid, are participating securities that must be included in the computation of earnings per share pursuant to the two-class method. These payment awards were previously not considered participating securities. Accordingly, the Company's unvested perfor-

mance units, restricted stock awards and restricted stock units that provide such nonforfeitable rights are now considered participating securities in the calculation of net earnings per share (EPS). The Company's share-based payment awards granted in fiscal year 2010 are not participating securities. The new standard requires the retrospective adjustment of the Company's earnings per share data. The impact of the retrospective adoption of the new accounting standard on the fiscal year 2009 and 2008 reported EPS data was as follows:

|                             | Basic                        |                | Diluted                      |                |
|-----------------------------|------------------------------|----------------|------------------------------|----------------|
|                             | As<br>Previously<br>Reported | As<br>Restated | As<br>Previously<br>reported | As<br>Restated |
| Year ended<br>June 30, 2009 | \$3.86                       | \$3.82         | \$3.81                       | \$3.79         |
| Year ended<br>June 30, 2008 | 3.30                         | 3.27           | 3.24                         | 3.23           |

The calculation of EPS under the new accounting standard is disclosed in Note 15.

*Note 15. Earnings Per Share (in part)*

The Company computes EPS using the two-class method (See Note 1), which is an earnings allocation formula that determines EPS for common stock and participating securities.

EPS for common stock is computed by dividing net earnings applicable to common stock by the weighted average number of common shares outstanding each period on an unrounded basis. Net earnings applicable to common stock includes dividends paid to common shareholders during the period plus a proportionate share of undistributed net earnings which is based on the weighted average number of shares of common stock and participating securities outstanding during the period.

Diluted EPS for common stock reflects the earnings dilution that could occur from common shares that may be issued through stock options, restricted stock awards, performance units and restricted stock units that are not participating securities. Excluded from this calculation are amounts allocated to participating securities.

The following are reconciliations of net earnings to net earnings (in millions) applicable to common stock, and the number of common shares outstanding (in thousands) used to calculate basic EPS to those used to calculate diluted EPS for fiscal years ended June 30:

|                                                      | 2010  | 2009  | 2008  |
|------------------------------------------------------|-------|-------|-------|
| Net earnings                                         | \$603 | \$537 | \$461 |
| Less: Earnings allocated to participating securities | 3     | 5     | 5     |
| Net earnings applicable to common stock              | \$600 | \$532 | \$456 |

|                                                                                | Weighted Average Number of<br>Shares Outstanding |         |         |
|--------------------------------------------------------------------------------|--------------------------------------------------|---------|---------|
|                                                                                | 2010                                             | 2009    | 2008    |
| Basic                                                                          | 140,272                                          | 139,015 | 139,633 |
| Dilutive effect of stock options and other (excludes participating securities) | 1,262                                            | 1,154   | 1,564   |
| Diluted                                                                        | 141,534                                          | 140,169 | 141,197 |

## Change in Accounting Principle: Pension and Other Postretirement Benefits

1.66

AT&amp;T INC. (DEC)

### NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

#### Note 1. Summary of Significant Accounting Policies (in part)

*Pension and Other Postretirement Benefits (In millions).* In January 2011, we announced a change in our method of recognizing actuarial gains and losses for pension and other postretirement benefits for all benefit plans. Historically, we have recognized the actuarial gains and losses as a component of the Stockholders' Equity on our consolidated balance sheets on an annual basis and have amortized them into our operating results over the average future service period of the active employees of these plans, to the extent such gains and losses were outside of a corridor. We have elected to immediately recognize actuarial gains and losses in our operat-

ing results, noting that it is generally preferable to accelerate the recognition of deferred gains and losses into income rather than to delay such recognition. This change will improve transparency in our operating results by more quickly recognizing the effects of economic and interest rate conditions on plan obligations, investments and assumptions. These gains and losses are generally only measured annually as of December 31 and accordingly will be recorded during the fourth quarter. Additionally, for purposes of calculating the expected return on plan assets, we will no longer use a permitted averaging technique for the market-related value of plan assets but instead will use actual fair value of plan assets. We have applied these changes retrospectively, adjusting all prior periods. The cumulative effect of the change on retained earnings as of January 1, 2008, was a reduction of \$1,533, with an offset to accumulated other comprehensive income (OCI). The annual recognition of actuarial gains and losses, which is reported as "Actuarial loss on pension and postretirement benefit plans" on our consolidated statement of cash flows total \$2,521 in 2010, \$215 in 2009 and \$25,150 in 2008. This change did not have a material impact on cash provided by or used in operations for any period presented.

The following table presents our results under our historical method and as adjusted to reflect the accounting change:

| (In millions)                                                                                  | Historical<br>Accounting Method | As Adjusted | Effect of Change |
|------------------------------------------------------------------------------------------------|---------------------------------|-------------|------------------|
| <b>At December 31, 2010 or for the year ended</b>                                              |                                 |             |                  |

| Retained earnings                                                                              | 36,591                          | 19,566      | (17,025)         |
| Accumulated other comprehensive income                                                         | (17,057)                        | (418)       | 16,639           |

<sup>(1)</sup> A portion of pension and postretirement costs are capitalized as a part of construction labor.

<sup>(2)</sup> The effect of the accounting change is also reflected in our consolidated statements of cash flows, included in "Net income (loss)" and relevant adjustments to reconcile net income (loss) to net cash provided by operating activities.

## Change in Accounting Principle: Business Combinations

### 1.67

#### ORACLE CORPORATION (MAY)

##### NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

##### 1. Organization and Significant Accounting Policies (in part)

##### Business Combinations

In fiscal 2010, we adopted ASC 805, Business Combinations, which revised the accounting guidance that we were required to apply for our acquisitions in comparison to prior fiscal years. The underlying principles are similar to the previous guidance and require that we recognize separately from goodwill the assets acquired and the liabilities assumed, generally at their acquisition date fair values. Goodwill as of the acquisition date is measured as the excess of consideration transferred and the net of the acquisition date fair values of the assets acquired and the liabilities assumed. While we use our best estimates and assumptions as a part of the purchase price allocation process to accurately value assets acquired and liabilities assumed at the acquisition date, our estimates are inherently uncertain and subject to refinement. As a result, during the measurement period, which may be up to one year from the acquisition date, we record adjustments to the assets acquired and liabilities assumed, with the corresponding offset to goodwill. Upon the conclusion of the measurement period or final determination of the values of assets acquired or liabilities assumed, whichever comes first, any subsequent adjustments are recorded to our consolidated statements of operations.

As a result of adopting the revised accounting guidance provided for by ASC 805 as of the beginning of fiscal 2010, certain of our policies differ when accounting for acquisitions in fiscal 2010 and prospective periods in comparison to the accounting for acquisitions in fiscal 2009 and prior periods, including:

- The fair value of in-process research and development is recorded as an indefinite-lived intangible asset until the underlying project is completed, at which time the intangible asset is amortized over its estimated useful life, or abandoned, at which time the intangible asset is expensed (prior to fiscal 2010, in-process research and development was expensed at the acquisition date);
- The direct transaction costs associated with the business combination are expensed as incurred (prior to fiscal 2010, direct transaction costs were included as a part of the purchase price);
- The costs to exit or restructure certain activities of an acquired company are accounted for separately from the business combination (prior to fiscal 2010, these restructuring and exist costs were included as a part of the assumed obligations in deriving the purchase price allocation); and

- Any changes in estimates associated with income tax valuation allowances or uncertain tax positions after the measurement period are generally recognized as income tax expense with application of this policy also applied prospectively to all of our business combinations regardless of the acquisition date (prior to fiscal 2010, any such changes were generally included as a part of the purchase price allocation indefinitely).

Costs to exit or restructure certain activities of an acquired company or our internal operations are accounted for as one-time termination and exit costs pursuant to ASC 420, *Exit or Disposal Cost Obligations*, and, as noted above, are accounted for separately from the business combination. A liability for a cost associated with an exit or disposal activity is recognized and measured at its fair value in our consolidated statement of operations in the period in which the liability is incurred. When estimating the fair value of facility restructuring activities, assumptions are applied regarding estimated sub-lease payments to be received, which can differ materially from actual results. This may require us to revise our initial estimates which may materially affect our results of operations and financial position in the period the revision is made.

For a given acquisition, we generally identify certain pre-acquisition contingencies as of the acquisition date and may extend our review and evaluation of these pre-acquisition contingencies throughout the measurement period (up to one year from the acquisition date) in order to obtain sufficient information to assess whether we include these contingencies as a part of the purchase price allocation and, if so, to determine the estimated amounts.

If we determine that a pre-acquisition contingency (non-income tax related) is probable in nature and estimable as of the acquisition date, we record our best estimate for such a contingency as a part of the preliminary purchase price allocation. We often continue to gather information for and evaluate our pre-acquisition contingencies throughout the measurement period and if we make changes to the amounts recorded or if we identify additional pre-acquisition contingencies during the measurement period, such amounts will be included in the purchase price allocation during the measurement period and, subsequently, in our results of operations.

In addition, uncertain tax positions and tax related valuation allowances assumed in connection with a business combination are initially estimated as of the acquisition date and we reevaluate these items quarterly with any adjustments to our preliminary estimates being recorded to goodwill provided that we are within the measurement period and we continue to collect information in order to determine their estimated values. Subsequent to the measurement period or our final determination of the tax allowance's or contingency's estimated value, changes to these uncertain tax positions and tax related valuation allowances will affect our provision for income taxes in our consolidated statement of operations and could have a material impact on our results of operations and financial position.

## Change in Accounting Principle: Noncontrolling Interests

1.68

COLLECTIVE BRANDS, INC. (JAN)

### NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

#### Note 21—Impact of Recently Issued Accounting Standards (in part)

In December 2007, the FASB issued new guidance for the accounting for noncontrolling interests. The new guidance, which is now a part of ASC 810, "Consolidation," estab-

lishes accounting and reporting standards for the noncontrolling interest in a subsidiary and for the deconsolidation of a subsidiary. The new guidance requires consolidated net earnings to be reported at amounts that include the amounts attributable to both the parent and the noncontrolling interest. It also requires disclosure, on the face of the Condensed Consolidated Statement of Earnings, of the amounts of consolidated net earnings attributable to the parent and to the noncontrolling interest. In addition, this new guidance establishes a single method of accounting for changes in a parent's ownership interest in a subsidiary that do not result in deconsolidation and requires that a parent recognize a gain or loss in net income when a subsidiary is deconsolidated. The Company adopted this new guidance on February 1, 2009, the impact of which was retrospectively applied and resulted in the noncontrolling interest being separately presented as a component of equity on the Consolidated Balance Sheets and Consolidated Statements of Equity and Comprehensive Income.

#### XILINX, INC. (MAR)

#### NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

#### Note 2. Summary of Significant Accounting Policies and Concentrations of Risk (in part)

#### Adoption of New Accounting Standard for Convertible Debentures

Beginning in fiscal 2010, the Company retrospectively adopted the authoritative guidance for convertible debentures issued by the Financial Accounting Standards Board (FASB), which affected the Company's 3.125% junior subordinated convertible debentures (debentures). The guidance specifies that issuers of convertible debt instruments should separately account for the liability (debt) and equity (conversion option) components of such instruments in a manner that reflects the borrowing rate for a similar non-convertible debt. The liability component is recognized at fair value, based on the fair value of a similar instrument that does not have a conversion feature at issuance. The equity component is based on the excess of the principal amount of the debentures over the fair value of the liability component, after adjusting for an allocation of debt issuance costs and the deferred tax impact. Such excess represents the estimated fair value of the conversion feature and is recorded as additional paid-in capital. The Company's debentures were issued at a coupon rate of 3.125%, which was below the rate of a similar instrument that did not have a conversion feature at that time (7.20%). Therefore, the valuation of the

debt component resulted in a discounted carrying value of the debentures compared to the principal. This debt discount is amortized as additional non-cash interest expense over the expected life of the debt, which is also the stated life of the debt. The consolidated financial statements have been retrospectively adjusted for all periods presented in accordance with the authoritative guidance for convertible debentures.

The effect of the retrospective adoption on individual line items on the Company's consolidated balance sheet was as follows:

| (In thousands)             | March 28, 2009         |                            |             |
|----------------------------|------------------------|----------------------------|-------------|
|                            | As Previously Reported | Adjustments <sup>(1)</sup> | As Adjusted |
| Other assets               | \$216,905              | \$ (13,614) <sup>(2)</sup> | \$ 203,291  |
| Convertible debentures     | 690,125                | (338,015)                  | 352,110     |
| Deferred tax liabilities   | 82,648                 | 113,541                    | 196,189     |
| Additional paid-in capital | 856,232                | 229,513                    | 1,085,745   |
| Retained earnings          | \$897,771              | \$ (18,653)                | \$ 879,118  |

<sup>(1)</sup> The amounts represent the net effect of the adoption of the accounting standard for convertible debentures in the first quarter of fiscal 2010 and the repurchase of a portion of the debentures.

<sup>(2)</sup> Other assets as of March 28, 2009 decreased by \$13.6 million due to a decrease to long-term deferred tax assets of \$7.0 million and a retroactive adjustment of debt issuance costs from other assets to additional paid-in capital of \$6.6 million upon the adoption of the accounting standard for convertible debentures. The reclassification resulted in a cumulative decrease in amortization of debt issuance costs of \$488 thousand as of March 28, 2009.

The effect of the retrospective adoption on individual line items on the Company's consolidated statements of income for the periods indicated was as follows:

|                                                        | Year Ended March 28, 2009 |                           |             | Year Ended March 29, 2008 |                        |             |
|--------------------------------------------------------|---------------------------|---------------------------|-------------|---------------------------|------------------------|-------------|
|                                                        | As Previously Reported    | Adjustments               | As Adjusted | As Previously Reported    | Adjustments            | As Adjusted |
| (In thousands, except per share amounts)               |                           |                           |             |                           |                        |             |
| Gain on early extinguishment of convertible debentures | \$110,606                 | \$(35,571) <sup>(1)</sup> | \$ 75,035   | \$ —                      | \$ —                   | \$ —        |
| Interest and other income, net                         | 12,189                    | (4,587) <sup>(2)</sup>    | 7,602       | 52,750                    | (4,605) <sup>(2)</sup> | 48,145      |
| Provision for income taxes                             | 122,544                   | (26,237)                  | 96,307      | 100,047                   | 127                    | 100,174     |
| Net income                                             | 375,640                   | (13,921)                  | 361,719     | 374,047                   | (4,732)                | 369,315     |
| Net income per common share—basic                      | \$ 1.36                   | \$ (0.05)                 | \$ 1.31     | \$ 1.27                   | \$ (0.02)              | \$ 1.25     |
| Net income per common share—diluted                    | \$ 1.36                   | \$ (0.05)                 | \$ 1.31     | \$ 1.25                   | \$ (0.01)              | \$ 1.24     |

<sup>(1)</sup> Gain on early extinguishment of convertible debentures decreased due to the allocation of the original gain to additional paid-in capital.

<sup>(2)</sup> Interest and other income (expense), net decreased due to additional interest expense recorded retroactively, partially offset by a reduction of amortization of debt issuance costs.

For fiscal 2010, the retrospective adoption increased interest expense by \$3.7 million and decreased provision for income taxes by \$1.4 million, and thereby reducing net income by \$2.3 million (or \$0.01 of net income per basic and diluted common share).

The retrospective adoption does not change the Company's net cash provided by (used in) operating, investing or financing activities for any periods.

**Note 14. Convertible Debentures and Revolving Credit Facility (in part)**

**3.125% Junior Subordinated Convertible Debentures**

In March 2007, the Company issued \$1.00 billion principal amount of 3.125% junior convertible debentures due March 15, 2037, to an initial purchaser in a private offering. The debentures are subordinated in right of payment to the Company's existing and future senior debt and to the other liabilities of the Company's subsidiaries. The debentures were initially convertible, subject to certain conditions, into shares of Xilinx common stock at a conversion rate of 32.0760 shares of common stock per \$1 thousand principal amount of debentures, representing an initial effective conversion price of approximately \$31.18 per share of common stock. The conversion rate is subject to adjustment for certain events as outlined in the indenture governing the debentures but will not be adjusted for accrued interest. Due to the accumulation of cash dividend distributions to common stockholders, the conversion rate for the debentures was adjusted to 32.8092 shares of common stock per \$1 thousand principal amount of debentures, representing an adjusted conversion price of \$30.48 per share at the end of fiscal 2010.

The Company received net proceeds from issuance of the debentures of \$980.0 million after deduction of issuance costs of \$20.0 million. During fiscal 2009, the Company paid \$193.2 million in cash to repurchase \$310.4 million (principal amount) of its debentures, resulting in approximately \$689.6 million of principal amount of debt outstanding as of April 3, 2010. The debt issuance costs, as adjusted for the retrospective adoption of the authoritative guidance for convertible debentures issued by the FASB, are recorded in long-term other assets and are being amortized to interest expense over 30 years. Cash interest of 3.125% (per annum) is payable semiannually in arrears on March 15 and September 15, beginning on September 15, 2007. However,

the Company recognizes an effective interest rate of 7.20% on the carrying value of the debentures. The effective rate is based on the interest rate for a similar instrument that does not have a conversion feature. The debentures also have a contingent interest component that may require the Company to pay interest based on certain thresholds beginning with the semi-annual interest period commencing on March 15, 2014 (the maximum amount of contingent interest that will accrue is 0.50% per year) and upon the occurrence of certain events, as outlined in the indenture governing the debentures.

Beginning in fiscal 2010, the Company retrospectively adopted the authoritative guidance for convertible debentures issued by the FASB. The authoritative guidance specifies that issuers of convertible debt instruments should separately account for the liability (debt) and equity (conversion option) components of such instruments in a manner that reflects the borrowing rate for a similar non-convertible debt. See "Adoption of New Accounting Standard for Convertible Debentures" included in "Note 1. Basis of Presentation" for further information relating to the adoption.

The carrying values of the liability and equity components of the debentures, after the retrospective adoption, are reflected in the Company's consolidated balance sheets as follows:

| (In thousands)                                                    | April 3, 2010 | Mar. 28, 2009 |
|-------------------------------------------------------------------|---------------|---------------|
| Liability component:                                              |               |               |
| Principal amount of convertible debentures                        | \$ 689,635    | \$ 689,635    |
| Unamortized discount of liability component                       | (334,123)     | (338,015)     |
| Unamortized discount of embedded derivative from date of issuance | (1,562)       | (1,620)       |
| Carrying value of liability component                             | 353,950       | 350,000       |
| Carrying value of embedded derivative component                   | 848           | 2,110         |
| Convertible debentures—net carrying value                         | \$ 354,798    | \$ 352,110    |
| Equity component—net carrying value                               | \$ 229,513    | \$ 229,513    |

The remaining debt discount is being amortized as additional non-cash interest expense over the expected remaining life of the debentures using the effective interest rate of 7.20%. As of April 3, 2010, the remaining term of the debentures is 27 years. Interest expense related to the debentures was included in interest and other income (expense), net on the consolidated statements of income and was recognized as follows:

| (In thousands)                                   | 2010     | 2009*    | 2008*    |
|--------------------------------------------------|----------|----------|----------|
| Contractual coupon interest                      | \$21,816 | \$28,293 | \$31,250 |
| Amortization of debt issuance costs              | 223      | 379      | 383      |
| Amortization of embedded derivative              | 58       | 73       | 84       |
| Amortization of debt discount                    | 3,892    | 4,789    | 4,889    |
| Total interest expense related to the debentures | \$25,989 | \$33,534 | \$36,606 |

\* As adjusted for the retrospective adoption of the accounting standard for convertible debentures in the first quarter of fiscal 2010 (see Note 2).

### ARCHER DANIELS MIDLAND COMPANY (JUN)

#### NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

##### Note 1. Summary of Significant Accounting Policies (in part)

##### New Accounting Standards (in part)

On July 1, 2009, the Company adopted the amended guidance in ASC Topic 470-20, *Debt with Conversion and Other Options*, which specifies that issuers of convertible debt instruments that may settle in cash upon conversion must bifurcate the proceeds from the debt issuance between the debt and equity components in a manner that reflects the entity's nonconvertible debt borrowing rate when interest cost is recognized in subsequent periods. The equity component reflects the fair value of the conversion feature of the notes at adoption. The amended guidance was retrospectively applied to the Company's \$1.15 billion, 0.875% Convertible Series Notes for all periods presented as further described in Note 8.

##### Note 8. Debt and Financing Arrangements (in part)

In February 2007, the Company issued \$1.15 billion principal amount of convertible senior notes due in 2014 (the Notes) in a private placement. The Notes were issued at par and bear interest at a rate of 0.875% per year, payable semi-annually. The Notes are convertible based on a conversion rate of 22.8423 shares per \$1,000 principal amount of Notes (which is equal to a conversion price of approximately \$43.78 per share). The Notes may be converted, subject to adjustment, only under the following circumstances: 1) during any calendar quarter beginning after March 31, 2007, if the closing price of the Company's common stock for at least 20 trading days in the 30 consecutive trading days ending on the last trading day of the immediately preceding quarter is more than 140% of the applicable conversion price per share, which is \$1,000 divided by the then applicable conversion

rate, 2) during the five consecutive business day period immediately after any five consecutive trading day period (the note measurement period) in which the average of the trading price per \$1,000 principal amount of Notes was equal to or less than 98% of the average of the product of the closing price of the Company's common stock and the conversion rate at each date during the note measurement period, 3) if the Company makes specified distributions to its common stockholders or specified corporate transactions occur, or 4) at any time on or after January 15, 2014, through the business day preceding the maturity date. Upon conversion, a holder would receive an amount in cash equal to the lesser of 1) \$1,000 and 2) the conversion value, as defined. If the conversion value exceeds \$1,000, the Company will deliver, at the Company's election, cash or common stock or a combination of cash and common stock for the conversion value in excess of \$1,000. If the Notes are converted in connection with a change in control, as defined, the Company may be required to provide a make-whole premium in the form of an increase in the conversion rate, subject to a stated maximum amount. In addition, in the event of a change in control, the holders may require the Company to purchase all or a portion of their Notes at a purchase price equal to 100% of the principal amount of the Notes, plus accrued and unpaid interest, if any. In accordance with ASC Topic 470-20, the Company recognized the Notes proceeds received in 2007 as long-term debt of \$853 million and equity of \$297 million. The discount is being amortized over the life of the Notes using the effective interest method. Discount amortization expense of \$40 million, \$39 million, and \$37 million for 2010, 2009, and 2008, respectively, were included in interest expense related to the Notes.

## 1.71

### GRIFFON CORPORATION (SEP)

#### NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

##### Note 3—Adoption of New Accounting Pronouncements (in part)

##### Retrospective Adjustment for Adoption of Convertible Debt Guidance (in part; in thousands)

In May 2008, the FASB issued new guidance to clarify that the liability and equity components of convertible debt instruments that may be settled in cash upon conversion (including partial cash settlement) must be separately accounted for in a manner that will reflect the entity's nonconvertible debt borrowing rate when interest cost is recognized. This guidance, which is applicable to Griffon's 4% convertible subordinated notes due 2023 issued in 2003 (the "2023 Notes") and 4% convertible subordinated notes due 2017 issued in December 2009 (the "2017 Notes"), became effective for Griffon as of October 1, 2009 and is implemented retrospectively, as required, for the 2023 Notes.

At September 30, 2010, the 2023 Notes had an outstanding balance of \$532, with no unamortized discount or capital in excess of par value component balance as substantially all of these notes were put to Griffon in July 2010. At September 30, 2009, the 2023 Notes had an outstanding balance of \$79,380, an unamortized discount balance of \$2,820, a net

carrying value of \$76,560 and a capital in excess of par value component balance, net of tax, of \$18,094. The stock price was below the conversion price for all periods presented. Griffon used 8.5% as the nonconvertible debt borrowing rate to discount the 2023 Notes. For more information, see the Long-Term Debt footnote.

For the 2023 Notes, the effective interest rate and interest expense was as follows:

| (In thousands)                           | Years Ended September 30 |         |          |
|------------------------------------------|--------------------------|---------|----------|
|                                          | 2010                     | 2009    | 2008     |
| Effective interest rate                  | 9.4%                     | 9.0%    | 8.9%     |
| Interest expense related to the coupon   | \$1,998                  | \$3,472 | \$ 5,200 |
| Amortization of the discount             | 2,105                    | 3,576   | 4,720    |
| Amortization of deferred issuance costs  | 217                      | 530     | 601      |
| Total interest expense on the 2023 Notes | \$4,320                  | \$7,578 | \$10,521 |

The cumulative effect of the adjustments prior to September 30, 2009 was recognized in the September 30, 2009 balance sheet as follows:

| (in thousands)                             | As of September 30, 2009 |             |
|--------------------------------------------|--------------------------|-------------|
|                                            | Reported                 | As Adjusted |
| Other Assets                               | \$ 30,648                | \$ 29,132   |
| All other assets                           | 1,114,759                | 1,114,759   |
| Total Assets                               | \$1,145,407              | \$1,143,891 |
| Notes payable & current portion of LT debt | \$ 81,410                | \$ 78,590   |
| Long-term debt                             | 98,394                   | 98,394      |
| All other liabilities                      | 278,700                  | 278,700     |
| Total liabilities                          | 458,504                  | 455,684     |
| Capital in excess of par value             | 420,749                  | 438,843     |
| Retained earnings                          | 438,782                  | 421,992     |
| All other shareholders' equity             | (172,628)                | (172,628)   |
| Total Shareholders' Equity                 | 686,903                  | 688,207     |
| Total Liabilities and shareholders' equity | \$1,145,407              | \$1,143,891 |

The prior year statements of operations have been adjusted as follows:

| (In thousands)                                         | September 30, 2009 |             | September 30, 2008 |             |
|--------------------------------------------------------|--------------------|-------------|--------------------|-------------|
|                                                        | Reported           | As Adjusted | Reported           | As Adjusted |
| Income from operations                                 | \$25,147           | \$25,147    | \$ 12,044          | \$ 12,044   |
| Other income (expense)                                 |                    |             |                    |             |
| Interest expense                                       | (9,562)            | (13,091)    | (12,345)           | (16,909)    |
| Interest income                                        | 1,539              | 1,539       | 1,970              | 1,970       |

## Change in Accounting Principle: Earnings Per Share

### 1.72

#### BROWN SHOE COMPANY, INC. (JAN)

##### NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

##### 1. Summary of Significant Accounting Policies (in part)

##### Earnings (Loss) Per Common Share Attributable to Brown Shoe Company, Inc. Shareholders

At the beginning of 2009, the Company was required to begin using the two-class method to calculate basic and diluted earnings (loss) per common share attributable to Brown Shoe Company, Inc. shareholders as unvested restricted stock awards are considered participating units because they entitle holders to non-forfeitable rights to dividends or dividend equivalents during the vesting term. Under the two-class method, basic earnings (loss) per common share attributable to Brown Shoe Company, Inc. shareholders is computed by dividing the net earnings (loss) attributable to Brown Shoe Company, Inc. after allocation of earnings to participating securities by the weighted-average number of common shares outstanding during the year. Diluted earnings (loss) per common share attributable to Brown Shoe Company, Inc. shareholders is computed by dividing the net earnings (loss) attributable to Brown Shoe Company, Inc. after allocation of earnings to participating securities by the weighted-average number of common shares and potential dilutive securities outstanding during the year. Potential dilutive securities consist of outstanding stock options. See Note 2 to the consoli-

dated financial statements for additional information related to the calculation of earnings (loss) per common share attributable to Brown Shoe Company, Inc. shareholders.

##### Impact of New Accounting Pronouncements (in part)

In June 2008, the FASB issued guidance which addresses whether instruments granted in share-based payment awards are participating securities prior to vesting and, therefore, must be included in the earnings allocation in calculating earnings per share under the two-class method. Under this pronouncement, unvested share-based payment awards that contain non-forfeitable rights to dividends or dividend equivalents should be treated as participating securities in computing earnings per share. However, in periods of net loss, no effect is given to the Company's participating securities since they do not contractually participate in the losses of the Company. The guidance is effective for fiscal years beginning after December 15, 2008, and for interim periods within those years, and shall be applied retrospectively to all prior periods. Accordingly, due to the adoption of the standard at the beginning of 2009, restricted stock awards are now considered participating units in the calculation of basic and diluted earnings (loss) per common share attributable to Brown Shoe Company, Inc. shareholders. See Note 2 to the consolidated financial statements for the calculation of basic and diluted earnings (loss) per common share attributable to Brown Shoe Company, Inc. shareholders.

##### 2. Earnings (Loss) Per Share

As discussed in Note 1, the Company began using the two-class method to compute basic and diluted earnings (loss) per common share attributable to Brown Shoe Company, Inc. shareholders at the beginning of 2009. In periods of net loss, no effect is given to the Company's participating securities since they do not contractually participate in the losses of the Company. The following table sets forth the computation of basic and diluted earnings (loss) per common share attributable to Brown Shoe Company, Inc. shareholders:

| (In thousands, except per share amounts)                                                                               | 2009     | 2008        | 2007     |
|------------------------------------------------------------------------------------------------------------------------|----------|-------------|----------|
| <b>Numerator</b>                                                                                                       |          |             |          |
| Net earnings (loss) attributable to Brown Shoe Company, Inc. before allocation of earnings to participating securities | \$ 9,500 | \$(133,238) | \$60,427 |
| Less: Earnings allocated to participating securities                                                                   | (361)    | —           | (670)    |
| Net earnings (loss) attributable to Brown Shoe Company, Inc. after allocation of earnings to participating securities  | \$ 9,139 | \$(133,238) | \$59,757 |
| <b>Denominator</b>                                                                                                     |          |             |          |
| Denominator for basic earnings (loss) per common share attributable to Brown Shoe Company, Inc. shareholders           | 41,585   | 41,525      | 43,223   |
| Dilutive effect of share-based awards                                                                                  | 64       | —           | 693      |
| Denominator for diluted earnings (loss) per common share attributable to Brown Shoe Company, Inc. shareholders         | 41,649   | 41,525      | 43,916   |
| Basic earnings (loss) per common share attributable to Brown Shoe Company, Inc. shareholders                           | \$ 0.22  | \$ (3.21)   | \$ 1.38  |
| Diluted earnings (loss) per common share attributable to Brown Shoe Company, Inc. shareholders                         | \$ 0.22  | \$ (3.21)   | \$ 1.36  |

Options to purchase 1,679,335 and 194,243 shares of common stock in 2009 and 2007, respectively, were not included in the denominator for diluted earnings per common share attributable to Brown Shoe Company, Inc. shareholders because the effect would be antidilutive. Due to the Company's net loss attributable to Brown Shoe Company, Inc. in 2008, the denominator for diluted loss per common share attributable to Brown Shoe Company, Inc. shareholders is the same as the denominator for basic loss per common share attributable to Brown Shoe Company, Inc. shareholders.

## Change in Accounting Principle: Inventory

### 1.73

SNYDER'S-LANCE, INC. (DEC)

#### NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

##### Note 2. Change in Accounting Method

Prior to December 6, 2010, inventories were valued using both the LIFO and the FIFO methods. Effective December 6, 2010, we changed our method of accounting for the finished goods, work-in-progress and raw material inventories previously on the LIFO method to the FIFO method. We believe the change is preferable as the FIFO method better reflects the current value of inventory on the Consolidated Balance Sheets and provides better matching of manufacturing costs and revenues. The change also conforms all of our raw materials, work-in-process and finished goods to a single costing method (FIFO).

We applied this change in method of inventory costing by retrospectively adjusting the prior years' financial statements.

The effect of the change on the Consolidated Statements of Income for the years ended December 26, 2009 and December 27, 2008, was as follows:

|                                         | Increase/(Decrease) |           |
|-----------------------------------------|---------------------|-----------|
| (In thousands, except share data)       | 2009                | 2008      |
| Cost of sales                           | \$ 1,128            | \$(1,715) |
| Income before interest and income taxes | (1,128)             | 1,715     |
| Income tax expense                      | (362)               | 593       |
| Net income                              | (766)               | 1,122     |
| Basic earnings per share                | (0.02)              | 0.03      |
| Diluted earnings per share              | (0.02)              | 0.03      |

The effect on the Consolidated Balance Sheet at December 26, 2009, was as follows:

| (In thousands)            | Increase/(Decrease) |
|---------------------------|---------------------|
| Inventories               | \$ 5,836            |
| Deferred income tax asset | (2,013)             |
| Retained earnings         | 3,823               |

Had we not changed our policy for accounting for inventory, pre-tax income for both the fourth quarter and the year ended January 1, 2011 would have been \$0.2 million lower (\$0.1 million reduction after-tax, with no effect on earnings per basic

or diluted share). As a result of the accounting change, retained earnings as of December 29, 2007, increased from \$163.4 million using the LIFO method to \$166.8 million using the FIFO method. There was no impact to net cash provided by operating activities as a result of this change in accounting policy.

##### Note 6. Inventories

Both the LIFO and FIFO methods were previously used to value inventory. Effective December 6, 2010, we changed the accounting policy for those inventories previously valued using LIFO, to FIFO. Refer to Note 2 for more information.

Inventories at January 1, 2011 and December 26, 2009 consisted of the following:

| (In thousands)    | 2010     | 2009 <sup>(*)</sup> |
|-------------------|----------|---------------------|
| Finished goods    | \$55,658 | \$33,060            |
| Raw materials     | 17,015   | 11,732              |
| Supplies, etc.    | 24,263   | 19,081              |
| Total inventories | \$96,936 | \$63,873            |

(\*) 2009 amounts have been reclassified to reflect the change in accounting for inventory, see Note 2.

The increase in inventory during 2010 was primarily due to the Merger.

## Change in Accounting Principle: Revenue Recognition

### 1.74

LOCKHEED MARTIN CORPORATION (DEC)

#### NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

##### Note 1—Significant Accounting Policies (in part)

**Sales and earnings**—We record net sales and estimated profits on a percentage-of-completion (POC) basis for cost-reimbursable and fixed-price design, development, and production (DD&P) contracts. Revenue is recorded on time-and-materials contracts as the work is performed based on agreed-upon hourly rates and allowable costs. The POC method for DD&P contracts depends on the nature of the products provided under the contract. For example, for contracts that require us to perform a significant level of development effort in comparison to the total value of the contract and/or to deliver less than substantial quantities of similar items, sales are recorded using the cost-to-cost method to measure progress toward completion. Under the cost-to-cost method of accounting, we recognize sales and an estimated profit as costs are incurred based on the proportion that the incurred costs bear to total estimated costs. For contracts that require us to provide a substantial number of similar items without a significant level of development effort, we record sales and profit on a percentage-of-completion basis using units-of-delivery as the basis to measure progress toward completing the contract.

When adjustments in estimated contract revenues or estimated costs at completion are required on DD&P contracts,

any changes from prior estimates are recognized in the current period for the inception-to-date effect of the changes. When estimates of total costs to be incurred on a contract exceed total estimates of revenue to be earned, a provision for the entire loss on the contract is recorded in the period in which the loss is determined.

Award fees and incentives, as well as penalties related to contract performance, are considered in estimating sales and profit rates on DD&P contracts. We consider estimates of award fees in estimating sales and profit rates based on past experience and anticipated performance. We record incentives or penalties when there is sufficient information to assess anticipated contract performance. We do not recognize incentive provisions that increase or decrease earnings based solely on a single significant event until the event occurs. We only include amounts representing contract change orders, claims, or other items in contract value when they can be reliably estimated and realization is probable.

For cost-reimbursable contracts for services that provide for award and incentive fees, we record net sales as services are performed, except for the award and incentive fees. Award and incentive fees are recorded when they are fixed or determinable, generally at the date the amount is communicated to us by the customer. This approach results in the recognition of such fees at contractual intervals (typically every six months) throughout the contract and is dependent on the customer's processes for notification of awards and issuance of formal notifications. Under a fixed-price service contract, we get paid a predetermined fixed amount for a specified scope of work and generally have full responsibility for the costs associated with the contract and the resulting profit or loss. We record net sales under fixed-price service contracts on a straight-line basis over the period of contract performance, unless evidence suggests that net sales are earned or the obligations are fulfilled in a different pattern. Costs for all service contracts are expensed as incurred.

*Change in Accounting Principle*—Effective January 1, 2011, we changed our methodology for recognizing net sales for service contracts with the U.S. Government. We will recognize sales on those contracts using the POC method similar to our DD&P contracts as described above. As such, we expect that approximately 95% of our consolidated net sales will be recognized using the POC method. We believe the POC method is preferable, as consistent revenue recognition application across all contracts with the U.S. Government better reflects the underlying economics of those contracts and aligns our financial reporting with others in our industry. Beginning with our first quarter 2011 financial statements, all prior periods presented will be retrospectively adjusted to apply the new method of accounting. The effect of this change is expected to be less than one percent of net sales and segment operating profit in 2011, and was not material to prior periods.

## 1.75

### CISCO SYSTEMS, INC. (JUL)

#### NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

##### 2. Summary of Significant Accounting Policies (in part)

(n) *Revenue Recognition*—The Company recognizes revenue when persuasive evidence of an arrangement exists, delivery has occurred, the fee is fixed or determinable, and collectibility is reasonably assured. In instances where final acceptance of the product, system, or solution is specified by the customer, revenue is deferred until all acceptance criteria have been met. For hosting arrangements, the Company recognizes revenue based on customer utilization. Technical support services revenue is deferred and recognized ratably over the period during which the services are to be performed, which is typically from one to three years. Advanced services revenue is recognized upon delivery or completion of performance.

The Company uses distributors that stock inventory and typically sell to systems integrators, service providers, and other resellers. In addition, certain products are sold through retail partners. The Company refers to this as its two-tier system of sales to the end customer. Revenue from distributors and retail partners generally is recognized based on a sell-through method using information provided by them. Distributors and retail partners participate in various cooperative marketing and other programs, and the Company maintains estimated accruals and allowances for these programs. The Company accrues for warranty costs, sales returns, and other allowances based on its historical experience. Shipping and handling fees billed to customers are included in net sales, with the associated costs included in cost of sales.

In October 2009, the FASB amended the accounting standards for revenue recognition to remove from the scope of industry-specific software revenue recognition guidance tangible products containing software components and nonsoftware components that function together to deliver the product's essential functionality. In October 2009, the FASB also amended the accounting standards for multiple-deliverable revenue arrangements to:

- (i) Provide updated guidance on whether multiple deliverables exist, how the deliverables in an arrangement should be separated, and how consideration should be allocated;
- (ii) Require an entity to allocate revenue in an arrangement using estimated selling prices (ESP) of deliverables if a vendor does not have vendor-specific objective evidence of selling price (VSOE) or third-party evidence of selling price (TPE); and
- (iii) Eliminate the use of the residual method and require an entity to allocate revenue using the relative selling price method.

The Company elected to early adopt this accounting guidance at the beginning of its first quarter of fiscal 2010 on a prospective basis for applicable transactions originating or materially modified after July 25, 2009. This guidance does not generally change the units of accounting for the Company's revenue transactions. Most products and services qualify as separate units of accounting and the revenue is recognized when the applicable revenue recognition criteria are met. The Company's arrangements generally do not

include any provisions for cancellation, termination, or refunds that would significantly impact recognized revenue.

Many of the Company's products have both software and nonsoftware components that function together to deliver the products' essential functionality. The Company's product offerings fall into the following categories: routing, switching, advanced technologies, and other products, the last of which includes emerging technologies items. The Company also provides technical support and advanced services. The Company has a broad customer base that encompasses virtually all types of public and private entities, including enterprise businesses, service providers, commercial customers, and consumers. The Company and its salesforce are not organized by product divisions and the Company's products and services can be sold standalone or together in various combinations across the Company's geographic segments or customer markets. For example, service provider arrangements are typically larger in scale with longer deployment schedules and involve the delivery of a variety of product technologies, including high-end routing, video and network management software, among others, along with technical support and advanced services. The Company's enterprise and commercial arrangements are typically unique for each customer and smaller in scale and may include network infrastructure products such as routers and switches or collaboration technologies such as unified communications and Cisco TelePresence systems products along with technical support services. Consumer products, including Linksys wireless routers and Pure Digital video recorders, are sold in standalone arrangements directly to distributors and retailers without support, as customers generally only require repair or replacement of defective products or parts under warranty.

The Company enters into revenue arrangements that may consist of multiple deliverables of its product and service offerings due to the needs of its customers. For example, a customer may purchase routing products along with a contract for technical support services. This arrangement would consist of multiple elements, with the products delivered in one reporting period and the technical support services delivered across multiple reporting periods. Another customer may purchase networking products along with advanced service offerings, in which all the elements are delivered within the same reporting period. In addition, distributors and retail partners purchase products or technical support services on a standalone basis for resale to an end user or for purposes of stocking certain products, and these transactions would not result in a multiple element arrangement. For transactions entered into prior to the first quarter of fiscal 2010, the Company primarily recognized revenue based on software revenue recognition guidance. For the vast majority of the Company's arrangements involving multiple deliverables, such as sales of products with services, the entire fee from the arrangement was allocated to each respective element based on its relative selling price, using VSOE. In the limited circumstances when the Company was not able to determine VSOE for all of the deliverables of the arrangement, but was able to obtain VSOE for any undelivered elements, revenue was allocated using the residual method. Under the residual method, the amount of revenue allocated to delivered elements equaled the total arrangement consideration less the aggregate selling price of any undelivered elements, and no revenue was recognized until all elements without VSOE had been delivered. If VSOE of any undelivered items did not exist, revenue from the entire arrangement was initially deferred and recognized at the earlier of (i) delivery of those elements

for which VSOE did not exist or (ii) when VSOE could be established. However, in limited cases where technical support services were the only undelivered element without VSOE, the entire arrangement fee was recognized ratably as a single unit of accounting over the technical services contractual period. The residual and ratable revenue recognition methods were generally used in a limited number of arrangements containing advanced and emerging technologies, such as Cisco TelePresence systems products. Several of these technologies are sold as solution offerings, whereas products or services are not sold on a standalone basis.

In many instances, products are sold separately in standalone arrangements as customers may support the products themselves or purchase support on a time-and-materials basis. Advanced services are sometimes sold in standalone engagements such as general consulting, network management, or security advisory projects and technical support services are sold separately through renewals of annual contracts. As a result, for substantially all of the arrangements with multiple deliverables pertaining to routing and switching products and related services, as well as most arrangements containing advanced and emerging technologies, the Company has used and intends to continue using VSOE to allocate the selling price to each deliverable. Consistent with its methodology under previous accounting guidance, the Company determines VSOE based on its normal pricing and discounting practices for the specific product or service when sold separately. In determining VSOE, the Company requires that a substantial majority of the selling prices for a product or service fall within a reasonably narrow pricing range, generally evidenced by approximately 80% of such historical standalone transactions falling within plus or minus 15% of the median rates. In addition, the Company considers the geographies in which the products or services are sold, major product and service groups and customer classifications, and other environmental or marketing variables in determining VSOE.

In certain limited instances, the Company is not able to establish VSOE for all deliverables in an arrangement with multiple elements. This may be due to the Company infrequently selling each element separately, not pricing products within a narrow range, or only having a limited sales history, such as in the case of certain advanced and emerging technologies. When VSOE cannot be established, the Company attempts to establish selling price of each element based on TPE. TPE is determined based on competitor prices for similar deliverables when sold separately. Generally, the Company's go-to-market strategy typically differs from that of its peers and its offerings contain a significant level of customization and differentiation such that the comparable pricing of products with similar functionality cannot be obtained. Furthermore, the Company is unable to reliably determine what similar competitor products' selling prices are on a standalone basis. Therefore, the Company is typically not able to determine TPE.

When the Company is unable to establish selling price using VSOE or TPE, the Company uses ESP in its allocation of arrangement consideration. The objective of ESP is to determine the price at which the Company would transact a sale if the product or service were sold on a standalone basis. ESP is generally used for new or highly customized offerings and solutions or offerings not priced within a narrow range, and it applies to a small proportion of the Company's arrangements with multiple deliverables.

The Company determines ESP for a product or service by considering multiple factors, including, but not limited to, geographies, market conditions, competitive landscape, internal costs, gross margin objectives, and pricing practices. The determination of ESP is made through consultation with and formal approval by the Company's management, taking into consideration the go-to-market strategy.

The Company regularly reviews VSOE, TPE, and ESP and maintains internal controls over the establishment and updates of these estimates. There were no material impacts during the fiscal year nor does the Company currently expect a material impact in the near term from changes in VSOE, TPE, or ESP.

Net sales as reported for the fiscal year ended July 31, 2010, and the Company's estimate of the pro forma net sales that would have been reported if the transaction entered into or materially modified during fiscal 2010 were subject to previous accounting guidance, are shown in the following table (in millions):

| Fiscal Year Ended July 31, 2010 |             |                                                                       |
|---------------------------------|-------------|-----------------------------------------------------------------------|
|                                 | As Reported | Pro Forma Basis as if the Previous Accounting Guidance Were in Effect |
| Net sales                       | \$40,040    | \$39,802                                                              |

The estimated impact to net sales of the accounting standard was primarily to net product sales.

The new accounting standards for revenue recognition if applied in the same manner to the year ended July 25, 2009 would not have had a material impact on net sales for that fiscal year. In terms of the timing and pattern of revenue recognition, the new accounting guidance for revenue recognition is not expected to have a significant effect on net sales in periods after the initial adoption when applied to multiple-element arrangements based on current go-to-market strategies due to the existence of VSOE across most of the Company's product and service offerings. However, the Company expects that this new accounting guidance will facilitate the Company's efforts to optimize its offerings due to better alignment between the economics of an arrangement and the accounting. This may lead to the Company engaging in new go-to-market practices in the future. In particular, the Company expects that the new accounting standards will enable it to better integrate products and services without VSOE into existing offerings and solutions. As these go-to-market strategies evolve, the Company may modify its pricing practices in the future, which could result in changes in selling prices, including both VSOE and ESP. As a result, the Company's future revenue recognition for multiple-element arrangements could differ materially from the results in the current period. The Company is currently unable to determine the impact that the newly adopted accounting guidance could have on its revenue as these go-to-market strategies evolve.

The Company's arrangements with multiple deliverables may have a standalone software deliverable that is subject to the existing software revenue recognition guidance. The revenue for these multiple-element arrangements is allocated to the software deliverable and the nonsoftware deliverables based on the relative selling prices of all of the deliverables in the arrangement using the hierarchy in the new revenue accounting guidance. In the limited circumstances where the Company cannot determine VSOE or TPE of the selling price

for all of the deliverables in the arrangement, including the software deliverable, ESP is used for the purposes of performing this allocation.

## Change in Accounting Principle: Transfers of Financial Assets and Variable Interest Entities

### 1.76

TIME WARNER INC. (DEC)

#### NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

##### 1. Description of Business, Basis of Presentation and Summary of Significant Accounting Policies (in part)

##### Accounting Guidance Adopted in 2010

##### Amendments to Accounting for Transfers of Financial Assets and VIEs

On January 1, 2010, the Company adopted guidance on a retrospective basis that (i) eliminated the concept of a qualifying special-purpose entity ("SPE"), (ii) eliminated the exception from applying existing accounting guidance related to variable interest entities ("VIEs") that were previously considered qualifying SPEs, (iii) changed the approach for determining the primary beneficiary of a VIE from a quantitative risk and reward model to a qualitative model based on control and (iv) requires the Company to assess each reporting period whether any of the Company's variable interests give it a controlling financial interest in the applicable VIE.

The Company's investments in entities determined to be VIEs principally consist of certain investments at its Networks segment, primarily HBO Asia, HBO South Asia and certain entities that comprise HBO Latin America Group ("HBO LAG"), which operate multi-channel pay and basic cable television services. As of December 31, 2010, the Company held an 80% economic interest in HBO Asia, a 75% economic interest in HBO South Asia and an approximate 80% economic interest in HBO LAG. The Company previously consolidated these entities; however, as a result of adopting this guidance, because voting control is shared with the other partners in each of the three entities, the Company determined that it is no longer the primary beneficiary of these entities and, effective January 1, 2010, accounts for these investments using the equity method. As of December 31, 2010 and December 31, 2009, the Company's aggregate investment in these three entities was \$597 million and \$362 million, respectively, and was recorded in investments, including available-for-sale securities, in the consolidated balance sheet.

These investments are intended to enable the Company to more broadly leverage its programming and digital strategy in the territories served and to capitalize on the growing multi-channel television market in such territories. The Company provides programming as well as certain services, including distribution, licensing, technological and administrative support, to HBO Asia, HBO South Asia and HBO LAG. These entities are financed through cash flows from their operations, and the Company is not obligated to provide them with any additional financial support. In addition, the assets of these entities are not available to settle the Company's obligations.

The adoption of this guidance with respect to these entities resulted in an increase (decrease) to revenues, operating income and net income attributable to Time Warner Inc. shareholders of \$(397) million, \$(75) million and \$9 million, respectively, for the year ended December 31, 2009 and an increase (decrease) of \$(82) million, \$(16) million and \$4 million, respectively, for the year ended December 31, 2008. The impact on the consolidated balance sheet as of December 31, 2009 and consolidated statement of cash flows for the years ended December 31, 2009 and 2008 was not material.

The Company also held variable interests in two wholly owned SPEs through which the activities of its accounts receivable securitization facilities were conducted. The Company determined it was the primary beneficiary of these entities because of its ability to direct the key activities of the SPEs that most significantly impact their economic performance. Accordingly, as a result of adopting this guidance, the Company consolidated these SPEs, which resulted in an increase to securitized receivables and non-recourse debt of \$805 million as of December 31, 2009. In addition, for the year ended December 31, 2008, cash provided by operations increased by \$231 million, with an offsetting decrease to cash used by financing activities. There was no change to cash provided by operations for the year ended December 31, 2009. The impact on the consolidated statement of operations for the years ended December 31, 2009 and 2008 was not material. During the first quarter of 2010, the Company repaid the \$805 million that was outstanding under these facilities and terminated the two facilities on March 19, 2010 and March 24, 2010, respectively.

## Change in Accounting Estimates

### 1.77

FURNITURE BRANDS INTERNATIONAL, INC. (DEC)

#### NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

##### 20. Change in Estimates (In Thousands)

During 2010 we recorded changes in estimates related to certain international tax and trade compliance matters. As a result of favorable settlements and actions taken by the Company as well as other conditions during 2010, our potential exposure and our estimate of the probable cost to resolve the matters decreased and we recognized a corresponding reduction in selling, general, and administrative expenses of \$5,937.

During 2009 we recorded changes in estimates related to changes in inventory valuation allowances and changes in the accrual for lease termination costs. The inventory valuation allowances were increased by \$32,981 due to our decision to accelerate the disposal of slow moving inventory and the accrual for closed store lease liabilities was increased by \$7,537 due to deteriorating market conditions for commercial leases. During 2008 we recorded changes in estimates related to changes in inventory valuation allowances, changes in the allowances for doubtful accounts, and changes in the accrual for lease termination costs. The inventory valuation allowances were increased by \$39,800, the allowance for doubtful accounts was increased by \$35,241, and the accrual

for closed store lease liabilities was increased by \$23,158. The increases in estimates were required due to deteriorating economic conditions and our decision to accelerate the disposal of slow moving inventory.

### 1.78

KIMBALL INTERNATIONAL, INC. (JUN)

#### NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

##### Note 1. Summary of Significant Accounting Policies (in part)

**Change in Estimates:** The Company periodically performs assessments of the useful lives of assets. In evaluating useful lives, the Company considers how long assets will remain functionally efficient and effective, given levels of technology, competitive factors, and the economic environment. If the assessment indicates that the assets will continue to be used for a longer period than previously anticipated, the useful life of the assets is revised, resulting in a change in estimate. Changes in estimates are accounted for on a prospective basis by depreciating the assets' current carrying values over their revised remaining useful lives.

Effective July 1, 2009, the Company revised the useful lives of Surface Mount Technology production equipment from 5 years to 7 years. Additionally, effective October 1, 2008, the Company revised the useful lives of Enterprise Resource Planning software from 7 years to 10 years. The effect of these changes in estimates, compared to the original depreciation and amortization, for fiscal year 2010 was a pre-tax reduction in depreciation and amortization expense of, in thousands, (\$2,148). The pre-tax reduction in amortization expense for fiscal year 2009 was, in thousands, (\$1,402). The pre-tax (decrease) increase to depreciation and amortization expense in future periods is expected to be, in thousands, (\$1,010), \$141, \$1,052, \$1,272, and \$1,225 in the five years ending June 30, 2015, and \$531 thereafter.

## Correction of Errors

### 1.79

THE TIMKEN COMPANY (DEC)

#### NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

##### Note 17—Prior-Period Adjustments

During the third quarter of 2010, the Company recorded an adjustment related to its 2009 Consolidated Financial Statements. (Loss) income from discontinued operations, net of income taxes, decreased \$1.3 million (after-tax) due to a correction of an error related to a foreign currency translation adjustment for the Company's Canadian operations that were sold as part of the NRB divestiture. The Company realized during the third quarter of 2010 that this adjustment should have been written-off in the fourth quarter of 2009 and recognized as part of the loss on the sale of the NRB operations.

Management of the Company concluded the effect of the third quarter adjustment was immaterial to the Company's 2009 and third-quarter 2010 financial statements, as well as to the full-year 2010 financial statements.

During the first quarter of 2010, the Company recorded a \$14.1 million adjustment to other comprehensive income for deferred taxes on postretirement prescription drug benefits, specifically the employer subsidy provided by the U.S. government under the Medicare Part D program (the Medicare subsidy). The Company determined it had provided deferred taxes on postretirement benefit plan accruals recorded through other comprehensive income net of the Medicare subsidy, rather than on a gross basis. The cumulative impact of this error resulted in a cumulative understatement of deferred tax assets totaling \$14.1 million and a corresponding overstatement of accumulated other comprehensive loss. Management concluded the effect of the adjustment was not material to the Company's prior three fiscal years and the first quarter of 2010 financial statements, as well as the estimated full-year 2010 financial statements.

During the first quarter of 2009, the Company recorded two adjustments related to its 2008 Consolidated Financial Statements. Net income (loss) attributable to noncontrolling interest increased by \$6.1 million (after-tax) due to a correction of an error related to the \$18.4 million goodwill impairment loss the Company recorded in the fourth quarter of 2008 for the Mobile Industries segment. In recording this goodwill impairment loss, the Company did not recognize that a portion of the loss related to two separate subsidiaries in India and South Africa of which the Company holds less than 100% ownership. In addition, income (loss) from continuing operations before income taxes decreased by \$3.4 million, or \$0.04 per share, (\$2.0 million after-tax or \$0.02 per share) due to a correction of an error related to \$3.4 million of in-process research and development costs that were recorded in other current assets with the anticipation of being paid for by a third-party. However, the Company subsequently realized that the balance could not be substantiated through a contract with a third party. The net effect of these errors understated 2008 net income attributable to The Timken Company of \$267.7 million by \$4.1 million. Furthermore, the net effect of these errors overstated the Company's first quarter 2009 net income attributable to The Timken Company of \$0.9 million by \$4.1 million. Had these adjustments been

recorded in the fourth quarter of 2008, rather than the first quarter of 2009, the results for the first quarter of 2009 would have been a net loss attributable to The Timken Company of \$3.2 million. Management of the Company concluded the effect of the first quarter adjustments was immaterial to the Company's 2008 and first-quarter 2009 financial statements, as well as to the full-year 2009 financial statements.

## 1.80

### LA-Z-BOY INCORPORATED (APR)

#### NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

##### Note 1. Accounting Policies (in part)

##### Principles of Consolidation (in part)

During the third quarter of fiscal 2010, we corrected our historical financial statements related to one of our VIEs. This VIE previously amortized leasehold improvements over a period that exceeded the appropriate useful life in accordance with our accounting policy. The cumulative effect was a \$3.3 million reduction to fixed assets and retained earnings as of April 25, 2009, to record the previously unrecognized amortization. The correction resulted in an increase in our net loss for the fiscal years ended April 29, 2006, April 26, 2008, and April 25, 2009, of \$0.2 million, \$0.4 million and \$1.3 million, respectively, as well as a decrease in our net income for the fiscal year ended April 28, 2007, of \$0.3 million. We determined that the cumulative impact of this correction was material to our fiscal 2010 year. However, we determined that the corrections were not material, either individually or in the aggregate, to any of our historical fiscal years or interim periods. Consequently, we revised our historical financial statements for the prior periods. Because our analysis concluded that these corrections were immaterial to any prior period, we did not amend our previous filings with the Securities and Exchange Commission.

The following tables set forth the impact of the immaterial corrections to our consolidated statements of operations for the fiscal years ended April 25, 2009, and April 26, 2008, and our consolidated balance sheet as of April 25, 2009:

| Year Ended 4/25/2009                                             |                                       |             |                            |
|------------------------------------------------------------------|---------------------------------------|-------------|----------------------------|
| (Amounts in thousands, except per share data)                    | 4/25/2009<br>(As Previously Reported) | Adjustments | 4/25/2009<br>(As Adjusted) |
| Net loss attributable to La-Z-Boy Incorporated                   | \$ (121,347)                          | \$ (1,325)  | \$ (122,672)               |
| Diluted net loss attributable to La-Z-Boy Incorporated per share | \$ (2.36)                             | \$ (0.03)   | \$ (2.39)                  |

  

| Year Ended 4/26/2008                                             |                                       |             |                            |

## 1.81

## HUBBELL INCORPORATED (DEC)

## NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

## Note 1—Significant Accounting Policies (in part)

## Revision to Financial Statement Presentation

During the third quarter of 2010, we determined that the December 31, 2009 deferred tax assets and deferred tax liabilities related to the Burndy acquisition were misclassified, primarily as a result of improperly applying the jurisdictional netting rules of the income taxes accounting guidance. The Company has assessed the materiality of this correction in accordance with the SEC Staff Accounting Bulletin (“SAB”) No. 99 “Materiality” and has concluded that the previously issued financial statements are not materially misstated. In accordance with the SEC’s SAB No. 108 “Considering the Effects of Prior Year Misstatements when Quantifying Misstatements in Current Year Financial Statements,” the Company has corrected the immaterial misstatement by revising the prior period balance sheet by decreasing current deferred tax assets (reflected in Deferred taxes and other) by \$17.1 million, decreasing non-current deferred tax assets (reflected in Intangible assets and other) by \$44.6 million and by decreasing its non-current deferred tax liability (reflected in Other Non-current liabilities) by \$61.7 million. This revision did not impact the statement of income or the statement of cash flows for any period.

## Note 12—Income Taxes (in part)

Deferred tax assets and liabilities result from differences in the basis of assets and liabilities for tax and financial statement purposes. The components of the deferred tax assets/(liabilities) at December 31, were as follows (in millions):

|                                                                                   | 2010    | 2009    |
|-----------------------------------------------------------------------------------|---------|---------|
| <b>Deferred Tax Assets:</b>                                                       |         |         |
| Inventory                                                                         | \$ 8.0  | \$ 6.4  |
| Income tax credits                                                                | 18.8    | 16.6    |
| Accrued liabilities                                                               | 13.8    | 17.4    |
| Pension                                                                           | 35.7    | 34.4    |
| Postretirement and post employment benefits                                       | 18.8    | 11.2    |
| Stock-based compensation                                                          | 11.3    | 10.2    |
| Net operating loss carryforwards                                                  | 75.9    | 86.6    |
| Miscellaneous other                                                               | 1.4     | 0.8     |
| Gross deferred tax assets                                                         | 183.7   | 183.6   |
| Valuation allowance                                                               | (2.6)   | (2.2)   |
| Total net deferred tax assets                                                     | \$181.1 | \$181.4 |
| <b>Deferred Tax Liabilities:</b>                                                  |         |         |
| Acquisition basis difference                                                      | 115.7   | 107.4   |
| Property, plant, and equipment                                                    | 27.7    | 29.5    |
| Total deferred tax liabilities                                                    | \$143.4 | \$136.9 |
| Total net deferred tax asset                                                      | \$ 37.7 | \$ 44.5 |
| <b>Deferred Taxes are Reflected in the Consolidated Balance Sheet as Follows:</b> |         |         |
| Current tax assets (included in deferred taxes and other)                         | \$ 24.7 | \$ 46.7 |
| Non-current tax assets (included in intangible assets and other)                  | 34.2    | 19.3    |
| Non-current tax liabilities (included in other non-current liabilities)           | (21.2)  | (21.5)  |
| Total net deferred tax asset                                                      | \$ 37.7 | \$ 44.5 |

During 2010, the Company determined that the December 31, 2009 deferred tax assets and deferred tax liabilities related to the Burndy acquisition were misclassified, primarily as a result of improperly applying the jurisdictional netting rule of the income taxes accounting guidance. As a result, the Company revised the December 31, 2009 balance sheet by decreasing current deferred tax assets by \$17.1 million, decreasing non-current deferred tax assets by \$44.6 million and by decreasing its non-current deferred tax liability by \$61.7 million. In 2010, the Company also finalized the tax attributes associated with the Burndy acquisition and as a result recorded an additional \$19.5 million of deferred tax assets. Both of these revisions have been reflected in the December 31, 2009 data presented in the table above.

## CONSOLIDATION

## RECOGNITION AND MEASUREMENT

**1.82** FASB ASC 810-10-10 states that the purpose of consolidated financial statements is to present, primarily for the benefit of the owners and creditors of the parent, the results of operations and the financial position of a parent and all its subsidiaries as if the consolidated group were a single economic entity. It is presumed that consolidated financial statements are more meaningful than separate financial statements and are usually necessary for a fair presentation when one of the entities in the consolidated group directly or indirectly has a controlling financial interest in the other entities.

**1.83** As explained by FASB ASC 810-10-05-8, the “General” subsections of FASB ASC 810, *Consolidation*, apply to certain legal entities in which equity investors do not have sufficient equity at risk for the legal entity to finance its activities without additional subordinated financial support, or as a group, the holders of the equity investment at risk lack any of the following three characteristics:

- The power, through voting or similar rights, to direct the activities of a legal entity that most significantly affect the entity’s economic performance
- The obligation to absorb the expected losses of the legal entity
- The right to receive the expected residual returns of the legal entity

Consolidated financial statements are usually necessary for a fair presentation if one of the entities in the consolidated group directly or indirectly has a controlling financial interest, typically a majority voting interest. Application of the majority voting interest requirement to certain types of entities may not identify the party with a controlling financial interest because that interest may be achieved through other arrangements. FASB ASC 810-10-25-38A explains that a reporting entity with a variable interest in a variable interest entity (VIE) should assess whether the reporting entity has a controlling financial interest in the VIE and, thus, is the VIE’s primary beneficiary. The reporting enterprise with a variable interest(s) that provides the reporting entity with a controlling financial interest in a VIE will have both the following characteristics: (a) the power to direct the activities of a VIE that most significantly affect the VIE’s performance and (b) the obligation to absorb losses of the VIE that could potentially be significant to the VIE or the right to

receive benefits from the VIE that could potentially be significant to the VIE. Only one reporting entity, if any, is expected to be identified as the primary beneficiary of a VIE. Although more than one reporting entity could have the obligation to absorb losses previously mentioned, only one reporting entity (if any) will have the power to direct the activities of a VIE that most significantly affect the VIE's economic performance. Further, the concept of a qualifying special-purpose entity no longer exists in FASB ASC.

**1.84** FASB ASC 810 also establishes accounting and reporting standards for the noncontrolling interest in a subsidiary and the deconsolidation of a subsidiary. A *noncontrolling interest* is the portion of equity (net assets) in a subsidiary not directly or indirectly attributable to a parent. A noncontrolling interest is sometimes called a minority interest.

## PRESENTATION

**1.85** FASB ASC 810-10-45-23 requires that a change in a parent's ownership interest while the parent retains its controlling financial interest in its subsidiary should be accounted for as equity transactions (investments by owners and distributions to owners acting in their capacity as owners). Therefore, no gain or loss shall be recognized in consolidated net income or comprehensive income. The carrying amount of the noncontrolling interest should be adjusted to reflect the change in its ownership interest in the subsidiary. Any difference between the fair value of the consideration received or paid and the amount by which the noncontrolling interest is adjusted should be recognized in equity attributable to the parent.

**1.86** Paragraphs 4–5 of FASB ASC 810-10-40 state that a parent should deconsolidate a subsidiary or derecognize a group of assets specified in FASB ASC 810-10-40-3A as of the date the parent ceases to have a controlling financial interest in that subsidiary or group of assets. If a parent deconsolidates a subsidiary or derecognizes a group of assets through a nonreciprocal transfer to owners, such as a spinoff, the applicable guidance is in FASB ASC 845-10. Otherwise, a parent should account for the deconsolidation of a subsidiary or derecognition of a group of assets by recognizing a gain or loss in net income attributable to the parent. This gain or loss is measured as the difference between (a) the aggregate of the fair value of any consideration received; the fair value of any retained noncontrolling interest in the former subsidiary of the group of assets at the date the subsidiary is deconsolidated or the group of assets is derecognized, and the carrying amount of any noncontrolling interest in the former subsidiary, including any accumulated other comprehensive income attributable to the noncontrolling interest, at the date the subsidiary is deconsolidated and (b) the carrying amount of the former subsidiary's assets and liabilities or the carrying amount of the group of assets.

## DISCLOSURE

**1.87** FASB ASC 810-10-50 states in part that consolidated financial statements should disclose the consolidation policy that is being followed. In most cases, this can be made apparent

by the headings or other information in the financial statements, but in other cases, a footnote is required.

**1.88** FASB ASC 810-10-50-1A also requires disclosure on the face of the consolidated financial statements of the amounts of consolidated net income and consolidated comprehensive income attributable to the parent and noncontrolling interest. Disclosures in the consolidated financial statements should clearly identify and distinguish between the interests of the parent's owners and the interests of the noncontrolling owners of a subsidiary. Those disclosures include a reconciliation of the beginning and ending balances of the equity attributable to the parent and noncontrolling owners and a schedule showing the effects of changes in a parent's ownership interest in a subsidiary on the equity attributable to the parent.

## PRESENTATION AND DISCLOSURE EXCERPTS

### Consolidation

#### 1.89

HARLEY-DAVIDSON, INC. (DEC)

#### NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

##### 1. Summary of Significant Accounting Policies (in part)

*Principles of Consolidation and Basis of Presentation*—The consolidated financial statements include the accounts of Harley-Davidson, Inc. and its wholly-owned subsidiaries (the Company), including the accounts of the groups of companies doing business as Harley-Davidson Motor Company (HDMC), Harley-Davidson Financial Services (HDFS) and Buell Motorcycle Company (Buell). In addition, certain variable interest entities (VIEs) related to secured financing are consolidated as the Company is the primary beneficiary. All intercompany accounts and transactions are eliminated.

All of the Company's subsidiaries are wholly owned and are included in the consolidated financial statements. Substantially all of the Company's international subsidiaries use their respective local currency as their functional currency. Assets and liabilities of international subsidiaries have been translated at period-end exchange rates, and income and expenses have been translated using average exchange rates for the period.

The Company operates in two principal business segments: Motorcycles & Related Products (Motorcycles) and Financial Services (Financial Services).

During 2008, the Company acquired Italian motorcycle manufacturer MV Agusta (MV). On October 15, 2009, the Company announced its intent to divest MV and completed the sale of MV on August 6, 2010. MV is presented as a discontinued operation for all periods.

##### New Accounting Standards (in part)

##### Consolidation of Off-Balance Sheet Special Purpose Entities

In June 2009, the Financial Accounting Standards Board (FASB) issued Statement of Financial Accounting Standards (SFAS) No. 166, "Accounting for Transfers of Financial

Assets, an amendment of FASB Statement No. 140.” SFAS No. 166 amended the guidance within Accounting Standards Codification (ASC) Topic 860, “Transfers and Servicing,” primarily by removing the concept of a qualifying special purpose entity as well as removing the exception from applying FASB Interpretation No. 46(R), “Consolidation of Variable Interest Entities.” Upon the effective adoption date, former QSPEs as defined under prior U.S. GAAP had to be evaluated for consolidation within an entity’s financial statements. Additionally, the guidance within ASC Topic 860 requires enhanced disclosures about the transfer of financial assets as well as an entity’s continuing involvement, if any, in transferred financial assets. In connection with term asset-backed securitization transactions prior to 2009, HDFS utilized QSPEs as defined under prior U.S. GAAP which were not subject to consolidation in the Company’s financial statements.

In June 2009, the FASB issued SFAS No. 167, “Amendments to FASB Interpretation No. 46(R).” SFAS No. 167 amended the guidance within ASC Topic 810, “Consolidations,” by adding formerly off-balance sheet QSPEs to its scope (the concept of these entities was eliminated by SFAS No. 166). In addition, companies must perform an analysis to determine whether the company’s variable interest or inter-

ests give it a controlling financial interest in a variable interest entity (VIE). Companies must also reassess on an ongoing basis whether they are the primary beneficiary of a VIE.

#### *Effects of Adoption on January 1, 2010*

The Company was required to adopt the new guidance within ASC Topic 810 and ASC Topic 860 as of January 1, 2010. The Company determined that the formerly unconsolidated QSPEs that HDFS utilized were VIEs, of which the Company was the primary beneficiary, and consolidated them into the Company’s financial statements beginning January 1, 2010. In accordance with ASC Topic 810, the Company measured the initial carrying values of the assets and liabilities of the VIEs by determining what those values would have been on January 1, 2010 as if the new guidance had been in effect when the Company first met the conditions as the primary beneficiary. The Company’s VIEs are discussed in further detail in Note 7.

The initial adoption of the new accounting guidance within ASC Topic 810 and ASC Topic 860 did not impact the Company’s statement of operations. The following table summarizes the effects on the Company’s balance sheet of adopting the new guidance within ASC Topic 810 and ASC Topic 860 on January 1, 2010 (in thousands):

|                                                                   | As of December 31, 2009 | Effect of Consolidation | As of January 1, 2010 |
|-------------------------------------------------------------------|-------------------------|-------------------------|-----------------------|
| Finance receivables held for investment <sup>(1)</sup>            | \$ 4,961,894            | \$ 1,922,833            | \$ 6,884,727          |
| Allowance for finance credit losses <sup>(1)</sup>                | \$ (150,082)            | \$ (49,424)             | \$ (199,506)          |
| Investment in retained securitization interests <sup>(1)</sup>    | \$ 245,350              | \$ (245,350)            | \$ —                  |
| Restricted cash held by variable interest entities <sup>(2)</sup> | \$ —                    | \$ 198,874              | \$ 198,874            |
| Other current assets <sup>(2)</sup>                               | \$ 462,106              | \$ 40,224               | \$ 502,330            |
| Accrued liabilities                                               | \$ (514,084)            | \$ (11,952)             | \$ (526,036)          |
| Long-term debt                                                    | \$(5,446,130)           | \$(1,892,313)           | \$(7,338,443)         |
| Retained earnings                                                 | \$(6,324,268)           | \$ 40,591               | \$(6,283,677)         |
| Accumulated other comprehensive loss                              | \$ 417,898              | \$ (3,483)              | \$ 414,415            |

<sup>(1)</sup> These three lines items were reported together as finance receivables held for investment, net prior to January 1, 2010.

<sup>(2)</sup> At December 31, 2009, the Company had \$167.7 million of restricted cash related to its 2009 on-balance sheet term-asset backed securitization transactions and its asset-backed commercial paper conduit facility. These amounts were reported within Other current assets as of December 31, 2009.

#### *Financial Statement Comparability to Prior Periods*

The new accounting guidance within ASC Topic 810 and ASC Topic 860 is adopted on a prospective basis. Prior periods have not been restated and therefore will not be comparable to the current period as discussed below.

Under the new accounting guidance, the Company’s securitization transactions are considered secured borrowings rather than asset sales. Beginning in 2010, the Company recognizes interest income and credit losses on the previously unconsolidated securitized receivables and interest expense on the related debt. The Company’s statement of operations no longer includes income from securitizations which consisted of an initial gain or loss on new securitization transactions, income on the investment in retained securitization interests and servicer fees. In addition, the Company no longer incurs charges related to other-than-temporary impairments on its investment in retained securitization interests as that asset has been derecognized.

Finance receivables consolidated as part of the adoption of the new accounting guidance, as well as finance receivables securitized as part of the Company’s 2009 on-balance sheet securitization transactions and finance receivables restricted

as collateral under the Company’s asset-backed commercial paper conduit facility, are reported on the Company’s balance sheet as restricted finance receivables held for investment by VIEs. Prior to the adoption of the new accounting guidance, finance receivables held by VIEs were included in finance receivables held for investment. In addition, finance receivable securitization debt is now reported as debt held by VIEs.

Historically, U.S. retail motorcycle finance receivables intended for securitization through off-balance sheet securitization transactions were initially classified as finance receivables held for sale. Accordingly, all of the related cash flows were classified as operating cash flows in the statement of cash flows. After the adoption of the new guidance within ASC Topic 810 and ASC Topic 860, all retail finance receivables are considered held for investment, as the Company has the intent and ability to hold the finance receivables for the foreseeable future, or until maturity. The adoption guidance within ASC Topic 810 and ASC Topic 860 requires the Company to apply the standards on a prospective basis as if they had always been in effect. Therefore, the Company has classified post-January 1, 2010 cash flows related to all of its retail motorcycle finance receivables as investing cash flows in the statement of cash flows.

**1.90****TRINITY INDUSTRIES, INC. (DEC)****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS***Note 1. Summary of Significant Accounting Policies (in part)**Principles of Consolidation (in part)*

The financial statements of Trinity Industries, Inc. and its consolidated subsidiaries ("Trinity," "Company," "we" or "our") include the accounts of all majority owned subsidiaries. The equity method of accounting is used for companies in which the Company has significant influence and 50% or less ownership. All significant intercompany accounts and transactions have been eliminated.

On January 1, 2010, the Company adopted the provisions of a new accounting standard, Accounting Standards Codification ("ASC") 810-10, requiring the inclusion of the consolidated financial statements of TRIP Holdings and subsidiary in the consolidated financial statements of the Company as of January 1, 2010. Prior to January 1, 2010, the Company's investment in TRIP Holdings was accounted for using the equity method. Accordingly, the consolidated balance sheet of the Company as of December 31, 2010 and the consolidated statements of operations, cash flows, and stockholders' equity for the year ended December 31, 2010 include the accounts of all subsidiaries including TRIP Holdings. As a result of adopting this pronouncement, we determined the effects on Trinity's consolidated financial statements as if TRIP Holdings had been included in the Company's consolidated financial statements from TRIP Holdings' inception and recorded a charge to retained earnings of \$105.4 million, net of \$57.7 million of tax benefit, and a noncontrolling interest of \$129.9 million as of January 1, 2010. Prior periods were not restated. All significant intercompany accounts and transactions have been eliminated. Profits have been deferred on sales of railcars from the Rail or Leasing Group to TRIP Holdings and will be amortized over the life of the related equipment. Additionally, any future profits on the sale of railcars to TRIP Holdings will be deferred and amortized over the life of the related equipment. The noncontrolling interest represents the non-Trinity equity interest in TRIP Holdings. In September 2010, Trinity increased its ownership interest in TRIP Holdings to 57.1%. The effect of adopting this accounting standard was an increase to net income from continuing operations and net income attributable to Trinity Industries, Inc. of \$5.3 million or \$0.07 per basic diluted share. The effect of adopting this accounting standard was an increase to income from continuing operations and net income attributable to Trinity Industries, Inc. of \$5.3 million or \$0.07 per share.

**1.91****BALL CORPORATION (DEC)****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS***1. Critical and Significant Accounting Policies (in part)*

The preparation of the company's consolidated financial statements in conformity with accounting principles generally accepted in the United States of America (U.S. GAAP) requires Ball's management to make estimates and assumptions that affect the reported amounts in our consolidated financial statements and the accompanying notes including various claims and contingencies related to lawsuits, taxes, environmental and other matters arising during the normal course of business. These estimates are based on management's best judgment, knowledge of existing facts and circumstances and actions that may be undertaken in the future. Ball's management evaluates the estimates on an ongoing basis using the company's historical experience, as well as other factors believed to be appropriate under the circumstances, such as current economic conditions, and adjusts or revises the estimates as circumstances change. As future events and their effects cannot be determined with precision, actual results may differ from these estimates. The financial statements reflect all adjustments necessary, in the opinion of management, for the fair presentation of results.

*Significant Accounting Policies (in part)**Principles of Consolidation and Basis of Presentation (in part)*

The consolidated financial statements include the accounts of Ball Corporation, its subsidiaries and variable interest entities in which Ball Corporation is considered to be the primary beneficiary (collectively, Ball, the company, we or our). Equity investments in which the company exercises significant influence but does not control and is not the primary beneficiary are accounted for using the equity method of accounting. Investments in which the company does not exercise significant influence over the investee are accounted for using the cost method of accounting. Intercompany transactions are eliminated.

*5. Business Consolidation and Other Activities*

Following is a summary of business consolidation (charges)/gains included in the consolidated statements of earnings for the years ended December 31:

| (\$ in millions)                 | 2010   | 2009     | 2008     |
|----------------------------------|--------|----------|----------|
| Metal beverage packaging,        |        |          |          |
| Americas & Asia                  | \$ —   | \$ (6.8) | \$(40.6) |
| Metal beverage packaging, Europe | (3.2)  | —        | —        |
| Metal food & household products  |        |          |          |
| packaging, Americas              | 18.3   | (2.6)    | 1.6      |
| Corporate other costs            | (4.1)  | (12.0)   | (4.8)    |
|                                  | \$11.0 | \$(21.4) | \$(43.8) |

## 2010

### *Metal Beverage Packaging, Europe*

During the fourth quarter of 2010, the company recorded a charge of \$2.6 million to write off capitalized installation costs associated with the decision not to complete a plant in Lublin, Poland. Also included in the fourth quarter were charges totaling \$0.6 million for transaction costs incurred for the January 2011 acquisition of Aerocan S.A.S. (See Note 23.)

### *Metal Food and Household Products Packaging, Americas*

In September 2010, Ball announced the closure of its metal food container manufacturing plant in Richmond, British Columbia. The plant, which produces steel cans for the Alaskan and Canadian salmon industry, will cease production in the first quarter of 2011, and its production capacity will be consolidated into other Ball facilities. In connection with the closure, the company recorded a charge of \$4.6 million primarily for severance and other employee benefits. In the fourth quarter of 2010, the company completed the sale and subsequent leaseback of its Richmond, British Columbia, facility resulting in a \$5.1 million gain on the sale net of estimated lease exit costs and other individually insignificant items.

During the third quarter of 2010, the company identified an accrual of a pension liability related to a Canadian plant closure that occurred in 2006. The amount of the accrual was \$17.8 million (\$14.5 million after tax) and was the result of recognizing the final settlement of the pension plan prior to the actual settlement of the pension obligation as defined in the pension accounting guidance. A third quarter 2010 out-of-period adjustment eliminated the excess pension liability balance related to the final settlement. The accrual for the pension settlement liability, as determined at that time, will be charged to earnings from accumulated other comprehensive earnings (loss) upon final settlement of the related pension obligation when the criteria in the accounting guidance are deemed to have been met and all regulatory clearances have been given. Management has assessed the impact of this adjustment and does not believe these amounts were quantitatively or qualitatively material, individually or in the aggregate, to any previously issued financial statements, including the results of operations for 2006, or to the 2010 results of operations.

### *Corporate and Other Costs*

In the third and fourth quarter of 2010, charges totaling \$1.0 million were recorded primarily for transaction costs related to the acquisition of Neuman (discussed in Note 3). In the second quarter of 2010, charges of \$3.1 million were recorded primarily to establish a reserve associated with an environmental matter at a previously owned facility.

## 2009

### *Metal Beverage Packaging, Americas and Asia*

During the fourth quarter, income of \$4.2 million was recorded to reflect the reversal of previously recorded employee benefit charges taken primarily related to the closures of the Puerto Rico and Kansas City plants, which were announced in the fourth quarter of 2008. The reversal was due to the original estimates of group insurance and other employee-related costs being higher than actual experience rates. These gains

were partially offset by other charges recognized in the fourth quarter totaling \$1.0 million primarily for fixed asset disposals where original adjustments to net realizable value were insufficient.

A charge of \$0.7 million was also recorded in the fourth quarter for acquisition costs required to be expensed related to the acquisition in the PRC of the remaining outstanding shares of Jianlibao. (See Note 3.) During the third quarter, a charge of \$1 million was recorded, primarily for additional costs of winding down the Puerto Rico and Kansas City plants, the closures of which were announced in the fourth quarter of 2008. In the second quarter of 2009, a charge of \$3.3 million was taken for severance and other employee benefits related to a reduction of personnel in the plants and headquarters of the Americas portion of this segment. Most of the costs were paid by the end of 2009. In the first quarter of 2009, a charge of \$5 million was taken related to accelerated depreciation for operations that ceased at the Kansas City plant.

### *Metal Food & Household Products Packaging, Americas*

In the fourth quarter, Ball recorded a charge of \$2.6 million primarily for higher than originally estimated employee benefit and lease termination costs related to previously announced plant closures.

### *Corporate Other Costs*

Charges of \$12.0 million were recorded in 2009 primarily for transaction costs required to be expensed for the acquisition of three metal beverage can plants and one beverage can end plant from AB InBev. (See Note 3.)

## 2008

### *Metal Beverage Packaging, Americas & Asia*

On October 30, 2008, the company announced the closure of two North American metal beverage can plants. A plant in Kansas City, Missouri, which primarily manufactured specialty beverage cans, was closed by the end of the first quarter of 2009 with manufacturing volumes absorbed by other North American beverage can plants. A plant in Puerto Rico, which manufactured 12-ounce beverage cans, was closed at the end of 2008. A pretax charge of \$40.7 million was recorded in the fourth quarter of 2008. The charge included \$17 million for employee severance, pension and other employment benefit costs; and \$9 million of accelerated depreciation and \$14 million for the write down to net realizable value of certain fixed assets and related spare parts. The carrying value of fixed assets remaining for sale in connection with the plant closures was \$4.9 million at December 31, 2010.

On April 23, 2008, the company announced plans to close a U.S. metal beverage packaging plant in Kent, Washington. A charge of \$11.2 million was recorded during the second and third quarters and included \$9.2 million for employee severance, pension and other employee benefit costs and \$2 million primarily related to accelerated depreciation and the write down to net realizable value of certain fixed assets, related spare parts and tooling inventory. The plant was shut down during the third quarter, and the land and building was sold in the fourth quarter for a gain of \$4.1 million. All remaining costs, excluding pension costs of \$5.2 million, were paid during 2009.

A gain of \$7.2 million was recorded in the second quarter for the recovery of previously expensed costs in a prior metal beverage business consolidation charge. This reflects a decision made in the second quarter to continue to operate existing end-making equipment and not install a new beverage can end module that would have been part of a multi-year project. The remaining reserves were utilized in 2010.

During 2007, the company settled a dispute with a U.S. customer, which was primarily related to the pricing of the aluminum component of the containers it supplied. The customer received \$85.6 million on settlement of the dispute, and Ball retained all of the customer's beverage can and end supply through 2015. The customer received a one-time payment of approximately \$70.3 million in January 2008 with the remainder of the settlement to be recovered over the life of the contract through 2015.

#### *Metal Food & Household Products Packaging, Americas*

During 2008 the company recorded a net pretax gain of \$1.6 million for business consolidation activities. In addition to

costs recorded in the fourth quarter of 2007, during the third quarter of 2008, a charge of \$4.5 million was recorded for lease cancellation costs on final shutdown of the Commerce, California, facility. In the fourth quarter, a \$6.1 million gain was recorded primarily related to management's decision in the fourth quarter to remain in the custom and decorative tinplate can business based on market conditions. All remaining reserves related to Commerce and Tallapoosa, Georgia (see 2007 discussion below), excluding lease cancellation costs, were utilized during 2009.

#### *Corporate Other Costs*

During 2008 pretax charges of \$4.8 million were recorded for estimated environmental costs related to previously closed and sold facilities.

#### *Summary*

Following is a summary of reserve activity by segment related to business consolidation activities for the year ended December 31, 2010. The reserve balances are included in other current liabilities on the consolidated balance sheets.

| (\$ in millions)                           | Metal Beverage<br>Packaging,<br>Americas & Asia | Metal Beverage<br>Packaging,<br>Europe | Metal Food<br>& Household<br>Products Packaging,<br>Americas | Corporate and<br>Other Costs | Total   |

## BUSINESS COMBINATIONS

### RECOGNITION AND MEASUREMENT

**1.92** FASB ASC 805, *Business Combinations*, requires that the acquisition method be used for all business combinations. An acquirer is required to recognize the identifiable acquired assets, the liabilities assumed, and any noncontrolling interest in the acquiree at the acquisition date, measured at their fair values as of that date. Additionally, FASB ASC 805 requires costs incurred to affect the acquisition to be recognized as expenses as incurred, rather than included in the cost allocated to the acquired assets and assumed liabilities. However, the costs to issue debt or equity securities should be recognized in accordance with other applicable GAAP. In a business combination achieved in stages, FASB ASC 805 also requires the acquirer to remeasure its previously-held equity interest in the acquiree at its acquisition date fair value and recognize the resulting gain or loss, if any, in earnings. For all business combinations, the

guidance requires the acquirer to recognize goodwill as of the acquisition date, measured as the excess of (a) over (b):

- a. The aggregate of the following:
  - i. The transferred consideration measured in accordance with FASB ASC 805-30, which generally requires acquisition-date fair value
  - ii. The fair value of any noncontrolling interest in the acquiree
  - iii. In a business combination achieved in stages, the acquisition-date fair value of the acquirer's previously-held equity interest in the acquiree
- b. The net of the acquisition-date amounts of the identifiable acquired assets and the assumed liabilities, measured in accordance with FASB ASC 805

If the amounts in (b) are in excess of those in (a), a bargain purchase has occurred. Before recognizing a gain on a bargain purchase, the acquirer shall reassess whether it has correctly identified all the acquired assets and assumed liabilities and should recognize any additional assets or liabilities identified in that review. If an excess still remains, the acquirer should recognize the resulting gain in earnings on the acquisition date.

## DISCLOSURE

**1.93** FASB ASC 805-10-50 requires the acquirer to disclose information that enables financial statement users to evaluate the nature and financial statement effect of a business combination that occurs during the current reporting period or after the reporting date but before the financial statements are issued or available to be issued. To meet this objective, the following items should be disclosed:

- The name and a description of the acquiree
- The acquisition date
- The percentage of voting equity interests acquired
- The primary reasons for the business combination and a description of how control was obtained
- For public business entities
  - The amounts of revenue and earnings of the acquiree since the acquisition date included in the consolidated income statement for the reporting period
  - The revenue and earnings of the combined entity for the current reporting period as though the acquisition date for all business combinations that occurred during the year had been as of the annual reporting period (supplemental pro forma information)
  - If comparative financial statements are presented, the revenue and earnings of the combined entity for the comparable prior reporting period as though the acquisition date for all business combinations that occurred during the current year had occurred as of the beginning of the comparable prior annual reporting period (supplemental pro forma information)

If any of the preceding disclosures for public business entities are impracticable, the acquirer should disclose that fact and explain why. Additional disclosures are required for transactions that are recognized separately from the acquisition of assets and assumptions of liabilities in the business combination and for business combinations achieved in stages.

### Author's Note

In December 2010, FASB Accounting Standards Update (ASU) No. 2010-29, *Business Combinations (Topic 805): Disclosure of Supplementary Pro Forma Information for Business Combinations (a consensus of the FASB Emerging Issues Task Force)*, was issued. This ASU clarifies that if comparative financial statements are presented, the pro forma revenue and earnings of the combined entity for the comparable prior reporting period should be reported as though the acquisition date for all business combinations that occurred during the current year had been as of the beginning of the comparable prior annual reporting period. Further, a public business entity will also be required to disclose the nature and amount of any material, nonrecurring pro forma adjustments directly attributable to the business combination(s) included in the reported pro forma revenue and earnings. The amendments in this ASU are effective prospectively for business combinations for which the acquisition date is on or after the beginning of the first annual reporting period beginning on or after December 15, 2010. Early adoption is permitted.

## PRESENTATION AND DISCLOSURE EXCERPTS

### Business Combinations

#### 1.95

#### CATERPILLAR INC. (DEC)

#### NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

#### 23. Business Combinations and Alliances

##### *Electro-Motive Diesel, Inc.*

In August 2010, we acquired 100 percent of the equity in privately held Electro-Motive Diesel, Inc. (EMD) for approximately \$901 million, consisting of \$928 million paid at closing less a final net working capital adjustment of \$27 million received in the fourth quarter of 2010. Headquartered in LaGrange, Illinois with additional manufacturing facilities in Canada and Mexico, EMD designs, manufactures and sells diesel-electric locomotives for commercial railroad applications and sells its products to customers throughout the world. EMD has a significant field population in North America and throughout the world supported by an aftermarket business offering customers replacement parts, maintenance solutions, and a range of value-added services. EMD is also a global provider of diesel engines for marine propulsion, offshore and land-based oil well drilling rigs, and stationary power generation. The acquisition supports our strategic plan to grow our presence in the global rail industry. The EMD acquisition will enable us to provide rail and transit customers a range of locomotive, engine and emissions solutions, as

well as aftermarket product and parts support and a full line of rail-related services and solutions.

The transaction was financed with available cash. Tangible assets acquired of \$890 million, recorded at their fair values, primarily were receivables of \$186 million, inventories of \$549 million and property, plant and equipment of \$131 million. Finite-lived intangible assets acquired of \$329 million were primarily related to customer relationships and also included intellectual property and trade names. The finite-lived intangible assets are being amortized on a straight-line basis over a weighted-average amortization period of approximately 15 years. An additional intangible asset acquired of \$18 million, related to in-process research and development, is considered indefinite-lived until the completion or abandonment of the development activities. Liabilities assumed of \$518 million, recorded at their fair values, primarily included accounts payable of \$124 million and accrued expenses of \$161 million. Additionally, net deferred tax liabilities were \$104 million. Goodwill of \$286 million, substantially all of which is non-deductible for income tax purposes, represents the excess of cost over the fair value of the net tangible and intangible assets acquired. Factors that contributed to a purchase price resulting in the recognition of goodwill include EMD's strategic fit into our product and services portfolio, aftermarket support opportunities and the acquired assembled workforce. The results of the acquired business for the period from the acquisition date are included in the accompanying consolidated financial statements and are reported in the "All Other" category in Note 22. Assuming this transaction had been made at the beginning of any period presented, the consolidated pro forma results would not be materially different from reported results.

#### *FCM Rail Ltd.*

In May 2010, we acquired 100 percent of the equity in privately held FCM Rail Ltd. (FCM) for approximately \$97 million, including the assumption of \$59 million in debt. We paid \$32 million at closing and an additional \$1 million post-closing adjustment paid in October 2010. There is also an additional \$5 million to be paid by May 2012. FCM is one of the largest lessors of maintenance-of-way (MOW) equipment in the United States, and is located in Fenton, Michigan. This acquisition strengthens Progress Rail's position in the MOW industry by expanding its service offerings.

The transaction was financed with available cash. Tangible assets acquired of \$93 million, primarily consisting of property, plant and equipment, were recorded at their fair values. Finite-lived intangible assets acquired of \$10 million related to customer relationships are being amortized on a straight-line basis over 15 years. Liabilities assumed of \$82 million, including \$59 million of assumed debt, were recorded at their fair values. Goodwill of \$17 million, non-deductible for income tax purposes, represents the excess of cost over the fair value of net tangible and finite-lived intangible assets acquired. The results of the acquired business for the period from the acquisition date are included in the accompanying consolidated financial statements and reported in the "All Other" category in Note 22. Assuming this transaction had been made at the beginning of any period presented, the consolidated pro forma results would not be materially different from reported results.

#### *GE Transportation's Inspection Products Business*

In March 2010, we acquired the Inspection Products business from GE Transportation's Intelligent Control Systems division for approximately \$46 million, which includes \$1 million paid for post-closing adjustments. The acquired business has operations located primarily in the United States, Germany and Italy that design, manufacture and sell hot wheel and hot box detectors, data acquisition systems, draggers and other related inspection products for the global freight and passenger rail industries. The acquisition supports our strategic initiative to expand the scope and product range of our rail signaling business and will provide a foundation for further global expansion of this business.

The transaction was financed with available cash. Tangible assets acquired of \$12 million and liabilities assumed of \$9 million were recorded at their fair values. Finite-lived intangible assets acquired of \$28 million related to customer relationships and intellectual property are being amortized on a straight-line basis over a weighted-average amortization period of approximately 13 years. Goodwill of \$15 million, approximately \$8 million of which is deductible for income tax purposes, represents the excess of cost over the fair value of the net tangible and finite-lived intangible assets acquired. The results of the acquired business for the period from the acquisition date are included in the accompanying consolidated financial statements and are reported in the "All Other" category in Note 22. Assuming this transaction had been made at the beginning of any period presented, the consolidated pro forma results would not be materially different from reported results.

#### *JCS Company, Ltd.*

In March 2010, we acquired 100 percent of the equity in privately held JCS Company Ltd. (JCS) for approximately \$34 million, consisting of \$32 million paid at closing and an additional \$2 million post-closing adjustment paid in June 2010. Based in Pyongtaek, South Korea, JCS is a leading manufacturer of centrifugally cast metal face seals used in many of the idlers and rollers contained in our undercarriage components. JCS is also a large supplier of seals to external customers in Asia and presents the opportunity to expand our customer base. The purchase of this business provides Caterpillar access to proprietary technology and expertise, which we will be able to replicate across our own seal production processes.

The transaction was financed with available cash. Tangible assets acquired of \$22 million and liabilities assumed of \$8 million were recorded at their fair values. Finite-lived intangible assets acquired of \$12 million related to intellectual property and customer relationships are being amortized on a straight-line basis over a weighted-average amortization period of approximately 9 years. Goodwill of \$8 million, non-deductible for income tax purposes, represents the excess of cost over the fair value of net tangible and finite-lived intangible assets acquired. The results of the acquired business for the period from the acquisition date are included in the accompanying consolidated financial statements and reported in the "Core Components" segment in Note 22. Assuming this transaction had been made at the beginning of any period presented, the consolidated pro forma results would not be materially different from reported results.

### *NC<sup>2</sup> Joint Venture*

In September 2009, we entered into a joint venture with Navistar International Corporation (Navistar), resulting in a new company, NC<sup>2</sup> Global LLC (NC<sup>2</sup>). NC<sup>2</sup> will develop, manufacture, market, distribute and provide product support for heavy and medium duty trucks outside of North America, the Indian subcontinent, Myanmar (Burma) and Malaysia. Initially, NC<sup>2</sup> will focus its activities in Australia, Brazil, and South Africa. NC<sup>2</sup>'s product line will feature both conventional and cab-over truck designs and will be sold under both the Caterpillar and International brands.

Under the joint venture operating agreement, Caterpillar and Navistar each contributed \$19 million during 2009 and \$80 million during 2010. Our investment in NC<sup>2</sup>, accounted for by the equity method, is included in Investments in unconsolidated affiliated companies in Statement 2.

### *Lovat Inc.*

In April 2008, we acquired 100 percent of the equity in privately held Lovat Inc. (Lovat) for approximately \$49 million. Based in Toronto, Canada, Lovat is a leading manufacturer of tunnel boring machines used globally in the construction of subway, railway, road, sewer, water main, mine access and high voltage cable and telecommunications tunnels. Expansion into the tunnel boring business is a strong fit with our strategic direction and the customers we serve around the world.

The transaction was financed with available cash and commercial paper borrowings. Net tangible assets acquired and liabilities assumed of \$10 million were recorded at their fair values. Finite-lived intangible assets acquired of \$17 million related to customer relationships, intellectual property and trade names are being amortized on a straight-line basis over a weighted-average amortization period of approximately 6 years. Goodwill of \$22 million, non-deductible for income tax purposes, represents the excess of cost over the fair value of net tangible and finite-lived intangible assets acquired. The results of the acquired business for the period from the acquisition date are included in the accompanying consolidated financial statements and reported in the "Mining" segment in Note 22. Assuming this transaction had been made at the beginning of any period presented, the consolidated pro forma results would not be materially different from reported results.

### *Gremada Industries Inc.*

In July 2008, we acquired certain assets and assumed certain liabilities of Gremada Industries, Inc. (Gremada), a supplier to our remanufacturing business. The cost of the acquisition was \$62 million, consisting of \$60 million paid at closing and an additional \$2 million post-closing adjustment paid in August 2008. Gremada is a remanufacturer of transmissions, torque converters, final drives and related components. This acquisition increases our product and service offerings for our existing customers, while providing a platform for further growth opportunities.

This transaction was financed with available cash and commercial paper borrowings. Net tangible assets acquired and liabilities assumed of \$21 million were recorded at their fair values. Goodwill of \$41 million, deductible for income tax purposes, represents the excess of cost over the fair value of net tangible assets acquired. The results of the acquired business for the period from the acquisition date are included

in the accompanying consolidated financial statements and are reported in the "All Other" category in Note 22. Assuming this transaction had been made at the beginning of any period presented, the consolidated pro forma results would not be materially different from reported results.

### *Shin Caterpillar Mitsubishi Ltd. (SCM)*

On August 1, 2008, SCM completed the first phase of a share redemption plan whereby SCM redeemed half of MHI's shares in SCM for \$464 million. This resulted in Caterpillar owning 67 percent of the outstanding shares of SCM and MHI owning the remaining 33 percent. As part of the share redemption, SCM was renamed Caterpillar Japan Ltd. (Cat Japan). Both Cat Japan and MHI have options, exercisable beginning August 1, 2013, to require the redemption of the remaining shares owned by MHI, which if exercised, would make Caterpillar the sole owner of Cat Japan. The share redemption plan is part of our comprehensive business strategy for expansion in the emerging markets of Asia and the Commonwealth of Independent States and will allow Cat Japan's manufacturing, design and process expertise to be fully leveraged across the global Caterpillar enterprise.

The change in Caterpillar's ownership interest from 50 percent to 67 percent was accounted for as a business combination. The \$464 million redemption price was assigned to 17 percent of Cat Japan's assets and liabilities based upon their respective fair values as of the transaction date. The revaluation resulted in an increase in property, plant and equipment of \$78 million and an increase in inventory of \$8 million over the book value of these assets. Finite-lived intangible assets of \$54 million were recognized and related primarily to customer relationships, intellectual property and trade names. These intangibles are being amortized on a straight-line basis over a weighted-average amortization period of approximately 9 years. Deferred tax liabilities of \$57 million were also recognized as part of the business combination. Goodwill of \$206 million, non-deductible for income tax purposes, represents the excess of the redemption price over the 17 percent of Cat Japan's net tangible and finite-lived intangible assets that were reported at their fair values.

Because Cat Japan is accounted for on a lag, we consolidated Cat Japan's August 1, 2008 financial position on September 30, 2008. We began consolidating Cat Japan's results of operations in the fourth quarter of 2008. Including the amounts assigned as part of the business combination, the initial consolidation of Cat Japan's financial position resulted in a net increase in assets of \$2,396 million (primarily property, plant and equipment of \$1,279 million, inventory of \$640 million, receivables of \$612 million, and goodwill and intangibles of \$260 million partially offset by a \$528 million reduction in investment in unconsolidated affiliates) and a net increase in liabilities of \$2,045 million (including \$1,388 million in debt). Cat Japan's functional currency is the Japanese yen.

The remaining 33 percent of Cat Japan owned by MHI has been reported as redeemable noncontrolling interest and classified as mezzanine equity (temporary equity) in Statement 2. On September 30, 2008, the redeemable noncontrolling interest was reported at its estimated future redemption value of \$464 million with the difference between the \$351 million book value of the 33 percent interest and the redemption value reported as a \$113 million reduction of Profit employed in the business. See Note 24 for information on

the subsequent reporting of the redeemable noncontrolling interest.

Cat Japan is included in the “Cat Japan” segment in Note 22. Assuming this transaction had been made at the beginning of any period presented, the consolidated pro forma results would not be materially different from reported results.

## 1.96

### FRONTIER COMMUNICATIONS CORPORATION (DEC)

#### NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

##### (2) Recent Accounting Literature and Changes in Accounting Principles

###### Business Combinations

Business combinations are accounted for utilizing the guidance of Accounting Standards Codification (ASC) Topic 805, formerly Statement of Financial Accounting Standards (SFAS) No. 141R, as amended by FSP SFAS No. 141(R)-1 which became effective on January 1, 2009. ASC Topic 805 requires an acquiring entity in a transaction to recognize all of the assets acquired and liabilities assumed at fair value at the acquisition date, to recognize and measure preacquisition contingencies, including contingent consideration, at fair value (if possible), to remeasure liabilities related to contingent consideration at fair value in each subsequent reporting period and to expense all acquisition related costs. We are accounting for our July 1, 2010 acquisition of approximately 4.0 million access lines from Verizon Communications Inc. (Verizon) (the Transaction or the Merger) using the guidance included in ASC Topic 805. We incurred approximately \$137.1 million and \$28.3 million of acquisition and integration related costs in connection with the Transaction during 2010 and 2009, respectively. Such costs are required to be expensed as incurred and are reflected in “Acquisition and integration costs” in our consolidated statements of operations.

##### (3) Acquisitions

###### The Transaction

On July 1, 2010, Frontier acquired the defined assets and liabilities of the local exchange business and related landline activities of Verizon in Arizona, Idaho, Illinois, Indiana, Michigan, Nevada, North Carolina, Ohio, Oregon, South Carolina, Washington, West Virginia and Wisconsin and in portions of California bordering Arizona, Nevada and Oregon (collectively, the Territories), including Internet access and long distance services and broadband video provided to designated customers in the Territories (the Acquired Business). Frontier is considered the accounting acquirer of the Acquired Business.

Our consolidated statement of operations for the year ended December 31, 2010 includes \$1,748.1 million of revenue and \$231.5 million of operating income related to the results of operations of the Acquired Business from the date of its acquisition on July 1, 2010.

The allocation of the purchase price of the Acquired Business is based on the fair value of assets acquired and liabilities assumed as of July 1, 2010, the effective date of the Merger. Our assessment of fair value is preliminary, and will be adjusted for information that is currently not available to us, primarily related to the tax basis of assets acquired, certain accruals and contingencies, pension assets and liabilities, and other assumed postretirement benefit obligations.

The fair value amounts recorded for the allocation of the purchase price as of July 1, 2010 are preliminary and certain items are subject to change. The most significant items include: legal and tax accruals, including sales and utility tax liabilities for the states of Washington and Indiana, pending the finalization of examinations and valuations of various cases; other accrued liabilities pending receipt of supporting documentation; deferred income tax assets and liabilities, pending Verizon providing us with tax values for the assets and liabilities of the Acquired Business; and pension and other postretirement liabilities, pending completion of actuarial studies and the related transfer of pension assets.

The preliminary allocation of the purchase price presented below represents the effect of recording the preliminary estimates of the fair value of assets acquired, liabilities assumed and related deferred income taxes as of the date of the Merger, based on the total transaction consideration of \$5.4 billion. The following allocation of purchase price includes minor revisions to the initial preliminary allocation that was reported as of September 30, 2010. These preliminary estimates will be revised in future periods and the revisions may materially affect the presentation of our consolidated financial results. Any changes to the initial estimates of the fair value of the assets and liabilities will be recorded as adjustments to those assets and liabilities and residual amounts will be allocated to goodwill.

(\$ In thousands)

|                                           |             |
|-------------------------------------------|-------------|
| Total transaction consideration:          | \$5,411,705 |
| Current assets                            | \$ 479,993  |
| Property, plant & equipment               | 4,417,567   |
| Goodwill                                  | 3,649,871   |
| Other intangibles—primarily customer list | 2,537,100   |
| Other assets                              | 75,092      |
| Current liabilities                       | (509,234)   |
| Deferred income taxes                     | (1,303,626) |
| Long-term debt                            | (3,456,782) |
| Other liabilities                         | (478,276)   |
| Total net assets acquired                 | \$5,411,705 |

The Transaction provides for a post-closing adjustment for working capital, pension liabilities transferred and pension assets. Frontier and Verizon have not finalized the results of these calculations. If an adjustment is made for the working capital “true-up,” the purchase price allocation will be revised.

The fair value of the total consideration issued to acquire the Acquired Business amounted to \$5.4 billion and included \$5.2 billion for the issuance of Frontier common shares and cash payments of \$105.0 million. As a result of the Merger, Verizon stockholders received 678,530,386 shares of Frontier common stock. Immediately after the closing of the Merger, Verizon stockholders owned approximately 68.4% of the combined company’s outstanding equity, and existing

Frontier stockholders owned approximately 31.6% of the combined company's outstanding equity.

The following unaudited pro forma financial information presents the combined results of operations of Frontier and the Acquired Business as if the acquisition had occurred as of January 1, 2009. The pro forma information is not necessarily indicative of what the financial position or results of operations actually would have been had the acquisition been completed as of January 1, 2009. In addition, the unaudited pro forma financial information is not indicative of, nor does it purport to project, the future financial position or operating results of Frontier. The unaudited pro forma financial information excludes acquisition and integration costs and does not give effect to any estimated and potential cost savings or other operating efficiencies that could result from the Merger.

### BOSTON SCIENTIFIC CORPORATION (DEC)

#### NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

##### Note B—Acquisitions

During 2010, we paid approximately \$200 million in cash to acquire Asthmatx, Inc. and certain other strategic assets. We did not consummate any material acquisitions during 2009. During 2008, we paid approximately \$40 million in cash to acquire CryoCor, Inc. and Labcoat, Ltd. Each of these acquisitions is described in further detail below. The purchase price allocations presented for our 2010 acquisitions are preliminary, pending finalization of the valuation surrounding deferred tax assets and liabilities, and will be finalized in 2011.

Our consolidated financial statements include the operating results for each acquired entity from its respective date of acquisition. We do not present pro forma information for these acquisitions given the immateriality of their results to our consolidated financial statements.

##### 2010 Acquisitions

##### Asthmatx, Inc.

On October 26, 2010, we completed the acquisition of 100 percent of the fully diluted equity of Asthmatx, Inc. Asthmatx designs, manufactures and markets a less-invasive, catheter-based bronchial thermoplasty procedure for the

treatment of severe persistent asthma. The acquisition was intended to broaden and diversify our product portfolio by expanding into the area of endoscopic pulmonary intervention. We are integrating the operations of the Asthmatx business into our Endoscopy division. We paid approximately \$194 million at the closing of the transaction using cash on hand, and may be required to pay future consideration up to \$250 million that is contingent upon the achievement of certain revenue-based milestones.

As of the acquisition date, we recorded a contingent liability of \$54 million, representing the estimated fair value of the contingent consideration we currently expect to pay to the former shareholders of Asthmatx upon the achievement of certain revenue-based milestones. The acquisition agreement provides for payments on product sales using technology acquired from Asthmatx of up to \$200 million through December 2016 and, in addition, we may be obligated to pay a one-time revenue-based milestone payment of \$50 million, no later than 2019, for a total of \$250 million in maximum future consideration.

The fair value of the contingent consideration liability associated with the \$200 million of potential payments was estimated by discounting, to present value, the contingent payments expected to be made based on our estimates of the revenues expected to result from the acquisition. We used a risk-adjusted discount rate of 20 percent to reflect the market risks of commercializing this technology, which we believe is appropriate and representative of market participant assumptions. For the \$50 million milestone payment, we used a probability-weighted scenario approach to determine the fair value of this obligation using internal revenue projections and external market factors. We applied a rate of probability to each scenario, as well as a risk-adjusted discount factor, to derive the estimated fair value of the contingent consideration as of the acquisition date. This fair value measurement is based on significant unobservable inputs, including management estimates and assumptions and, accordingly, is classified as Level 3 within the fair value hierarchy prescribed by ASC Topic 820, *Fair Value Measurements and Disclosures* (formerly FASB Statement No. 157, *Fair Value Measurements*). In accordance with ASC Topic 805, *Business Combinations* (formerly FASB Statement No. 141(R), *Business Combinations*), we will re-measure this liability each reporting period and record changes in the fair value through a separate line item within our consolidated statements of operations. Increases or decreases in the fair value of the contingent consideration liability can result from changes in discount periods and rates, as well as changes in the timing and amount of revenue estimates. During the fourth quarter of 2010, we recorded expense of \$2 million in the accompanying statements of operations representing the increase in fair value of this obligation between the acquisition date and December 31, 2010.

The components of the preliminary purchase price as of the acquisition date for our 2010 acquisitions are as follows:

| (In millions)                          | Asthmatx | All<br>Other | Total |
|----------------------------------------|----------|--------------|-------|
| Cash                                   | \$194    | \$ 5         | \$199 |
| Fair value of contingent consideration | 54       | 15           | 69    |
|                                        | \$248    | \$20         | \$268 |

We accounted for these acquisitions as business combinations and, in accordance with Topic 805, we have recorded the assets acquired and liabilities assumed at their respective fair values as of the acquisition date. The following summarizes the preliminary purchase price allocations:

| (In millions)                      | Asthmatx | All Other | Total |
|------------------------------------|----------|-----------|-------|
| Goodwill                           | \$ 68    | \$ 5      | \$ 73 |
| Amortizable intangible assets      | 176      | 3         | 179   |
| Indefinite-lived intangible assets | 45       | 12        | 57    |
| Other net assets                   | 2        |           | 2     |
| Deferred income taxes              | (43)     |           | (43)  |
|                                    | \$248    | \$20      | \$268 |

Transaction costs associated with these acquisitions were expensed as incurred through selling, general and administrative costs in the statement of operations and were not material in 2010.

We allocated the preliminary purchase price to specific intangible asset categories as follows:

|                                           | Amount Assigned (In Millions) |           |       | Weighted Average Amortization Period (In Years) | Range of Risk-Adjusted Discount Rates used in Purchase Price Allocation |
|-------------------------------------------|-------------------------------|-----------|-------|-------------------------------------------------|-------------------------------------------------------------------------|
|                                           | Asthmatx                      | All Other | Total |                                                 |                                                                         |
| <b>Amortizable Intangible Assets</b>      |                               |           |       |                                                 |                                                                         |
| Technology—core                           | \$168                         |           | \$168 | 12.0                                            | 28.0%                                                                   |
| Technology—developed                      | 8                             | \$ 3      | 11    | 5.5                                             | 27.0%–35.5%                                                             |
|                                           | 176                           | 3         | 179   | 11.6                                            |                                                                         |
| <b>Indefinite-Lived Intangible Assets</b> |                               |           |       |                                                 |                                                                         |
| Purchased research and development        | 45                            | 12        | 57    |                                                 | 29.0%–36.0%                                                             |
|                                           | \$221                         | \$15      | \$236 |                                                 |                                                                         |

Core technology consists of technical processes, intellectual property, and institutional understanding with respect to products and processes that we will leverage in future products or processes and will carry forward from one product generation to the next. Developed technology represents the value associated with marketed products that have received regulatory approval, primarily the Alair<sup>®</sup> Bronchial Thermo-plasty System acquired from Asthmatx, which is approved for distribution in CE Mark countries and received FDA approval in April 2010. The amortizable intangible assets are being amortized on a straight-line basis over their assigned useful lives.

Purchased research and development represents the estimated fair value of acquired in-process research and development projects, including the second generation of the Alair<sup>®</sup> product, which have not yet reached technological feasibility. The indefinite-lived intangible assets will be tested for impairment on an annual basis, or more frequently if impairment indicators are present, in accordance with our accounting policies described in *Note A—Significant Accounting Policies*, and amortization of the purchased research and development will begin upon completion of the project. As of the acquisition date, we estimate that the total cost to complete the in-process research and development programs acquired from Asthmatx is between \$10 million and

\$15 million. We currently expect to launch the second generation of the Alair<sup>®</sup> product in the U.S. in 2014, in our Europe/Middle East/Africa (EMEA) region and certain Inter-Continental countries in 2016, and Japan in 2017, subject to regulatory approvals. We expect material net cash inflows from such products to commence in 2014, following the launch of this technology in the U.S.

We believe that the estimated intangible asset values so determined represent the fair value at the date of each acquisition and do not exceed the amount a third party would pay for the assets. We used the income approach, specifically the discounted cash flow method, to derive the fair value of the amortizable intangible assets and purchased research and development. These fair value measurements are based on significant unobservable inputs, including management estimates and assumptions and, accordingly, are classified as Level 3 within the fair value hierarchy prescribed by Topic 820.

We recorded the excess of the purchase price over the estimated fair values of the identifiable assets as goodwill, which is non-deductible for tax purposes. Goodwill was established due primarily to revenue and cash flow projections associated with future technology, as well as synergies expected to be gained from the integration of these businesses into our existing operations, and has been allocated to our

reportable segments as follows based on the relative expected benefit from the business combinations, as follows:

| (In millions)     | Asthmatx | All Other | Total |
|-------------------|----------|-----------|-------|
| U.S.              | \$17     | \$5       | \$22  |
| EMEA              | 44       |           | 44    |
| Inter-Continental | 4        |           | 4     |
| Japan             | 3        |           | 3     |
|                   | \$68     | \$5       | \$73  |

#### 2009 Acquisitions

Our policy is to expense certain costs associated with strategic investments outside of business combinations as purchased research and development as of the acquisition date. Our adoption of Statement No. 141(R) (Topic 805) did not change this policy with respect to asset purchases. In accordance with this policy, we recorded purchased research and development charges of \$21 million in 2009, associated with entering certain licensing and development arrangements. Since the technology purchases did not involve the transfer of processes or outputs as defined by Statement No. 141(R) (Topic 805), the transactions did not qualify as business combinations.

#### 2008 Acquisitions

##### Labcoat, Ltd.

In December 2008, we completed the acquisition of the assets of Labcoat, Ltd., a development-stage drug-coating company, for a purchase price of \$17 million, net of cash acquired.

##### CryoCor, Inc.

In May 2008, we completed our acquisition of 100 percent of the fully diluted equity of CryoCor, Inc., and paid a cash purchase price of \$21 million, net of cash acquired. CryoCor was developing products using cryogenic technology for use in treating atrial fibrillation.

In 2008, in accordance with accounting guidance applicable at the time, we consummated the acquisitions of Labcoat and CryoCor and recorded \$43 million of purchased research and development charges, including \$17 million associated with Labcoat and \$8 million attributable to CryoCor, as well as \$18 million associated with entering certain licensing and development arrangements. During 2010, we suspended the Labcoat and CryoCor in-process research and development projects.

#### Payments Related to Prior Period Acquisitions

Certain of our acquisitions involve contingent consideration arrangements. Payment of additional consideration is generally contingent on the acquired company reaching certain performance milestones, including attaining specified revenue levels, achieving product development targets or obtaining regulatory approvals. In August 2007, we entered an agreement to amend our 2004 merger agreement with the principal former shareholders of Advanced Bionics Corporation. Previously, we were obligated to pay future consideration contingent primarily on the achievement of future performance milestones. The amended agreement provided a new schedule of consolidated, fixed payments, consisting of

\$650 million that was paid in 2008, and a final \$500 million payment, paid in 2009. We received cash proceeds of \$150 million in 2008 related to our sale of a controlling interest in the Auditory business acquired with Advanced Bionics, and received additional proceeds of \$40 million in 2009 related to the sale of our remaining interest in this business. Refer to *Note C—Divestitures and Assets Held for Sale* for a discussion of this transaction. During 2010, we made total payments of \$12 million related to prior period acquisitions. During 2009, including the \$500 million payment to the former shareholders of Advanced Bionics, we made total payments of \$523 million related to prior period acquisitions. During 2008, we paid \$675 million related to prior period acquisitions, consisting primarily of the \$650 million payment made to the principal former shareholders of Advanced Bionics.

As of December 31, 2010, the estimated maximum potential amount of future contingent consideration (undiscounted) that we could be required to make associated with acquisitions consummated prior to 2010 is approximately \$260 million. In accordance with accounting guidance applicable at the time we consummated these acquisitions, we do not recognize a liability until the contingency is resolved and consideration is issued or becomes issuable. Topic 805 now requires the recognition of a liability equal to the expected fair value of future contingent payments at the acquisition date for all acquisitions consummated after January 1, 2009. In connection with our 2010 business combinations, we recorded liabilities of \$69 million representing the estimated fair value of contingent payments expected to be made, including \$54 million associated with Asthmatx and \$15 million attributable to other acquisitions. The maximum amount of future contingent consideration (undiscounted) that we could be required to make associated with our 2010 acquisitions is approximately \$275 million. Included in the accompanying consolidated balance sheets is accrued contingent consideration of \$71 million as of December 31, 2010 and \$6 million as of December 31, 2009.

#### 1.98

#### BARNES & NOBLE, INC. (JAN)

#### NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

#### 4. Acquisition of B&N College (In Thousands)

On September 30, 2009, the Company completed the acquisition of B&N College from Leonard Riggio and Louise Riggio (Sellers) pursuant to a Stock Purchase Agreement dated as of August 7, 2009 among the Company and the Sellers. Mr. Riggio is the Chairman of the Company's Board of Directors and a significant stockholder. As part of the transaction, the Company acquired the Barnes & Noble trade name that had been owned by B&N College and licensed to the Company.

As a result of the Acquisition, the Company expects to capitalize on the revenue stream derived from the sale of textbooks and course-related materials, emblematic apparel and gifts, trade books, school and dorm supplies, and convenience and café items. Combining both businesses under a unified brand will enable the Company to benefit from the growing online college textbook and eBook markets.

On September 30, 2009, in connection with the closing of the Acquisition described above, the Company issued the Sellers (i) a senior subordinated note in the principal amount of \$100,000, payable in full on December 15, 2010, with interest of 8% per annum payable on the unpaid principal amount (the Senior Seller Note), and (ii) a junior subordinated note in the principal amount of \$150,000, payable in full on the fifth anniversary of the closing of the Acquisition, with interest of 10% per annum payable on the unpaid principal amount (the Junior Seller Note; and together with the Senior Seller Note, the Seller Notes). On December 22, 2009, the Company consented to the pledge and assignment of the Senior Seller Note by the Sellers as collateral security.

The purchase price paid to the Sellers was \$596,000, consisting of \$346,000 in cash and \$250,000 in Seller Notes. However, the cash paid to the Sellers was reduced by \$82,352 in cash bonuses paid by B&N College to 192 members of its management team and employees, not including Leonard Riggio. The Company financed the Acquisition through \$250,000 of seller financing, \$150,000 from the Credit Facility and the remainder from both the Company's and B&N College's cash on hand.

The Acquisition was accounted for as a business purchase pursuant to Accounting Standards Codification (ASC) 805, *Business Combinations* (ASC 805). Acquisition-related expenses totaled \$10,400 and have been recorded as selling and administrative expenses in the Company's consolidated statement of operations for the 52 weeks ended May 1, 2010. As required by ASC 805-20, the Company allocated the purchase price to assets and liabilities based on their estimated fair value at the Acquisition date. The following table represents the allocation of the purchase price to the acquired net assets and resulting adjustment to goodwill (in thousands):

|                                   |             |
|-----------------------------------|-------------|
| Cash Paid                         | \$ 263,648  |
| Seller Notes                      | \$ 250,000  |
| Fair value of total consideration | \$ 513,648  |
| Allocation of purchase price:     |             |
| Current assets                    | \$ 609,786  |
| Non-current assets                | 114,683     |
| Trade name                        | 245,000     |
| Customer relationships            | 255,000     |
| Goodwill                          | 274,070     |
| Total assets acquired             | \$1,498,539 |
| Deferred taxes                    | 234,631     |
| Liabilities assumed               | 750,260     |
|                                   | \$ 513,648  |

Acquired intangible assets consisted primarily of the trade name and customer relationships.

### Trade Name

The Company previously licensed the "Barnes & Noble" trade name from B&N College under certain agreements. The Acquisition gave the Company exclusive ownership of its trade name. The estimated fair value ascribed to the trade name of \$245,000 represents solely the estimated incremental value acquired as part of the Acquisition, which is not representative of the value of the "Barnes & Noble" trade name taken as a whole. The trade name has been classified as an indefinite life intangible asset.

### Customer Relationships

The estimated fair value of customer relationships of B&N College is \$255,000. Customers are comprised of existing college and university contractual relationships at the date of the Acquisition.

### Amortization of Fair Value Ascribed to Customer Relationships

Historical customer attrition rates imply a life of 50 years; however, the useful life was shortened to 25 years since the majority of the value of discounted cash flows are captured in this period. The \$255,000 will be amortized evenly over the 25-year period. The Company recorded \$5,950 in amortization during the 52 weeks ended May 1, 2010, related to these intangibles.

The Company also recorded a short-term deferred tax liability of \$26,810 and a long-term deferred tax liability of \$207,821 related to the difference between the book basis and the tax basis of the net assets acquired. In addition, the Company stepped up the value of other assets and liabilities, resulting in goodwill of \$272,879, which is not deductible for income tax purposes.

The following audited condensed financial information of B&N College since the date of the Acquisition on September 30, 2009 was included in the Company's consolidated results of operations for the 52 weeks ended May 1, 2010:

| (In thousands) | 52 Weeks Ended May 1, 2010 |
|----------------|----------------------------|
| Sales          | \$836,458                  |
| Net loss       | \$ 3,344                   |

The following unaudited pro forma condensed financial information assumes that the Acquisition was accounted for using the acquisition method of accounting for business combinations in accordance with ASC 805 and represents a pro forma presentation based upon available information of the combining companies giving effect to the Acquisition as if it had occurred on May 4, 2008, the first date of B&N College's prior fiscal year, with adjustments for amortization expense of intangible assets, depreciation expense for the fair value of property and equipment above its book value, termination or changes in certain compensation arrangements, termination

of textbook royalties, non-operating expenses not acquired in the Acquisition, interest expense and income tax expense:

| (In thousands)                                                                                 | 52 Weeks Ended<br>May 1, 2010 | 13 Weeks Ended<br>May 2, 2009 | 52 Weeks Ended<br>January 31, 2009 |
|------------------------------------------------------------------------------------------------|-------------------------------|-------------------------------|------------------------------------|
| Sales                                                                                          | \$6,786,661                   | \$1,302,769                   | \$6,907,179                        |
| Net income (loss) from continuing operations attributable to Barnes & Noble, Inc.              | \$ 53,514                     | \$ (27,730)                   | \$ 96,554                          |

| Basic                                                                                          | \$ 0.93                       | \$ (0.52)                     | \$ 1.52                            |
| Diluted                                                                                        | \$ 0.92                       | \$ (0.52)                     | \$ 1.48                            |

The unaudited pro forma condensed financial information is based on the assumptions and adjustments which give effect to events that are: (i) directly attributable to the Acquisition; (ii) expected to have a continuing impact; and (iii) factually supportable. The unaudited pro forma condensed financial information is presented for informational purposes only and is not necessarily indicative of the operating results that would have been achieved had the Acquisition been consummated as of the dates indicated or of the results that may be obtained in the future.

In accordance with ASC 280, *Disclosures about Segments of an Enterprise and Related Information*, the Company performed an evaluation on the effect of the Acquisition on the identification of operating segments, considering the way the business is managed (focusing on the financial information distributed) and the manner in which the chief operating decision maker interacts with other members of management. As a result of this assessment, the Company has determined that it now has two operating segments: B&N Retail and B&N College. See Note 20 for more detail on segment information.

## COMMITMENTS

### DISCLOSURE

**1.99** FASB ASC 440, *Commitments*, requires the disclosure of commitments such as those for unused letters of credit; long-term leases; assets pledged as security for loans; pension plans; cumulative preferred stock dividends in arrears; plant acquisition, obligations to reduce debts, maintain working capital, and restrict dividends; and unconditional purchase obligations.

## 1.100

**TABLE 1-8: COMMITMENTS**

Table 1-8 lists the various commitments disclosed in the annual reports of the survey entities.

|                                                                                                   | Number of Entities |      |      |

## PRESENTATION AND DISCLOSURE EXCERPTS

### Restrictive Covenants

#### 1.101

#### LEAR CORPORATION (DEC)

##### NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

##### (8) Long-Term Debt (in part)

The indenture governing the Notes contains restrictive covenants that, among other things, limit the ability of the Company and its subsidiaries to: (i) incur additional debt, (ii) pay dividends and make other restricted payments, (iii) create or permit certain liens, (iv) issue or sell capital stock of the Company's restricted subsidiaries, (v) use the proceeds from sales of assets and subsidiary stock, (vi) create or permit restrictions on the ability of the Company's restricted subsidiaries to pay dividends or make other distributions to the Company, (vii) enter into transactions with affiliates, (viii) enter into sale and leaseback transactions and (ix) consolidate or merge or sell all or substantially all of the Company's assets. The foregoing limitations are subject to exceptions as set forth in the Notes. In addition, if in the future the Notes have an investment grade credit rating from both Moody's Investors Service and Standard & Poor's Ratings Services and no default has occurred and is continuing, certain of these covenants will, thereafter, no longer apply to the Notes for so long as the Notes have an investment grade credit rating by both rating agencies.

The indenture governing the Notes contains customary events of default that include, among other things (subject in certain cases to customary grace and cure periods): (i) non-payment of principal or interest, (ii) breach of certain covenants contained in the indenture governing the Notes, (iii) failure to pay certain other indebtedness or the acceleration of certain other indebtedness prior to maturity if the total amount of such indebtedness unpaid or accelerated exceeds \$100 million or its foreign currency equivalent, (iv) the rendering of a final and nonappealable judgment for the payment of money in excess of \$100 million or its foreign currency equivalent that is not timely paid or its enforcement stayed, (v) the failure of the guarantees by the subsidiary guarantors to be in full force and effect in all material respects and (vi) certain events of bankruptcy or insolvency. Generally, if an event of default occurs (subject to certain exceptions), the trustee or the holders of at least 25% in aggregate principal amount of the then outstanding Notes of any series may declare all of the Notes of such series to be due and payable immediately.

As of December 31, 2010, the Company was in compliance with all covenants under the indenture governing the Notes.

#### 1.102

#### L-3 COMMUNICATIONS HOLDINGS, INC. (DEC)

##### NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

##### 10. Debt (in part)

##### Covenants (in part)

**Financial and other restrictive covenants.** The Revolving Credit Facility and Senior Subordinated Notes indentures contain financial and other restrictive covenants that limit, among other things, the ability of the subsidiaries of L-3 Communications to borrow additional funds, and the ability of L-3 Communications and its subsidiaries to incur liens, make investments, merge or consolidate, dispose of assets, pay dividends or repurchase its common stock. The Company's Revolving Credit Facility contains covenants that require that (1) the Company's consolidated leverage ratio be less than or equal to 4.0 to 1.0; (2) the Company's consolidated interest coverage ratio be greater than or equal to 3.0 to 1.0; and (3) the Company's consolidated senior leverage ratio be less than or equal to 3.5 to 1.0, in each case, as of the end of any fiscal quarter. Calculations of the financial covenants are to exclude, among other things, certain items such as impairment losses on goodwill or other intangible assets, non-cash gains or losses from discontinued operations, gains or losses in connection with asset dispositions, and gains or losses with respect to judgments or settlements in connection with litigation matters. As of December 31, 2010, the Company was in compliance with its financial and other restrictive covenants.

The Senior Indenture contains covenants customary for investment grade notes, including covenants that restrict the ability of L-3 Communications and its wholly-owned domestic subsidiaries to create, incur, assume or permit to exist any lien, except permitted liens (as defined in the Senior Indenture) and restrict the ability of L-3 Communications and its subsidiaries to enter into certain sale and leaseback transactions (as defined in the Senior Indenture).

The Senior Subordinated Notes indentures contain covenants that restrict the ability of L-3 Communications to incur indebtedness and issue capital stock that matures or is redeemable 91 days or less after the maturity date of such series of notes, and the ability of its restricted subsidiaries to incur indebtedness or issue preferred stock, unless the Company's fixed charge coverage ratio would have been at least 2.0 to 1.0 on a pro forma basis. The covenants are subject to several material exceptions, including an exception for indebtedness under the Company's credit facilities up to a specified amount.

**Restricted Payments.** L-3 Holdings relies on dividends paid by L-3 Communications to generate the funds necessary to pay dividends on and repurchase its common stock. The Revolving Credit Facility contains provisions that limit the ability of L-3 Communications to pay dividends, repurchase L-3 Holdings' common stock or other distributions with respect to any capital stock and make investments in L-3 Holdings. However, the Revolving Credit Facility permits L-3 Communications to:

- Fund payments of interest on indebtedness of L-3 Holdings and to fund payments of dividends on disqualified preferred stock issued by L-3 Holdings, so long as (1) any such indebtedness or disqualified preferred stock

is guaranteed by L-3 Communications and (2) the proceeds received by L-3 Holdings from the issuance of such indebtedness or disqualified preferred stock have been invested by L-3 Holdings in L-3 Communications;

- Fund payments and prepayments of principal of indebtedness of L-3 Holdings and to fund optional and mandatory redemptions of disqualified preferred stock issued by L-3 Holdings, so long as (1) any such indebtedness or disqualified preferred stock is guaranteed by L-3 Communications and (2) the amount of such fundings does not exceed the sum of (a) the aggregate amount of investments made by L-3 Holdings in L-3 Communications with the proceeds from any issuance of indebtedness or disqualified preferred stock by L-3 Holdings that is guaranteed by L-3 Communications and (b) the amount of any premium, penalty, or accreted value payable in connection with such payment, prepayment or redemption;
- Pay other dividends on and make other redemptions of its equity interests (including for the benefit of L-3 Holdings) and make other investments in L-3 Holdings, so long as no default or event of default has occurred and is continuing, up to an aggregate amount of \$2.0 billion, increased (or decreased) on a cumulative basis at the end of each quarter, commencing with the quarter ended December 31, 2009 by an amount equal to 50% of the consolidated net income (or deficit) of L-3 Communications for the quarter, plus (1) 100% of the proceeds from any issuance of capital stock (other than disqualified preferred stock) by L-3 Holdings after October 23, 2009, provided those proceeds were invested in L-3 Communications, plus (2) 100% of the proceeds from any issuance of indebtedness or disqualified preferred stock by L-3 Holdings after October 23, 2009 provided those proceeds were invested in L-3 Communications and the indebtedness or disqualified preferred stock is not guaranteed by L-3 Communications, plus (3) 100% of the proceeds from any issuance of capital stock (other than disqualified preferred stock) by L-3 Communications after October 23, 2009.

Disqualified preferred stock discussed above is stock, other than common stock, that is not classified as a component of shareholders' equity on the balance sheet. At December 31, 2010, L-3 Holdings and L-3 Communications did not have any disqualified preferred stock.

The Senior Subordinated Notes indentures contain provisions that limit the ability of L-3 Communications to pay dividends to L-3 Holdings and make investments in L-3 Holdings, subject to exceptions. Subject to certain limitations, the indentures permit L-3 Communications to make such restricted payments so long as it would be able to incur at least one dollar of additional indebtedness under the fixed charge coverage ratio test described above and meet other conditions.

### 1.103

#### SEABOARD CORPORATION (DEC)

##### NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

###### *Note 8—Notes Payable and Long-term Debt (in part)*

Of the 2010 foreign subsidiary obligations, \$16,352,000 was payable in U.S. dollars, \$221,000 was payable in Argentine pesos. Of the 2009 foreign subsidiary obligations, \$688,000 was denominated in CFA francs, \$232,000 was payable in Argentine pesos.

The terms of the note agreements pursuant to which the senior notes, IDRBs, bank debt and credit lines were issued require, among other terms, the maintenance of certain ratios and minimum net worth, the most restrictive of which requires consolidated funded debt not to exceed 50% of consolidated total capitalization; an adjusted leverage ratio of less than 3.5 to 1.0; requires the maintenance of consolidated tangible net worth, as defined, of not less than \$1,150,000,000 plus 25% of cumulative consolidated net income beginning March 29, 2008; limits aggregate dividend payments to \$10,000,000 plus 50% of consolidated net income less 100% of consolidated net losses beginning January 1, 2002 plus the aggregate amount of Net Proceeds of Capital Stock for such period (\$645,864,000 as of December 31, 2010) or \$15,000,000 per year under certain circumstances; limits the sum of subsidiary indebtedness and priority indebtedness to 10% of consolidated tangible net worth; and limits Seaboard's ability to acquire investments and sell assets under certain circumstances. Seaboard is in compliance with all restrictive debt covenants relating to these agreements as of December 31, 2010.

### 1.104

#### SMITHFIELD FOODS, INC. (APR)

##### NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

###### *Note 10. Debt (in part)*

###### *Debt Covenants*

Our various debt agreements contain covenants that limit additional borrowings, acquisitions, dispositions, leasing of assets and payments of dividends to shareholders, among other restrictions.

Our senior unsecured and secured notes limit our ability to incur additional indebtedness, subject to certain exceptions, when our interest coverage ratio is, or after incurring additional indebtedness would be, less than 2.0 to 1.0 (the Incurrence Test). As of May 2, 2010, we did not meet the Incurrence Test. Due to the trailing twelve month nature of the Incurrence Test, we do not expect to meet the Incurrence Test again until the second quarter of fiscal 2011 at the earliest. The Incurrence Test is not a maintenance covenant and our failure to meet the Incurrence Test is not a default. In addition to limiting our ability to incur additional indebtedness, our failure to meet the Incurrence Test restricts us from engaging in certain other activities, including paying cash dividends,

repurchasing our common stock and making certain investments. However, our failure to meet the Incurrence Test does not preclude us from borrowing on the ABL Credit Facility or from refinancing existing indebtedness. Therefore we do not expect the limitations resulting from our inability to satisfy the Incurrence Test to have a material adverse effect on our business or liquidity.

Our ABL Credit Facility contains a covenant requiring us to maintain a fixed charges coverage ratio of at least 1.1 to 1.0 when the amounts available for borrowing under the ABL Credit Facility are less than the greater of \$120 million or 15% of the total commitments under the facility (currently \$1.0 billion). We currently are not subject to this restriction and we do not anticipate that our borrowing availability will decline below those thresholds during fiscal 2010, although there can be no assurance that this will not occur because our borrowing availability depends upon our borrowing base calculated for purposes of that facility.

During the first quarter of fiscal 2010, we determined that we previously and unintentionally breached a non-financial covenant under our senior unsecured notes relating to certain foreign subsidiaries' indebtedness. We promptly cured this minor breach by amending certain debt agreements of the subsidiaries and extinguishing other indebtedness of the subsidiaries, and, as a result, no event of default occurred under our senior unsecured notes or any other facilities.

## Leasing Commitments

### 1.105

NETAPP, INC. (APR)

#### NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

##### 18. Commitments and Contingencies (in part)

**Operating Leases**—We lease office space in several U.S. locations. Outside the United States, larger leased sites include sites in The Netherlands, Australia, Belgium, France, Germany, India, Japan, and the United Kingdom. We also lease equipment and vehicles.

As of April 30, 2010, we have four leasing arrangements (Leasing Arrangements 1, 2, 3 and 4) for facilities in Sunnyvale, California with BNPPLC which require us to lease certain of our land to BNPPLC for a period of 99 years, and to lease approximately 0.6 million square feet of office space for our headquarters in Sunnyvale costing up to \$149.6 million. Under these leasing arrangements, we pay BNPPLC minimum lease payments, which vary based on LIBOR plus a spread or a fixed rate on the costs of the facilities on the respective lease commencement dates. We make payments for each of the leases for a term of five years. We have the option to renew each of the leases for two consecutive five-year periods upon approval by BNPPLC. Upon expiration (or upon any earlier termination) of the lease terms, we must elect one of the following options: (i) purchase the buildings from BNPPLC at cost; (ii) if certain conditions are met, arrange for the sale of the buildings by BNPPLC to a third party for an amount equal to at least 85% of the costs (residual guarantee), and be liable for any deficiency between the net proceeds received from the third party and such amounts; or (iii) pay BNPPLC supplemental payments for an amount equal to at least 85% of the costs (residual guarantee), in which event we may recoup some or all of such payments by arranging for a sale of each or all buildings by BNPPLC during the ensuing two-year period. The following table summarizes the costs, the residual guarantee, the applicable LIBOR plus spread or fixed rate at April 30, 2010, and the date we began to make payments for each of our leasing arrangements (in millions):

| Leasing Arrangements | Cost   | Residual Guarantee | LIBOR Plus Spread or Fixed Rate | Lease Commencement Date | Term    |
|----------------------|--------|--------------------|---------------------------------|-------------------------|---------|
| 1                    | \$48.5 | \$41.2             | 3.99%                           | January 2008            | 5 years |
| 2                    | \$80.0 | \$68.0             | 1.08%                           | December 2007           | 5 years |
| 3                    | \$10.5 | \$ 8.9             | 3.97%                           | December 2007           | 5 years |
| 4                    | \$10.6 | \$ 9.0             | 3.99%                           | December 2007           | 5 years |

These leases require us to maintain specified financial covenants with which we were in compliance as of April 30, 2010. Such financial covenants include a maximum ratio of Total Debt to Earnings before Interest, Taxes, Depreciation and Amortization and a minimum amount of Unencumbered Cash and Short-Term Investments.

Future annual minimum lease payments under all non-cancelable operating leases with an initial term in excess of one year as of April 30, 2010 are as follows (in millions):

|                                    | 2011   | 2012   | 2013    | 2014   | 2015   | Thereafter | Total   |
|------------------------------------|--------|--------|---------|--------|--------|------------|---------|
| Office operating lease payments    | \$26.7 | \$22.3 | \$ 17.8 | \$15.1 | \$13.0 | \$20.4     | \$115.3 |
| Real estate lease payments         | 3.6    | 3.6    | 129.5   | —      | —      | —          | 136.7   |
| Equipment operating lease payments | 24.3   | 10.7   | 4.6     | 0.4    | —      | —          | 40.0    |
| Less: Sublease income              | (5.8)  | (0.8)  | (0.6)   | (0.4)  | (0.2)  | —          | (7.8)   |
| Total lease commitments            | \$48.8 | \$35.8 | \$151.3 | \$15.1 | \$12.8 | \$20.4     | \$284.2 |

Included in real estate lease payments pursuant to four financing arrangements with BNP Paribas Leasing Corporation (BNPPLC) are (i) lease commitments of \$3.6 million in each of the fiscal years 2011 and 2012; \$2.4 million in fiscal 2013, which are based on the LIBOR rate at April 30, 2010 plus a spread or a fixed rate, for terms of five years; and (ii) at the expiration or termination of the lease, a supplemental payment obligation equal to our minimum guarantee of \$127.1 million in the event that we elect not to purchase or arrange for sale of the buildings.

In fiscal 2010, we determined that it was probable that the fair value of the properties under synthetic lease would be below the guaranteed residual at the end of the initial lease terms. Our current estimate of this shortfall is \$36.9 million. We are accruing for this deficiency over the remaining initial terms of the respective leases of thirty-two months.

## Capital Expenditures

### 1.106

#### FRONTIER COMMUNICATIONS CORPORATION (DEC)

##### NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

##### (20) Commitments and Contingencies (in part)

We anticipate total capital expenditures of approximately \$750 million to \$780 million for 2011 related to our Frontier legacy properties and the Acquired Business. Although we from time to time make short-term purchasing commitments to vendors with respect to these expenditures, we generally do not enter into firm, written contracts for such activities.

In connection with the Transaction, the Company undertook activities to plan and implement systems conversions and other initiatives necessary to effectuate the closing (Phase 1). The Company incurred operating expenses, including deal costs, of approximately \$135.6 million and capital expenditures of approximately \$90.6 million in 2010 related to these integration initiatives in Phase 1. The Company continues to engage in activities to enable the Company to implement its “go to market” strategy in its new markets and to complete the conversions of all the remaining systems into one platform (Phase 2). The Company also incurred \$1.5 million of integration costs and \$6.4 million in capital expenditures related to the commencement of these Phase 2 activities during 2010. The Company currently expects to incur operating expenses and capital expenditures of approximately \$90 million and \$60 million, respectively, in 2011 related to these Phase 2 initiatives.

In addition, the Federal Communications Commission (FCC) and certain state regulatory commissions, in connection with granting their approvals of the Transaction, specified certain capital expenditure and operating requirements for the acquired Territories for specified periods of time post-closing. These requirements focus primarily on certain capital investment commitments to expand broadband availability and speeds to at least 85% of the households throughout the acquired Territories with minimum speeds of 3 megabits per second (Mbps) by the end of 2013 and 4 Mbps by the end of 2015. To satisfy all or part of certain capital investment commitments to three state regulatory commissions, we placed an aggregate amount of \$115.0 million in cash into escrow accounts and obtained the letter of credit for \$190.0 million in the third quarter of 2010. Another \$72.4 million of cash in an escrow account, with an associated liability (reflected in Other liabilities), was acquired in connection with the Merger to be used for service quality initiatives in the state of West Virginia. As of December 31, 2010, the Company had a restricted cash balance in these escrow accounts in the aggregate amount of \$187.5 million. The aggregate amount of these escrow accounts and the letter of credit will decrease over time as Frontier makes the required capital expenditures in the respective states.

## Financing Commitments

### 1.107

#### THE BOEING COMPANY (DEC)

##### NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

##### Note 11—Liabilities, Commitments and Contingencies (in part)

##### Financing Commitments (In millions)

Financing commitments totaled \$9,865 and \$10,409 as of December 31, 2010 and 2009. We anticipate that a significant portion of these commitments will not be exercised by the customers as we continue to work with third party financiers to provide alternative financing to customers. However, there can be no assurances that we will not be required to fund greater amounts than historically required.

We have entered into standby letters of credit agreements and surety bonds with financial institutions primarily relating

to the guarantee of future performance on certain contracts. Contingent liabilities on outstanding letters of credit agreements and surety bonds aggregated approximately \$7,599 and \$7,052 as of December 31, 2010 and 2009.

In connection with the formation of ULA, we and Lockheed Martin Corporation (Lockheed) each committed to provide up to \$200 to support its working capital requirements through December 1, 2011. ULA did not request any funds under the commitment as of December 31, 2010. We and Lockheed have also each committed to provide ULA with up to \$232 of additional capital contributions in the event ULA does not have sufficient funds to make a required payment to us under an inventory supply agreement.

## Royalty and Advertising Obligations

### 1.108

WOLVERINE WORLD WIDE, INC. (DEC)

#### NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

##### 8. Litigation and Contingencies (in part; in thousands)

The Company has future minimum royalty and advertising obligations due under the terms of certain licenses held by the Company. These minimum future obligations are as follows:

| (In thousands)      | 2011  | 2012  | 2013  | 2014  | 2015  |
|---------------------|-------|-------|-------|-------|-------|
| Minimum royalties   | 1,693 | 880   | 898   | 916   | 934   |
| Minimum advertising | 1,941 | 1,999 | 2,059 | 2,121 | 2,184 |

Minimum royalties are based on both fixed obligations and assumptions regarding the consumer price index. Royalty obligations in excess of minimum requirements are based upon future sales levels. In accordance with these agreements, the Company incurred royalty expense of \$3,028, \$2,861 and \$3,198 for 2010, 2009 and 2008, respectively.

The terms of certain license agreements also require the Company to make advertising expenditures based on the level of sales. In accordance with these agreements, the Company incurred advertising expense of \$2,998, \$2,682 and \$3,018 for 2010, 2009 and 2008, respectively.

## Purchase Agreements

### 1.109

TIFFANY & CO. (JAN)

#### NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

##### L. Commitments and Contingencies (in part)

##### Diamond Sourcing Activities

The Company will, from time to time, secure supplies of diamonds by agreeing to purchase a defined portion of a mine's

output. Under such arrangements, management anticipates that it will purchase approximately \$75,000,000 of rough diamonds in 2010. Purchases beyond 2010 that are contingent upon mine production cannot be reasonably estimated.

#### Contractual Cash Obligations and Contingent Funding Commitments

At January 31, 2010, the Company's contractual cash obligations and contingent funding commitments were: inventory purchases of \$291,322,000 (which includes the \$75,000,000 obligation discussed in Diamond Sourcing Activities above); non-inventory purchases of \$4,552,000; construction-in-progress of \$17,857,000 and other contractual obligations of \$29,649,000.

## CONTINGENCIES

### RECOGNITION AND MEASUREMENT

**1.110** The FASB ASC glossary defines a *contingency* as an existing condition, situation, or set of circumstances involving uncertainty about possible gain (gain contingency) or loss (loss contingency) to an entity that will ultimately be resolved when one or more future events occur or fail to occur. FASB ASC 450-20 sets forth guidance for the recognition and disclosure of loss contingencies. An estimated loss from a loss contingency should be accrued by a charge to income if both of the following conditions are met:

- Information available before the financial statements are issued or available to be issued indicates that it is probable that an asset had been impaired or a liability had been incurred at the date of the financial statements. It is implicit in this condition that it must be probable that one or more future events will occur confirming the fact of the loss.
- The amount of loss can be reasonably estimated.

**1.111** Disclosure is preferable to accrual when a reasonable estimate of loss cannot be made. Even losses that are reasonably estimable should not be accrued if it is not probable that an asset has been impaired or a liability has been incurred at the date of the entity's financial statements because those losses relate to a future period, rather than the current period. If some amount within a range of loss appears at the time to be a better estimate than any other amount within the range, that amount should be accrued. When no amount within the range is a better estimate than any other amount, however, the minimum amount in that range should be accrued. Select loss contingency disclosures do not apply to loss contingencies arising from an entity's recurring estimation of its allowance for credit losses. FASB ASC 450-30 states the guidance for the recognition and disclosure for gain contingencies and explains that a contingency that might result in a gain usually should not be reflected in the financial statements because to do so might be to recognize revenue before its realization. When contingency disclosures exist, public companies generally present a balance sheet caption for contingencies, in accordance with Rule 5-02 of Regulation S-X.

## 1.112

**TABLE 1-9: CONTINGENCIES**

Table 1-9 lists the loss and gain contingencies disclosed in the annual reports of the survey entities.

|                                                     | Number of Entities |      |      |
|-----------------------------------------------------|--------------------|------|------|
|                                                     | 2010               | 2009 | 2008 |

## 1.113

**BOSTON SCIENTIFIC CORPORATION (DEC)****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS***Note L—Commitments and Contingencies (in part)*

The medical device market in which we primarily participate is largely technology driven. Physician customers, particularly in interventional cardiology, have historically moved quickly to new products and new technologies. As a result, intellectual property rights, particularly patents and trade secrets, play a significant role in product development and differentiation. However, intellectual property litigation is inherently complex and unpredictable. Furthermore, appellate courts can overturn lower court patent decisions.

In addition, competing parties frequently file multiple suits to leverage patent portfolios across product lines, technologies and geographies and to balance risk and exposure between the parties. In some cases, several competitors are parties in the same proceeding, or in a series of related proceedings, or litigate multiple features of a single class of de-

vices. These forces frequently drive settlement not only for individual cases, but also for a series of pending and potentially related and unrelated cases. In addition, although monetary and injunctive relief is typically sought, remedies and restitution are generally not determined until the conclusion of the trial court proceedings and can be modified on appeal. Accordingly, the outcomes of individual cases are difficult to time, predict or quantify and are often dependent upon the outcomes of other cases in other geographies. Several third parties have asserted that certain of our current and former product offerings infringe patents owned or licensed by them. We have similarly asserted that other products sold by our competitors infringe patents owned or licensed by us. Adverse outcomes in one or more of the proceedings against us could limit our ability to sell certain products in certain jurisdictions, or reduce our operating margin on the sale of these products and could have a material adverse effect on our financial position, results of operations or liquidity.

In particular, although we have resolved multiple litigation matters with Johnson & Johnson, described herein, we continue to be involved in patent litigation with them, particularly relating to drug-eluting stent systems. Adverse outcomes in one or more of these matters could have a material adverse effect on our ability to sell certain products and on our operating margins, financial position, results of operation or liquidity.

In the normal course of business, product liability, securities and commercial claims are asserted against us. Similar claims may be asserted against us in the future related to events not known to management at the present time. We are substantially self-insured with respect to product liability claims and intellectual property infringement, and maintain an insurance policy providing limited coverage against securities claims. The absence of significant third-party insurance coverage increases our potential exposure to unanticipated claims or adverse decisions. Product liability claims, securities and commercial litigation, and other legal proceedings in the future, regardless of their outcome, could have a material adverse effect on our financial position, results of operations and liquidity. In addition, the medical device industry is the subject of numerous governmental investigations often involving regulatory, marketing and other business practices. These investigations could result in the commencement of civil and criminal proceedings, substantial fines, penalties and administrative remedies, divert the attention of our management and have an adverse effect on our financial position, results of operations and liquidity.

We generally record losses for claims in excess of the limits of purchased insurance in earnings at the time and to the extent they are probable and estimable. In accordance with ASC Topic 450, *Contingencies* (formerly FASB Statement No. 5, *Accounting for Contingencies*), we accrue anticipated costs of settlement, damages, losses for general product liability claims and, under certain conditions, costs of defense, based on historical experience or to the extent specific losses are probable and estimable. Otherwise, we expense these costs as incurred. If the estimate of a probable loss is a range and no amount within the range is more likely, we accrue the minimum amount of the range.

Our accrual for legal matters that are probable and estimable was \$588 million as of December 31, 2010 and \$2.316 billion as of December 31, 2009, and includes estimated costs of settlement, damages and defense. The decrease in our accrual is due primarily to the payment of \$1.725 billion to Johnson & Johnson in connection with the patent litigation settlement discussed below. We continue to assess

certain litigation and claims to determine the amounts, if any, that management believes will be paid as a result of such claims and litigation and, therefore, additional losses may be accrued and paid in the future, which could materially adversely impact our operating results, cash flows and our ability to comply with our debt covenants.

In management's opinion, we are not currently involved in any legal proceedings other than those specifically identified below, which, individually or in the aggregate, could have a material effect on our financial condition, operations and/or cash flows. Unless included in our legal accrual or otherwise indicated below, a range of loss associated with any individual material legal proceeding cannot be estimated.

#### *Patent Litigation (in part)*

##### *Litigation with Johnson & Johnson (including its subsidiary, Cordis Corporation)*

On April 13, 1998, Cordis Corporation filed suit against Boston Scientific Scimed, Inc. and us in the U.S. District Court for the District of Delaware, alleging that our former NIR® stent infringed three claims of two patents (the Fischell patents) owned by Cordis and seeking damages and injunctive relief. On May 2, 2005, the District Court entered judgment that none of the three asserted claims was infringed, although two of the claims were not invalid. The District Court also found the two patents unenforceable for inequitable conduct. Cordis appealed the non-infringement finding of one claim in one patent and the unenforceability of that patent. We cross appealed the finding that one of the two claims was not invalid. Cordis did not appeal as to the second patent. On June 29, 2006, the Court of Appeals upheld the finding that the claim was not invalid, remanded the case to the District Court for additional factual findings related to inequitable conduct, and did not address the finding that the claim was not infringed. On August 10, 2009, the District Court reversed its finding that the two patents were unenforceable for inequitable conduct. On August 24, 2009, we asked the District Court to reconsider and on March 31, 2010, the District Court denied our request for reconsideration. On April 2, 2010, Cordis filed an appeal and on April 9, 2010, we filed a cross appeal.

On each of May 25, June 1, June 22 and November 27, 2007, Boston Scientific Scimed, Inc. and we filed a declaratory judgment action against Johnson & Johnson and Cordis Corporation in the U.S. District Court for the District of Delaware seeking a declaratory judgment of invalidity of four U.S. patents (the Wright and Falotico patents) owned by them and of non-infringement of the patents by the PROMUS® coronary stent system, supplied to us by Abbott Laboratories. On February 21, 2008, Johnson & Johnson and Cordis filed counterclaims for infringement seeking an injunction and a declaratory judgment of validity. On June 25, 2009, we amended our complaints to allege that the four patents owned by Johnson & Johnson and Cordis are unenforceable. On January 20, 2010, the District Court found the four patents owned by Johnson & Johnson and Cordis invalid. On February 17, 2010, Johnson & Johnson and Cordis appealed the District Court's decision. The oral argument on appeal occurred on January 11, 2011.

On February 1, 2008, Wyeth Corporation and Cordis Corporation filed an amended complaint against Abbott Laboratories, adding us and Boston Scientific Scimed, Inc. as additional defendants to the complaint. The suit alleges that the PROMUS® coronary stent system, supplied to us by Abbott, infringes three U.S. patents (the Morris patents) owned by Wyeth and licensed to Cordis. The suit was filed in the U.S. District Court for the District of New Jersey seeking monetary and injunctive relief. A Markman hearing was held on July 15, 2010. On November 3, 2010, the District Court granted a motion to bifurcate damages from liability in the case. A liability trial is scheduled to begin September 12, 2011. On January 7, 2011, Wyeth and Cordis withdrew their infringement claim as to one of the patents.

On September 22, 2009, Cordis Corporation, Cordis LLC and Wyeth Corporation filed a complaint for patent infringement against Abbott Laboratories, Abbott Cardiovascular Systems, Inc., Boston Scientific Scimed, Inc. and us alleging that the PROMUS® coronary stent system, supplied to us by Abbott, infringes a patent (the Llanos patent) owned by Cordis and Wyeth that issued on September 22, 2009. The suit was filed in the U.S. District Court for the District of New Jersey seeking monetary and injunctive relief. On September 22, 2009, we filed a declaratory judgment action in the U.S. District Court for the District of Minnesota against Cordis and Wyeth seeking a declaration that the patent is invalid and not infringed by the PROMUS® coronary stent system, supplied to us by Abbott. On January 19, 2010, the Minnesota District Court transferred our suit to the U.S. District Court for the District of New Jersey and on February 17, 2010, the Minnesota case was dismissed. On July 13, 2010, Cordis filed a motion to amend the complaint to add an additional patent, which the New Jersey District Court granted on August 2, 2010. Cordis filed an amended complaint on August 9, 2010. On September 3, 2010 we filed an answer to the amended complaint along with counterclaims of invalidity and non-infringement.

On December 4, 2009, Boston Scientific Corporation and Boston Scientific Scimed, Inc. filed a complaint for patent infringement against Cordis Corporation alleging that its Cypher Mini™ stent product infringes a U.S. patent (the Jang patent) owned by us. The suit was filed in the U.S. District Court for the District of Minnesota seeking monetary and injunctive relief. On January 19, 2010, Cordis filed its answer as well as a motion to transfer the suit to the U.S. District Court for the District of Delaware. On April 16, 2010, the Minnesota District Court granted Cordis' motion to transfer the case to Delaware. A trial has been scheduled to begin on May 5, 2011.

On January 15, 2010, Cordis Corporation filed a complaint against us and Boston Scientific Scimed, Inc. alleging that the PROMUS® coronary stent system, supplied to us by Abbott, infringes three patents (the Fischell patents) owned by Cordis. The suit was filed in the U.S. District Court for the District of Delaware and seeks monetary and injunctive relief. A trial is scheduled to begin on April 9, 2012.

## 1.114

## AK STEEL HOLDING CORPORATION (DEC)

## NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

*Note 9—Environmental and Legal Contingencies (in part; in millions)*

*Butler Works Retiree Healthcare Benefits Litigation*

As previously reported, on June 18, 2009, three former hourly members of the Butler Armco Independent Union filed a purported class action against AK Steel in the United States District Court for the Southern District of Ohio, Case No. 1-09CV00423 (the “2009 Retiree Action”), alleging that AK Steel did not have a right to make changes to their healthcare benefits. On June 29, 2009, the plaintiffs filed an amended complaint. The named plaintiffs in the 2009 Retiree Action sought, among other things, injunctive relief for themselves and the other members of a proposed class, including an order retroactively rescinding certain changes to retiree healthcare benefits negotiated by AK Steel with its union. The proposed class the plaintiffs sought to represent consisted originally of all union-represented retirees of AK Steel other than those retirees who were included in the class covered by the Middletown Works Retiree Healthcare Benefits Litigation described below. On August 21, 2009, AK Steel filed an answer to the amended complaint and filed a motion for summary judgment. On September 14, 2009, plaintiffs filed a motion for partial summary judgment and responded to defendant’s motion. On October 14, 2009, plaintiffs filed a motion for preliminary injunction, seeking to prevent certain scheduled January 2010 changes to retiree healthcare from taking effect. On November 25, 2009, AK Steel filed its opposition to the motion for a preliminary injunction, opposition to plaintiffs’ motion for partial summary judgment, and reply in support of its motion for summary judgment. A hearing on the then-pending motions was held on December 8, 2009. During the course of the hearing, plaintiffs’ counsel notified the court that the pending motion for a preliminary injunction was limited to retirees from the Company’s Butler Works in Butler, Pennsylvania. On January 29, 2010, the trial court issued an opinion and order granting plaintiffs’ motion for a preliminary injunction and barring the Company from effecting any further benefit reductions or new healthcare charges for Butler Works hourly retirees until final judgment in the case.

On February 2, 2010, AK Steel filed a notice of appeal to the United States Court of Appeals for the Sixth Circuit seeking a reversal of the decision to grant the preliminary injunction. Absent a reversal of the decision to impose the preliminary injunction, the negotiated changes to retiree healthcare for the Company’s Butler Works retirees would be rescinded and the Company’s other postretirement benefit (“OPEB”) obligations would increase by approximately \$145.0 based upon then-current valuation assumptions. This amount reflects the value of the estimated additional healthcare and welfare benefits the Company would pay out with respect to the Butler hourly retirees.

In the third quarter of 2010, the Company reached a tentative settlement agreement (the “Hourly Class Settlement”) with the Butler Works hourly retirees who initiated the litigation. The appeal pending in the Sixth Circuit Court of Appeals was stayed pending finalization of the Hourly Class Settlement. The participants in the Hourly Class Settlement con-

sist generally of all retirees and their surviving spouses who worked for AK Steel at Butler Works and retired from AK Steel on or before December 31, 2006 (the “Hourly Class Members”). Pursuant to the Hourly Class Settlement, AK Steel agreed to continue to provide company-paid health and life insurance to Hourly Class Members through December 31, 2014, and to make combined lump sum payments totaling \$86.0 to a Voluntary Employees Beneficiary Association trust (the “VEBA Trust”) and to plaintiffs’ counsel. More specifically, AK Steel will make three cash contributions to the VEBA Trust as follows: \$21.4 on August 1, 2011; \$30.0 on July 31, 2012; and \$26.0 on July 31, 2013. The balance of the \$86.0 in lump sum payments will be paid to plaintiffs’ attorneys on August 1, 2011, to cover plaintiffs’ obligations with respect to attorneys’ fees. Effective January 1, 2015, AK Steel will transfer to the VEBA Trust all OPEB obligations owed to the Hourly Class Members under the Company’s applicable health and welfare plans and will have no further liability for any claims incurred by the Hourly Class Members after December 31, 2014, relating to their OPEB obligations. The VEBA Trust will be utilized to fund all such future OPEB obligations to the Hourly Class Members. Trustees of the VEBA will determine the scope of the benefits to be provided to the Hourly Class Members.

After reaching the Hourly Class Settlement, the Company was notified that a separate group of retirees from the Butler Works who were previously salaried employees and who had been members of the Butler Armco Independent Salaried Union also were asserting similar claims and desired to settle those claims on a basis similar to the settlement with the hourly employees. The participants in this group consist generally of all retirees and their surviving spouses who worked for AK Steel at Butler Works and retired from AK Steel between January 1, 1985, and on or before September 30, 2006 (the “Salaried Class Members”). If the Salaried Class Members were to prevail on their claims, the Company’s other postretirement benefit obligation would have increased by approximately \$8.5 based upon then-current valuation assumptions. This amount reflects the value of the estimated additional healthcare and welfare benefits the Company would pay out with respect to the Salaried Class Members. After negotiation with counsel representing the Salaried Class Members, the Company also reached a tentative settlement agreement with the Salaried Class Members (the “Salaried Class Settlement”). The stay referenced above of the appeal pending in the Sixth Circuit Court of Appeals pending finalization of the Hourly Class Settlement also applies to the Salaried Class Settlement.

Pursuant to the Salaried Class Settlement, AK Steel agreed to continue to provide company-paid health and life insurance to Salaried Class Members through December 31, 2014, and to make combined lump sum payments totaling \$5.0 to a VEBA Trust and to plaintiffs’ counsel. AK Steel will make three cash contributions to the VEBA Trust as follows: approximately \$1.2 on August 1, 2011; approximately \$1.7 on July 31, 2012; and approximately \$1.6 on July 31, 2013. The balance of the \$5.0 in lump sum payments will be paid to plaintiffs’ attorneys on August 1, 2011, to cover plaintiffs’ obligations with respect to attorneys’ fees. Effective January 1, 2015, AK Steel will transfer to the VEBA Trust all OPEB obligations owed to the Salaried Class Members under the Company’s applicable health and welfare plans and will have no further liability for any claims incurred by the Salaried Class Members after December 31, 2014, relating to their OPEB obligations. The VEBA Trust will be utilized to fund all

such future OPEB obligations to the Salaried Class Members. Trustees of the VEBA will determine the scope of the benefits to be provided to the Salaried Class Members.

The tentative settlements (hereinafter collectively referred to as the “Butler Retiree Settlement”) with both the Hourly Class Members and the Salaried Class Members (hereinafter collectively referred to as the “Class Members”) were subject to approval by the Court. On September 17, 2010, the plaintiffs filed an Unopposed Motion to File a Second Amended Complaint and an Unopposed Amended Motion for an Order Conditionally Certifying Classes, and the parties jointly filed a Joint Motion for Preliminary Approval of Class Action Settlement Agreements and Proposed Class Notice. On September 24, 2010, the Court held a hearing on these motions and issued orders granting the joint motion for preliminary approval of the Butler Retiree Settlement, conditionally certifying the two classes, and allowing the filing of a second amended complaint. The second amended complaint was deemed filed as of September 24, 2010 and defined the class represented by the Plaintiffs to consist of the Class Members. Notice of the settlement was sent to all Class Members on October 1, 2010. The Class Members were given the opportunity to object to the Butler Retiree Settlement in writing and at a hearing conducted by the Court to determine whether to approve that Settlement. The deadline for filing objections was November 15, 2010 and only one objection was filed prior to that date. That objection subsequently was withdrawn. On December 20, 2010, the parties filed their motions for approval of the Butler Retiree Settlement. Plaintiffs further filed a motion for approval of attorney fees and expenses. A Fairness Hearing with respect to the settlement occurred on January 10, 2011. There were no objections to the Butler Retiree Settlement or to the proposed attorney fee award expressed during the Fairness Hearing. On January 10, 2011, the Court issued written orders granting final approval to the Butler Retiree Settlement, as well as the proposed attorney fee award. The final judgment (the “Judgment”) formally approving the Butler Retiree Settlement and the attorney fee award also was entered on January 10, 2011. The Butler Retiree Settlement became effective on that date. No appeal from that Judgment has been taken and the time for filing such an appeal has expired.

As of December 31, 2010, the Company’s total OPEB liability for all of its retirees was approximately \$795.4. Following entry of the Judgment approving the Butler Retiree Settlement, the Company’s total OPEB liability (prior to any funding of the VEBA Trust) will increase by approximately \$30.0 in 2011. A one-time, pre-tax charge of approximately \$14.2, based upon then-current valuation assumptions, will be recorded in the first quarter of 2011 to reverse previous amortization of the prior plan amendment. In addition, the Company recorded a one-time charge of \$9.1 in the fourth quarter of 2010 related to the Butler Retiree Settlement. The remaining portion of the plan amendment will be amortized over approximately five years. The Company’s only remaining liability with respect to the OPEB obligations to the Class Members will be to provide existing company-paid health and life insurance to Class Members through December 31, 2014, and to contribute the payments due to the VEBA Trust under the settlements. The Company’s OPEB liability will be reduced after each of the annual contributions to the VEBA Trust under the terms of the settlements. In addition, its OPEB liability will be reduced by the amounts of the continued payments of uncapped benefits through December 31, 2014. After December 31, 2014, the Company will have no liabil-

ity or responsibility with respect to OPEB obligations to the Class Members.

For accounting purposes, a settlement of the Company’s OPEB obligations related to the Class Members will be deemed to have occurred when AK Steel makes the last payment called for under the Settlement.

#### *Middletown Works Retiree Healthcare Benefits Litigation*

As previously reported, on June 1, 2006, AK Steel notified approximately 4,600 of its current retirees (or their surviving spouses) who formerly were hourly and salaried members of the Armco Employees Independent Federation (“AEIF”) that AK Steel was terminating their existing healthcare insurance benefits plan and implementing a new plan more consistent with current steel industry practices that would require the retirees to contribute to the cost of their healthcare benefits, effective October 1, 2006. On July 18, 2006, a group of nine former hourly and salaried members of the AEIF filed a class action (the “Middletown Retiree Action”) in the United States District Court for the Southern District of Ohio (the “Court”), Case No. 1-06CV0468, alleging that AK Steel did not have a right to make changes to their healthcare benefits. The named plaintiffs in the Middletown Retiree Action sought, among other things, injunctive relief (including an order retroactively rescinding the changes) for themselves and the other members of the class. On August 4, 2006, the plaintiffs in the Middletown Retiree Action filed a motion for a preliminary injunction seeking to prevent AK Steel from implementing the previously announced changes to healthcare benefits with respect to the AEIF-represented hourly employees. AK Steel opposed that motion, but on September 22, 2006, the trial court issued an order granting the motion. On October 8, 2007, the Company announced that it had reached a tentative settlement (the “Middletown Retiree Settlement”) of the claims of the retirees in the Middletown Retiree Action. The Middletown Retiree Settlement was opposed by certain objecting class members, but their objections were rejected by the trial court and on appeal. After the appeal of the objecting participants was dismissed, the Middletown Retiree Settlement became final on July 6, 2009.

Under terms of the Middletown Retiree Settlement, AK Steel has transferred to a Voluntary Employees Beneficiary Association trust (the “VEBA Trust”) all OPEB obligations owed to the covered retirees under the Company’s applicable health and welfare plans and will have no further liability for any claims incurred by those retirees after the effective date of the Middletown Retiree Settlement relating to their OPEB obligations. The VEBA Trust will be utilized to fund the future OPEB obligations to the covered retirees. Under the terms of the Middletown Retiree Settlement, AK Steel was obligated to initially fund the VEBA Trust with a contribution of \$468.0 in cash within two business days of the effective date of that Settlement. AK Steel made this contribution on March 4, 2008. AK Steel further committed under the Middletown Retiree Settlement to make three subsequent annual cash contributions of \$65.0 each, for a total contribution of \$663.0. AK Steel has timely made the first two of these three annual cash contributions of \$65.0, leaving AK Steel obligated to make one more cash contribution in March of 2011.

Prior to the Middletown Retiree Settlement, the Company’s total OPEB liability for all of its retirees was approximately \$2.0 billion. Of that amount, approximately \$1.0 billion was attributable to the retirees covered by the Middletown Retiree Settlement. Immediately following the judgment approving

that Settlement, the Company's total OPEB liability was reduced by approximately \$339.1. This reduction in the Company's OPEB liability is being treated as a negative plan amendment and amortized as a reduction to net periodic benefit cost over approximately eleven years. This negative plan amendment will result in an annual net periodic benefit cost reduction of approximately \$30.0 in addition to the lower interest costs associated with the lower OPEB liability. Upon payment on March 4, 2008, of the initial \$468.0 contribution by AK Steel to the VEBA Trust in accordance with the terms of the Middletown Retiree Settlement, the Company's total OPEB liability was reduced further to approximately \$1.1 billion. The Company's total OPEB liability was further reduced by the two \$65.0 payments referred to above. The Company's total OPEB liability will be reduced further after the remaining \$65.0 payment due in March 2011 is made. In total, it is expected that the \$663.0 Middletown Retiree Settlement ultimately will reduce the Company's total OPEB liability by approximately \$1.0 billion.

For accounting purposes, a settlement of the Company's OPEB obligations related to the Class Members will be deemed to have occurred when AK Steel makes the last \$65.0 payment called for under the Middletown Retiree Settlement. In the first quarter of 2011, the Company will recognize the settlement accounting at the date of the final payment, which will result in a non-cash adjustment to the income statement for a portion of the accumulated gains and losses measured at that date. The amount recognized will be prorated based on the portion settled of the total liability as of March 2008.

## Tax Contingencies

### 1.115

#### PRAXAIR, INC. (DEC)

##### NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

###### *Note 17. Commitments and Contingencies (in part)*

The company accrues non income-tax liabilities for contingencies when management believes that a loss is probable and the amounts can be reasonably estimated, while contingent gains are recognized only when realized. In the event any losses are sustained in excess of accruals, they will be charged against income at that time. Commitments represent obligations, such as those for future purchases of goods or services, that are not yet recorded on the company's balance sheet as liabilities. The company records liabilities for commitments when incurred (i.e., when the goods or services are received).

Praxair is subject to various lawsuits and government investigations that arise from time to time in the ordinary course of business. These actions are based upon alleged environmental, tax, antitrust and personal injury claims, among others. Praxair has strong defenses in these cases and intends to defend itself vigorously. However, it is possible that the company may incur losses in connection with some of these actions in excess of accrued liabilities. Management does not anticipate that in the aggregate such losses would have a material adverse effect on the company's consolidated fi-

nancial position or liquidity; however, it is possible that the final outcomes could have a significant impact on the company's reported results of operations in any given period.

Among such matters are:

- Claims by the Brazilian taxing authorities against several of the company's Brazilian subsidiaries relating to non-income and income tax matters. During May 2009, the Brazilian government published Law 11941/2009 instituting a new voluntary amnesty program ("Refis Program") which allowed Brazilian companies to settle certain federal tax disputes at reduced amounts. During the 2009 third quarter, Praxair decided that it was economically beneficial to settle many of its outstanding federal tax disputes and these disputes were enrolled in the Refis Program and settled (see Note 2). During January 2010, the Brazilian state of Rio de Janeiro ("Rio") published Law 5647/2010 instituting a new state amnesty program ("Rio Amnesty Program") which allows Brazilian companies to settle certain disputes with the state of Rio at reduced amounts. During the 2010 first quarter, Praxair decided that it was economically beneficial to settle several of its outstanding disputes with the state of Rio and these disputes were enrolled in the Program and settled. The final settlements related to both the Refis and Rio Amnesty Programs are subject to final calculation and review by the Brazilian federal and Rio state governments, respectively, and the company currently anticipates these reviews will conclude during the next year. Any differences from amounts recorded will be adjusted to income at that time.

After enrollment in the amnesty programs, at December 31, 2010 the most significant remaining claims relate to a state VAT tax matter associated with a procedural issue and a federal income tax matter where the taxing authorities are challenging the tax rate that should be applied to income generated by a subsidiary company. The total estimated exposure relating to such claims, including interest and penalties, as appropriate, is approximately \$173 million. Praxair has not recorded any liabilities related to such claims based on management judgments, after considering judgments and opinions of outside counsel. Because litigation in Brazil historically takes many years to resolve, it is very difficult to estimate the timing of resolution of these matters; however, it is possible that certain of these matters may be resolved within the near term. The company is vigorously defending against the proceedings.

### 1.116

#### INGRAM MICRO INC. (DEC)

##### NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

###### *Note 10—Commitments and Contingencies (in part; in thousands)*

Our Brazilian subsidiary has been assessed for commercial taxes on its purchases of imported software for the period January to September 2002. The principal amount of the tax assessed for this period was 12,700 Brazilian reais. Although we believe we have valid defenses to the payment

of the assessed taxes, as well as any amounts due for the unassessed period from October 2002 to December 2005, after consultation with counsel and consideration of legislation enacted in February 2007, it is our opinion that it is probable that we may be required to pay all or some of these taxes. Accordingly, we recorded a net charge to cost of sales of \$30,134 in 2007 to establish a liability for these taxes assessable through December 2005. The legislation enacted in February 2007 provides that such taxes are not assessable on software imports after January 1, 2006. In the fourth quarters of 2010, 2009 and 2008, we released a portion of this commercial tax reserve amounting to \$9,112, \$9,758 and \$8,224 respectively, (15,500, 17,100 and 19,600 Brazilian reais at a December 2010 exchange rate of 1.666, December 2009 exchange rate of 1.741 and December 2008 exchange rate of 2.330 Brazilian reais to the U.S. dollar, respectively). These partial reserve releases were related to the unassessed periods from January through December 2005, January through December 2004 and January through December 2003, respectively, for which it is our opinion, after consultation with counsel, that the statute of limitations for an assessment from Brazilian tax authorities has expired. The remaining amount of liability at January 1, 2011 and January 2, 2010 was 12,700 Brazilian reais and 28,200 Brazilian reais, respectively, (approximately \$7,600 and \$16,200 at January 1, 2011 and January 2, 2010, respectively, based on the exchange rate prevailing on those dates of 1.666 and 1.741 Brazilian reais, respectively, to the U.S. dollar).

While the tax authorities may seek to impose interest and penalties in addition to the tax as discussed above, which potentially aggregate to approximately \$15,000 as of January 1, 2011 based on the exchange rate prevailing on that date of 1.666 Brazilian reais to the U.S. dollar, we continue to believe that we have valid defenses to the assessment of interest and penalties and that payment is not probable. We will continue to vigorously pursue administrative and judicial action to challenge the current, and any subsequent assessments. However, we can make no assurances that we will ultimately be successful in defending any such assessments, if made.

## Environmental Matters

### 1.117

#### ANADARKO PETROLEUM CORPORATION (DEC)

##### NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

#### 2. Deepwater Horizon Events (in part)

**Background** In April 2010, the Macondo well in the Gulf of Mexico, in which Anadarko holds a 25% non-operating leasehold interest, discovered hydrocarbon accumulations. During suspension operations, the well blew out, an explosion occurred on the *Deepwater Horizon* drilling rig, and the drilling rig sank, resulting in the release of hydrocarbons into the Gulf of Mexico. Eleven people lost their lives in the explosion and subsequent fire, and others sustained personal injuries. Response and cleanup efforts are being conducted by BP Exploration & Production Inc. (BP), the operator and 65% owner of the Macondo lease, and by other parties, all

under the direction of the Unified Command of the United States Coast Guard (USCG).

On July 15, 2010, after several attempts to contain the oil spill, BP successfully installed a capping stack that shut in the well and prevented the further release of hydrocarbons. Installation of the capping stack was a temporary solution that was followed by a successful "static kill" cementing operation completed on August 5, 2010. The Macondo well was permanently plugged on September 19, 2010, when BP completed a "bottom kill" cementing operation in connection with the successful interception of the well by a relief well. Investigations by the federal government and other parties into the cause of the well blowout, explosion, and resulting oil spill, as well as other matters arising from or relating to these events, are ongoing.

Based on information provided by BP to the Company, BP has incurred costs of approximately \$16.5 billion (including costs associated with USCG invoices totaling \$606 million) through December 31, 2010, related to spill response and containment, relief-well drilling, grants to certain Gulf Coast states for cleanup costs, local tourism promotion, monetary damage claims and federal costs. In addition, BP has incurred more than \$1.4 billion of costs since December 31, 2010.

BP has sought reimbursement from Anadarko for amounts BP has paid or committed to pay for spill-response efforts, grants, damage claims and costs incurred by the federal government through provisions of the operating agreement (OA), which is the contract governing the relationship between BP and the non-operating OA parties to the Mississippi Canyon Block 252 lease in which the Macondo well is located (Lease). BP has invoiced the Company an aggregate \$4.0 billion for what BP considers to be Anadarko's 25% proportionate share of actual costs through December 31, 2010. In addition, BP has invoiced Anadarko for anticipated near-term future costs related to the Deepwater Horizon events. Anadarko has withheld reimbursement to BP for Deepwater Horizon event-related invoices pending the completion of various ongoing investigations into the cause of the well blowout, explosion, and subsequent release of hydrocarbons. Final determination of the root causes of the Deepwater Horizon events could materially impact the Company's potential obligations under the OA.

BP, Anadarko and other parties, including parties that do not own an interest in the Lease, such as the drilling contractor, have received correspondence from the USCG referencing their identification as a "responsible party or guarantor" (RP) under the Oil Pollution Act of 1990 (OPA), and the United States Department of Justice (DOJ) has also filed a civil lawsuit against such parties seeking to, among other things, confirm each party's identified RP status. Under OPA, RPs may be held jointly and severally liable for costs of well control, spill response, and containment and removal of hydrocarbons, as well as other costs and damage claims directly related to the spill and spill cleanup. The USCG has directly invoiced the identified RPs for reimbursement of spill-related response costs incurred by the USCG and other federal and state agencies. The identified RPs each received identical invoices for total costs, without specification or stipulation of any allocation of costs between or among the identified RPs. To date, as operator, BP has paid all USCG invoices, thereby satisfying the joint and several obligation of the identified RPs to the USCG for these costs. BP has also made repeated public statements regarding its intention to continue to pay

100% of costs associated with cleanup efforts, claims and reimbursements related to the Deepwater Horizon events.

The following analysis applies relevant accounting guidance to the Deepwater Horizon events to determine the Company's liability accrual as of December 31, 2010. The process for quantifying the Company's Deepwater Horizon event-related liability accrual involves the identification of all potential costs and the grouping of these costs in a manner that enables the Company to apply relevant accounting guidance to each cost based upon the qualitative characteristics of such costs. This is appropriate because satisfaction of liability-recognition criteria may vary depending upon the type of costs being analyzed. For example and as discussed more fully below, contingent contractual liabilities (such as those arising under the OA) and contingent environmental liabilities (such as those arising under OPA) are subject to substantially similar liability-recognition criteria; however, circumstances under which such criteria are considered satisfied are different.

As discussed and analyzed below, after applying the relevant accounting guidance to the Company's Deepwater Horizon event-related contingent liabilities, the Company's aggregate liability accrual for these amounts is zero as of December 31, 2010. The zero liability accrual is not intended to represent an opinion of the Company that it will not incur any future liability related to the Deepwater Horizon events. Rather, the zero liability accrual is based on currently available facts and the application of accounting rules to this set of facts where the relevant accounting rules do not allow for loss recognition where a potential loss is not considered "probable" or cannot be reasonably estimated.

In quantifying its potential Deepwater Horizon event-related liabilities, the Company has made certain assumptions regarding facts that are the subject of continuing investigations, the duration and extent of ongoing cleanup activities, and current and potential future damage claims. Thus, the Company's zero liability accrual for the Deepwater Horizon events is subject to change in the future, perhaps materially. Below is a discussion of the Company's current analysis, under applicable accounting guidance, of its potential liability for (i) amounts invoiced by BP under the OA, (ii) OPA-related environmental costs, and (iii) other contingent liabilities.

**OA Contingent Liabilities**—OA contingent liabilities relate to Anadarko's potential responsibility for a 25% share of costs incurred by BP through December 31, 2010, for which BP has sought reimbursement from Anadarko under the OA. Accounting standards require the Company to accrue contingent liabilities arising under the terms of the OA if it is both "probable" that a liability has been incurred and the amount of the liability can be reasonably estimated.

With respect to the operator's duties and liabilities, the OA provides the following:

- BP, as operator, owes duties to the non-operating parties (including Anadarko) to perform the drilling of the well in a good and workmanlike manner and to comply with all applicable laws and regulations;
- BP, as operator, is not liable to non-operating parties for losses sustained or liabilities incurred, except for losses resulting from the operator's gross negligence or willful misconduct; and
- Liability for losses, damages, costs, expenses, or claims involving activities or operations shall be borne by each party in proportion to its participating interest, except that when liability results from the gross negligence or willful misconduct of a party, that party shall

be solely responsible for liability resulting from its gross negligence or willful misconduct.

The Company believes publicly available evidence indicates that the blowout of the well, the explosion on the *Deepwater Horizon* drilling rig, and the subsequent release of hydrocarbons were preventable and the direct result of BP's decisions, omissions and actions, and likely constitute gross negligence or willful misconduct by BP. BP has issued public statements indicating that it disagrees with this assessment. Under the OA, liabilities arising as a result of gross negligence or willful misconduct by BP are the sole responsibility of BP and are not chargeable to other OA parties, including Anadarko. In light of the foregoing, Anadarko does not consider OA contingent liabilities for Deepwater Horizon event-related costs invoiced by BP to the Company to satisfy the standard of "probable" required for loss recognition. Accordingly, as of December 31, 2010, pursuant to applicable accounting guidance, the Company has not recognized a liability in its Consolidated Balance Sheets for Deepwater Horizon event-related costs that have been invoiced by BP to Anadarko under the OA.

In the future, the Company may recognize a liability for Deepwater Horizon event-related costs invoiced by BP under the OA if new information arising from the legal discovery or adjudication process, hearings, other investigations, expert analysis, or testing alters the Company's current assessment as to the likelihood of the Company incurring a liability for its existing OA contingent obligations. In addition, BP, as the operator, may have enforceable indemnity obligations to certain of its contractors, for which BP may be able to obtain reimbursement from the Company under the OA for the Company's share of any such costs incurred by BP, notwithstanding BP's own gross negligence. The Company currently is not positioned to assess the validity of BP's ostensible indemnity obligations to its contractors, nor is the Company knowledgeable as to whether BP has incurred actual costs as a result of these indemnity provisions. As a result, the Company currently does not consider any losses attributable to potential indemnity obligations to be "probable," and is furthermore unable to reasonably estimate the amount of any such potential loss.

**OPA-Related Environmental Costs**—Under OPA, Anadarko may be held jointly and severally liable with all RPs for OPA-related environmental costs associated with the Deepwater Horizon events. Anadarko's treatment by the USCG as an identified RP arises as a result of Anadarko's status as a co-lessee in the Lease.

Applicable accounting guidance requires the Company to accrue an environmental liability if it is both "probable" that a liability has been incurred and the amount of the liability can be reasonably estimated. Under accounting guidance applicable to environmental liabilities, a liability is presumed "probable" if the entity is both identified as an RP and associated with the environmental event. The Company's co-lessee status in the Lease and the subsequent identification and treatment of the Company as an RP satisfies these standards and therefore establishes the presumption that the Company's potential environmental liabilities related to the Deepwater Horizon events are "probable." Given that such liabilities are probable, applicable accounting guidance requires the Company to (i) estimate, on a gross basis, a range of total potential OPA-related environmental costs for the Deepwater Horizon events, and (ii) separately assess and estimate the Company's allocable share of the gross estimated costs.

OPA-related environmental costs that have been paid by BP and subsequently invoiced to Anadarko under the OA are accounted for as OA contingent liabilities (discussed above) rather than OPA-related environmental costs (discussed herein). Payment of OPA-related environmental costs by BP satisfies these liabilities for all identified RPs, including Anadarko, and has resulted in BP seeking reimbursement from Anadarko for these costs through the OA, thereby creating an OA contingent liability. The Company assumes that all OPA-related environmental costs incurred by BP and reported to the Company have been paid by BP, thereby satisfying those joint and several OPA-related environmental costs for all identified RPs.

**Gross OPA-Related Environmental Cost Estimate**—The Company estimates the range of gross OPA-related environmental costs for all identified RPs to be \$4.0 billion to \$5.0 billion, excluding (i) \$16.5 billion of costs incurred by BP as of December 31, 2010, which are considered and analyzed as OA contingent liabilities, and (ii) amounts the Company currently cannot reasonably estimate, which include OPA damage claims that may be filed subsequent to the first quarter of 2011, potential costs associated with penalties and fines, the costs associated with natural resource damage (NRD) assessments and NRD claims, and civil litigation damages. The costs that the Company currently cannot reasonably estimate may be significant.

Anadarko's gross OPA-related environmental cost estimate is comprised of spill-response costs and OPA damage claims. This cost estimate is based on cost information received from BP, certain assumptions discussed below, and publicly available information from the Gulf Coast Claims Facility (GCCF). The GCCF is an independent claims facility that was established in June 2010, as part of an agreement between the federal government and BP, to assist claimants in the submission and resolution of claims for costs and damages incurred as a result of the Deepwater Horizon events. As a non-operator, the Company is limited to formulating its estimates of spill-response costs and OPA damages based upon information provided by BP, publicly available information, and management's assumptions regarding a number of variables associated with the Deepwater Horizon events that remain uncertain or unknown. Although the Macondo well has been permanently plugged, the scope and extent of damages and cleanup activities continue to evolve, resulting in significant uncertainty as to the spill's ultimate impacts and associated costs. Accordingly, the Company believes that actual gross OPA-related environmental costs may vary, perhaps materially, from the Company's estimate.

**Spill-Response Costs and Assumptions**—Estimated spill-response costs are based on cost information received from BP, which was used to estimate activity-based cost run-rates for spill-response activities, which, in turn, were projected forward according to the Company's estimates of the potential duration and extent of the spill response and cleanup.

The Company's current cost estimate is based on the following assumptions:

- Costs to operate, demobilize and decontaminate offshore well-site equipment and resources will continue through the first quarter of 2011; and
- At a minimum, costs will continue through the end of the first quarter of 2011, and end prior to the beginning of the third quarter of 2011, for the following activities:
  - Shallow-water marine cleanup;
  - Demobilization and decontamination of vessels deployed in open-water cleanup;

—Shoreline cleanup; and

—Federal, state and local spill mitigation and coordination.

The above costs may continue for periods longer than those assumed by the Company for purposes of formulating its cost estimate. However, the scope and extent of the above costs continue to evolve over time, which adversely impacts the Company's ability to reasonably estimate certain costs that may continue beyond the above-stated periods. The Company will continue to monitor and estimate costs as the scope and extent of required activities becomes more certain.

**OPA Damage Claims**—OPA damages (other than NRD, discussed below) include costs associated with increased public-service expenses, damages to real or personal property, damages to subsistence users of natural resources, lost revenues, and lost profits and earning capacity. These damages are assessed pursuant to OPA and are limited, in general, to \$75 million. However, the \$75 million limit has not been applied for purposes of formulating the Company's cost-range estimate and may not be applicable where there is a finding of gross negligence, willful misconduct, or a violation of an applicable federal safety, construction, or operating regulation by an RP, an agent or employee of an RP, or a person acting pursuant to a contractual relationship with an RP.

The Company's cost estimate includes potential OPA damage claims and costs to administer those claims based on data received from BP and publicly available information from the GCCF. This claims information has been used to formulate estimates of the number of claims to be paid, the average expected per-claim payout, and costs to administer claims and operate claims offices projected for claims filed through the end of the first quarter of 2011.

The Company believes that new claims will continue to be filed beyond the end of the first quarter of 2011; however, the Company is currently unable to reasonably estimate the number, magnitude and administrative cost of claims that will be filed subsequent to the first quarter of 2011. The Company lacks visibility into, among other things, the processes associated with OPA damage claim approvals and claims administration, which significantly hinders the Company's ability to formulate a long-term estimate of potential OPA damage claims. Accordingly, the Company's cost estimate does not include amounts attributable to OPA damage claims that could be made subsequent to the end of the first quarter of 2011.

**Allocable Share of Gross OPA-Related Environmental Costs**—As discussed above, under applicable accounting guidance, the Company is required to estimate its allocable share of gross OPA-related environmental costs based on the Company's estimate of the allocation method and percentage that may ultimately apply. No agreed-upon or stipulated allocation of gross OPA-related environmental costs currently exists. As a result, the Company considered the following factors for purposes of estimating a range of its allocable share of these costs:

- *BP's payment to date of Deepwater Horizon event-related costs*—To date, BP has paid all Deepwater Horizon event-related costs and has repeatedly stated publicly and in congressional testimony that it will continue to pay all of these costs. The liability of all RPs for amounts payable under OPA is satisfied as BP funds these amounts. Accordingly, Anadarko's minimum allocable share of gross OPA-related environmental costs is

zero where BP continues to fund 100% of OPA-related environmental costs. Furthermore, the Company believes that in order for BP to obtain reimbursement from Anadarko under the OA for OPA-related environmental costs paid by BP, BP must establish that it is entitled to reimbursement under the terms of the OA. As discussed above, the Company does not consider BP to be entitled to cost reimbursement under the OA.

- **Anadarko's OA sharing percentage**—If BP ceases paying any portion of the Deepwater Horizon event-related costs, the federal government could seek payment from all potential RPs under the joint and several liability provisions of OPA. Under this scenario, the Company estimates its maximum allocation of gross OPA-related environmental costs could be 25%, which is equivalent to Anadarko's OA sharing percentage. The Company does not consider an allocable percentage in excess of 25% to be reasonable based on BP's public statements that it intends to continue to honor its commitments in the Gulf of Mexico, the Company's assessment of BP's ability to continue funding all OPA-related environmental costs and the Company's assessment of the other OA party's ability to fund its share of potential costs. This estimate of a maximum allocation percentage assumes no allocation of gross OPA-related environmental costs to RPs that are not a party to the OA (non-OA RPs).
- **Allocation to non-OA RPs**—In addition to the parties to the OA, identified as RPs (including the Company), two non-OA RPs have been identified by the federal government. The allocation of costs to all potential RPs, including non-OA RPs, would likely reduce Anadarko's potential allocable share of gross OPA-related environmental costs to an amount less than Anadarko's 25% OA sharing percentage.

Based on the above, the Company has concluded that a range of 0-25% is appropriate as an estimate of its potential allocable share of gross OPA-related environmental costs. In prior periods, the Company concluded that no single allocation percentage within the 0-25% range was more likely than another, resulting in the Company accruing a liability of zero for its potential share of gross OPA-related environmental costs as required by applicable accounting guidance. At December 31, 2010, the Company considers zero to be the most likely allocable percentage within the original 0-25% range for allocation of gross OPA-related environmental costs and, under the applicable accounting guidance, continues to have a liability accrual of zero. The Company's assessment as to the most likely allocation percentage changed as a result of BP's continued funding of 100% of OPA-related environmental costs and BP's repeated public commentary regarding its ability and intent to continue to honor its Deepwater Horizon-related commitments. BP's funding and public commentary has continued subsequent to the release of BP's own investigation report as well as the National Commission on the BP Deepwater Horizon Oil Spill and Offshore Drilling's final report, which the Company considers significant in concluding that zero is the most likely allocation percentage within the 0-25% range.

### LOCKHEED MARTIN CORPORATION (DEC)

#### NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

##### *Note 14—Legal Proceedings, Commitments, and Contingencies (in part)*

##### *Environmental Matters*

We are involved in environmental proceedings and potential proceedings relating to soil and groundwater contamination, disposal of hazardous waste, and other environmental matters at several of our current or former facilities, or at third-party sites where we have been designated as a potentially responsible party (PRP). At December 31, 2010 and 2009, the aggregate amount of liabilities recorded relative to environmental matters was \$935 million and \$877 million. Approximately \$807 million and \$748 million are recorded in other liabilities on the Balance Sheets, with the remainder recorded in other current liabilities. A portion of environmental costs is eligible for future recovery in the pricing of our products and services on U.S. Government contracts. We have recorded assets totaling \$810 million and \$740 million at December 31, 2010 and 2009 for the estimated future recovery of these costs, as we consider the recovery probable based on government contracting regulations and our history of receiving reimbursement for such costs. Approximately \$699 million and \$630 million are recorded in other assets on the Balance Sheets, with the remainder recorded in other current assets.

Environmental cleanup activities usually span several years, which make estimating liabilities a matter of judgment because of such factors as changing remediation technologies, assessments of the extent of contamination, and continually evolving regulatory environmental standards. We consider these and other factors in estimates of the timing and amount of any future costs that may be required for remediation actions, which results in the calculation of a range of estimates for a particular environmental site.

We perform quarterly reviews of the status of our environmental sites and the related liabilities and assets. We record a liability when it is probable that a liability has been incurred and the amount can be reasonably estimated. The amount of liability recorded is based on our best estimate of the costs to be incurred for remediation at a particular site within a range of estimates for that site or, in cases where no amount within the range is better than another, we record an amount at the low end of the range. We do not discount the recorded liabilities, as the amount and timing of future cash payments are not fixed or cannot be reliably determined.

We cannot reasonably determine the extent of our financial exposure in all cases at this time. There are a number of former operating facilities that we are monitoring or investigating for potential future remediation. In some cases, although a loss may be probable, it is not possible at this time to reasonably estimate the amount of any obligation for remediation activities because of uncertainties with respect to assessing the extent of the contamination or the applicable regulatory standard. We also are pursuing claims for contribution to site cleanup costs against other PRPs, including the U.S. Government.

In January 2011, both the U.S. Environmental Protection Agency and the California Office of Environmental Health Hazard Assessment announced plans to regulate two

chemicals, perchlorate and hexavalent chromium, to a level that is expected to be substantially lower than the existing standard established in California. The rulemaking process is a lengthy one and may take one or more years to complete. If a substantially lower standard is adopted, we would expect a material increase in our estimates for remediation at several existing sites.

We are conducting remediation activities, including under various consent decrees and orders relating to soil or ground-water contamination at certain sites of former or current operations. Under an agreement related to our Burbank and Glendale, California sites, the U.S. Government reimburses us an amount equal to approximately 50% of expenditures for certain remediation activities in its capacity as a PRP under the Comprehensive Environmental Response, Compensation and Liability Act (CERCLA).

##### NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

###### *Note 9. Commitments and Contingencies (in part)*

**Self-Insurance**—The Company retains the risk for workers' compensation resulting from uninsured deductibles per accident or occurrence that are subject to annual aggregate limits. Losses up to the deductible amounts are accrued based upon known claims incurred and an estimate of claims incurred but not reported. For the year ended December 26, 2010, the Company compiled its historical data pertaining to the self-insurance experiences and actuarially developed the ultimate loss associated with its self-insurance programs for workers' compensation liability. Management believes that the actuarial valuation provides the best estimate of the ultimate losses to be expected under these programs.

The undiscounted ultimate losses of all the Company's self-insurance reserves at December 26, 2010, and December 27, 2009, were \$20.4 million and \$24.4 million, respectively. Based on historical payment patterns, the Company expects payments of undiscounted ultimate losses to be made as follows (in thousands):

| Year       | Amount   |
|------------|----------|
| 2011       | \$ 5,183 |
| 2012       | 3,566    |
| 2013       | 2,561    |
| 2014       | 1,953    |
| 2015       | 1,521    |
| Thereafter | 5,607    |
| Total      | \$20,391 |

The Company discounts the ultimate losses above to present value using an approximate risk-free rate over the average life of its insurance claims. For the years ended December 26, 2010, and December 27, 2009, the discount rate used was 2.23% and 3.67%, respectively. The present value of all self-insurance reserves for the employee group health claims and

workers' compensation liability recorded at December 26, 2010, and December 27, 2009, was \$19.9 million and \$21.0 million, respectively.

The Company had letters of credit of \$7.5 million outstanding at December 26, 2010, to collateralize its self-insurance obligations.

## Investigations and Regulatory Action

#### HALLIBURTON COMPANY (DEC)

##### NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

###### *Note 8. Commitments and Contingencies (in part)*

###### *The Gulf of Mexico/Macondo Well Incident*

**Overview.**—The semisubmersible drilling rig, Deepwater Horizon, sank on April 22, 2010 after an explosion and fire onboard the rig that began on April 20, 2010. The Deepwater Horizon was owned by Transocean Ltd. and had been drilling the Macondo exploration well in Mississippi Canyon Block 252 in the Gulf of Mexico for the lease operator, BP Exploration & Production, Inc. (BP Exploration), an indirect wholly owned subsidiary of BP p.l.c. We performed a variety of services for BP Exploration, including cementing, mud logging, directional drilling, measurement-while-drilling, and rig data acquisition services. Crude oil flowing from the well site spread across thousands of square miles of the Gulf of Mexico and reached the United States Gulf Coast. Numerous attempts at estimating the volume of oil spilled have been made by various groups, and on August 2, 2010 the federal government published an estimate that approximately 4.9 million barrels of oil were discharged from the well. Efforts to contain the flow of hydrocarbons from the well were led by the United States government and by BP p.l.c., BP Exploration, and their affiliates (collectively, BP). The flow of hydrocarbons from the well ceased on July 15, 2010, and the well was permanently capped on September 19, 2010. There were eleven fatalities and a number of injuries as a result of the Macondo well incident.

As of December 31, 2010, we had not accrued any amounts related to this matter because we do not believe that a loss is probable. We are currently unable to estimate the full impact the Macondo well incident will have on us. Further, an estimate of possible loss or range of loss related to this matter cannot be made. Considering the complexity of the Macondo well, however, and the number of investigations being conducted and lawsuits pending, as discussed below, new information or future developments may require us to adjust our liability assessment, and liabilities arising out of this matter could have a material adverse effect on our liquidity, consolidated results of operations, and consolidated financial condition.

**Investigations and Regulatory Action.**—The United States Department of Homeland Security and Department of the Interior are jointly investigating the cause of the Macondo well incident. The United States Coast Guard, a component of the United States Department of Homeland Security, and the Bureau of Ocean Energy Management, Regulation and Enforcement (formerly known as the Minerals Management Service),

a bureau of the United States Department of the Interior, share jurisdiction over the investigation into the Macondo well incident and have formed a joint investigation team that continues to review information and hold hearings regarding the incident (Marine Board Investigation). We are named as one of the 16 parties-in-interest in the Marine Board Investigation. In addition, other investigations are underway by the Chemical Safety Board, the National Academy of Sciences, and the National Commission on the BP Deepwater Horizon Oil Spill and Offshore Drilling (National Commission) that the President of the United States has established to, among other things, examine the relevant facts and circumstances concerning the causes of the Macondo well incident and develop options for guarding against future oil spills associated with offshore drilling. We are assisting in efforts to identify the factors that led to the Macondo well incident and have participated and intend to continue participating in various hearings relating to the incident that are held by, among others, certain of the agencies referred to above and various committees and subcommittees of the House of Representatives and the Senate of the United States.

In May 2010, the United States Department of the Interior effectively suspended all offshore deepwater drilling projects in the United States Gulf of Mexico. The suspension was lifted in October 2010. Since that time, the Department of the Interior has issued guidance for drillers that intend to resume deepwater drilling activity. There has been no material increase, however, in the level of drilling activity in the Gulf of Mexico since the suspension was lifted, and we believe that the prospects for any significant increase will remain uncertain through the first half, and perhaps the full year, of 2011. For additional information, see Item 1(a), "Risk Factors" and "Management's Discussion and Analysis of Financial Condition and Results of Operations—Business Environment and Results of Operations."

*DOJ Investigations and Actions.*—On June 1, 2010, the United States Attorney General announced that the DOJ was launching civil and criminal investigations into the Macondo well incident to closely examine the actions of those involved, and that the DOJ was working with attorneys general of states affected by the Macondo well incident. The DOJ announced that it was reviewing, among other traditional criminal statutes, possible violations of and liabilities under The Clean Water Act (CWA), The Oil Pollution Act of 1990 (OPA), The Migratory Bird Treaty Act of 1918 (MBTA), and the Endangered Species Act of 1973 (ESA).

The CWA provides authority for civil and criminal penalties for discharges of oil into or upon navigable waters of the United States, adjoining shorelines, or in connection with the Outer Continental Shelf Lands Act in quantities that are deemed harmful. Criminal sanctions under the CWA can be assessed for negligent discharges (up to \$50,000 per day of violation), for knowing discharges (up to \$100,000 per day of violation), and for knowing endangerment (up to \$2 million per violation), and federal agencies could be precluded from contracting with a company that is criminally sanctioned under the CWA. Civil proceedings under the CWA can be commenced against an "owner, operator or person in charge of any vessel or offshore facility that discharged oil or a hazardous substance." The civil penalties that can be imposed against responsible parties range from up to \$1,100 per barrel of oil discharged in the case of those found strictly liable to \$4,300 per barrel of oil discharged in the case of those found to have been grossly negligent.

The OPA establishes liability for discharges of oil from vessels, onshore facilities, and offshore facilities into or upon the navigable waters of the United States. Under the OPA, the "responsible party" for the discharging vessel or facility is liable for removal and response costs as well as for damages, including recovery costs to contain and remove discharged oil and compensation for injury to natural resources. The cap on liability under the OPA is the full cost of removal of the discharged oil plus up to \$75 million for natural resources damages, except that the cap on natural resources damages does not apply in the event the damage was proximately caused by gross negligence or the violation of certain federal standards. The OPA defines the set of responsible parties differently depending on whether the source of the discharge is a vessel or an offshore facility. Liability for vessels is imposed on owners and operators; liability for offshore facilities is imposed on the holder of the permit or lessee of the area in which the facility is located.

The MBTA and the ESA provide penalties for injury and death to wildlife and bird species. The MBTA provides that violators are strictly liable and provides for fines of up to \$15,000 per bird killed and imprisonment of up to six months. The ESA provides for civil penalties for knowing violations that can range up to \$25,000 per violation and, in the case of criminal penalties, up to \$50,000 per violation.

In addition, the Alternative Fines Act may be applied in lieu of the express amount of the criminal fines that may be imposed under the statutes described above in the amount of twice the gross economic loss suffered by third parties (or twice the gross economic gain realized by the defendant, if greater).

On December 15, 2010, the DOJ filed a civil action seeking damages and injunctive relief against BP, Anadarko, Transocean and others for violations of the CWA and the OPA. The DOJ's complaint seeks an action declaring that the defendants are strictly liable under the CWA as a result of harmful discharges of oil into the Gulf of Mexico and upon U.S. shorelines as a result of the Macondo well incident. The complaint also seeks an action declaring that the defendants are strictly liable under the OPA for the discharge of oil that has resulted in, among other things, injury to, loss of, loss of use of or destruction of natural resources and resource services in and around the Gulf of Mexico and the adjoining U.S. shorelines and resulting in removal costs and damages to the United States far exceeding \$75 million. BP has been designated, and has accepted the designation, as a responsible party for the pollution under the CWA and the OPA. Others have also been named as responsible parties, and all responsible parties may be held jointly and severally liable for any damages under the OPA, although a responsible party may make a claim for contribution against any other "responsible party" it alleges contributed to the oil spill or any other person it alleges was the sole cause of the oil spill.

We were not named as a responsible party under the CWA or the OPA in the DOJ civil action, and we do not believe we are a "responsible party" under the CWA or the OPA. While we were not included in the DOJ's complaint, there can be no assurance that we will not be joined in the action or that the DOJ or other federal or state governmental authorities will not bring an action, whether civil or criminal, against us under other statutes or regulations. In connection with the DOJ's filing of the action, it announced that its criminal and civil investigations are continuing and that it will employ efforts to hold accountable those who are responsible for the incident.

As of February 17, 2011, no criminal proceedings have been commenced against us.

In June 2010, we received a letter from the DOJ requesting thirty days advance notice of any event that may involve substantial transfers of cash or other corporate assets outside of the ordinary course of business. In our reply to the June 2010 DOJ letter, we conveyed our interest in briefing the DOJ on the services we provided on the Deepwater Horizon but indicated that we would not bind ourselves to the DOJ request. Subsequently, we have had and expect to continue to have discussions with the DOJ regarding the Macondo well incident and the request contained in the June 2010 DOJ letter.

*Investigative Reports.*—On September 8, 2010, an incident investigation team assembled by BP issued the Deepwater Horizon Accident Investigation Report (BP Report). The BP Report outlines eight key findings of BP related to the possible causes of the Macondo well incident, including failures of cement barriers, failures of equipment provided by other service companies and the drilling contractor, and failures of judgment by BP and the drilling contractor. With respect to the BP Report's assessment that the cement barrier did not prevent hydrocarbons from entering the wellbore after cement placement, the BP Report concluded that, among other things, there were "weaknesses in cement design and testing." According to the BP Report, the BP incident investigation team did not review its analyses or conclusions with us or any other entity or governmental agency conducting a separate or independent investigation of the incident. In addition, the BP incident investigation team did not conduct any testing using our cementing products.

On January 11, 2011, the National Commission released "Deep Water—The Gulf Oil Disaster and the Future of Off-shore Drilling," its investigation report (Investigation Report) to the President of the United States regarding, among other things, the National Commission's conclusions of the causes of the Macondo well incident. According to the Investigation Report, the "immediate causes" of the incident were the result of a series of missteps, oversights, miscommunications and failures to appreciate risk by BP, Transocean, and us, although the National Commission acknowledged that there were still many things it did not know about the incident, such as the role of the blowout preventer. The National Commission also acknowledged that it may never know the extent to which each mistake or oversight caused the Macondo well incident, but concluded that the immediate cause was "a failure to contain hydrocarbon pressures in the well," and pointed to three things that could have contained those pressures: "the cement at the bottom of the well, the mud in the well and in the riser, and the blowout preventer." In addition, the Investigation Report stated that "primary cement failure was a direct cause of the blowout" and that cement testing performed by an independent laboratory "strongly suggests" that the foam cement slurry used on the Macondo well was unstable. The Investigation Report, however, acknowledges a fact widely accepted by the industry that cementing wells is a complex endeavor utilizing an inherently uncertain process in which failures are not uncommon and that, as a result, the industry utilizes the negative pressure test and cement bond log test, among others, to identify cementing failures that require remediation before further work on a well is performed.

The Investigation Report also sets forth the National Commission's findings on certain missteps, oversights and other factors that may have caused, or contributed to the cause of, the incident, including BP's decision to use a long string cas-

ing instead of a liner casing, BP's decision to use only six centralizers, BP's failure to run a cement bond log, BP's reliance on the primary cement job as a barrier to a possible blowout, BP's and Transocean's failure to properly conduct and interpret a negative-pressure test, BP's temporary abandonment procedures, and the failure of the drilling crew and our surface data logging specialist to recognize that an unplanned influx of oil, gas or fluid into the well (known as a "kick") was occurring. With respect to the National Commission's finding that our surface data logging specialist failed to recognize a kick, the Investigation Report acknowledged that there were simultaneous activities and other monitoring responsibilities that may have prevented the surface data logging specialist from recognizing a kick.

The Investigation Report also identified two general root causes of the Macondo well incident: systemic failures by industry management, which the National Commission labeled "the most significant failure at Macondo," and failures in governmental and regulatory oversight. The National Commission cited examples of failures by industry management such as BP's lack of controls to adequately identify or address risks arising from changes to well design and procedures, the failure of BP's and our processes for cement testing, communication failures among BP, Transocean, and us, including with respect to the difficulty of our cement job, Transocean's failure to adequately communicate lessons from a recent near-blowout, and the lack of processes to adequately assess the risk of decisions in relation to the time and cost those decisions would save. With respect to failures of governmental and regulatory oversight, the National Commission concluded that applicable drilling regulations were inadequate, in part because of a lack of resources and political support of the Minerals Management Service (MMS), and a lack of expertise and training of MMS personnel to enforce regulations that were in effect.

We expect National Commission staff to issue a separate, more detailed report regarding the causes of the Macondo well incident sometime in the first quarter 2011.

*The Cementing Job and Reaction to Reports.* We disagree with the BP Report and the National Commission regarding many of their findings and characterizations with respect to the cementing and surface data logging services on the Deepwater Horizon. We have provided information to the National Commission and its staff that we believe has been overlooked or selectively omitted from the Investigation Report. We intend to continue to vigorously defend ourselves in any investigation relating to our involvement with the Macondo well that we believe inaccurately evaluates or depicts our services on the Deepwater Horizon.

The cement slurry on the Deepwater Horizon was designed and prepared pursuant to well condition data provided by BP. Regardless of whether alleged weaknesses in cement design and testing are or are not ultimately established, and regardless of whether the cement slurry was utilized in similar applications or was prepared consistent with industry standards, we believe that had BP and others properly interpreted a negative-pressure test, this test would have revealed any problems with the cement. In addition, had BP designed the Macondo well to allow a full cement bond log test or if BP had conducted even a partial cement bond log test, the test likely would have revealed any problems with the cement. BP, however, elected not to conduct any cement bond log test, and with others misinterpreted the negative-pressure test, both of which could have resulted in remedial action, if appropriate, with respect to the cementing services.

At this time we cannot predict the impact of the Investigation Report or the conclusions of future reports of the National Commission, the Marine Board Investigation, the Chemical Safety Board, the National Academy of Sciences, Congressional committees, or any other governmental or private entity. In addition, although we have not been served by the DOJ or any state agency, we cannot predict whether their investigations or any other report or investigation will have an influence on or result in our being named as a party in any action alleging violation of a statute or regulation, whether federal or state and whether criminal or civil.

We intend to continue to cooperate fully with all governmental hearings, investigations, and requests for information relating to the Macondo well incident. We cannot predict the outcome of, or the costs to be incurred in connection with, any of these hearings or investigations, and therefore we cannot predict the potential impact they may have on us.

**Litigation.**—Beginning on April 21, 2010, plaintiffs started filing lawsuits relating to the Macondo well incident. Generally, those lawsuits allege either (1) damages arising from the oil spill pollution and contamination (e.g., diminution of property value, lost tax revenue, lost business revenue, lost tourist dollars, inability to engage in recreational or commercial activities) or (2) wrongful death or personal injuries. To date, we have been named along with other unaffiliated defendants in more than 330 complaints, most of which are alleged class actions, involving pollution damage claims and at least 28 personal injury lawsuits involving six decedents and 54 allegedly injured persons who were on the drilling rig at the time of the incident. Another six lawsuits naming us and others relate to alleged personal injuries sustained by those responding to the explosion and oil spill. Plaintiffs originally filed the lawsuits described above in federal and state courts throughout the United States, including Alabama, Delaware, Florida, Georgia, Kentucky, Louisiana, Mississippi, South Carolina, Tennessee, Texas, and Virginia. Except for approximately 25 lawsuits not yet consolidated, one lawsuit that is proceeding in Louisiana state court, and one lawsuit that is proceeding in Texas state court, the Judicial Panel on Multi-District Litigation ordered all of the lawsuits consolidated in a multi-district litigation (MDL) proceeding before Judge Carl Barbier in the U.S. Eastern District of Louisiana. The pollution complaints generally allege, among other things, negligence and gross negligence, property damages, taking of protected species, and potential economic losses as a result of environmental pollution and generally seek awards of unspecified economic, compensatory, and punitive damages, as well as injunctive relief. Plaintiffs in these pollution cases have brought suit under various legal provisions, including the OPA, the CWA, the MBTA, the ESA, the Outer Continental Shelf Lands Act, the Longshoremen and Harbor Workers Compensation Act, general maritime law, STATE COMMON LAW, and various state environmental and products liability statutes.

Furthermore, the pollution complaints include suits brought by governmental entities, including the State of Alabama, Plaquemines Parish, and three Mexican states. The wrongful death and other personal injury complaints generally allege negligence and gross negligence and seek awards of compensatory damages, including unspecified economic damages and punitive damages. We have retained counsel and are investigating and evaluating the claims, the theories of recovery, damages asserted, and our respective defenses to all of these claims.

According to case management and pre-trial orders, with respect to the MDL, the court may try one or more OPA “test

cases” as early as third quarter 2011. These test cases, the number and specificity of which have not been determined, will consist of claims brought against BP as a responsible party under the OPA. The same judge is also presiding over a separate proceeding filed by Transocean under the Limitation of Liability Act (Limitation Action). In the Limitation Action, Transocean seeks to limit its liability for claims arising out of the Macondo well incident to the value of the rig and its freight. Although the Limitation Action is not consolidated in the MDL, to this point the judge is effectively treating the two proceedings as associated cases. Although we are not yet formally a party to the Limitation Action, we expect that Transocean will tender all defendants into the Limitation Action in February 2011. As a result of that anticipated tender, all defendants will be treated as direct defendants to the plaintiffs’ claims as if the plaintiffs had sued each defendant directly.

In the Limitation Action, the judge intends to determine the allocation of liability among all defendants in the hundreds of lawsuits associated with the Macondo well incident that are pending in his court. More specifically, the court intends to try one or more “personal injury/wrongful death test cases” and one or more economic damage claim “test cases” in the first quarter 2012 in an attempt to determine liability, limitation, exoneration and fault allocation with regard to all of the defendants. We do not believe, however, that a single apportionment of liability in the Limitation Action is properly applied to the hundreds of lawsuits pending in the MDL Proceeding. Damages for the personal injury/wrongful death and economic damage claim “test cases” tried in the first quarter 2012, including punitive damages, are expected to be tried in a second phase of the Limitation Action. Under ordinary MDL procedures, such trials would, unless waived by the respective parties, be tried in the courts from which they were transferred into the MDL. It remains unclear, however, what impact the overlay of the Limitation Action will have on where these matters are tried.

Additional civil lawsuits may be filed against us. Document discovery and depositions among the parties to the MDL have begun. The deadline for defendants to file cross claims and third-party claims arising out of the Macondo well incident against other defendants is March 18, 2011.

We intend to vigorously defend any litigation, fines, and/or penalties relating to the Macondo well incident.

**Shareholder derivative case.**—In February 2011, a shareholder derivative lawsuit was filed in Harris County, Texas naming us as a nominal defendant and certain of our directors and officers as defendants. This case alleges that these defendants, among other things, breached fiduciary duties of good faith and loyalty by failing to properly exercise oversight responsibilities and establish adequate internal controls, including controls and procedures related to cement testing and the communication of test results, as they relate to the Deepwater Horizon incident. Due to the preliminary status of the lawsuit and uncertainties related to litigation, we are unable to evaluate the likelihood of either a favorable or unfavorable outcome.

**Indemnification and Insurance.**—Our contract with BP Exploration relating to the Macondo well provides for our indemnification for potential claims and expenses relating to the Macondo well incident, including those resulting from pollution or contamination (other than claims by our employees, loss or damage to our property, and any pollution emanating directly from our equipment). Also, under our contract with BP Exploration, we have, among other things, generally

agreed to indemnify BP Exploration and other contractors performing work on the well for claims for personal injury of our employees and subcontractors, as well as for damage to our property. In turn, we believe that BP Exploration is obligated to obtain agreement by other contractors performing work on the well to indemnify us for claims for personal injury of their employees or subcontractors as well as for damages to their property.

In addition to the contractual indemnity, we have a general liability insurance program of \$600 million. Our insurance is designed to cover claims by businesses and individuals made against us in the event of property damage, injury or death and, among other things, claims relating to environmental damage. To the extent we incur any losses beyond those covered by indemnification, there can be no assurance that our insurance policies will cover all potential claims and expenses relating to the Macondo well incident. Insurance coverage can be the subject of uncertainties and, particularly in the event of large claims, potential disputes with insurance carriers, as well as other potential parties claiming insured status under our insurance policies.

Given the potential amounts involved, BP Exploration and other indemnifying parties may seek to avoid their indemnification obligations. In particular, while we do not believe there is any justification to do so, BP Exploration, in response to our request for indemnification, on June 25, 2010 generally reserved all of its rights and stated that it is premature to conclude that it is obligated to indemnify us. In doing so, BP Exploration has asserted that the facts were not sufficiently developed to determine who is responsible, and cited a variety of possible legal theories based upon the contract and facts still to be developed. As indicated above, all cross claims among defendants must be filed by March 18, 2011. We expect that all defendants will make claims against each other and deny that they owe any indemnification or other obligations to any other defendant.

Indemnification for criminal fines or penalties, if any, may not be available if a court were to find such indemnification unenforceable as against public policy. We do not expect, however, public policy to limit substantially the enforceability of our contractual right to indemnification with respect to liabilities other than criminal fines and penalties, if any. We may not be insured with respect to civil or criminal fines or penalties, if any, pursuant to the terms of our insurance policies.

We believe the law likely to be held applicable to matters relating to the Macondo well incident does not allow for enforcement of indemnification of persons who are found to be grossly negligent, although we do not believe the performance of our services on the Deepwater Horizon constituted gross negligence. In addition, certain state laws, if deemed to apply, may not allow for enforcement of indemnification of persons who are found to be negligent with respect to personal injury claims. In addition, financial analysts and the press have speculated about the financial capacity of BP, and whether it might seek to avoid indemnification obligations in bankruptcy proceedings. We consider the likelihood of a BP bankruptcy to be remote.

## Warranties

### 1.121

#### CISCO SYSTEMS, INC. (JUL)

#### NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

##### 11. Commitments and Contingencies (in part)

##### (e) Product Warranties and Guarantees

The following table summarizes the activity related to the product warranty liability during fiscal 2010 and 2009 (in millions):

|                                           | July 31, 2010 | July 25, 2009 |
|-------------------------------------------|---------------|---------------|
| Balance at beginning of fiscal year       | \$321         | \$399         |
| Provision for warranties issued           | 469           | 374           |
| Payments                                  | (437)         | (452)         |
| Fair value of warranty liability acquired | 7             | —             |
| Balance at end of fiscal year             | \$360         | \$321         |

The Company accrues for warranty costs as part of its cost of sales based on associated material product costs, labor costs for technical support staff, and associated overhead. The Company's products are generally covered by a warranty for periods ranging from 90 days to five years, and for some products the Company provides a limited lifetime warranty.

In the normal course of business, the Company indemnifies other parties, including customers, lessors, and parties to other transactions with the Company, with respect to certain matters. The Company has agreed to hold the other parties harmless against losses arising from a breach of representations or covenants, or out of intellectual property infringement or other claims made against certain parties. These agreements may limit the time within which an indemnification claim can be made and the amount of the claim. In addition, the Company has entered into indemnification agreements with its officers and directors, and the Company's bylaws contain similar indemnification obligations to the Company's agents. It is not possible to determine the maximum potential amount under these indemnification agreements due to the Company's limited history with prior indemnification claims and the unique facts and circumstances involved in each particular agreement. Historically, payments made by the Company under these agreements have not had a material effect on the Company's operating results, financial position, or cash flows.

The Company also provides financing guarantees, which are generally for various third-party financing arrangements to channel partners and other end-user customers. See Note 6. The Company's other guarantee arrangements as of July 31, 2010 that are subject to recognition and disclosure requirements were not material.

## Operating Loss Carryforward

### 1.122

#### LAM RESEARCH CORPORATION (JUN)

##### NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

###### Note 14. Income Taxes (in part)

Deferred income taxes reflect the net tax effect of temporary differences between the carrying amounts of assets and liabilities for financial reporting purposes, and the amounts used for income tax purposes, as well as the tax effect of carryforwards. Significant components of the Company's net deferred tax assets are as follows:

| (In thousands)                                         | June 27, 2010 | June 28, 2009 |
|--------------------------------------------------------|---------------|---------------|
| Deferred tax assets:                                   |               |               |
| Tax carryforwards                                      | \$ 50,182     | \$ 57,350     |
| Allowances and reserves                                | 63,143        | 72,037        |
| Inventory valuation differences                        | 7,764         | 11,656        |
| Equity-based compensation                              | 6,202         | 6,200         |
| Capitalized R&D expenses                               | 5,027         | 5,677         |
| Other                                                  | 5,088         | 4,095         |
| Gross deferred tax assets                              | 137,406       | 157,015       |
| Valuation allowance                                    | (36,957)      | (35,518)      |
| Net deferred tax assets                                | 100,449       | 121,497       |
| Deferred tax liabilities:                              |               |               |
| Fixed assets depreciation and intangibles amortization | (20,188)      | (25,632)      |
| State cumulative temporary differences                 | (10,118)      | (11,917)      |
| Amortization of goodwill                               | (6,026)       | (4,326)       |
| Gross deferred tax liabilities                         | (36,332)      | (41,875)      |
| Net deferred tax assets                                | \$ 64,117     | \$ 79,622     |

Realization of the Company's net deferred tax assets is based upon the weight of available evidence, including such factors as the recent earnings history and expected future taxable income. The Company believes it is more likely than not that such assets will be realized with the exception of \$37.0 million related to certain California and foreign deferred tax assets. To the extent realization of the deferred tax assets becomes more-likely-than-not, the Company would recognize such deferred tax asset as an income tax benefit during the period the realization occurred. However, ultimate realization of deferred tax assets could be negatively impacted by market conditions and other variables not known or anticipated at this time.

The provisions related to the tax accounting for stock-based compensation prohibit the recognition of a deferred tax asset for an excess benefit that has not yet been realized. As a result, we will only recognize a benefit from stock-based compensation in additional paid-in-capital if an incremental tax benefit is realized or realizable after all other tax attributes currently available to us have been utilized. In addition, we have elected to account for the indirect benefits of stock-based compensation on the R&D tax credit through the consolidated statement of income (continuing operations) rather than through additional paid-in-capital.

As of June 27, 2010, the Company had California net operating loss carry-forwards of approximately \$2.3 million. Unused net operating loss carry-forwards will expire in the year 2030. When recognized these net operating losses will result in a benefit to additional paid-in capital of approximately \$0.1 million.

At June 27, 2010, the Company had federal and state tax credit carryforwards of approximately \$182.5 million, of which approximately \$66.8 million will expire in varying amounts between fiscal years 2026 and 2031. The remaining balance of \$115.7 million of tax carryforwards may be carried forward indefinitely. The tax benefits relating to approximately \$57.0 million of the tax credit carryforwards will be credited to additional paid-in-capital when recognized.

At June 27, 2010, the Company had foreign net operating loss carryforwards of approximately \$68.9 million, of which approximately \$25.9 million may be carried forward indefinitely and \$43.0 million will begin to expire in fiscal year 2012.

A reconciliation of income tax expense provided at the federal statutory rate (35% in fiscal years 2010, 2009 and 2008) to actual income expense is as follows:

| (In thousands)                                        | Year Ended    |               |               |

| <b>Net deferred tax assets</b>                     | <b>\$ 800</b>     | <b>\$ 717</b>  |

Deferred tax assets (liabilities) are reported in the following components within the Consolidated Statement of Financial Position:

| (In millions)                   | As of December 31 |              |
|---------------------------------|-------------------|--------------|
|                                 | 2010              | 2009         |
| Deferred income taxes (current) | \$120             | \$121        |
| Other long-term assets          | 695               | 607          |
| Accrued income taxes            | (7)               | —            |
| Other long-term liabilities     | (8)               | (11)         |
| <b>Net deferred tax assets</b>  | <b>\$800</b>      | <b>\$717</b> |

As of December 31, 2010, the Company had available domestic and foreign net operating loss carryforwards for income tax purposes of approximately \$3,690 million, of which approximately \$609 million have an indefinite carryforward period. The remaining \$3,081 million expire between the years 2011 and 2030. Utilization of these net operating losses may be subject to limitations in the event of significant changes in stock ownership of the Company. As of Decem-

ber 31, 2010, the Company had unused foreign tax credits and investment tax credits of \$477 million and \$160 million, respectively, with various expiration dates through 2030.

The Company has been granted a tax holiday in certain jurisdictions in China. The Company is eligible for a 50% reduction of the income tax rate as a tax holiday incentive. The tax rate currently varies by jurisdiction, due to the tax holiday, and will be 25% in all jurisdictions within China in 2013.

| <b>Net deferred tax liability</b>                                                                                                                                            | <b>\$ (419.4)</b> | <b>\$ (259.1)</b> |

The Company's tax credits and loss carryforwards included alternative minimum tax (AMT), foreign tax and general business credits of \$317.0 million, state net operating loss (NOL) carryforwards of \$23.8 million and foreign loss carryforwards of \$84.4 million as of December 31, 2010. The AMT credits and foreign NOL and capital loss carryforwards have no expiration date. The foreign tax and general business credits begin to expire in 2020 and 2027, respectively. The state NOL carryforwards begin to expire in the year 2011. In assessing the near term use of NOLs and tax credits and corresponding valuation allowance adjustments, the Company evaluated the overall deferred tax position, available tax strategies and future taxable income. The \$28.7 million change in the valuation allowance due to the 2010 assessment included a \$48.8 million decrease on AMT credits, an \$11.7 million increase on state NOLs and an \$8.4 million increase on foreign deferred assets. The remaining valuation allowance at December 31, 2010 of \$65.0 million represents a reserve for state NOLs and certain foreign deferred tax assets.

## FINANCIAL INSTRUMENTS

### RECOGNITION AND MEASUREMENT

**1.125** FASB ASC 815 establishes accounting and reporting standards for derivative instruments, including certain derivative instruments embedded in other contracts (collectively referred to as derivatives), and hedging activities. FASB ASC 815 requires that an entity recognize all derivatives as either assets or liabilities in the statement of financial position and measure those instruments at fair value. In addition, paragraphs 4–6 of FASB ASC 815-15-25 simplify the accounting for certain hybrid financial instruments by permitting an entity to irrevocably elect to initially and subsequently measure that hybrid financial instrument in its entirety at fair value, with changes recognized in earnings. This election is also available when a previously-recognized financial instrument is subject to a remeasurement (new basis) event and the separate recognition of an embedded derivative.

**1.126** FASB ASC 825, *Financial Instruments*, permits entities to choose to measure at fair value many financial instruments and certain other items that are not currently required to be measured at fair value. Further, under FASB ASC 825, a business entity should report unrealized gains and losses on eligible items for which the fair value option has been elected in earnings at each subsequent reporting date. The irrevocable election of the fair value option is made on an instrument-by-instrument basis, with certain exceptions, and applied to the entire instrument, not only to specified risks, specific cash flows, or portions of that instrument.

### DISCLOSURE

**1.127** The disclosures required by FASB ASC 815 for entities with derivative instruments or nonderivative instruments that

are designated and qualify as hedging instruments are intended to enable users of financial statements to understand

- How and why an entity uses derivative or nonderivative instruments.
- How derivative instruments or such nonderivative instruments and related hedged items are accounted for under FASB ASC 815.
- How derivative instruments or such nonderivative instruments and related hedged items affect an entity's financial position, financial performance, and cash flows.

**1.128** To meet those objectives, FASB ASC 815 requires qualitative disclosures about an entity's objectives and strategies for using derivatives and such nonderivative instruments. An entity that holds or issues derivative instruments or such nonderivative instruments should disclose all of the following for each interim and annual reporting period for which a statement of financial position and statement of financial performance are presented:

- Its objectives for holding or issuing those instruments.
- The context needed to understand those objectives. This should be disclosed in the context of each instrument's primary underlying risk exposure.
- Its strategies for achieving those objectives. This should be disclosed in the context of each instrument's primary underlying risk exposure.

**1.129** These instruments should be disclosed in the context of each instrument's primary underlying risk exposure and should be distinguished among those used for risk management purposes, those used as economic hedges and other purposes related to risk exposure, and those used for other purposes. Those used for risk management purposes should be distinguished between those designated as hedging instruments and, further, whether they are fair value hedges, cash flow hedges, or foreign currency hedges. Information that would enable users of its financial statements to understand the volume of its activity in those instruments should also be disclosed for the same periods. An entity should select the format and specifics for this that are most relevant and practicable for its individual facts and circumstances. For any derivatives not designated as hedging instruments under FASB ASC 815-20, the description should include the purpose of the derivative activity.

**1.130** FASB ASC 815 also requires quantitative disclosures about derivatives and such nonderivative instruments. For every annual and interim reporting period for which a statement of financial position and statement of financial performance are presented, an entity that holds or issues derivative instruments is required to disclose the location and fair value amounts of derivative instruments and such nonderivative instruments reported in the statement of financial position. The fair value of those instruments should be presented on a gross basis, even when those instruments are subject to master netting arrangements and qualify for net presentation in the statement of financial position. Cash collateral payables and receivables associated with these instruments should not be added to, or netted against, the fair value amounts.

**1.131** Fair value amounts should be presented as separate asset and liability values segregated between derivatives that are designated and qualifying as hedging instruments presented separately by type of contract and those that are not. The disclosure should also identify the line item(s) in the statement of financial position in which the fair value amounts for these categories of derivative instruments are included. Also, disclosure of the

location and amount of the gains and losses on derivative instruments and such nonderivative instruments and related hedged items in the statement of financial performance or statement of financial position (for example, in other comprehensive income) is required. These gain and loss disclosures should be presented separately by type of contract. These quantitative disclosures are required to be presented in tabular format, except for disclosures regarding hedged items that can be presented in either tabular or nontabular format.

**1.132** For derivative instruments not designated or qualifying as hedging instruments under FASB ASC 815-20, if the entity's policy is to include them in its trading activities, the entity can elect not to separately disclose gains and losses, provided that the entity discloses certain other information. Additionally, FASB ASC 815 requires specific disclosures for derivative instruments that contain credit-risk-related features and credit derivatives.

**1.133** FASB ASC 825 requires certain reporting entities to disclose the fair value of financial instruments and disclosure requirements of credit risk concentrations of all financial instruments, and it provides guidance on the fair value option. FASB ASC 825 also establishes presentation and disclosure requirements designed to facilitate comparison between entities that choose different measurement attributes for similar types of assets and liabilities.

## PRESENTATION AND DISCLOSURE EXCERPTS

### Derivative Financial Instruments

1.139

#### LAM RESEARCH CORPORATION (JUN)

##### NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

###### *Note 2. Summary of Significant Accounting Policies (in part)*

**Derivative Financial Instruments:** The Company's policy is to attempt to minimize short-term business exposure to foreign currency exchange rate risks using an effective and efficient method to eliminate or reduce such exposures. In the normal course of business, the Company's financial position is routinely subjected to market risk associated with foreign currency exchange rate fluctuations. The Company carries derivative financial instruments (derivatives) on the balance sheet at their fair values. The Company has a policy that allows the use of derivative financial instruments, specifically foreign currency forward exchange rate contracts, to hedge foreign currency exchange rate fluctuations on forecasted revenue transactions denominated in Japanese yen and net monetary assets or liabilities denominated in various foreign currencies. The Company does not use derivatives for trading or speculative purposes. The Company does not believe that it is or was exposed to more than a nominal amount of credit risk in its interest rate and foreign currency hedges, as counterparties are established and well-capitalized financial institutions. The Company's exposures are in liquid currencies (Japanese yen, Swiss francs, Euros, and Taiwanese dollars), so there is minimal risk that appropriate derivatives to maintain the Company's hedging program would not be available in the future.

To hedge foreign currency risks, the Company uses foreign currency exchange forward contracts, where possible and practical. These forward contracts are valued using standard valuation formulas with assumptions about future foreign currency exchange rates derived from existing exchange rates and interest rates observed in the market.

The Company considers its most current outlook in determining the level of foreign currency denominated intercompany revenue to hedge as cash flow hedges. The Company combines these forecasts with historical trends to establish the portion of its expected volume to be hedged. The revenue is hedged and designated as cash flow hedges to protect the Company from exposures to fluctuations in foreign currency exchange rates. If the underlying forecasted transaction does not occur, or it becomes probable that it will not occur, the related hedge gains and losses on the cash flow hedge are reclassified from accumulated other comprehensive income (loss) to interest and other income (expense) on the consolidated statement of operations at that time.

For further details related to the Company's derivatives, see Note 4 of the Notes to the Consolidated Financial Statements.

##### *Note 4. Financial Instruments (in part)*

###### *Fair Value*

Pursuant to the accounting guidance for fair value measurement and its subsequent updates, the Company defines fair value as the price that would be received from selling an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. When determining the fair value measurements for assets and liabilities required or permitted to be recorded at fair value, the Company considers the principal or most advantageous market in which it would transact, and it considers assumptions that market participants would use when pricing the asset or liability.

The FASB has established a fair value hierarchy that prioritizes the inputs to valuation techniques used to measure fair value. An asset or liability's level in the hierarchy is based on the lowest level of input that is significant to the fair value measurement. Assets and liabilities carried at fair value are classified and disclosed in one of the following three categories:

Level 1: Valuations based on quoted prices in active markets for identical assets or liabilities with sufficient volume and frequency of transactions.

Level 2: Valuations based on observable inputs other than Level 1 prices such as quoted prices for similar assets or liabilities, quoted prices in markets that are not active, or model-derived valuations techniques for which all significant inputs are observable in the market or can be corroborated by, observable market data for substantially the full term of the assets or liabilities.

Level 3: Valuations based on unobservable inputs to the valuation methodology that are significant to the measurement of fair value of assets or liabilities and based on non-binding, broker-provided price quotes and may not have been corroborated by observable market data.

The following table sets forth the Company's financial assets and liabilities measured at fair value on a recurring basis as of June 27, 2010:

|                                        |           | Fair Value Measurement at June 27, 2010                                 |                                                     |                                                    |
|----------------------------------------|-----------|-------------------------------------------------------------------------|-----------------------------------------------------|----------------------------------------------------|
| (In thousands)                         | Total     | Quoted Prices in<br>Active Markets for<br>Identical Assets<br>(Level 1) | Significant Other<br>Observable Inputs<br>(Level 2) | Significant<br>Unobservable<br>Inputs<br>(Level 3) |

| Accrued expenses and other current liabilities | \$ 470    | \$ —      | \$ 470    | \$—       |

At June 27, 2010 the fair value of Level 3 assets measured on a recurring basis was \$0.1 million and consisted of a corporate note security. Fair values were based on non-binding, broker-provided price quotes and may not have been corroborated by observable market data.

The following table sets forth the Company's financial assets and liabilities measured at fair value on a recurring basis as of June 28, 2009:

|                                        |           | Fair Value Measurement at June 28, 2009                                 |                                                     |                                                    |

The Company's primary financial instruments include its cash, cash equivalents, short-term investments, restricted cash and investments, long-term investments, accounts receivable, accounts payable, long-term debt and capital leases, and foreign currency related derivatives. The estimated fair value of cash, accounts receivable and accounts payable approximates their carrying value due to the short period of time to their maturities. The estimated fair values of long-term debt and capital lease obligations approximate their carrying value as the substantial majority of these obligations have interest rates that adjust to market rates on a periodic basis. The fair value of cash equivalents, short-term investments, restricted cash and investments, long-term investments, and foreign currency related derivatives are based on quotes from brokers using market prices for similar instruments.

#### *Derivative Instruments and Hedging*

The Company carries derivative financial instruments ("derivatives") on its consolidated balance sheets at their fair values. The Company enters into foreign exchange forward

contracts with financial institutions with the primary objective of reducing volatility of earnings and cash flows related to foreign currency exchange rate fluctuations. The counterparties to these foreign exchange forward contracts are creditworthy multinational financial institutions; therefore, we do not consider the risk of counterparty nonperformance to be material.

#### *Cash Flow Hedges*

The Company's policy is to attempt to minimize short-term business exposure to foreign currency exchange rate fluctuations using an effective and efficient method to eliminate or reduce such exposures. In the normal course of business, the Company's financial position is routinely subjected to market risk associated with foreign currency exchange rate fluctuations. To protect against a reduction in value of Japanese yen-denominated revenues, the Company has instituted a foreign currency cash flow hedging program. The Company enters into foreign exchange forward contracts that generally expire within 12 months and no later than 24 months. These foreign exchange forward contracts are designated as cash flow hedges and are carried on the Company's balance sheet

at fair value with the effective portion of the contracts' gains or losses included in accumulated other comprehensive income (loss) and subsequently recognized in revenue in the same period the hedged revenue is recognized.

At inception and at each quarter end, hedges are tested for effectiveness using regression testing. Changes in the fair value of foreign exchange forward contracts due to changes in time value are excluded from the assessment of effectiveness and are recognized in revenue in the current period. The change in forward time value was not material for all reported periods. There were no gains or losses during the twelve months ended June 27, 2010 associated with ineffectiveness or forecasted transactions that failed to occur. There were \$4.0 million of deferred net losses associated with ineffectiveness related to forecasted transactions that were no longer considered probable of occurring and were recognized in "Other income (expense), net" in the Company's consolidated statements of operations during twelve months ended June 28, 2009. There were no gains or losses during the twelve months ended June 29, 2008 associated with ineffectiveness or forecasted transactions that failed to occur. To qualify for hedge accounting, the hedge relationship must meet criteria relating both to the derivative instrument and the hedged item. These criteria include identification of the hedging instrument, the hedged item, the nature of the risk being hedged and how the hedging instrument's effectiveness in offsetting the exposure to changes in the hedged item's fair value or cash flows will be measured.

To receive hedge accounting treatment, all hedging relationships are formally documented at the inception of the hedge and the hedges must be highly effective in offsetting changes to future cash flows on hedged transactions. When derivative instruments are designated and qualify as effective cash flow hedges, the Company is able to defer effective changes in the fair value of the hedging instrument within accumulated other comprehensive income (loss) until the hedged exposure is realized. Consequently, with the exception of excluded time value and hedge ineffectiveness recognized, the Company's results of operations are not subject to fluctuation as a result of changes in the fair value of the

derivative instruments. If hedges are not highly effective or if the Company does not believe that the underlying hedged forecasted transactions will occur, the Company may not be able to account for its derivative instruments as cash flow hedges. If this were to occur, future changes in the fair values of the Company's derivative instruments would be recognized in earnings. Additionally, related amounts previously recorded in "Other comprehensive income" would be reclassified to income immediately. At June 27, 2010, the Company had a de minimis amount of losses accumulated in other comprehensive income.

### Balance Sheet Hedges

The Company also enters into foreign exchange forward contracts to hedge the effects of foreign currency fluctuations associated with foreign currency denominated monetary assets and liabilities, primarily intercompany receivables and payables. These foreign exchange forward contracts are not designated for hedge accounting treatment. Therefore, the change in fair value of these derivatives is recorded as a component of other income (expense) and offsets the change in fair value of the foreign currency denominated assets and liabilities, recorded in other income (expense).

As of June 27, 2010, the Company had the following outstanding foreign currency forward contracts that were entered into to hedge forecasted revenues and purchases:

### Concentrations of Credit Risk

Financial instruments that potentially subject the Company to concentrations of credit risk consist principally of cash equivalents, short term investments, restricted cash and investments, loans receivable, trade accounts receivable, and derivative financial instruments used in hedging activities. Cash is placed on deposit in major financial institutions in various countries throughout the world. Such deposits may be in excess of insured limits. Management believes that the financial institutions that hold the Company's cash are financially sound and, accordingly, minimal credit risk exists with respect to these balances.

The Company's available-for-sale securities, which are invested in taxable financial instruments, must have a minimum rating of A2 / A, as rated by two of the following three rating agencies: Moody's, Standard & Poor's (S&P), or Fitch. Available-for-sale securities that are invested in tax-exempt financial instruments must have a minimum rating of A2 / A, as rated by any one of the same three rating agencies. The Company's policy limits the amount of credit exposure with any one financial institution or commercial issuer.

The Company is exposed to credit losses in the event of nonperformance by counterparties on the foreign currency forward contracts that are used to mitigate the effect of exchange rate changes. These counterparties are large international financial institutions and to date no such counterparty has failed to meet its financial obligations to the Company. The Company does not anticipate nonperformance by these counterparties.

As of June 27, 2010, two customers accounted for approximately 24% and 22 % of accounts receivable. As of June 28, 2009, three customers accounted for approximately 17%, 15%, and 14% of accounts receivable.

Credit risk evaluations, including trade references, bank references and Dun & Bradstreet ratings, are performed on all new customers and the Company monitors its customers' financial statements and payment performance. In general, the Company does not require collateral on sales.

#### NOBLE ENERGY, INC. (DEC)

#### NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

##### Note 1. Summary of Significant Accounting Policies (in part)

**Derivative Instruments and Hedging Activities** All derivative instruments (including certain derivative instruments embedded in other contracts) are recorded in our consolidated balance sheets as either an asset or liability and measured at fair value. Changes in the derivative instrument's fair value are recognized currently in earnings, unless the derivative instrument has been designated as a cash flow hedge and specific cash flow hedge accounting criteria are met. Under cash flow hedge accounting, unrealized gains and losses are reflected in shareholders' equity as accumulative other comprehensive loss (AOCL) until the forecasted transaction occurs. The derivative's gains or losses are then offset against related results on the hedged transaction in the statements of operations.

A company must formally document, designate and assess the effectiveness of transactions that receive hedge accounting. Only derivative instruments that are expected to be highly effective in offsetting anticipated gains or losses on the hedged cash flows and that are subsequently documented to have been highly effective can qualify for hedge accounting. Effectiveness must be assessed both at inception of the hedge and on an ongoing basis. Any ineffectiveness in hedging instruments whereby gains or losses do not exactly offset anticipated gains or losses of hedged cash flows is measured and recognized in earnings in the period in which it occurs. When using hedge accounting, we assess hedge effectiveness quarterly based on total changes in the derivative instrument's fair value by performing regression analysis. A hedge is considered effective if certain statistical tests are met. We record hedge ineffectiveness in (gain) loss on commodity derivative instruments.

**Accounting for Commodity Derivative Instruments**—We account for our commodity derivative instruments using mark-to-market accounting and recognize all gains and losses in earnings during the period in which they occur. Prior to January 1, 2008, we elected to designate certain of our commodity derivative instruments as cash flow hedges. Effective January 1, 2008, we voluntarily discontinued cash flow hedge accounting for our commodity derivative instruments. Net derivative gains and losses that were deferred in AOCL as of January 1, 2008, as a result of previous cash flow hedge accounting, were reclassified to earnings during the years ended December 31, 2008 through December 31, 2010 as the original transactions occurred.

We offset the fair value amounts recognized for derivative instruments and the fair value amounts recognized for the right to reclaim cash collateral or the obligation to return cash collateral. The cash collateral (commonly referred to as a "margin") must arise from derivative instruments recognized at fair value that are executed with the same counterparty under a master netting arrangement.

**Accounting for Interest Rate Derivative Instruments** We designate interest rate derivative instruments as cash flow hedges. Changes in fair value of interest rate swaps or interest rate "locks" used as cash flow hedges are reported in AOCL, to the extent the hedge is effective, until the forecasted transaction occurs, at which time they are recorded as adjustments to interest expense over the term of the related notes. See Note 10. Derivative Instruments and Hedging Activities.

##### Note 10. Derivative Instruments and Hedging Activities

**Objective and Strategies for Using Derivative Instruments** In order to reduce commodity price uncertainty and enhance the predictability of cash flows relating to the marketing of our crude oil and natural gas, we enter into crude oil and natural gas price hedging arrangements with respect to a portion of our expected production. The derivative instruments we use include variable to fixed price commodity swaps, two-way and three-way collars and basis swaps.

The fixed price swap, two-way collar, and basis swap contracts entitle us (floating price payor) to receive settlement from the counterparty (fixed price payor) for each calculation period in amounts, if any, by which the settlement price for the scheduled trading days applicable for each calculation period is less than the fixed strike price or floor price. We would pay the counterparty if the settlement price for the scheduled trading days applicable for each calculation

period is more than the fixed strike price or ceiling price. The amount payable by us, if the floating price is above the fixed or ceiling price, is the product of the notional quantity per calculation period and the excess, if any, of the floating price over the fixed or ceiling price in respect of each calculation period. The amount payable by the counterparty, if the floating price is below the fixed or floor price, is the product of the notional quantity per calculation period and the excess, if any, of the fixed or floor price over the floating price in respect of each calculation period.

A three-way collar consists of a two-way collar contract combined with a put option contract sold by us with a strike price below the floor price of the two-way collar. We receive price protection at the purchased put option floor price of the two-way collar if commodity prices are above the sold put option strike price. If commodity prices fall below the sold put option strike price, we receive the cash market price plus the delta between the two put option strike prices. This type of instrument allows us to capture more value in a rising commodity price environment, but limits our benefits in a downward commodity price environment.

We also enter into forward contracts or swap agreements to hedge exposure to interest rate risk.

While these instruments mitigate the cash flow risk of future reductions in commodity prices or increases in interest rates, they may also curtail benefits from future increases in commodity prices or decreases in interest rates.

See Note 16. Fair Value Measurements and Disclosures for a discussion of methods and assumptions used to estimate the fair values of our derivative instruments.

**Counterparty Credit Risk**—Derivative instruments expose us to counterparty credit risk. Our commodity derivative instruments are currently with a diversified group of highly rated major banks or market participants, and we control our level of financial exposure. Our commodity derivative contracts are executed under master agreements which allow us, in the event of default, to elect early termination of all contracts with the defaulting counterparty. If we choose to elect early termination, all asset and liability positions with the defaulting counterparty would be net settled at the time of election.

We monitor the creditworthiness of our counterparties. However, we are not able to predict sudden changes in counterparties' creditworthiness. In addition, even if such changes are not sudden, we may be limited in our ability to mitigate an increase in counterparty credit risk. Possible actions would be to transfer our position to another counterparty or request a voluntary termination of the derivative contracts resulting in a cash settlement. Should one of these financial counterparties not perform, we may not realize the benefit of some of our derivative instruments under lower commodity prices or higher interest rates, and could incur a loss.

#### *Unsettled Derivative Instruments*

We have entered into the following crude oil derivative instruments:

| Period                                              | Type of Contract  | Index                    | Bbls<br>Per Day | Swaps                                 | Collars                                |                                    |                                      |

<sup>(1)</sup> In 2010, in anticipation of a long-term debt issuance, we entered into an interest rate forward starting swap to effectively fix the cash flows related to interest payments on the anticipated debt issuance. We are accounting for the instrument as a cash flow hedge against the variability of interest payments attributable to changes in interest rates on the forecasted issuance of fixed-rate debt. The swap is in the notional amount of \$500 million and is based on a 30-year LIBOR swap rate.

The effect of derivative instruments on our consolidated statements of operations was as follows:

**Commodity Derivative Instruments Not Designated as Hedging Instruments  
Amount of (Gain) Loss on Derivative Instruments Recognized in Income**

<sup>(1)</sup> Includes effect of commodity derivative instruments previously accounted for as cash flow hedges. Net derivative gains and losses that were deferred in AOCL as of January 1, 2008, as a result of previous cash flow hedge accounting, were reclassified to oil, gas and NGL sales in our consolidated statements of operations in 2008, 2009 and 2010 as the original hedged transactions occurred.

**AOCL—Commodity Derivative Instruments** At December 31, 2010, AOCL included no further amounts related to commodity derivative instruments. At December 31, 2009, the balance in AOCL included net deferred losses of \$12 million (net of deferred income tax benefits of \$8 million) related to the fair value of crude oil and natural gas derivative instruments previously designated as cash flow hedges. The net deferred losses were reclassified to earnings during 2010 as the forecasted transactions occurred and recorded as a reduction in oil, gas and NGL sales of approximately \$20 million before tax.

**AOCL—Interest Rate Derivative Instruments** At December 31, 2010, AOCL included deferred losses of \$42 million, net of tax, related to interest rate derivative instruments. Of this amount, \$1 million, net of tax, is currently being reclassified into earnings as adjustments to interest expense over the term of our Senior Notes due April 2014. Approximately \$41 million will remain in AOCL until fixed-rate debt is issued, at which time we will begin amortizing it to interest expense over the life of the related debt issuance.

**Note 16. Fair Value Measurements and Disclosures (in part)**

**Assets and Liabilities Measured at Fair Value on a Recurring Basis**—Certain assets and liabilities are measured at fair value on a recurring basis in our consolidated balance sheets. The following methods and assumptions were used to estimate the fair values:

**Commodity Derivative Instruments**—Our commodity derivative instruments consist of variable to fixed price commodity swaps, two-way and three-way collars and basis swaps. We estimate the fair values of these instruments

based on published forward commodity price curves as of the date of the estimate. The discount rate used in the discounted cash flow projections is based on published LIBOR rates, Eurodollar futures rates and interest swap rates. The fair values of commodity derivative instruments in an asset position include a measure of counterparty nonperformance risk, and the fair values of commodity derivative instruments in a liability position include a measure of our own nonperformance risk, each based on the current published credit default swap rates. In addition, for collars, we estimate the option values of the put options sold (for three-way collars) and the contract floors and ceilings (for two-way and three-way collars) using an option pricing model which takes into account market volatility, market prices and contract terms. See Note 10. Derivative Instruments and Hedging Activities.

**Interest Rate Derivative Instrument**—We estimate the fair value of our forward starting swap based on published interest rate yield curves as of the date of the estimate. The fair values of interest rate derivative instruments in an asset position include a measure of counterparty nonperformance risk, and the fair values of interest rate derivative instruments in a liability position include a measure of our own nonperformance risk, each based on the current published credit default swap rates. See Note 10. Derivative Instruments and Hedging Activities.

Measurement information for assets and liabilities that are measured at fair value on a recurring basis was as follows:

| (millions)                          | Fair Value Measurements Using                                     |                                                                    |                                                                | Adjustment <sup>(2)</sup> | Fair Value Measurement |

### SMITHFIELD FOODS, INC. (APR)

#### NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

##### Note 7: Derivative Financial Instruments

Our meat processing and hog production operations use various raw materials, primarily live hogs, corn and soybean meal, which are actively traded on commodity exchanges. We hedge these commodities when we determine conditions are appropriate to mitigate price risk. While this hedging may limit our ability to participate in gains from favorable commodity fluctuations, it also tends to reduce the risk of loss from adverse changes in raw material prices. We attempt to closely match the commodity contract terms with the hedged item. We also enter into interest rate swaps to hedge exposure to changes in interest rates on certain financial instruments and foreign exchange forward contracts to hedge certain exposures to fluctuating foreign currency rates.

We record all derivatives in the balance sheet as either assets or liabilities at fair value. Accounting for changes in the fair value of a derivative depends on whether it qualifies and has been designated as part of a hedging relationship. For derivatives that qualify and have been designated as hedges for accounting purposes, changes in fair value have no net impact on earnings, to the extent the derivative is considered perfectly effective in achieving offsetting changes in fair value or cash flows attributable to the risk being hedged, until the hedged item is recognized in earnings (commonly referred to as the “hedge accounting” method). For derivatives that do

not qualify or are not designated as hedging instruments for accounting purposes, changes in fair value are recorded in current period earnings (commonly referred to as the “mark-to-market” method). We may elect either method of accounting for our derivative portfolio, assuming all the necessary requirements are met. We have in the past, and will in the future, avail ourselves of either acceptable method. We believe all of our derivative instruments represent economic hedges against changes in prices and rates, regardless of their designation for accounting purposes.

We do not offset the fair value of derivative instruments with cash collateral held with or received from the same counterparty under a master netting arrangement. As of May 2, 2010, prepaid expenses and other current assets included \$150.3 million representing cash on deposit with brokers to cover losses on our open derivative instruments. Changes in commodity prices could have a significant impact on cash deposit requirements under our broker and counterparty agreements. We have reviewed our derivative contracts and have determined that they do not contain credit contingent features which would require us to post additional collateral if we did not maintain a credit rating equivalent to what was in place at the time the contracts were entered into.

We are exposed to losses in the event of nonperformance or nonpayment by counterparties under financial instruments. Although our counterparties primarily consist of financial institutions that are investment grade, there is still a possibility that one or more of these companies could default. However, a majority of our financial instruments are exchange traded futures contracts held with brokers and counterparties with whom we maintain margin accounts that are settled on a daily basis, and therefore our credit risk is not

significant. Determination of the credit quality of our counterparties is based upon a number of factors, including credit ratings and our evaluation of their financial condition. As of May 2, 2010, we had credit exposure of \$4.5 million on non-exchange traded derivative contracts, excluding the effects of netting arrangements. As a result of netting arrangements, our credit exposure was reduced to \$3.5 million. No significant concentrations of credit risk existed as of May 2, 2010.

The size and mix of our derivative portfolio varies from time to time based upon our analysis of current and future market conditions. The following table presents the fair values of our open derivative financial instruments in the consolidated balance sheets on a gross basis. All grain contracts, livestock contracts and foreign exchange contracts are recorded in prepaid expenses and other current assets or accrued expenses and other current liabilities within the consolidated condensed balance sheets, as appropriate. Interest rate contracts are recorded in accrued expenses and other current liabilities or other liabilities, as appropriate.

| Total fair value of derivative instruments       | \$26.3      | \$46.2      | \$150.6     | \$79.5      |

### *Hedge Accounting Method*

#### *Cash Flow Hedges*

We enter into derivative instruments, such as futures, swaps and options contracts, to manage our exposure to the variability in expected future cash flows attributable to commodity price risk associated with the forecasted sale of live hogs and the forecasted purchase of corn and soybean meal. In addition, we enter into interest rate swaps to manage our exposure to changes in interest rates associated with our variable interest rate debt, and we enter into foreign exchange contracts to manage our exposure to the variability in expected future cash flows attributable to changes in foreign exchange rates associated with the forecasted purchase or sale of assets denominated in foreign currencies. We generally do not hedge anticipated transactions beyond twelve months.

During fiscal 2010, the range of notional volumes associated with open derivative instruments designated in cash flow hedging relationships was as follows:

|                                 | Minimum     | Maximum     | Metric       |
|---------------------------------|-------------|-------------|--------------|
| Commodities:                    |             |             |              |
| Corn                            | —           | 79,035,000  | Bushels      |
| Soybean meal                    | 78,900      | 551,200     | Tons         |
| Lean Hogs                       | —           | 264,800,000 | Pounds       |
| Interest rate                   | 200,000,000 | 200,000,000 | U.S. Dollars |
| Foreign currency <sup>(1)</sup> | 32,653,181  | 114,691,273 | U.S. Dollars |

<sup>(1)</sup> Amounts represent the U.S. dollar equivalent of various foreign currency contracts.

The following table presents the effects on our consolidated financial statements of pre-tax gains and losses on derivative instruments designated in cash flow hedging relationships for the fiscal years indicated:

| (In millions)              | Gain (Loss) Recognized in OCI on Derivative (Effective Portion) |           |         | Gain (Loss) Reclassified From Accumulated OCI into Earnings (Effective Portion) |           |          | Gain (Loss) Recognized in Earnings on Derivative (Ineffective Portion) |         |      |

| Total                      | \$(25.3)                                                        | \$(251.6) | \$(1.4) | \$(98.3)                                                                        | \$(136.5) | \$(31.9) | \$(7.7)                                                                | \$(4.6) | \$—  |

When cash flow hedge accounting is applied, derivative gains or losses from these cash flow hedges are recognized as a component of other comprehensive income (loss) and reclassified into earnings in the same period or periods during which the hedged transactions affect earnings. Derivative gains and losses, when reclassified into earnings, are recorded in cost of sales for grain contracts, sales for lean hog contracts, interest expense for interest rate contracts and selling, general and administrative expenses for foreign currency contracts.

As of May 2, 2010, there were deferred net losses of \$24.5 million, net of tax of \$15.5 million, in accumulated other comprehensive loss. We expect to reclassify \$25.2 million (\$15.4 million net of tax) of the deferred net losses on closed commodity contracts into earnings in fiscal 2011.

#### Fair Value Hedges

We enter into derivative instruments (primarily futures contracts) that are designed to hedge changes in the fair value of live hog inventories and firm commitments to buy grains. We also enter into interest rate swaps to manage interest rate risk associated with our fixed rate borrowings. When fair value hedge accounting is applied, derivative gains and losses from

these fair value hedges are recognized in earnings currently along with the change in fair value of the hedged item attributable to the risk being hedged. The gains or losses on the derivative instruments and the offsetting losses or gains on the related hedged items are recorded in cost of sales for commodity contracts, interest expense for interest rate contracts and selling, general and administrative expenses for foreign currency contracts.

During fiscal 2010, the range of notional volumes associated with open derivative instruments designated in fair value hedging relationships was as follows:

|                                 | Minimum    | Maximum     | Metric       |
|---------------------------------|------------|-------------|--------------|
| Commodities:                    |            |             |              |
| Corn                            | 2,070,000  | 11,610,000  | Bushels      |
| Lean Hogs                       | —          | 726,160,000 | Pounds       |
| Interest rate                   | —          | 50,000,000  | U.S. Dollars |
| Foreign currency <sup>(1)</sup> | 16,051,549 | 24,836,547  | U.S. Dollars |

<sup>(1)</sup> Amounts represent the U.S. dollar equivalent of various foreign currency contracts.

The following table presents the effects on our consolidated statements of income of gains and losses on derivative instruments designated in fair value hedging relationships and the related hedged items for the fiscal years indicated:

| (In millions)              | Gain (Loss) Recognized in Earnings on Derivative |        |       | Gain (Loss) Recognized in Earnings on Related Hedged Item |          |         |
|----------------------------|--------------------------------------------------|--------|-------|-----------------------------------------------------------|----------|---------|
|                            | 2010                                             | 2009   | 2008  | 2010                                                      | 2009     | 2008    |
| Commodity contracts        | \$(36.2)                                         | \$12.8 | \$4.3 | \$32.4                                                    | \$(14.0) | \$(4.3) |
| Interest rate contracts    | 0.6                                              | 0.7    | (3.0) | (0.6)                                                     | (0.7)    | 3.0     |
| Foreign exchange contracts | 3.4                                              | —      | —     | (1.5)                                                     | —        | —       |
| Total                      | \$(32.2)                                         | \$13.5 | \$1.3 | \$30.3                                                    | \$(14.7) | \$(1.3) |

#### Mark-to-Market Method

Derivative instruments that are not designated as a hedge, that have been de-designated from a hedging relationship, or do not meet the criteria for hedge accounting, are marked-to-market with the unrealized gains and losses together with

actual realized gains and losses from closed contracts being recognized in current period earnings. Derivative gains and losses are recorded in cost of sales for commodity contracts, interest expense for interest rate contracts and selling, general and administrative expenses for foreign currency contracts.

During fiscal 2010, the range of notional volumes associated with open derivative instruments using the “mark-to-market” method was as follows:

|                                 | Minimum    | Maximum       | Metric       |
|---------------------------------|------------|---------------|--------------|
| Commodities:                    |            |               |              |
| Lean hogs                       | 9,000,000  | 1,146,200,000 | Pounds       |
| Corn                            | 3,125,000  | 63,304,300    | Bushels      |
| Soybean meal                    | —          | 516,421       | Tons         |
| Soybeans                        | 10,000     | 595,000       | Bushels      |
| Wheat                           | —          | 360,000       | Bushels      |
| Live cattle                     | —          | 6,000,000     | Pounds       |
| Pork bellies                    | —          | 1,920,000     | Pounds       |
| Natural gas                     | 2,145,000  | 5,040,000     | Million BTU  |
| Foreign currency <sup>(1)</sup> | 55,909,712 | 152,889,945   | U.S. Dollars |

<sup>(1)</sup> Amounts represent the U.S. dollar equivalent of various foreign currency contracts.

The following table presents the amount of gains (losses) recognized in the consolidated statements of income on derivative instruments using the “mark-to-market” method by type of derivative contract for the fiscal years indicated:

|                            | Fiscal Years |         |         |
|----------------------------|--------------|---------|---------|
| (In millions)              | 2010         | 2009    | 2008    |
| Commodity contracts        | \$ (92.4)    | \$104.0 | \$236.2 |
| Interest rate contracts    | —            | 2.3     | (7.8)   |
| Foreign exchange contracts | (11.1)       | (3.1)   | (0.2)   |
| Total                      | \$(103.5)    | \$103.2 | \$228.2 |

## Financial Guarantees and Indemnifications

### 1.142

#### EASTMAN KODAK COMPANY (DEC)

##### NOTES TO FINANCIAL STATEMENTS

###### Note 11. Guarantees (in part)

The Company guarantees debt and other obligations of certain customers. The debt and other obligations are primarily due to banks and leasing companies in connection with financing of customers' purchases of equipment and product from the Company. At December 31, 2010, the maximum potential amount of future payments (undiscounted) that the Company could be required to make under these customer-related guarantees was \$47 million. At December 31, 2010, the carrying amount of any liability related to these customer guarantees was not material.

The customer financing agreements and related guarantees, which mature between 2011 and 2016, typically have a term of 90 days for product and short-term equipment financing arrangements, and up to five years for long-term equipment financing arrangements. These guarantees would require payment from the Company only in the event of default on payment by the respective debtor. In some cases, particularly for guarantees related to equipment financing, the Com-

pany has collateral or recourse provisions to recover and sell the equipment to reduce any losses that might be incurred in connection with the guarantees. However, any proceeds received from the liquidation of these assets may not cover the maximum potential loss under these guarantees.

Eastman Kodak Company (“EKC”) also guarantees potential indebtedness to banks and other third parties for some of its consolidated subsidiaries. The maximum amount guaranteed is \$261 million, and the outstanding amount for those guarantees is \$238 million with \$109 million recorded within the Short-term borrowings and current portion of long-term debt, and Long-term debt, net of current portion components in the accompanying Consolidated Statement of Financial Position. These guarantees expire in 2010 through 2019. Pursuant to the terms of the Company's Amended Credit Agreement, obligations of the Borrowers to the Lenders under the Amended Credit Agreement, as well as secured agreements in an amount not to exceed \$100 million, are guaranteed by the Company and the Company's U.S. subsidiaries and included in the above amounts. These secured agreements totaled \$90 million as of December 31, 2010.

During the fourth quarter of 2007, EKC issued a guarantee to Kodak Limited (the “Subsidiary”) and the Trustees (the “Trustees”) of the Kodak Pension Plan of the United Kingdom (the “Plan”). Under that arrangement, EKC guaranteed to the Subsidiary and the Trustees the ability of the Subsidiary, only to the extent it becomes necessary to do so, to (1) make contributions to the Plan to ensure sufficient assets exist to make plan benefit payments, and (2) make contributions to the Plan such that it will achieve full funded status by the funding valuation for the period ending December 31, 2015. On October 12, 2010, the 2007 guarantee was replaced by a new guarantee from EKC to the Subsidiary and the Trustees. The new guarantee continues to guarantee the Subsidiary's ability to make contributions as set forth in the 2007 guarantee but extends the full funding date to December 31, 2022. The new guarantee expires (a) upon the conclusion of the funding valuation for the period ending December 31, 2022 if the Plan achieves full funded status or on payment of the balance if the Plan is underfunded by no more than 60 million British pounds by that date, (b) earlier in the event that the Plan achieves full funded status for two consecutive funding valuation cycles which are typically performed at least every three years, or (c) June 30, 2024 on payment of the balance in the event that the Plan is underfunded by more than 60 million British pounds upon conclusion of the funding valuation for the period ending December 31, 2022. The amount of potential future contributions is dependent on the funding status of the Plan as it fluctuates over the term of the guarantee and the United Kingdom Pension Regulator's approval of a funding plan agreed to by the Subsidiary and the Trustees to close the funding gap identified by the Plan's most recent local statutory funding valuation agreed to in March 2009. The funded status of the Plan (calculated in accordance with U.S. GAAP) is included in Pension and other postretirement liabilities presented in the Consolidated Statement of Financial Position.

**1.143****NORTHROP GRUMMAN CORPORATION (DEC)****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS****16. Commitments and Contingencies (in part)**

**Guarantees of Subsidiary Performance Obligations**—From time to time in the ordinary course of business, the company guarantees performance obligations of its subsidiaries under certain contracts. In addition, the company's subsidiaries may enter into joint ventures, teaming and other business arrangements (collectively, Business Arrangements) to support the company's products and services in domestic and international markets. The company generally strives to limit its exposure under these arrangements to its subsidiary's investment in the Business Arrangements, or to the extent of such subsidiary's obligations under the applicable contract. In some cases, however, the company may be required to guarantee performance by the Business Arrangements and, in such cases, the company generally obtains cross-indemnification from the other members of the Business Arrangements. At December 31, 2010, the company is not aware of any existing event of default that would require it to satisfy any of these guarantees.

**Financial Arrangements**—In the ordinary course of business, the company uses standby letters of credit and guarantees issued by commercial banks and surety bonds issued principally by insurance companies to guarantee the performance on certain contracts and to support the company's self-insured workers' compensation plans. At December 31, 2010, there were \$303 million of stand-by letters of credit, \$192 million of bank guarantees, and \$446 million of surety bonds outstanding.

The company has also guaranteed the remaining \$22 million of bonds outstanding from the Gulf Opportunity Zone Industrial Revenue Development Bonds issued by the Mississippi Business Finance Corporation in December 2006. Under the guaranty, the company guaranteed the repayment of all payments due under the trust indenture and loan agreement. In addition, a subsidiary of the company has guaranteed Shipbuilding's outstanding \$84 million Economic Development Revenue Bonds (Ingalls Shipbuilding, Inc. Project), Taxable Series 1999A.

**Indemnifications**—The company has retained certain warranty, environmental, income tax, and other potential liabilities in connection with certain of its divestitures. The settlement of these liabilities is not expected to have a material adverse effect on the company's consolidated financial position, results of operations or cash flows.

**Standby Letters of Credit****1.144****HARSCO CORPORATION (DEC)****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS****Note 13. Financial Instruments (in part)****Off-Balance Sheet Risk**

As collateral for the Company's performance and to insurers, the Company is contingently liable under standby letters of credit, bonds and bank guarantees in the amounts of \$286.1 million and \$280.1 million at December 31, 2010 and 2009, respectively. These standby letters of credit, bonds and bank guarantees are generally in force for up to four years. Certain issues have no scheduled expiration date. The Company pays fees to various banks and insurance companies that range from 0.25 percent to 2.30 percent per annum of the instruments' face value. If the Company were required to obtain replacement standby letters of credit, bonds and bank guarantees at December 31, 2010 for those currently outstanding, it is the Company's opinion that the replacement costs would be within the present fee structure.

The Company has currency exposures in more than 50 countries. The Company's primary foreign currency exposures during 2010 were in the European Economic and Monetary Union, the United Kingdom, Brazil, Australia, South Africa and Canada.

**FAIR VALUE****RECOGNITION AND MEASUREMENT**

**1.145** FASB ASC 820, *Fair Value Measurements and Disclosures*, defines fair value, establishes a framework for measuring fair value, and requires certain disclosures about fair value measurements. *Fair value* is defined as an exit price (that is, a price that would be received to sell, versus acquire, an asset or transfer a liability). Further, fair value is a market-based measurement. It establishes a fair value hierarchy that distinguishes between assumptions developed based on market data obtained from independent external sources and the reporting entity's own assumptions. Further, fair value measurement should consider adjustment for risk, such as the risk inherent in a valuation technique or its inputs.

**1.146** FASB ASC 820-10-35-10 provides that a fair value measurement of an asset assumes the highest and best use of the asset by market participants, considering the use of the asset that is physically possible, legally permissible, and financially feasible at the measurement date. Highest and best use is determined based on the use of the asset by market participants, even if the intended use of the asset by the reporting entity is different. FASB ASC 820-10-35-10 states that the highest and best use for an asset is established by one of two valuation premises: value in use or value in exchange. The highest and best use of the asset is in use if the asset would provide maximum value to market participants principally through its use in combination with other assets as a group (as installed or otherwise configured for

use). For example, value in use might be appropriate for certain nonfinancial assets. The highest and best use of the asset is in exchange if the asset would provide maximum value to market participants principally on a stand-alone basis. For example, value in exchange might be appropriate for a financial asset. According to paragraphs 12–13 of FASB ASC 820-10-35, an asset's value in use should be based on the price that would be received in a current transaction to sell the asset, assuming that the asset would be used with other assets as a group and that those other assets would be available to market participants. An asset's value in exchange is determined based on the price that would be received in a current transaction to sell the asset on a stand-alone basis.

**1.147** According to paragraphs 16–16A of FASB ASC 820-10-35, a fair value measurement of a liability assumes that both (a) the liability is transferred to a market participant at the measurement date (the liability to the counterparty continues; it is not settled), and (b) the nonperformance risk relating to that liability is the same before and after its transfer. Certain liabilities, such as debt obligations, are traded in the marketplace as assets. However, liabilities are rarely transferred in the marketplace due to contractual or other legal restrictions. A reporting entity is permitted, as a practical expedient, to estimate the fair value of an investment within the scope of paragraphs 4–5 of FASB ASC 820-10-15 using the net asset value per share (or its equivalent) of the investment if the net asset value per share or its equivalent is calculated in a manner consistent with the measurement principles of FASB ASC 946, *Financial Services—Investment Companies*, as of the reporting entity's measurement date.

## DISCLOSURE

**1.148** For assets and liabilities measured at fair value, whether on a recurring or nonrecurring basis, FASB ASC 820-10-50 specifies the required disclosures concerning the inputs used to measure fair value. "Pending Content" in FASB ASC 820-10-50-1 explains that the reporting entity should disclose information that enables users of its financial statements to assess the following: (a) for assets and liabilities measured at fair value on a recurring basis in periods subsequent to initial recognition or measured on a nonrecurring basis in periods subsequent to initial recognition, the valuation techniques and inputs used to develop those measurements and (b) for recurring fair value measurements using significant unobservable inputs (level 3), the effect of the measurements on earnings for the period.

### Author's Note

Separate disclosures about purchases, sales, issuances, and settlements relating to level 3 measurements, as discussed in FASB ASC 820-10-50-2(c)(2), will be required for fiscal years beginning after December 15, 2010, and for interim periods within those fiscal years. However, early adoption is permitted.

## PRESENTATION AND DISCLOSURE EXCERPTS

### Fair Value Measurements

#### 1.149

#### SANDISK CORPORATION (DEC)

#### NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

##### Note 1. Organization and Summary of Significant Accounting Policies (in part)

**Fair Value of Financial Instruments.** For certain of the Company's financial instruments, including accounts receivable, short-term marketable securities and accounts payable, the carrying amounts approximate fair value due to their short maturities.

The Company categorizes the fair value of its financial assets and liabilities according to the hierarchy established by the FASB, which prioritizes the inputs to valuation techniques used to measure fair value. The hierarchy gives the highest priority to unadjusted quoted prices in active markets for identical assets or liabilities (Level 1 measurements) and the lowest priority to unobservable inputs (Level 3 measurements). The three levels of the fair value hierarchy are described as follows:

Level 1 Valuations based on quoted prices in active markets for identical assets or liabilities that the Company has the ability to directly access.

Level 2 Valuations based on quoted prices for similar assets or liabilities; valuations for interest-bearing securities based on non-daily quoted prices in active markets; quoted prices in markets that are not active; or other inputs that are observable or can be corroborated by observable data for substantially the full term of the assets or liabilities.

Level 3 Valuations based on inputs that are supported by little or no market activity and that are significant to the fair value of the assets or liabilities.

A financial instrument's level within the fair value hierarchy is based on the lowest level of any input that is significant to the fair value measurement.

In circumstances in which a quoted price in an active market for the identical liability is not available, the Company is required to use the quoted price of the identical liability when traded as an asset, quoted prices for similar liabilities, or quoted prices for similar liabilities when traded as assets. If these quoted prices are not available, the Company is required to use another valuation technique, such as an income approach or a market approach.

The Company's financial assets are measured at fair value on a recurring basis. Instruments that are classified within Level 1 of the fair value hierarchy generally include money market funds, U.S. Treasury securities and equity securities. Level 1 securities represent quoted prices in active markets, and therefore do not require significant management judgment.

Instruments that are classified within Level 2 of the fair value hierarchy primarily include government agency securities, asset-backed securities, mortgage-backed securities, commercial paper, U.S. government-sponsored agency securities, and corporate/municipal notes and bonds. The Company's Level 2 securities are primarily valued using

quoted market prices for similar instruments and nonbinding market prices that are corroborated by observable market data. The Company uses inputs such as actual trade data, benchmark yields, broker/dealer quotes, and other similar data, which are obtained from independent pricing vendors, quoted market prices, or other sources to determine the ultimate fair value of the Company's assets and liabilities. The

inputs and fair value are reviewed for reasonableness and may be further validated by comparison to publicly available information or compared to multiple independent valuation sources.

*Note 2. Investments and Fair Value Measurements*

Financial assets and liabilities measured at fair value on a recurring basis as of January 2, 2011 were as follows (in thousands):

|                             | Total       | Quoted Prices in Active Markets for Identical Assets (Level 1) | Significant Other Observable Inputs (Level 2) | Significant Unobservable Inputs (Level 3) |
|-----------------------------|-------------|----------------------------------------------------------------|-----------------------------------------------|-------------------------------------------|
| Money market funds          | \$ 587,973  | \$587,973                                                      | \$ —                                          | \$—                                       |
| Fixed income securities     | 4,448,837   | 30,803                                                         | 4,418,034                                     | —                                         |
| Equity securities           | 90,425      | 90,425                                                         | —                                             | —                                         |
| Derivative assets           | 19,462      | —                                                              | 19,462                                        | —                                         |

|                                                | Fair Value          | Gross Unrealized Loss | Fair Value             | Gross Unrealized Loss |
| U.S. Treasury and government agency securities | \$ 3,587            | \$ (33)               | \$ —                   | \$—                   |
| Corporate notes and bonds                      | 76,499              | (190)                 | 4,346                  | (6)                   |
| Asset-backed securities                        | 6,003               | (5)                   | —                      | —                     |
| Municipal notes and bonds                      | 1,776,140           | (13,641)              | —                      | —                     |
| Total                                          | \$1,862,229         | \$(13,869)            | \$4,346                | \$(6)                 |

Gross unrealized gains and losses related to publicly-traded equity investments are due to changes in market prices. The Company has cash flow hedges designated to substantially mitigate risks, of both gains and losses, from certain of these equity investments, as discussed in Note 3, "Derivatives and Hedging Activities." The gross unrealized loss related to U.S. Treasury and government agency securities, corporate and municipal notes and bonds and asset-backed securities was primarily due to changes in interest rates. The gross unrealized loss on all available-for-sale fixed income securities at January 2, 2011 was considered temporary in nature. Factors considered in determining whether a loss is temporary include the length of time and extent to which fair value has been less than the cost basis, the financial condition and near-term prospects of the investee, and the Company's intent and ability to hold an investment for a period of time sufficient to allow for any anticipated recovery in market value. For debt security investments, the Company considered additional factors including the Company's intent to sell the investments or whether it is more likely than not the Company will be required to sell the investments before the recovery of its amortized cost.

The following table shows the gross realized gains and (losses) on sales of available-for-sale securities (in thousands).

|                         | Year Ended      |                 |                   |
|-------------------------|-----------------|-----------------|-------------------|
|                         | January 2, 2011 | January 3, 2010 | December 28, 2008 |
| Gross realized gains    | \$20,867        | \$13,997        | \$8,870           |
| Gross realized (losses) | (344)           | (576)           | (640)             |

Fixed income securities by contractual maturity as of January 2, 2011 are shown below (in thousands). Actual maturities may differ from contractual maturities because issuers of the securities may have the right to prepay obligations.

|                                       | Amortized Cost | Fair Value  |
|---------------------------------------|----------------|-------------|
| Due in one year or less               | \$1,951,220    | \$1,953,865 |
| Due after one year through five years | 2,499,150      | 2,494,972   |
| Total                                 | \$4,450,370    | \$4,448,837 |

For certain of the Company's financial instruments, including accounts receivable, short-term marketable securities and accounts payable, the carrying amounts approximate fair value due to their short maturities. For those financial instruments where the carrying amounts differ from fair value, the following table represents the related carrying values and the fair values, which are based on quoted market prices (in thousands).

|                                     | As of January 2, 2011 |             | As of January 3, 2010 |            |
|-------------------------------------|-----------------------|-------------|-----------------------|------------|
|                                     | Carrying Value        | Fair Value  | Carrying Value        | Fair Value |
| 1% Sr. Convertible notes due 2013   | \$993,199             | \$1,118,375 | \$934,722             | \$958,813  |
| 1.5% Sr. Convertible notes due 2017 | 717,833               | 1,132,500   | —                     | —          |
| 1% Convertible notes due 2035       | —                     | —           | 75,000                | 74,700     |

(DEC)

### NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

#### Note 2. Summary of Significant Accounting Policies (in part)

##### Fair Value of Financial Instruments

Our financial instruments consist of cash and cash equivalents, auction rate securities, accounts receivable, accounts payable, interest rate hedges and long-term notes including the current portion. The carrying values of cash and cash

equivalents, auction rate securities, accounts receivable, accounts payable and interest rate hedges approximate their fair values. The carrying value of our long-term notes, including the current portion, reflects original cost net of unamortized discounts and other. See Note 3—Fair Value of Financial Instruments for a more detailed discussion of the fair value of our other financial instruments.

### *Pension and Post-Retirement Benefits*

We sponsor a noncontributory defined benefit pension plan (referred to as our pension plan) for substantially all management and occupational employees. In addition to this tax qualified pension plan, we also maintain a non-qualified pension plan for certain eligible highly compensated employees. We maintain post-retirement benefit plans that provide health care and life insurance benefits for certain eligible retirees.

Pension and post-retirement health care and life insurance benefits attributed to eligible employees' service during the year, as well as interest on benefit obligations, are accrued currently. Prior service costs and actuarial gains and losses are generally recognized as a component of net periodic expense over one of the following periods: (i) the average remaining service period of the employees expected to receive benefits of approximately nine years; (ii) the average remaining life of the employees expected to receive benefits of approximately 18 years; or (iii) the term of the collective bargaining agreements, as applicable. Pension and post-retirement benefit expenses are recognized over the period in which the employee renders service and becomes eligible to receive benefits as determined using the projected unit credit method.

In computing the pension and post-retirement health care and life insurance benefits expenses and obligations, the most significant assumptions we make include discount rate, expected rate of return on plan assets, health care trend rates and our evaluation of the legal basis for plan amendments. The plan benefits covered by collective bargaining agreements as negotiated with our employees' unions can also significantly impact the amount of expense, benefit obligations and pension assets that we record.

The discount rate is the rate at which we believe we could effectively settle the benefit obligations as of the end of the year. We set our discount rates each year based upon the yields of high-quality fixed-income investments available at December 31 with maturities matching our future expected cash flows of the pension and post-retirement benefit plans. In making the determination of discount rates, we average the yields of various bond matching sources and the Citigroup Pension Discount Curve.

The expected rate of return on plan assets is the long-term rate of return we expect to earn on plan assets. The rate of return is determined by the strategic allocation of the plan assets and the long-term risk and return forecast for each asset class. The forecast for each asset class is generated primarily from an analysis of the long-term expectations of various third party investment management organizations. The expected rate of return on plan assets is reviewed annually and revised, as necessary, to reflect changes in the financial markets and our investment strategy.

To compute the expected return on pension and post-retirement benefit plan assets, we apply an expected rate of return to the market-related value of the pension plan assets and to the fair value of the post-retirement plan assets adjusted for projected benefit payments to be made from the

plan assets. With respect to equity assets held by our pension plan, we have elected to recognize actual returns on these equity assets ratably over a five year period when computing our market-related value of pension plan assets; the unrecognized portion of actual returns on these equity assets is included in accumulated other comprehensive income. This method has the effect of reducing the impact on expenses of equity market volatility that may be experienced from year to year. With respect to bonds and other assets held by our pension plan and with respect to the assets held by our post-retirement benefit plans, we did not elect to recognize actual returns on these assets using this five-year ratable method. Therefore, the full impact of annual market volatility for these assets is reflected in the subsequent year's net periodic combined benefits expense.

The trusts for the pension and post-retirement benefits plans hold investments in equities, fixed income, real estate and other assets such as private equity assets. The assets held by these trusts are reflected at estimated fair value as of December 31. The fair value of certain assets held by the trusts is determined through use of observable inputs, such as quoted market prices for identical instruments in active markets or quoted prices for similar assets in active markets. For instance, the fair value of individual exchange traded equity securities is based on the last published price reported on the major market in which that individual security is traded and the fair value of certain individual fixed income securities is based on a spread to other more active fixed income securities last reported price on the major market in which that more active security is traded. Interests in commingled funds and limited partnerships are valued using the net asset value of each fund. The fair value of a significant amount of assets held by our trusts are not available by reference to a quoted market price or other significant observable inputs as of December 31. As a consequence, we believe there is a risk in reporting the fair value of these assets because the actual values of these assets could be significantly different from our estimates. The methods we use to value investments in the absence of observable market prices are described below.

Investments in partnerships (private equity, private debt and real estate) do not have observable market prices and are generally reported at fair value as determined by the partnership. Each partnership uses valuation methodologies that give consideration to a range of factors, including but not limited to the price at which the investment was acquired, the nature of the investments, market conditions, trading values on comparable public securities, current and projected operating performance and financing transactions subsequent to the acquisition of the investment. These valuation methodologies involve a significant degree of judgment. For some of these partnership investments, the fair value provided by the partnership is as of a date prior to our measurement date. In these situations, we adjust the fair value based on subsequent cash flows and review of the latest information provided by the partnership, including the impact of any significant events and changes in market conditions that have occurred since the last valuation date.

The assumptions and valuation methodologies of the pricing vendors, account managers, fund managers and partnerships are monitored and evaluated for reasonableness. See additional information about the valuation inputs used to value the assets in Note 11—Employee Benefits.

### Note 3. Fair Value of Financial Instruments

Our financial instruments consisted of cash and cash equivalents, auction rate securities, accounts receivable, accounts payable, interest rate hedges, the embedded option in our previously outstanding convertible debt and long-term notes including the current portion. The carrying values of the following items approximate their fair values: cash and cash equivalents, auction rate securities, accounts receivable, accounts payable and interest rate hedges. The carrying value of our long-term notes, including the current portion, reflects original cost net of unamortized discounts and other and was \$11.583 billion as of December 31, 2010. For additional information, see Note 8—Borrowings.

Fair value is defined as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between independent and knowledgeable parties who are willing and able to transact for an asset or liability at the measurement date. We use valuation techniques that maximize the use of observable inputs and minimize the use of unobservable inputs when determining fair value and then we rank the estimated values based on the reliability of the inputs used following the fair value hierarchy set forth by the FASB.

The table below presents the fair values for auction rate securities, interest rate hedges and long-term notes including the current portion, as well as the input levels used to determine these fair values as of December 31, 2010 and 2009:

|                                                   |       | Fair Value as<br>of December 31 |          |
|---------------------------------------------------|-------|---------------------------------|----------|
| (Dollars in millions)                             | Level | 2010                            | 2009     |
| Assets:                                           |       |                                 |          |
| Auction rate securities                           | 3     | \$ 92                           | \$ 95    |
| Fair value hedges                                 | 3     | —                               | 2        |
| Total assets                                      |       | \$ 92                           | \$ 97    |
| Liabilities:                                      |       |                                 |          |
| Long-term notes, including the<br>current portion | 1 & 2 | \$12,480                        | \$14,245 |
| Cash flow hedges                                  | 3     | —                               | 3        |
| Total liabilities                                 |       | \$12,480                        | \$14,248 |

The three levels of the fair value hierarchy as defined by the FASB are as follows:

| Input Level | Description of Input                                                                                                                                                                                                                                                                                                                                                                     |
|-------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Level 1     | Inputs are based upon unadjusted quoted prices for identical instruments traded in active markets.                                                                                                                                                                                                                                                                                       |
| Level 2     | Inputs are based upon quoted prices for similar instruments in active markets, quoted prices for identical or similar instruments in markets that are not active, and model-based valuation techniques for which all significant assumptions are observable in the market or can be corroborated by observable market data for substantially the full term of the assets or liabilities. |
| Level 3     | Inputs are generally unobservable and typically reflect management's estimates of assumptions that market participants would use in pricing the asset or liability. The fair values are therefore determined using model-based techniques that include option pricing models, discounted cash flow models, and similar techniques.                                                       |

We determined the fair value of our auction rate securities using a probability-weighted discounted cash flow model that takes into consideration the weighted average of the following factors:

- Coupon rate of 5.44%;
- Probability that we will be able to sell the securities in an auction or that the securities will be redeemed early of 75.23%;
- Probability that a default will occur of 20.98% with a related recovery rate of 55.00%; and
- Discount rate of 7.81%.

We determined the fair value of our interest rate hedges using projected future cash flows, discounted at the mid-market implied forward London Interbank Offered Rate ("LIBOR"). For additional information on our derivative financial instruments, see Note 9—Derivative Financial Instruments.

We determined the fair values of our long-term notes, including the current portion, based on quoted market prices where available or, if not available, based on discounted future cash flows using current market interest rates.

The table below presents a rollforward of the instruments valued using Level 3 inputs for the years ended December 31, 2010 and 2009:

| (Dollars in millions)                         | Auction Rate Securities | Investment Fund | Fair Value Hedges | Cash Flow Hedges | Embedded Option in Convertible Debt |
|-----------------------------------------------|-------------------------|-----------------|-------------------|------------------|-------------------------------------|
| Balance at December 31, 2008                  | \$90                    | \$20            | \$—               | \$(8)            | \$ —                                |
| Transfers into (out of) Level 3               | —                       | —               | —                 | —                | —                                   |
| Additions                                     | 2                       | —               | —                 | —                | —                                   |
| Dispositions and settlements                  | —                       | (21)            | —                 | —                | —                                   |
| Realized and unrealized gains:                |                         |                 |                   |                  |                                     |
| Included in long-term borrowings—net          | —                       | —               | 2                 | —                | —                                   |
| Included in other income (expense)—net        | —                       | 1               | —                 | —                | —                                   |
| Included in other comprehensive income        | 3                       | —               | —                 | 5                | —                                   |
| Balance at December 31, 2009                  | 95                      | —               | 2                 | (3)              | —                                   |
| Transfers into (out of) Level 3               | —                       | —               | —                 | —                | —                                   |
| Additions                                     | —                       | —               | —                 | —                | —                                   |
| Reclassification from equity                  | —                       | —               | —                 | —                | (165)                               |
| Dispositions and settlements                  | —                       | —               | (7)               | —                | 640                                 |
| Realized and unrealized gains:                |                         |                 |                   |                  |                                     |
| Included in long-term borrowings—net          | —                       | —               | 5                 | —                | —                                   |
| Included in other (expense) income—net        | —                       | —               | —                 | —                | (475)                               |

| Balance at December 31, 2010                  | \$92                    | \$—             | \$—               | \$—              | \$ —                                |

Our 3.50% Convertible Senior Notes had previously been accounted for as two components: a debt component, and an equity component representing a written option on our stock. Our obligation under the CenturyLink merger agreement to redeem these notes for cash triggered a change in accounting to reclassify the equity component from equity to a liability. We therefore computed the fair value of the equity component to be \$165 million as of April 21, 2010 (the date the merger agreement was signed) and reclassified this amount from additional paid-in capital to a current liability. We determined the stock price volatility considering the historical volatility of both our common stock and CenturyLink's common stock for a historical period equivalent to the expected remaining option term. Under the terms of these notes, the conversion price of the debt was adjusted based on dividend payments. The embedded option therefore effectively participated in dividends and the fair value of the embedded option was computed based upon the conversion price in effect on the valuation date and an assumed dividend yield of zero.

We determined the fair value of the embedded option in our convertible debt using a Black-Scholes option valuation model. The value was computed using the following assumptions as of April 21, 2010 (the date of the merger agreement).

- Stock price of \$5.24;
- Stock price volatility of 28.7%;
- Exercise price of \$4.92;
- Option term of approximately eight months; and
- Risk free rate of 0.29%.

See Note 8—Borrowings and Note 9—Derivative Financial Instruments for additional information.

By December 31, 2010 we had settled the outstanding liability for our embedded option for \$640 million resulting in a loss of \$475 million.

#### Note 4. Investments

As of December 31, 2010 and 2009, our investments included auction rate securities of \$92 million and \$95 million, respectively, which are classified as non-current, available-for-sale investments and are included in other non-current assets at their estimated fair value on our consolidated balance sheets.

Auction rate securities are generally long-term debt instruments that provide liquidity through a Dutch auction process that resets the applicable interest rate at pre-determined calendar intervals, generally every 28 days. This mechanism generally allows existing investors to rollover their holdings and continue to own their respective securities or liquidate their holdings by selling their securities at par value. Prior to August 2007, we invested in these securities for short periods of time as part of our cash management program. However, the uncertainties in the credit markets have prevented us and other investors from liquidating holdings of these securities in auctions since the third quarter of 2007. Because we are uncertain as to when the liquidity issues relating to these investments will improve, we continued to classify these securities as non-current as of December 31, 2010. These securities:

- Are structured obligations of special purpose reinsurance entities associated with life insurance companies and are referred to as "Triple X" securities;
- Currently pay interest every 28 days at one-month LIBOR plus 200 basis points;
- Are rated A;
- Are insured against loss of principal and interest by two bond insurers, one of which had a credit rating of B and the other of which was not rated and in the fourth quarter of 2009 was prohibited by its regulator from making any claim payments;
- Are collateralized by the issuers; and
- Mature between 2033 and 2036.

The following table summarizes the fair value of these auction rate securities, the cumulative net unrealized loss, net of deferred income taxes, and the cost basis of these securities as of December 31, 2010 and 2009:

| (Dollars in millions)                                        | December 31                                 |       |
|--------------------------------------------------------------|---------------------------------------------|-------|
|                                                              | 2010                                        | 2009  |
| Auction rate securities—fair value                           | \$ 92                                       | \$ 95 |
| Classification                                               | Non-current, available-for-sale investments |       |
| Balance sheet location (reported at estimated fair value)    | Other non-current assets                    |       |
| Cumulative net unrealized loss, net of deferred income taxes | \$ 16                                       | \$ 15 |
| Auction rate securities—cost basis                           | \$120                                       | \$120 |

The following table summarizes the unrealized gains and losses, net of deferred income taxes included in comprehensive (loss) income, on our auction rate securities for the years ended December 31, 2010 and 2009:

| (Dollars in millions)                                | December 31 |      |
|------------------------------------------------------|-------------|------|
|                                                      | 2010        | 2009 |
| Unrealized (loss) gain, net of deferred income taxes | \$(1)       | \$2  |

These unrealized losses were recorded in accumulated other comprehensive loss on our consolidated balance sheets. We consider the decline in fair value to be a temporary impairment because we believe it is more likely than not that we will ultimately recover the entire \$120 million cost basis, in part because the securities are rated investment grade, the securities are collateralized and the issuers continue to make required interest payments. At some point in the future, we may determine that the decline in fair value is other than temporary if, among other factors:

- The issuers cease making required interest payments;
- We believe it is more likely than not that we will be required to sell these securities before their values recover; or
- We change our intent to hold the securities due to events such as a change in the terms of the securities.

#### Note 11. Employee Benefits (in part)

##### Plan Assets

We maintain plan assets for our pension plan and certain post-retirement benefit plans. The pension plan assets are used for the payment of pension benefits and certain eligible plan expenses. The post-retirement benefit plan assets are used to pay health care benefits and premiums on behalf of eligible retirees who are former occupational plan participants and to pay certain eligible plan expenses. The following table summarizes the change in the fair value of plan assets for the pension and post-retirement benefit plans as of and for the years ended December 31, 2010 and 2009:

| (Dollars in millions)                          | Pension Plan |         | Post-Retirement Benefit Plans |        |
|------------------------------------------------|--------------|---------|-------------------------------|--------|
|                                                | 2010         | 2009    | 2010                          | 2009   |
| Fair value of plan assets at beginning of year | \$7,326      | \$7,217 | \$863                         | \$ 915 |
| Actual gain on plan assets                     | 1,094        | 793     | 124                           | 141    |
| Benefits paid from plan assets                 | (760)        | (684)   | (186)                         | (193)  |
| Fair value of plan assets at end of year       | \$7,660      | \$7,326 | \$801                         | \$ 863 |

**Fair Value Measurements:** Fair value is defined as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between independent and knowledgeable parties who are willing and able to transact for an asset or liability at the measurement date. We use valuation techniques that maximize the use of observable inputs and minimize the use of unobservable inputs when determining fair value and then we rank the estimated values based

on the reliability of the inputs used following the fair value hierarchy set forth by the FASB. For additional information on the fair value hierarchy, see Note 3—Fair Value of Financial Instruments.

The tables below presents the fair value of plan assets by category and the input levels used to determine those fair values as of December 31, 2010. It is important to note that the asset allocations do not include market exposures that are gained with derivatives.

| Fair Value of Pension Plan Assets as of December 31, 2010  |         |         |         |         |
|------------------------------------------------------------|---------|---------|---------|---------|
| (Dollars in millions)                                      | Level 1 | Level 2 | Level 3 | Total   |
| Investment grade bonds <sup>(a)</sup>                      | \$ 453  | \$ 804  | \$ —    | \$1,257 |
| High yield bonds <sup>(b)</sup>                            | —       | 520     | 114     | 634     |

The plans' assets are invested in various asset categories utilizing multiple strategies and investment managers. For several of the investments in the tables above and discussed below, the plans own units in commingled funds and limited partnerships that invest in various types of assets. Interests in commingled funds are valued using the net asset value (NAV) per unit of each fund. The NAV reported by the fund manager is based on the market value of the underlying investments owned by each fund, minus its liabilities, divided by the number of shares outstanding. All commingled funds held by the plans that can be redeemed at NAV within a year of the financial statement date are classified as Level 2, otherwise the fund is classified as Level 3. Investments in limited partnerships represent long-term commitments with a fixed maturity date, typically ten years. Valuation inputs for these limited partnership interests are generally based on assumptions and other information not observable in the market and are classified as Level 3 investments. The assumptions and valuation methodologies of the pricing vendors, account managers, fund managers, and partnerships are monitored and evaluated for reasonableness. Below is an overview of the asset categories, the underlying strategies, and valuation inputs used to value the assets in the preceding tables:

- (a) *Investment grade bonds* represent stand-alone investments in U.S. Treasury securities as well as portfolios and commingled funds with characteristics similar to the Barclays Capital U.S. Aggregate Bond Index (the index). The index is comprised of U.S. Treasuries, agencies, corporate bonds, mortgage-backed securities, asset-backed securities, and commercial mortgage-backed securities. Treasury securities are valued at the bid price reported in the active market in which the security is traded and are classified as Level 1. Valuations of other investment grade bonds are based on a spread to U.S. Treasuries and consider yields available on comparable securities of issuers with similar credit ratings and are classified as Level 2. The commingled funds can be redeemed at NAV within a year of the financial statement date and are classified as Level 2.
- (b) *High yield bonds* represent investments in fixed income securities below investment grade and bank loans. Investments are made in stand-alone portfolios and commingled funds. Valuations of publicly traded high yield bonds are based on a spread to U.S. Treasuries and consider yields available on comparable securities of issuers with similar credit ratings and are classified as Level 2. The commingled funds that can be redeemed at NAV within a year of the financial statement date are classified as Level 2. For the pension plan, all other high yield funds that cannot be redeemed at NAV or that cannot be redeemed at NAV within a year of the financial statement date are classified as Level 3.
- (c) *Emerging market bonds* represent debt instruments issued by governments and other entities located in developing countries. Emerging market bonds are priced based on dealer quotes or a spread relative to the local government bonds and are classified as Level 2.
- (d) *Convertible bonds* primarily represent investments in corporate debt securities that have features that allow the debt to be converted into equity securities under certain circumstances. Valuations of individual convertible bonds are based on a combination of a spread to U.S. Treasuries and the value and volatility of the underlying equity security. Convertible bonds are classified as Level 2.
- (e) *Diversified strategies* represent investments in commingled funds that primarily have exposures to global government, corporate and inflation-linked bonds, but that also have exposures to global stocks and commodities. The funds can be redeemed at NAV within a year of the financial statement date and are classified as Level 2.
- (f) *U.S. stocks* represent investments in securities that are held in stand-alone portfolios and commingled funds that track the broad U.S. stock markets. Individual U.S. stocks are valued at the last published price reported on the major market on which the individual securities are traded and are classified as Level 1. The commingled funds can be redeemed at NAV within a year of the financial statement date and are classified as Level 2.
- (g) *Non-U.S. stocks* represent investments in securities, which are held in stand-alone portfolios, a registered mutual fund and commingled funds that track developed non-U.S. stock markets. Foreign currency exposure is hedged approximately 50% to the U.S. dollar. Individual non-U.S. stock securities and mutual funds are valued at the last published price reported on the major market on which the individual securities or mutual fund are traded and are classified as Level 1. The commingled funds can be redeemed at NAV within a year of the financial statement date and are classified as Level 2.
- (h) *Emerging market stocks* represent investments in registered mutual funds and commingled funds for the pension plan and commingled funds for the post-retirement plan and are comprised of stocks of companies located in developing markets. Registered mutual funds are valued at the last published price reported on the major market on which the mutual funds are traded and are classified as Level 1. The commingled funds can be redeemed at NAV within a year of the financial statement date and are classified as Level 2.
- (i) *Private equity* represents investments in nonpublicly traded domestic and foreign buy-out and venture capital funds. Private equity funds are structured as limited partnerships and are valued according to the valuation policy of each partnership, subject to prevailing accounting and other regulatory guidelines. The partnerships use valuation methodologies that give consideration to a range of factors, including but not limited to the price at which investments were acquired, the nature of the investments, market conditions, trading values on comparable public securities, current and projected operating performance, and financing transactions subsequent to the acquisition of the investments. These valuation methodologies involve a significant degree of judgment. For some investments, the fair value provided by the partnership is as of a date prior to our measurement date. In these situations, we adjust the value for subsequent cash flows and review the fair value based on the latest information provided by the partnership, including the impact of any significant events and changes in market conditions that have occurred since the last valuation date. Private equity investments are classified as Level 3.
- (j) *Private debt* represents investments in nonpublicly traded funds that primarily invest in either distressed or mezzanine debt instruments. Mezzanine debt instruments are debt instruments that are subordinated to other debt issues and may include embedded equity instruments such as warrants. Private debt funds are

structured as limited partnerships and are valued according to the valuation policy of each partnership, subject to prevailing accounting and other regulatory guidelines. The valuation of underlying fund investments are based on factors including the issuer's current and projected credit worthiness, the security's terms, reference to the securities of comparable companies, and other market factors. These valuation methodologies involve a significant degree of judgment. For some investments, the fair value provided by the partnership is as of a date prior to our measurement date. In these situations, we adjust the value for subsequent cash flows and review the fair value based on the latest information provided by the partnership, including the impact of any significant events and changes in market conditions that have occurred since the last valuation date. Private debt investments are classified as Level 3.

- (k) *Hedge funds.* *Market neutral hedge funds* hold investments in a diversified mix of instruments that are intended in combination to exhibit low correlations to market fluctuations. For the pension plan, these investments are typically combined with futures to achieve uncorrelated excess returns over various markets. *Directional hedge funds* represent investments that may exhibit somewhat higher correlations to market fluctuations than the market neutral hedge funds. Investments in hedge funds include both direct investments and investments in diversified funds of funds. All hedge funds are valued at NAV. Hedge funds that can be redeemed at NAV within a year of the financial statement date are classified as Level 2. All other hedge fund investments that cannot be redeemed at NAV or that cannot be redeemed at NAV within a year of the financial statement date are classified as Level 3.
- (l) *Real estate* represents investments in nonpublicly traded commingled funds and limited partnerships that invest in a diversified portfolio of real estate properties. Real estate investments are valued at NAV according to the valuation policy of each fund or partnership, subject to prevailing accounting and other regulatory guidelines. The valuation of specific properties is generally based on third-party appraisals that use comparable sales or a projection of future cash flows to determine fair value. Real estate investments that can be redeemed at NAV within a year of the financial statement date are classified as level 2. Real estate investments that cannot be redeemed at NAV or that cannot be redeemed at NAV within a year of the financial statement date are classified as Level 3.
- (m) *Derivatives* include the market value of exchange-traded futures contracts which are classified as Level 1, as well as privately negotiated over-the-counter forwards and swaps that are valued based on changes in interest rates, currencies or a specific market index and classified as Level 2. The market values represent gains or losses that occur due to fluctuations in interest rates, foreign currency exchange rates, security prices, or other factors.

- (n) *Cash equivalents and short-term investments* represent investments that are used in conjunction with derivatives positions or are used to provide liquidity for the payment of benefits or other purposes. U.S. Treasury Bills are valued at the bid price reported in the active market in which the security is traded and are classified as Level 1. Valuations of other securities are based on a spread to U.S. Treasury Bills, the Federal Funds Rate, or London Interbank Offered Rate and consider yields available on comparable securities of issuers with similar credit ratings and are classified as Level 2.
- (o) *Securities lending obligation and collateral* represent securities lending transactions whereby the plans' lending agent lends stock and bond investments of the plan to other third-party investment firms in exchange for collateral. The stock and bond securities are generally loaned for a period of less than one month and can be recalled on a day's notice. Under the terms of its securities lending agreement, the plan typically requires collateral of a value in excess of the fair value of the loaned investments. Collateral received is then invested in certain collective investment vehicles maintained by the lending agent. Upon the maturity of the agreement, the borrower must return the same, or substantially the same, investments that were borrowed and the plan returns the collateral. The value of the obligation is a fixed amount based on the collateral received and is classified as Level 2. The collateral received is invested in collective investment vehicles that are comprised of short-term investment grade bonds and cash equivalents, the valuations of which are described above, and is classified as Level 2.

*Concentrations of Risk:* Investments, in general, are exposed to various risks, such as significant world events, interest rate, credit, foreign currency, and overall market volatility risk. These risks are managed by broadly diversifying assets across numerous asset classes and strategies with differing expected returns, volatilities, and correlations. Risk is also broadly diversified across numerous market sectors and individual companies. Financial instruments that potentially subject the plans to concentrations of counterparty risk consist principally of investment contracts with high quality financial institutions. These investment contracts are typically collateralized obligations and/or are actively managed, limiting the amount of counterparty exposure to any one financial institution. Although the investments are well diversified, the value of plan assets could change materially depending upon the overall market volatility, which could affect the funded status of the plans.

The table below presents a rollforward of the pension plan assets valued using Level 3 inputs for the years ended December 31, 2010 and 2009:

| Pension Plan Assets Valued Using Level 3 Inputs          |                  |                |              |                           |                         |             |         |
|----------------------------------------------------------|------------------|----------------|--------------|---------------------------|-------------------------|-------------|---------|

| Losses relating to assets still held at year-end                | (9)            | —            | (20)        | (29)  |
| Balance at December 31, 2009                                    | 85             | 12           | 44          | 141   |
| Net transfers                                                   | —              | —            | (17)        | (17)  |
| Net dispositions                                                | (15)           | (1)          | (5)         | (21)  |
| Actual return on plan assets:                                   |                |              |             |       |
| Gains relating to assets sold during the year                   | 21             | —            | 1           | 22    |
| (Losses) gains relating to assets still held at year-end        | (14)           | —            | 2           | (12)  |
| Balance at December 31, 2010                                    | \$ 77          | \$11         | \$ 25       | \$113 |

Certain gains and losses are allocated between assets sold during the year and assets still held at year-end based on transactions and changes in valuations that occurred during the year. These allocations also impact our calculation of net acquisitions and dispositions.

For the year ended December 31, 2010, the investment program produced actual gains on pension and post-retirement plan assets of \$1.218 billion as compared to the expected returns of \$617 million for a difference of \$601 million. For the year ended December 31, 2009, the investment program produced actual gains on pension and post-retirement plan assets of \$934 million as compared to the expected returns of \$633 million for a difference of \$301 million. The short-term annual returns on plan assets will almost always be different from the expected long-term returns, and the plans could experience net gains or losses, due primarily to the volatility occurring in the financial markets during any given year.

## SUBSEQUENT EVENTS

### RECOGNITION AND MEASUREMENT

**1.151** The FASB ASC glossary defines *subsequent events* as events or transactions that occur subsequent to the balance sheet date but before financial statements are issued or available to be issued. The following are the two types of subsequent events: the first type existed at the balance sheet date and includes the estimates inherent in the process of preparing financial statements (recognized subsequent events); the second type did not exist at the balance sheet date but arose subsequent to that date (nonrecognized subsequent events). The first type of subsequent event should be recognized in the entity's financial statements. An entity that is either an SEC filer or a conduit bond obligor

for conduit debt securities that are traded in a public market must evaluate subsequent events through the date the financial statements are issued. The SEC has indicated that issuance of financial statements generally is the earlier of when the annual or quarterly financial statements are widely distributed to all shareholders and other financial statement users or filed with the SEC.

## DISCLOSURE

**1.152** Some nonrecognized subsequent events may be of such a nature that they must be disclosed in order to keep the financial statements from being misleading. In that case, the entity should disclose the nature of the event and estimate of its financial effect or a statement that such an estimate cannot be made. For entities that are not SEC filers, the date through which subsequent events have been evaluated and whether that date is when the financial statements were issued or available to be issued must be disclosed. An entity that is an SEC filer is not required to disclose the date through which subsequent events have been evaluated.

### 1.153

**TABLE 1-15: SUBSEQUENT EVENTS**

Table 1-15 lists the subsequent events disclosed in the financial statements of the survey entities.

|                                                                             | Number of Entities |      |      |
|-----------------------------------------------------------------------------|--------------------|------|------|
|                                                                             | 2010               | 2009 | 2008 |

\* N/C = Not compiled. Line item was not included in the table for the year shown.

## PRESENTATION AND DISCLOSURE EXCERPTS

### Periodic Fee Agreement

#### 1.154

#### BOYD GAMING CORPORATION (DEC)

#### NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

##### Note 22. Subsequent Events

We have evaluated all events or transactions that occurred after December 31, 2010. During this period, we had the following subsequent event, the effects of which did not require adjustment to our financial position or results of operations as of and for the year ended December 31, 2010.

##### Periodic Fee Agreement

On March 7, 2011, Echelon entered into the Periodic Fee Agreement with LVE. The Periodic Fee Agreement is effective from March 7, 2011 (the "Effective Date") until the earliest to occur of the following events (such earliest date, the "Termination Date"): (i) the date on which Echelon resumes construction of the Echelon resort and the parties agree to certain milestones with respect to the performance of the ESA; (ii) the date on which Echelon has purchased all or substantially all of the assets of LVE pursuant to the terms of the Purchase Option Agreement; and (iii) the date on which LVE draws down and receives the full amount available under the Letter of Credit (as defined below). On and after the Termination Date, the Periodic Fee Agreement shall be null and void and shall be deemed dissolved and of no effect, and the terms of the ESA shall be as they were prior to execution of the Periodic Fee Agreement.

The Periodic Fee Agreement provides for monthly payments by Echelon to LVE of approximately \$1.0 million (subject to a reduction for Echelon's allocable share of reduced interest costs attributed to Tax-Exempt Bonds (as defined below) LVE redeems in excess of \$27.0 million plus certain operation and maintenance fees (estimated by LVE not to exceed an aggregate of \$0.6 million annually) on March 4, 2011 and the first day of each month, beginning on April 1, 2011 and ending on November 1, 2013. Monthly payments are also due on the first day of each month after November 1, 2013; however, the amount of the payments after such date will be based on the then-outstanding principal amount of LVE's obligation to its Lenders, the Tax-Exempt Bonds and certain advances from its members.

The Periodic Fee Agreement also provides that from the Effective Date through the Termination Date, neither LVE nor Echelon would give notice of, file or otherwise initiate any claim or cause of action, in or before any court, administrative agency, arbitrator, mediator or other tribunal, that arises under the ESA, subject to certain exceptions, and any statute of limitations or limitation periods for defenses, claims, causes of actions and counterclaims shall be tolled during such period (the "No-Litigation Period").

To secure Echelon's obligations under the Periodic Fee Agreement, Echelon also agreed to post a letter of credit in the amount of \$6.0 million for the benefit of LVE (the "Letter of Credit"). LVE is entitled to draw down the Letter of Credit in the event that Echelon fails to make payments required pursuant to the Periodic Fee Agreement (a "Buyer Event of

Default"). LVE is obligated to reimburse Echelon for its reasonable substantiated third-party costs incurred in providing the Letter of Credit.

The Periodic Fee Agreement provides, among other things, for (i) LVE's maintenance of certain construction permits and certain assets; (ii) LVE's delivery of releases to Echelon from certain professional service contracts and its engagement of replacement professional service providers if the necessary releases are not obtained; (iii) LVE's delivery of recommendations to Echelon regarding certain aspects of the central energy center and energy distribution system at the Echelon resort (the "System"); (iv) the resolution of disputes between LVE and Echelon with respect to certain aspects of the System; (v) the possible sale of certain portions of the System; and (vi) LVE's agreement (subject to the consent of the applicable trustee) to use commercially reasonable efforts to redeem a portion of the tax-exempt bonds issued on behalf of LVE on December 20, 2007 (the "Tax-Exempt Bonds"), subject to certain exceptions.

#### *Purchase Option*

LVE also granted Echelon and the Company an option to purchase substantially all of the assets of LVE (the "Purchase Option") for a purchase price of approximately \$195.1 million (subject to certain adjustments), which may be exercised from the Effective Date through the Termination Date, provided that no Buyer Event of Default has occurred and remains ongoing.

#### *Future Commitments Related to LVE Agreements*

Our future commitments with respect to the LVE agreements discussed above are as follows (in thousands):

#### **For the Year Ending December 31**

|      |                |
|------|----------------|
| 2011 | \$11,887       |
| 2012 | 11,887         |
| 2013 | 11,796         |
| 2014 | 10,800         |
| 2015 | 10,800         |
|      | <hr/> \$57,170 |

## **Litigation**

### **1.155**

#### **CORN PRODUCTS INTERNATIONAL, INC. (DEC)**

#### *NOTES TO CONSOLIDATED FINANCIAL STATEMENTS*

##### *Note 13—Mexican Tax on Beverages Sweetened with HFCS*

On January 1, 2002, a discriminatory tax on beverages sweetened with high fructose corn syrup ("HFCS") approved by the Mexican Congress late in 2001, became effective. In response to the enactment of the tax, which at the time effectively ended the use of HFCS for beverages in Mexico, the Company ceased production of HFCS 55 at its San Juan del Rio plant, one of its three plants in Mexico. Over time, the Company resumed production and sales of HFCS and by 2006 had returned to levels attained prior to the imposition

of the tax as a result of certain customers having obtained court rulings exempting them from paying the tax. The Mexican Congress repealed this tax effective January 1, 2007.

On October 21, 2003, the Company submitted, on its own behalf and on behalf of its Mexican affiliate, CPIngridientes, S.A. de C.V. (previously known as Compania Proveedora de Ingredientes), a Request for Institution of Arbitration Proceedings Submitted Pursuant to Chapter 11 of the North American Free Trade Agreement ("NAFTA") (the "Request"). The Request was submitted to the Additional Office of the International Centre for Settlement of Investment Disputes and was brought against the United Mexican States. In the Request, the Company asserted that the imposition by Mexico of a discriminatory tax on beverages containing HFCS in force from 2002 through 2006 breached various obligations of Mexico under the investment protection provisions of NAFTA. The case was bifurcated into two phases, liability and damages, and a hearing on liability was held before a Tribunal in July 2006. In a Decision dated January 15, 2008, the Tribunal unanimously held that Mexico had violated NAFTA Article 1102, National Treatment, by treating beverages sweetened with HFCS produced by foreign companies differently than those sweetened with domestic sugar. In July 2008, a hearing regarding the quantum of damages was held before the same Tribunal. The Company sought damages and pre- and post-judgment interest totaling \$288 million through December 31, 2008.

In an award rendered August 18, 2009, the Tribunal awarded damages to CPIngridientes in the amount of \$58.4 million, as a result of the tax and certain out-of-pocket expenses incurred by CPIngridientes, together with accrued interest. On October 1, 2009, the Company submitted to the Tribunal a request for correction of this award to avoid effective double taxation on the amount of the award in Mexico.

On March 26, 2010, the Tribunal issued a correction of its August 18, 2009 damages award. While the amount of damages had not changed, the decision made the damages payable to Corn Products International, Inc. instead of CPIngridientes.

On January 24 and 25, 2011, the Company received cash payments totaling \$58.4 million from the Government of the United Mexican States pursuant to the corrected award. Mexico made these payments pursuant to an agreement with Corn Products International that provides for terminating pending post-award litigation and waiving post-award interest. The \$58.4 million award will be recorded in the Company's first quarter 2011 consolidated financial statements.

### **1.156**

#### **THE KROGER CO. (JAN)**

#### *NOTES TO CONSOLIDATED FINANCIAL STATEMENTS*

##### *17. Subsequent Events (in part)*

On March 9, 2010, the Company filed an action (The Kroger Co., et al. v. Excentus Corporation, Case No. 1:10-cv-00161-SSB, in the United States District Court for the Southern District of Ohio, Western Division at Cincinnati) seeking a declaration that the Company's actions related to fuel rewards programs do not infringe certain patents allegedly held by

Excentus Corporation and that certain patents allegedly held by Excentus Corporation are invalid. Shortly after the Company filed the action, on March 9, 2010, Excentus Corporation filed an action against the Company (Excentus Corporation v. The Kroger Co., Case No. 3:10-cv-00483, in the United States District Court for the Northern District of Texas, Dallas Division) seeking to recover damages from the Company for its alleged infringement of patents claimed to be held by Excentus Corporation, along with injunctive relief enjoining the Company from infringing the patents by reason of its actions related to fuel reward programs. Although these lawsuits are subject to uncertainties inherent in the litigation process and have only recently been filed, based on the information available to the Company, management does not expect that the ultimate resolution of these matters will have a material adverse effect on the Company's financial condition, results of operations, or cash flows.

## Spin-offs

### 1.157

#### ITT CORPORATION (DEC)

##### NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

###### Note 22—Subsequent Events

On January 12, 2011, the Company announced that its Board of Directors had unanimously approved a plan to separate the Company's businesses into three distinct, publicly traded companies. Following completion of the transaction, ITT will continue to trade on the New York Stock Exchange as an industrial company that supplies highly engineered solutions in the aerospace, transportation, energy and industrial markets. Under the plan, ITT shareholders will own shares in all three corporations following the completion of the transaction. The transaction is anticipated to be completed by the end of 2011.

Under the plan, ITT would execute tax-free spinoffs to shareholders of its water-related businesses and its Defense & Information Solutions segment. The water-related business will include the Water & Wastewater division and the Residential & Commercial Water division, as well as the Flow Control division that is currently reported within the Motion & Flow Control segment. The Industrial Process division, which is currently reported within the Fluid segment, will continue to operate as a subsidiary of the new ITT Corporation.

### 1.158

#### MARRIOTT INTERNATIONAL, INC. (DEC)

##### NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

###### 24. Subsequent Event

On February 14, 2011, we announced a plan to split the company's businesses into two separate, publicly traded compa-

nies. Under the plan, we expect to spin off our timeshare operations and development business as a new independent company through a special tax-free dividend to our shareholders in late 2011. The new company will focus on the timeshare business as the exclusive developer and operator of timeshare, fractional, and related products under the Marriott brand and the exclusive developer of fractional and related products under the Ritz-Carlton brand. After the split, we will concentrate on the lodging management and franchise business. We will receive franchise fees from the new timeshare company's use of the Marriott timeshare and Ritz-Carlton fractional brands.

As two separate public companies, Marriott and the new timeshare company will have separate boards of directors. William J. Shaw, who recently announced his retirement as vice chairman of Marriott and also resigned from its board, will become chairman of the board of the new timeshare company and Deborah Marriott Harrison, senior vice president of government affairs for Marriott, will serve as a board member of the new timeshare company. J.W. Marriott, Jr. will remain chairman of the board and chief executive officer of Marriott. Stephen P. Weisz, president of Marriott's timeshare business since 1997 and a 39-year Marriott veteran, will become chief executive officer of the new company. We expect that the common stock of the new timeshare company will be listed on the New York Stock Exchange. We do not expect that the new timeshare company will pay a quarterly cash dividend or be investment grade in the near term.

We expect that the new timeshare company will file a Form 10 registration statement with the SEC in the second quarter 2011. At that time, we will disclose additional details about the proposed transaction, including respective pro forma balance sheets and pro forma income statements of the two companies. The transaction is subject to the receipt of normal and customary regulatory approvals and third-party consents, the execution of inter-company agreements, receipt of a favorable ruling from the Internal Revenue Service, arrangement of adequate financing facilities, final approval by our board of directors, and other related matters. The transaction will not require shareholder approval and will have no impact on Marriott's contractual obligations to the existing securitizations. Subject to the completion of this ongoing work, and the receipt of regulatory approvals, the spin-off should be completed before year end 2011.

## Restructuring

### 1.159

#### KIMBERLY-CLARK CORPORATION (DEC)

##### NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

###### Note 19. Subsequent Events

On January 21, 2011, we initiated a pulp and tissue restructuring plan in order to exit our remaining integrated pulp manufacturing operations and improve the underlying profitability and return on invested capital of our consumer tissue and K-C Professional businesses. The restructuring is expected to be completed by the end of 2012 and will involve the streamlining, sale or closure of 5 to 6 of our manufacturing facilities

around the world. In conjunction with these actions, we will be exiting certain non-strategic products, primarily non-branded offerings, and transferring some production to lower-cost facilities in order to improve overall profitability and returns. Facilities that will be impacted by the restructuring include our pulp and tissue facility in Everett, Washington and the two facilities in Australia that manufacture pulp and tissue.

The restructuring plan will commence in the first quarter of 2011 and is expected to be completed by December 31, 2012. The restructuring is expected to result in cumulative charges of approximately \$400 million to \$600 million before tax (\$280 million to \$420 million after tax) over that period. We anticipate that the charges will fall into the following categories and approximate dollar ranges: workforce reduction costs (\$50 million to \$100 million); incremental depreciation (\$300 million to \$400 million); and other associated costs (\$50 million to \$100 million). Cash costs related to the streamlining of operations, sale or closure, relocation of equipment, severance and other expenses are expected to account for approximately 25 percent to 50 percent of the charges. Noncash charges will consist primarily of incremental depreciation.

As a result of the restructuring, we expect that by 2013 annual net sales will be reduced by \$250 million to \$300 million and operating profit will increase by at least \$75 million. Most of the restructuring will impact the consumer tissue business segment.

## Assets Held for Sale

### 1.160

REYNOLDS AMERICAN INC. (DEC)

#### NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

##### Note 3—Intangible Assets (in part)

During the fourth quarter of 2010, in order to facilitate its strategic focus on key brands in the cigarette, moist-snuff and modern smoke-free categories of the tobacco business, RAI determined that it was probable that it would dispose of the operations of Lane, which are included in the American Snuff segment. In accordance with accounting guidance, the assets of the disposal group were reclassified as assets held for sale, and liabilities held for sale were included in other current liabilities, in the consolidated balance sheet at December 31, 2010. See note 23 for additional information on the sale of Lane.

##### Note 23—Subsequent Event

On January 13, 2011, RAI reached an agreement to sell all the capital stock of Lane and certain other assets related to the Lane operations, to an affiliate of Scandinavian Tobacco Group A/S for approximately \$200 million in cash. The transaction is expected to be completed in the first half of 2011, pending antitrust review and approval.

In accordance with accounting guidance, the assets of the disposal group were reclassified as assets held for sale, and liabilities held for sale that were included in other current liabilities, in the consolidated balance sheet at December 31,

2010. For further information related to goodwill and other intangible assets reclassified as held for sale, see note 3.

## Purchase and Sale Agreement

### 1.161

IRON MOUNTAIN INCORPORATED (DEC)

#### NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

##### 15. Subsequent Events (in part; in thousands)

In January 2011, we acquired the remaining 80% interest of our joint venture in Poland (Iron Mountain Poland Holdings Limited) in a stock transaction for an estimated purchase price of \$69,500, including an initial cash purchase price of \$35,000. As a result, we now own 100% of our Polish operations, which provide storage and records management services. The terms of the purchase and sale agreement requires a second payment based upon the audited financial results of the joint venture for the period April 1, 2010 through March 31, 2011. This payment is based upon a formula defined in the purchase and sale agreement and is expected to be paid in the second quarter of 2011. Our current estimate of the second payment is approximately \$32,000. Additionally, the purchase and sale agreement provides for the payment of up to a maximum of \$2,500 of contingent consideration to be paid in July 2012 based upon meeting certain performance criteria. The carrying value of the 20% interest that we owned and accounted for under the equity method of accounting amounted to approximately \$5,500 as of December 31, 2010. We will calculate the fair value of such interest on the date of the acquisition of the additional 80% interest and will record a gain during the first quarter of 2011 to other (income) expense, net included in the consolidated statement of operations. One of the members of our board of directors and several of his family members hold an indirect equity interest in one of the shareholders that will receive proceeds in connection with this transaction. As a result of this equity interest, our board member together with several of his family members will receive approximately 24% of the purchase price that we pay in connection with this transaction.

## Business Combinations

### 1.162

COMCAST CORPORATION (DEC)

#### NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

##### Note 21. Subsequent Events

##### NBCUniversal Transaction

On January 28, 2011, we closed our transaction with GE to form a new company named NBCUniversal, LLC ("NBCUniversal Holdings"). We now control and own 51% of NBCUniversal Holdings and GE owns the remaining 49%. As part

of the NBCUniversal transaction, GE contributed the historical businesses of NBC Universal, which is now a wholly owned subsidiary of NBCUniversal Holdings. The NBCUniversal contributed businesses include its national cable programming networks, the NBC network and its owned NBC affiliated local television stations, the Telemundo network and its owned Telemundo affiliated local television stations, Universal Pictures filmed entertainment, the Universal Studios Hollywood theme park and other related assets. We contributed our national cable programming networks, our regional sports and news networks, certain of our Internet businesses, including DailyCandy and Fandango, and other related assets ("Comcast Content Business"). In addition to contributing the Comcast Content Business, we also made a cash payment of \$6.2 billion at the closing. The cash paid will be adjusted subsequent to close to reflect final balances of certain working capital accounts and other closing adjustments. The transaction also calls for the payment to GE, in the future, of certain tax benefits to the extent realized. The combination of businesses creates a leading media and entertainment company capable of providing entertainment, news, sports and other content to a global audience across all platforms.

In connection with the NBCUniversal transaction, NBCUniversal issued \$9.1 billion of senior debt securities with maturities ranging from 2014 to 2041 and repaid approximately \$1.7 billion of existing debt during 2010. Immediately prior to the closing, NBCUniversal distributed approximately \$7.4 billion to GE.

Under the terms of the operating agreement of NBCUniversal Holdings, during the six month period beginning on July 28, 2014 GE has the right to cause NBCUniversal Holdings to redeem half of GE's interest in NBCUniversal Holdings, and during the six month period beginning January 28, 2018, GE has the right to cause NBCUniversal Holdings to redeem GE's remaining interest, if any. If GE exercises its first redemption right, we have the immediate right to purchase the remainder of GE's interest. If GE does not exercise its first redemption right, during the six month period beginning on January 28, 2016, we have the right to purchase half of GE's interest in NBCUniversal Holdings. During the six month period beginning January 28, 2019, we have the right to purchase GE's remaining interest, if any, in NBCUniversal Holdings. The purchase price to be paid in connection with any purchase described in this paragraph will be equal to the ownership percentage being purchased multiplied by an amount equal to 120% of the fully distributed public market trading value of NBCUniversal Holdings (determined pursuant to an appraisal process if NBCUniversal Holdings is not then publicly traded), less 50% of an amount (not less than zero) equal to the excess of 120% of the fully distributed public market trading value over \$28.4 billion. Subject to various limitations, we are committed to fund up to \$2.875 billion in cash or our common stock for each of the two redemptions (up to an aggregate of \$5.75 billion), with amounts not used in the first redemption to be available for the second redemption to the extent NBCUniversal Holdings cannot fund the redemptions.

Until July 28, 2014, GE may not directly or indirectly transfer its interest in NBCUniversal Holdings. Thereafter, GE may transfer its interest to a third party, subject to our right of first offer. The right of first offer would permit us to purchase all, but not less than all, of the interests proposed to be transferred. In the event that GE makes a registration request in accordance with certain registration rights that are granted to it under the agreement, we will have the right to purchase,

for cash at the market value (determined pursuant to an appraisal process if NBCUniversal Holdings is not then publicly traded), all of GE's interest in NBCUniversal Holdings that GE is seeking to register.

As a result of the NBCUniversal transaction, beginning in 2011 we expect to present five reportable segments, Cable Distribution (currently presented in our Cable segment), Cable Networks, Broadcast Networks, Filmed Entertainment and Theme Parks. Our Programming segment, our regional sports and news networks (currently presented in our Cable segment) and our contributed Comcast Interactive Media businesses (currently presented in Corporate and Other) will be presented with NBCUniversal's businesses in the new segments. The businesses of Comcast Interactive Media that were not contributed to NBCUniversal will be included in the Cable Distribution segment.

#### *Acquisition-Related Expenses*

In connection with the NBCUniversal transaction, we have incurred incremental expenses related to legal, accounting and valuation services, which are reflected in operating, selling, general and administrative expenses. We also incurred certain financing costs and other shared costs with GE associated with debt facilities that were entered into in December 2009 and with the issuance of NBCUniversal's senior notes in 2010, which are reflected in other income (expense) and interest expense. The table below presents the amounts related to these expenses included in our consolidated statement of operations.

#### **Year Ended December 31, 2010 (In millions)**

|                                                         |       |
|---------------------------------------------------------|-------|
| Operating, selling, general and administrative expenses | \$ 80 |
| Other expense                                           | \$129 |
| Interest expense                                        | \$ 7  |

Additional fees paid in connection with the closing of the transaction will be recorded as expenses in the first quarter of 2011.

#### **Preliminary Purchase Price Allocation and Unaudited Pro Forma Information**

Since we now control NBCUniversal Holdings, we will apply acquisition accounting to the NBCUniversal contributed businesses and their results of operations will be included in our consolidated results of operations following the acquisition date. The NBCUniversal contributed businesses will be recorded at their estimated fair value. The Comcast Content Business will continue at its historical or carry-over basis. GE's interest in NBCUniversal Holdings will be recorded as a redeemable noncontrolling interest in our consolidated financial statements due to the redemption provisions outlined above.

Due to the limited time since the acquisition date and limitations on access to NBCUniversal information prior to the acquisition date, the initial accounting for the business combination is incomplete at this time. As a result, we are unable to provide amounts recognized as of the acquisition date for major classes of assets and liabilities acquired and resulting from the transaction, including the information required for indemnification assets, contingencies, noncontrolling interests and goodwill. Also, because the initial accounting for the transaction is incomplete, we are unable to provide the supplemental pro forma revenue and earnings of the combined

entity. We will include this information in our Quarterly Report on Form 10-Q for the three months ended March 31, 2011.

## Merger Agreements

### 1.163

ROBBINS & MYERS, INC. (AUG)

#### NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

##### *Note 14—Subsequent Events*

On October 6, 2010, Robbins & Myers, Inc. ("R&M"), Triple Merger I, Inc., a Delaware corporation and a wholly-owned subsidiary of R&M ("Merger Sub I"), Triple Merger II, Inc., a Delaware corporation and a wholly-owned subsidiary of R&M ("Merger Sub II"), and T-3 Energy Services, Inc., a Delaware corporation ("T-3"), (NASDAQ: TTES), entered into an Agreement and Plan of Merger (the "Merger Agreement"). The Merger Agreement provides that, upon the terms and subject to the conditions set forth in the Merger Agreement, Merger Sub I will merge with and into T-3, with T-3 surviving as a wholly-owned subsidiary of R&M (the "Merger"). The Merger Agreement and the Merger have been unanimously approved by the Boards of Directors of both R&M and T-3.

T-3, located in Houston, Texas, provides oilfield and pipeline products and services and will operate under our Fluid Management segment. Under the Merger Agreement, T-3 stockholders will receive 0.894 common shares of R&M, without par value, plus \$7.95 in cash, without interest, for each share of common stock of T-3, par value \$0.001 per share, in a transaction valued at approximately \$422 million as of the date of the announcement. Accordingly, T-3 stockholders are estimated to receive an aggregate of approximately 12 million of our common shares and \$106 million in cash. Upon completion of the Merger Agreement, we expect T-3 stockholders to own approximately 27% of our outstanding common shares.

The exchange ratio is fixed and will not be adjusted in the event of any change in the price of R&M common shares or T-3 common stock between the date of the Merger Agreement and the closing. Because the exchange ratio is fixed, the value of the consideration paid for each share of T-3 common stock will vary based upon any changes in the market value of common shares of R&M. Changes in the market value of shares of T-3 common stock will have no effect upon the value of the consideration paid for each share of T-3 common stock.

Completion of the Merger is conditioned upon: (1) approval by R&M shareholders and T-3 stockholders; (2) the absence of any law or order prohibiting the closing; (3) regulatory approvals, including expiration or early termination of the applicable waiting period under the Hart-Scott Rodino Antitrust Improvements Act of 1976; (4) subject to certain exceptions, the accuracy of representations and warranties and the performance of covenants; (5) the effectiveness of a registration statement on Form S-4 that will be filed by R&M for the issuance of its common shares in the Merger and the authorization of the listing of those shares on the NYSE; (6) the delivery of customary opinions from counsel to Robbins & Myers and T-3 that the Merger will qualify as a tax-free re-

organization for U.S. federal income tax purposes; and (7) other closing conditions set forth in the Merger Agreement.

Annual revenues of T-3 for the years ended December 31, 2009 and 2008 were approximately \$218 million and \$285 million, respectively. Total assets of T-3 for the years ended December 31, 2009 and 2008 were approximately \$280 million and \$287 million, respectively.

### 1.164

SMURFIT-STONE CONTAINER CORPORATION  
(DEC)

#### NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

##### *26. Subsequent Events*

On January 23, 2011, the Company and Rock-Tenn entered into the Merger Agreement pursuant to which the Company will merge with and into a subsidiary of Rock-Tenn (the "Merger"). This Merger, unanimously approved by the Boards of Directors of both companies, will create a leader in the North American paperboard packaging market with combined revenues of approximately \$9 billion.

For each share of the Company's common stock, the Company's stockholders will be entitled to receive 0.30605 shares of Rock-Tenn common stock and \$17.50 in cash, representing 50% cash and 50% stock on the date of the signing of the Merger Agreement. On January 23, 2011, the equity consideration was \$35 per the Company's common share or approximately \$3.5 billion, consisting of approximately \$1.8 billion of cash and the issuance of approximately 30.9 million shares of Rock-Tenn common stock. In addition, Rock-Tenn will assume the Company's liabilities, including debt and underfunded pension liabilities, which were \$1,194 million and \$1,145 million, respectively, at December 31, 2010. Following the acquisition, Rock-Tenn stockholders will own approximately 56% and the Company's stockholders will own 44% of the combined company.

The transaction is expected to close in the second quarter of 2011 and is subject to customary closing conditions, regulatory approvals, as well as approval by both Rock-Tenn and the Company's stockholders.

## Defined Benefit Plan

### 1.165

THE MCCLATCHY COMPANY (DEC)

#### NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

##### *Note 13. Subsequent Events (in part)*

*Contribution of Real Property to Qualified Defined Benefit Plan:* On January 14, 2011, the Company contributed company-owned real property from seven locations to its qualified defined benefit pension plan. The pension plan obtained independent appraisals of the property, and based

on these appraisals the plan recorded the contribution (the fair value of the property) at \$49.6 million on January 14, 2011.

The Company has entered into leases for the contributed properties for 10 years at an annual rent of approximately \$4.0 million and expects to continue to use the properties in its newspaper operations at the seven locations. The properties will be managed on behalf of the pension plan by an independent fiduciary, and the terms of the leases were negotiated with the fiduciary.

McClatchy expects its required pension contribution under the Employee Retirement Income Security Act to be approximately \$51.2 million in 2011, and the contribution of real property is expected to satisfy virtually all of the Company's required pension contribution for fiscal 2011. The remaining required contribution, if any, will be made in cash.

The contribution and leaseback of the properties were treated as a financing transaction and accordingly, the Company will continue to depreciate the carrying value of the properties in its financial statements and no gain or loss is recognized. The \$49.6 million will be recorded in other long-term obligations and will be reduced by a portion of lease payments made to the pension plan. The transaction will be recorded in the first fiscal quarter of 2011 and therefore the funded status of the Company's qualified pension plan disclosed in Note 7 and elsewhere in these financial statements does not reflect this transaction.

## Taxable Investment Incentives

### 1.166

FIRST SOLAR, INC. (DEC)

#### NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

##### Note 25. Subsequent Events (in part)

On February 11, 2011 we were approved to receive taxable investment incentives ("Investitionszuschüsse") of approximately €6.3 million (\$8.4 million at the balance sheet close rate on December 31, 2010 of \$1.33 /€1.00) from the State of Brandenburg, Germany. These funds will reimburse us for certain costs incurred building our expansion of our manufacturing plant in Frankfurt/Oder, Germany, including costs for the construction of buildings and the purchase of machinery and equipment. Receipt of these incentives is conditional upon the State of Brandenburg having sufficient funds allocated to this program to pay the reimbursements we claim. In addition, we are required to operate our facility for a minimum of five years. Our incentive approval expires on December 31, 2012.

## Acquisition

### 1.167

NETAPP, INC. (APR)

#### NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

##### 20. Subsequent Event

On May 13, 2010, we completed the acquisition of Bycast Inc., a privately held company headquartered in Vancouver, British Columbia, Canada, for approximately \$80 million in cash. This acquisition will extend our leadership position in unified storage by adding an object-based storage software offering which simplifies the task of large-scale object storage while improving the ability to quickly search and locate data objects. As of April 30, 2010, we had incurred \$1.2 million in related expenses which is included in acquisition related income, net in our consolidated statements of operations.

## Interest Rate Swap Agreement

### 1.168

TENET HEALTHCARE CORPORATION (DEC)

#### NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

##### Note 22. Subsequent Events (in part)

##### Interest Rate Swap Agreement

In February 2011, we entered into an interest rate swap agreement for an aggregate notional amount of \$600 million. The interest rate swap agreement has been designated as a fair value hedge and will be used to manage our exposure to future changes in interest rates. It has the effect of converting our 10% senior secured notes due 2018 from a fixed interest rate paid semi-annually to a variable interest rate paid semi-annually based on the one-month LIBOR plus a floating rate spread of approximately 6.60%. During the term of the interest rate swap agreement, changes in the fair value of the interest rate swap agreement and changes in the fair value of the 10% senior secured notes, which we anticipate should substantially offset each other, will be recorded in interest expense.

## Research and Development

1.169

PFIZER INC. (DEC)

### NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

#### 21. Subsequent Events (in part)

##### B. New Research and Development Productivity Initiative

On February 1, 2011, we announced that we are continuing to closely evaluate our global research and development function and will accelerate our current strategies to improve innovation and overall productivity by prioritizing areas with the greatest scientific and commercial promise, utilizing appropriate risk/return profiles and focusing on areas with the highest potential to deliver value in the near term and over time. In connection with these actions:

- We estimate that we will incur pre-tax employee-termination charges in the range of approximately \$800 million to \$1.1 billion and other pre-tax exit and implementation charges in the range of approximately \$300 million to \$500 million, all of which will result in future cash expenditures. We expect most of these charges to be incurred in 2011 and the balance to be incurred in 2012.
- We estimate that we will incur total pre-tax impairment and additional depreciation—asset restructuring charges in the range of approximately \$1.1 billion to \$1.3 billion, of which approximately \$800 million to \$900 million represent additional depreciation—asset restructuring charges. Most of these charges will be associated with our Sandwich, U.K. facility. We expect most of these non-cash charges to be incurred in 2011 and the balance to be incurred in 2012.

## RELATED PARTY TRANSACTIONS

### DISCLOSURE

**1.170** FASB ASC 850, *Related Party Disclosures*, specifies the nature of information that should be disclosed in financial statements about related-party transactions and certain common control relationships. Financial statements should include disclosures of material related-party transactions, other than compensation arrangements, expense allowances, and other similar items in the ordinary course of business. The disclosures should include the nature of the relationship(s) involved, a description of the transactions, the dollar amounts of the transactions, and amounts due to or from related parties. For entities with separately-issued financial statements that are members of a consolidated tax return, additional disclosures are required. Further, if the reporting entity and one or more other companies are under common ownership or management control, and the existence of that control could result in operating results or a financial position of the reporting entity significantly different from those that would have been obtained if the companies were autonomous, the nature of the control relationship should be disclosed, even though there are no transactions between the entities.

## PRESENTATION AND DISCLOSURE EXCERPTS

### Related Party Receivables

1.171

CBS CORPORATION (DEC)

### NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

#### 6) Related Parties

*National Amusements, Inc.* National Amusements, Inc. ("NAI") is the controlling stockholder of CBS Corp. Mr. Sumner M. Redstone, the controlling stockholder, chairman of the board of directors and chief executive officer of NAI, is the Executive Chairman of the Board of Directors and founder of both CBS Corp. and Viacom Inc. In addition, Ms. Shari Redstone, Mr. Sumner M. Redstone's daughter, is the president and a director of NAI and the vice chair of the board of directors of both CBS Corp. and Viacom Inc. Mr. David R. Andelman is a director of CBS Corp. and serves as a director of NAI. Mr. Frederic V. Salerno is a director of CBS Corp. and serves as a director of Viacom Inc. At December 31, 2010, NAI directly or indirectly owned approximately 79% of CBS Corp.'s voting Class A Common Stock and owned approximately 6% of CBS Corp.'s Class A Common Stock and non-voting Class B Common Stock on a combined basis.

*Viacom Inc.* CBS Corp., as part of its normal course of business, enters into transactions with Viacom Inc. and its subsidiaries. CBS Corp., through its Entertainment segment, licenses its television products to Viacom Inc., primarily MTV Networks and BET Networks. In addition, CBS Corp. recognizes advertising revenues for media spending placed by various subsidiaries of Viacom Inc., primarily Paramount Pictures. Paramount Pictures also distributes certain of the Company's television products in the home entertainment market. CBS Corp.'s total revenues from these transactions were \$262.4 million, \$243.3 million and \$448.8 million for the years ended December 31, 2010, 2009 and 2008, respectively.

Showtime Networks licenses motion picture programming from Paramount Pictures under an exclusive output agreement which covered feature films initially theatrically released in the U.S. through 2007. Showtime Networks has exhibition rights to each film licensed under this agreement during three pay television exhibition windows over the course of several years after each such film's initial theatrical release. This agreement has not been renewed for new feature films initially theatrically released in the U.S. after 2007. In addition, CBS Corp. places advertisements with and purchases other goods and services from various subsidiaries of Viacom Inc. The total amounts purchased in connection with these transactions were \$26.9 million, \$23.0 million and \$93.4 million for the years ended December 31, 2010, 2009 and 2008, respectively.

The following table presents the amounts due from or due to Viacom Inc. in the normal course of business as reflected on CBS Corp.'s Consolidated Balance Sheets.

| (In millions)                                  | At December 31 |         |
|------------------------------------------------|----------------|---------|

| Accounts payable                               | \$ 5.6         | \$ 2.8  |
| Program rights                                 | 4.1            | 18.4    |
| Other liabilities (Program rights, noncurrent) | .5             | 3.8     |
| Total amounts due to Viacom Inc.               | \$ 10.2        | \$ 25.0 |

**Other Related Parties**—The Company owns 50% of The CW, a television broadcast network, which is accounted for by the Company as an equity investment. CBS Corp. earns revenues from The CW, primarily from the licensing of the Company's television programming. Total revenues from The CW were \$136.1 million, \$130.5 million and \$121.9 million for the years ended December 31, 2010, 2009 and 2008, respectively.

The Company, through the normal course of business, is involved in transactions with other related parties that have not been material in any of the periods presented.

## Merger Agreement and Exchange Agreement

### 1.172

#### SPECTRUM BRANDS HOLDINGS, INC. (SEP)

#### NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

#### (13) Related Party Transactions (in part; in thousands)

##### Merger Agreement and Exchange Agreement

On June 16, 2010 (the "Closing Date"), SB Holdings completed a business combination transaction pursuant to the Agreement and Plan of Merger (the "Mergers"), dated as of February 9, 2010, as amended on March 1, 2010, March 26, 2010 and April 30, 2010, by and among SB Holdings, Russell Hobbs, Spectrum Brands, Battery Merger Corp., and Grill Merger Corp. (the "Merger Agreement"). As a result of the Mergers, each of Spectrum Brands and Russell Hobbs became a wholly-owned subsidiary of SB Holdings. At the effective time of the Mergers, (i) the outstanding shares of Spectrum Brands common stock were canceled and converted into the right to receive shares of SB Holdings common stock, and (ii) the outstanding shares of Russell Hobbs common stock and preferred stock were canceled and converted into the right to receive shares of SB Holdings common stock.

Pursuant to the terms of the Merger Agreement, on February 9, 2010, Spectrum Brands entered into support agreements with Harbinger Capital Partners Master Fund I, Ltd. ("Harbinger Master Fund"), Harbinger Capital Partners Special Situations Fund, L.P. and Global Opportunities Break-

away Ltd. (collectively, the "Harbinger Parties") and Avenue International Master, L.P. and certain of its affiliates (the "Avenue Parties"), in which the Harbinger Parties and the Avenue Parties agreed to vote their shares of Spectrum Brands common stock acquired before the date of the Merger Agreement in favor of the Mergers and against any alternative proposal that would impede the Mergers.

Immediately following the consummation of the Mergers, the Harbinger Parties owned approximately 64% of the outstanding SB Holdings common stock and the stockholders of Spectrum Brands (other than the Harbinger Parties) owned approximately 36% of the outstanding SB Holdings common stock. Harbinger Group, Inc. ("HRG") and the Harbinger Parties are parties to a Contribution and Exchange Agreement (the "Exchange Agreement"), pursuant to the terms of which the Harbinger Parties will contribute 27,757 shares of SB Holdings common stock to HRG and received in exchange for such shares an aggregate of 119,910 shares of HRG common stock (the "Share Exchange"). Immediately following the consummation of the Share Exchange, (i) HRG will own 27,757 shares of SB Holdings common stock and the Harbinger Parties will own 6,500 shares of SB Holdings common stock, approximately 54.4% and 12.7% of the outstanding shares of SB Holdings common stock, respectively, and (ii) the Harbinger Parties will own 129,860 shares of HRG common stock, or approximately 93.3% of the outstanding HRG common stock.

In connection with the Mergers, the Harbinger Parties and SB Holdings entered into a stockholder agreement, dated February 9, 2010 (the "Stockholder Agreement"), which provides for certain protective provisions in favor of minority stockholders and provides certain rights and imposes certain obligations on the Harbinger Parties, including:

- For so long as the Harbinger Parties own 40% or more of the outstanding voting securities of SB Holdings, the Harbinger Parties and HRG will vote their shares of SB Holdings common stock to effect the structure of the SB Holdings board of directors as described in the Stockholder Agreement;
- The Harbinger Parties will not effect any transfer of equity securities of SB Holdings to any person that would result in such person and its affiliates owning 40% or more of the outstanding voting securities of SB Holdings, unless specified conditions are met; and
- The Harbinger Parties will be granted certain access and informational rights with respect to SB Holdings and its subsidiaries.

On September 10, 2010, the Harbinger Parties and HRG entered into a joinder to the Stockholder Agreement, pursuant to which, effective upon the consummation of the Share Exchange, HRG will become a party to the Stockholder Agreement, subject to all of the covenants, terms and conditions of the Stockholder Agreement to the same extent as the Harbinger Parties were bound thereunder prior to giving effect to the Share Exchange.

Certain provisions of the Stockholder Agreement terminate on the date on which the Harbinger Parties or HRG no longer constitutes a Significant Stockholder (as defined in the Stockholder Agreement). The Stockholder Agreement terminates when any person (including the Harbinger Parties or HRG) acquires 90% or more of the outstanding voting securities of SB Holdings.

Also in connection with the Mergers, the Harbinger Parties, the Avenue Parties and SB Holdings entered into a registration rights agreement, dated as of February 9, 2010 (the "SB

Holdings Registration Rights Agreement”), pursuant to which the Harbinger Parties and the Avenue Parties have, among other things and subject to the terms and conditions set forth therein, certain demand and so-called “piggy back” registration rights with respect to their shares of SB Holdings common stock. On September 10, 2010, the Harbinger Parties and HRG entered into a joinder to the SB Holdings Registration Rights Agreement, pursuant to which, effective upon the consummation of the Share Exchange, HRG will become a party to the SB Holdings Registration Rights Agreement, entitled to the rights and subject to the obligations of a holder thereunder.

### (15) Acquisition

On June 16, 2010, the Company merged with Russell Hobbs. Headquartered in Miramar, Florida, Russell Hobbs is a designer, marketer and distributor of a broad range of branded small household appliances. Russell Hobbs markets and distributes small kitchen and home appliances, pet and pest products and personal care products. Russell Hobbs has a broad portfolio of recognized brand names, including Black & Decker, George Foreman, Russell Hobbs, Toastmaster, Litter-Maid, Farberware, Breadman and Juiceman. Russell Hobbs’ customers include mass merchandisers, specialty retailers and appliance distributors primarily in North America, South America, Europe and Australia.

The results of Russell Hobbs operations since June 16, 2010 are included in the Company’s Consolidated Statements of Operations. The financial results of Russell Hobbs are reported as a separate business segment, Small Appliances. Russell Hobbs contributed \$237,576 in Net sales, and recorded Operating loss of \$320 for the period from June 16, 2010 through the period ended September 30, 2010, which includes \$13,400 of Acquisition and integration related charges.

In accordance with ASC Topic 805, “*Business Combinations*” (“ASC 805”), the Company accounted for the Merger by applying the acquisition method of accounting. The acquisition method of accounting requires that the consideration transferred in a business combination be measured at fair value as of the closing date of the acquisition. After consummation of the Merger, the stockholders of Spectrum Brands, inclusive of Harbinger, own approximately 60% of SB Holdings and the stockholders of Russell Hobbs own approximately 40% of SB Holdings. Inasmuch as Russell Hobbs is a private company and its common stock was not publicly traded, the closing market price of the Spectrum Brands common stock at June 15, 2010 was used to calculate the purchase price. The total purchase price of Russell Hobbs was approximately \$597,579 determined as follows (in thousands, except per share data):

|                                                                         |                  |
|-------------------------------------------------------------------------|------------------|
| Spectrum Brands closing price per share on June 15, 2010                | \$ 28.15         |
| Purchase price—Russell Hobbs allocation—20,704 shares <sup>(1)(2)</sup> | \$575,203        |
| Cash payment to pay off Russell Hobbs’ North American credit facility   | 22,376           |
| <b>Total purchase price of Russell Hobbs</b>                            | <b>\$597,579</b> |

<sup>(1)</sup> Number of shares calculated based upon conversion formula, as defined in the Merger Agreement, using balances as of June 16, 2010.

<sup>(2)</sup> The fair value of 271 shares of unvested restricted stock units as they relate to post combination services will be recorded as operating expense over the remaining service period and were assumed to have no fair value for the purchase price.

### Preliminary Purchase Price Allocation

The total purchase price for Russell Hobbs was allocated to the preliminary net tangible and intangible assets based upon their preliminary fair values at June 16, 2010 as set forth below. The excess of the purchase price over the preliminary net tangible assets and intangible assets was recorded as goodwill. The preliminary allocation of the purchase price was based upon a valuation for which the estimates and assumptions are subject to change within the measurement period (up to one year from the acquisition date). The primary areas of the preliminary purchase price allocation that are not yet finalized relate to the certain legal matters, amounts for income taxes including deferred tax accounts, amounts for uncertain tax positions, and net operating loss carryforwards inclusive of associated limitations, and the final allocation of goodwill. The Company expects to continue to obtain information to assist it in determining the fair values of the net assets acquired at the acquisition date during the measurement period. The preliminary purchase price allocation for Russell Hobbs is as follows (in thousands):

|                                  |                  |
|----------------------------------|------------------|
| Current assets                   | \$307,809        |
| Property, plant and equipment    | 15,150           |
| Intangible assets                | 363,327          |
| Goodwill <sup>(A)</sup>          | 120,079          |
| Other assets                     | 15,752           |
| <b>Total assets acquired</b>     | <b>\$822,117</b> |
| Current liabilities              | 142,046          |
| Total debt                       | 18,970           |
| Long-term liabilities            | 63,522           |
| <b>Total liabilities assumed</b> | <b>\$224,538</b> |
| <b>Net assets acquired</b>       | <b>\$597,579</b> |

<sup>(A)</sup> Consists of \$25,426 of tax deductible Goodwill.

### Preliminary Pre-Acquisition Contingencies Assumed

The Company has evaluated and continues to evaluate pre-acquisition contingencies relating to Russell Hobbs that existed as of the acquisition date. Based on the evaluation to date, the Company has preliminarily determined that certain pre-acquisition contingencies are probable in nature and estimable as of the acquisition date. Accordingly, the Company has preliminarily recorded its best estimates for these contingencies as part of the preliminary purchase price allocation for Russell Hobbs. The Company continues to gather information relating to all pre-acquisition contingencies that it has assumed from Russell Hobbs. Any changes to the pre-acquisition contingency amounts recorded during the measurement period will be included in the purchase price allocation. Subsequent to the end of the measurement period any adjustments to pre-acquisition contingency amounts will be reflected in the Company’s results of operations.

Certain estimated values are not yet finalized and are subject to change, which could be significant. The Company will finalize the amounts recognized as it obtains the information necessary to complete its analysis during the measurement period. The following items are provisional and subject to change:

- Amounts for legal contingencies, pending the finalization of the Company’s examination and evaluation of the portfolio of filed cases;

- Amounts for income taxes including deferred tax accounts, amounts for uncertain tax positions, and net operating loss carryforwards inclusive of associated limitations; and
- The final allocation of Goodwill.

ASC 805 requires, among other things, that assets acquired and liabilities assumed be recognized at their fair values as of the acquisition date. Accordingly, the Company performed a preliminary valuation of the assets and liabilities of Russell Hobbs at June 16, 2010. Significant adjustments as a result of that preliminary valuation are summarized as follows:

- Inventories—An adjustment of \$1,721 was recorded to adjust inventory to fair value. Finished goods were valued at estimated selling prices less the sum of costs of disposal and a reasonable profit allowance for the selling effort.
- Deferred tax liabilities, net—An adjustment of \$43,086 was recorded to adjust deferred taxes for the preliminary fair value allocations.
- Property, plant and equipment, net—An adjustment of \$(455) was recorded to adjust the net book value of property, plant and equipment to fair value giving consideration to their highest and best use. Key assumptions used in the valuation of the Company's property, plant and equipment were based on the cost approach.
- Certain indefinite-lived intangible assets were valued using a relief from royalty methodology. Customer relationships and certain definite-lived intangible assets were valued using a multi-period excess earnings method. Certain intangible assets are subject to sensitive business factors of which only a portion are within control of the Company's management. The total fair value of indefinite and definite lived intangibles was \$363,327 as of June 16, 2010. A summary of the significant key inputs were as follows:

—The Company valued customer relationships using the income approach, specifically the multi-period excess earnings method. In determining the fair value of the customer relationship, the multi-period excess earnings approach values the intangible asset at the present value of the incremental after-tax cash flows attributable only to the customer relationship after deducting contributory asset charges. The incremental after-tax cash flows attributable to the subject intangible asset are then discounted to their present value. Only expected sales from current customers were used which included an expected growth rate of 3%. The Company assumed a customer retention rate of approximately 93% which was supported by historical retention rates. Income taxes were estimated at 36% and amounts were discounted using a rate of 15.5%. The customer relationships were valued at \$38,000 under this approach.

—The Company valued trade names and trademarks using the income approach, specifically the relief from royalty method. Under this method, the asset value was determined by estimating the hypothetical royalties that would have to be paid if the trade name was not owned. Royalty rates were selected based on consideration of several factors, including prior transactions of Russell Hobbs related trademarks and trade names, other similar trademark licensing and transaction agreements and the relative profitability and perceived contribution of the trade-

marks and trade names. Royalty rates used in the determination of the fair values of trade names and trademarks ranged from 2.0% to 5.5% of expected net sales related to the respective trade names and trademarks. The Company anticipates using the majority of the trade names and trademarks for an indefinite period as demonstrated by the sustained use of each subjected trademark. In estimating the fair value of the trademarks and trade names, Net sales for significant trade names and trademarks were estimated to grow at a rate of 1%–14% annually with a terminal year growth rate of 3%. Income taxes were estimated at a range of 30%–38% and amounts were discounted using rates between 15.5%–16.5%. Trade name and trademarks were valued at \$170,930 under this approach.

—The Company valued a trade name license agreement using the income approach, specifically the multi-period excess earnings method. In determining the fair value of the trade name license agreement, the multi-period excess earnings approach values the intangible asset at the present value of the incremental after-tax cash flows attributable only to the trade name license agreement after deducting contributory asset charges. The incremental after-tax cash flows attributable to the subject intangible asset are then discounted to their present value. In estimating the fair value of the trade name license agreement net sales were estimated to grow at a rate of (3)%–1% annually. The Company assumed a twelve year useful life of the trade name license agreement. Income taxes were estimated at 37% and amounts were discounted using a rate of 15.5%. The trade name license agreement was valued at \$149,200 under this approach.

—The Company valued technology using the income approach, specifically the relief from royalty method. Under this method, the asset value was determined by estimating the hypothetical royalties that would have to be paid if the technology was not owned. Royalty rates were selected based on consideration of several factors including prior transactions of Russell Hobbs related licensing agreements and the importance of the technology and profit levels, among other considerations. Royalty rates used in the determination of the fair values of technologies were 2% of expected net sales related to the respective technology. The Company anticipates using these technologies through the legal life of the underlying patent and therefore the expected life of these technologies was equal to the remaining legal life of the underlying patents ranging from 9 to 11 years. In estimating the fair value of the technologies, net sales were estimated to grow at a rate of 3%–12% annually. Income taxes were estimated at 37% and amounts were discounted using the rate of 15.5%. The technology assets were valued at \$4,100 under this approach.

*Supplemental Pro Forma Information (unaudited)*

The following reflects the Company's pro forma results had the results of Russell Hobbs been included for all periods beginning after September 30, 2007.

(A) The Company has not assumed the exercise of common stock equivalents as the impact would be antidilutive.

**Major Stockholder Transactions****1.173****PILGRIM'S PRIDE CORPORATION (DEC)***NOTES TO CONSOLIDATED FINANCIAL STATEMENTS**16. Related Party Transactions*

Upon the Effective Date, JBS USA became the holder of the majority of the common stock of the Company (the "Current Major Stockholder"). Prior to the Effective Date, Lonnie A. "Bo" Pilgrim and certain entities related to Mr. Pilgrim collectively owned a majority of the voting power of the common stock of the Company (the "Former Major Stockholder"). Mr. Pilgrim was also the Senior Chairman of the Company prior to the Effective Date. Mr. Pilgrim ceased being Senior Chairman on the Effective Date; however, he remains a director of the Company.

Transactions with the Current Major Stockholder and the Former Major Stockholder are summarized below:

| (In thousands)                                                                                            | 2010     | Transition<br>Period | 2009  | 2008  |

<sup>(a)</sup> JBS USA did not become the holder of the majority of the common stock of the Company until the Effective Date. Although transactions did occur between the Company and JBS USA during 2009, they were not related party transactions.

<sup>(b)</sup> Until the Effective Date, Pilgrim Interests, Ltd., an entity related to Lonnie A. "Bo" Pilgrim, guaranteed a portion of the Company's debt obligations. In consideration of such guarantees, the Company has paid Pilgrim Interests, Ltd. a quarterly fee equal to 0.25% of one-half of the average aggregate outstanding balance of such guaranteed debt. Pursuant to the terms of the DIP Credit Agreement, the Company could not pay any loan guaranty fees during the Chapter 11 case without the consent of the lenders party thereto. At December 27, 2009, the Company had accrued loan guaranty fees totaling \$8.9 million. The Company paid these fees after emerging from bankruptcy on the Effective Date.

<sup>(c)</sup> On February 23, 2010, the Company purchased a commercial egg property from the Former Major Stockholder for \$12.0 million. Prior to the purchase, the Company leased the commercial egg property including all of the ongoing costs of the operation from the Former Major Stockholder.

<sup>(d)</sup> In connection with the Plan, the Company and Lonnie A. "Bo" Pilgrim entered into a consulting agreement, which became effective on the Effective Date. The terms of the consulting agreement include, among other things, that (i) Mr. Pilgrim will provide services to the Company that are comparable in the aggregate with the services provided by him to the Company prior to the Effective Date, (ii) Mr. Pilgrim would be appointed to the Board of Directors of the Company and during the term of the consulting agreement will be nominated for subsequent terms on the board, (iii) Mr. Pilgrim will be compensated for services rendered to the Company at a rate of \$1.5 million a year for a term of five years, (iv) Mr. Pilgrim will be subject to customary non-solicitation and non-competition provisions and (v) Mr. Pilgrim and his spouse will be provided with medical benefits (or will be compensated for medical coverage) that are comparable in the aggregate to the medical benefits afforded to employees of the Company.

<sup>(e)</sup> On June 9, 2010, the Company sold two airplane hangars and undeveloped land to the Former Major Stockholder for \$1.45 million.

<sup>(f)</sup> On January 19, 2010, the Company entered into an agreement with JBS USA in order to allocate costs associated with JBS USA's procurement of SAP licenses and maintenance services for its combined companies. Under this agreement, the fees associated with procuring SAP licenses and maintenance services are allocated between the Company and JBS USA in proportion to the percentage of licenses used by each company. The agreement expires on the date of expiration, or earlier termination, of the underlying SAP license agreement. On May 5, 2010, the Company also entered into an agreement with JBS USA in order to allocate the costs of supporting the business operations by one consolidated corporate team, which have historically been supported by their respective corporate teams. Expenditures paid by the Current Major Stockholder on behalf of the Company will be reimbursed by the Company and expenditures paid by the Company on behalf of the Current Major Stockholder will be reimbursed by the Current Major Stockholder. This agreement expires on May 5, 2015.

<sup>(g)</sup> As of December 26, 2010, the outstanding payable to JBS USA was \$7.2 million and the outstanding receivable from JBS USA was \$0.5 million. As of December 26, 2010, approximately \$3.9 million of goods from JBS USA were in transit and not reflected on our Consolidated Balance Sheet.

The Company is party to grower contracts involving farms owned by the Former Major Stockholder that provide for the placement of Company-owned flocks on these farms during the grow-out phase of production. These contracts are on terms substantially the same as contracts executed by the Company with unaffiliated parties and can be terminated by either party upon completion of the grow-out phase for each flock. The aggregate amounts paid by the Company to the Former Major Stockholder under these grower contracts were less than \$1.3 million in each of the periods 2010, the Transition Period, 2009 and 2008.

The Company leased an airplane from its Former Major Stockholder under an operating lease agreement. The terms of the lease agreement required monthly payments of \$33,000 plus operating expenses. The lease was terminated on November 18, 2008. Lease expense was \$66,000 and \$396,000 in 2009 and 2008, respectively. Operating expenses were \$1,500 and \$60,000 in 2009 and 2008, respectively.

The Company maintains depository accounts with a financial institution in which the Company's Former Major Stockholder is also a major stockholder. Fees paid to this bank in 2010, the Transition Period, 2009 and 2008 were insignificant.

The Company had account balances at this financial institution of approximately \$4.2 million and \$2.3 million at December 26, 2010 and September 26, 2009, respectively.

The Former Major Stockholder has deposited \$0.3 million with the Company as an advance on miscellaneous expenditures.

A son of the Former Major Stockholder sold commodity feed products and a limited amount of other services to the Company totaling approximately \$0.4 million in each of the years ended 2010, 2009 and 2008. We made no purchases during the Transition Period. He also leases an insignificant amount of land from the Company.

## Transaction Between Reporting Entity and Officer/Director

### 1.174

TIFFANY & CO. (JAN)

#### NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

##### *M. Related Parties*

The Company's Chairman of the Board and Chief Executive Officer is a member of the Board of Directors of The Bank of New York Mellon, which serves as the Company's lead bank for its Credit Facility, provides other general banking services and serves as the trustee and an investment manager for the Company's pension plan. BNY Mellon Shareowner Services serves as the Company's transfer agent and registrar. Fees paid to the bank for services rendered, interest on debt and premiums on derivative contracts amounted to \$2,090,000, \$1,666,000 and \$1,534,000 in 2009, 2008 and 2007.

## Transaction Between Reporting Entity and Variable Interest Entity

### 1.175

VIACOM INC. (SEP)

#### NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

##### *Note 3. Acquisitions & Investments (in part)*

##### *Variable Interest Entities*

In the normal course of business, the Company enters into joint ventures or makes investments with business partners that support its underlying business strategy and provide it the ability to enter new markets to expand the reach of its brands, develop new programming and/or distribute its existing content. In certain instances, an entity in which the Company makes an investment may qualify as a VIE. In determining whether the Company is the primary beneficiary of a VIE, the Company assesses whether it has the power to direct matters that most significantly impact the activities of the VIE and has the obligation to absorb losses or the right

to receive benefits from the VIE that could potentially be significant to the VIE.

##### *Unconsolidated Variable Interest Entities*

The Company has a number of unconsolidated investments in which it holds a non-controlling ownership interest, including but not limited to Rhapsody, EPIX and Viacom 18. These arrangements are typically entered into with strategic partners and generally contain the following governance provisions: (i) the funding of the venture is provided by the equity holders pro rata based on their ownership interest; (ii) the investments are initially funded to meet short-term working capital requirements with funding commitments provided by the partners to fund future operating needs; (iii) commercial arrangements between the Company, the venture and other related parties are negotiated between the parties and are believed to be at market rates; and (iv) voting rights are consistent with the equity holders' rights and obligations to share in the profits and losses of the variable interest entity. In connection with these investment arrangements the Company does not have the power to direct matters that most significantly impact the activities of the VIE and therefore does not qualify as the primary beneficiary. Accordingly, these investments are accounted for under the equity method of accounting and are included in *Other assets-noncurrent* in the Consolidated Balance Sheets. In these arrangements, the Company's risk of loss is typically limited to its carrying value and future funding commitments.

At September 30, 2010 and December 31, 2009, the Company's aggregate investment carrying value in unconsolidated VIEs was \$98 million and \$144 million, respectively. The impact of the Company's unconsolidated VIEs on its Consolidated Financial Statements, including related party transactions, is further described in Note 13.

##### *Consolidated Variable Interest Entities*

In April 2008, MTV Networks' Hispanic-oriented cable network MTV Tr3s acquired an interest in a television broadcaster to expand its reach to Hispanic audiences in the Los Angeles and other southwest markets where the target company held broadcast licenses. The Company acquired a non-voting equity interest in the broadcaster of approximately 32% and has certain rights and obligations related to its investment, including the guarantee of third-party bank debt. The Company has determined that it is the primary beneficiary as it has the power to direct certain matters that significantly impact the activities of the VIE and the obligation to absorb losses that could be potentially significant to the VIE through its equity interest and its guarantee of third-party bank debt. Accordingly, the Company consolidates the entity. As of September 30, 2010 and December 31, 2009, there are \$37 million and \$43 million of assets and \$84 million and \$85 million of liabilities, respectively, in respect of this entity included within the Company's Consolidated Balance Sheets. The operating results of this consolidated VIE in 2009 included a \$60 million non-cash impairment charge related to certain broadcast licenses held by the entity. The impact to *Net earnings attributable to Viacom* in 2009 was a reduction of \$19 million, with the remaining \$41 million allocated to the noncontrolling interest. Except for the 2009 impairment charge, the revenues, expenses and operating income for the nine months ended September 30, 2010 and the years

ended December 31, 2009 and 2008 were not significant to the Company.

*Note 13. Related Party Transactions (in part)*

*Other Related Party Transactions*

In the ordinary course of business, the Company is involved in related party transactions with equity investees, principally related to investments in unconsolidated VIEs as more fully described in Note 3. These related party transactions primarily relate to the provision of advertising services, licensing of film and programming content, distribution of films and provision of certain administrative support services, for which the impact on the Company's Consolidated Financial Statements is as follows:

| Other Related Party Transactions           | Nine Months Ended<br>September 30, 2010 | Year Ended December 31   |       |
|--------------------------------------------|-----------------------------------------|--------------------------|-------|
|                                            |                                         | 2009                     | 2008  |
| (In millions)                              |                                         |                          |       |
| <b>Consolidated Statements of Earnings</b> |                                         |                          |       |
| Revenues                                   | \$168                                   | \$375                    | \$408 |
| Operating expenses                         | \$ 53                                   | \$207                    | \$249 |
| Selling, general, and administrative       | \$ (24)                                 | \$ —                     | \$ —  |

##### Transactions with Purchasing Cooperatives, Foundation, and AFA

<sup>(a)</sup> On April 5, 2010, the Wendy's independent purchasing cooperative Quality Supply Chain Co-op ("QSCC") and the Arby's independent purchasing cooperative ("ARCOP"), in consultation with Wendy's/Arby's Restaurants, established Strategic Sourcing Group Co-op, LLC ("SSG"). SSG was formed to manage and operate purchasing programs which combine the purchasing power of both Wendy's and Arby's company-owned and franchised restaurants to create buying efficiencies for certain non-perishable goods, equipment, and services.

In order to facilitate the orderly transition of this purchasing function for the Companies' North America operations, Wendy's/Arby's Restaurants transferred certain contracts, assets and certain Wendy's/Arby's Restaurants purchasing employees to SSG in the second quarter of 2010. Wendy's/Arby's Restaurants had committed to pay approximately \$5,145 of SSG expenses, which were expensed in 2010 and included in "General and administrative," and was to be paid over a 24 month period through March 2012. We made payments of \$2,000 in 2010.

Should a sale of Arby's occur as discussed in Note 1, under the change of control provisions in the agreement that established SSG, the activities of SSG would be wound up. In the wind up process, the assets, personnel and functions of SSG would be transferred to QSCC and ARCOP as such parties and Wendy's/Arby's Restaurants agree. In contemplation of a possible sale, the parties are in discussion regarding the dissolution of SSG and transferring SSG's assets, personnel and functions to QSCC and ARCOP.

<sup>(b)</sup> During the 2009 fourth quarter, Wendy's entered into a purchasing co-op relationship agreement (the "Co-op Agreement") to establish QSCC. QSCC manages food and related product purchases and distribution services for the Wendy's system in the United States and Canada. Through QSCC, Wendy's and Wendy's franchisees purchase food, proprietary paper and operating supplies under national contracts with pricing based upon total system volume.

QSCC's supply chain management facilitates continuity of supply and provides consolidated purchasing efficiencies while monitoring and seeking to minimize possible obsolete inventory throughout the Wendy's North America supply chain. The system's purchasing function for 2009 and prior was performed and paid for by Wendy's. In order to facilitate the orderly transition of the 2010 purchasing function for North America operations, Wendy's transferred certain contracts, assets and certain Wendy's purchasing employees to QSCC in the first quarter of 2010. Pursuant to the terms of the Co-op Agreement, Wendy's was required to pay \$15,500 to QSCC over an 18 month period through May 2011 in order to provide funding for start-up costs, operating expenses and cash reserves. The required payments by Wendy's under the Co-op Agreement were expensed in the fourth quarter of 2009 and included in "General and administrative." Wendy's made payments of \$15,195 in 2010. In connection with the ongoing operations of QSCC during 2010, QSCC reimbursed Wendy's \$913 for amounts Wendy's had paid primarily for payroll-related expenses for certain Canadian QSCC purchasing employees.

<sup>(c)</sup> ARCOP subleased approximately 4,500 square feet of the corporate headquarters office space from Arby's in 2010, and 2,680 square feet in 2009 and 2008. The Arby's Foundation, Inc. (the "Foundation"), a not-for-profit charitable foundation in which Arby's has non-controlling representation on the board of directors, subleased approximately 3,800 square feet of the corporate headquarters office space from Arby's in 2010, 2009 and 2008. Effective January 4, 2010, QSCC subleased approximately 9,333 square feet of office space from Wendy's. Effective April 5, 2010, the SSG leased 2,300 square feet of office space from Arby's. The Companies received \$104, \$106, and \$111, of sublease income from ARCOP in 2010, 2009, and 2008, respectively, \$105, \$107 and \$116 of sublease income from Foundation in 2010, 2009, and 2008, respectively, \$113 of sublease income from QSCC in 2010, and \$24 of sublease income from SSG in 2010.

(continued)

(continued)

- (d) In December 2009, and as amended in February and August 2010, AFA entered into a revolving loan agreement with Arby's. The terms of this agreement allow AFA to have revolving loans of up to \$14,000 outstanding with an expiration date of March 2012 and bearing interest at 7.5% per annum. In February 2011, the maximum principal amount of revolving loans was reduced to \$11,000. As of January 2, 2011 and January 3, 2010, the outstanding revolving loan balance was \$4,458 and \$5,089, respectively. Arby's received interest income of \$463 and \$4 in 2010 and 2009, respectively, which is included in "Other income (expense)."
- (e) Beginning in January 2010 and through March 2010, Arby's and most domestic Arby's franchisees paid 1.2% of sales as member dues to AFA. Beginning in April 2010 and for the remainder of 2010, the AFA Board approved a dues increase based on a tiered rate structure for the payment of the advertising and marketing service fee ranging between 1.4% and 3.6% of sales. As a result, the average Arby's advertising and marketing service fee percentage from April 2010 to the end of the 2010 fiscal year was approximately 2.3%. In addition, Arby's partially subsidized the top two rate tiers in 2010 thereby decreasing franchisees' effective advertising and marketing service fee percentages. This subsidy required payments by Arby's of \$2,635 to AFA in 2010.

*Transactions with the Management Company*

- (f) Wendy's/Arby's and the Management Company entered into a new services agreement (the "New Services Agreement"), which commenced on July 1, 2009 and will continue until June 30, 2011, unless sooner terminated. Under the New Services Agreement, the Management Company assists us with strategic merger and acquisition consultation, corporate finance and investment banking services and related legal matters. Pursuant to the terms of this agreement, Wendy's/Arby's is paying the Management Company a service fee of \$250 per quarter, payable in advance commencing July 1, 2009. In addition, in the event the Management Company provides substantial assistance to us in connection with a merger or acquisition, corporate finance and/or similar transaction that is consummated at any time during the period commencing on the date the New Services Agreement was executed and ending six months following the expiration of its term, Wendy's/Arby's will negotiate a success fee to be paid to the Management Company which is reasonable and customary for such transactions. In addition, Wendy's/Arby's incurred service fees of \$1,000 in 2010, which are included in "General and administrative."
- (g) The Companies paid approximately \$2,465 and \$5,368 in 2010 and 2009, respectively, in fees for corporate finance advisory services under the New Services Agreement in connection with the negotiation and execution of the Credit Agreement in 2010 and the issuance of the Senior Notes in 2009.
- (h) In connection with its 2007 restructuring, Wendy's/Arby's entered into an agreement with the Management Company for the provision of services under a two-year transition services agreement (the "Services Agreement"), effective June 30, 2007, pursuant to which the Management Company provided Wendy's/Arby's with a range of professional and strategic services. Under the Services Agreement, which expired on June 30, 2009 and was superseded by the New Services Agreement, Wendy's/Arby's paid the Management Company \$3,000 per quarter for the first year of services and \$1,750 per quarter for the second year of services. Wendy's/Arby's incurred \$3,500 and \$9,500 of such service fees for 2009 and 2008, respectively, which are included in "General and administrative."
- (i) In July 2008 and July 2007, Wendy's/Arby's entered into agreements under which the Management Company is subleasing (the "Subleases") office space on two of the floors of the Company's former New York headquarters. Under the terms of the Subleases, the Management Company paid Wendy's/Arby's approximately \$157 and \$153 in 2009 and 2008, respectively, per month, which included an amount equal to the rent Wendy's/Arby's pays plus a fixed amount reflecting a portion of the increase in the then fair market value of Wendy's/Arby's leasehold interest, as well as amounts for property taxes and the other costs related to the use of the space. During the second quarter of 2010, Wendy's/Arby's and the Management Company entered into an amendment to the sublease, effective April 1, 2010, pursuant to which the Management Company's early termination right was cancelled in exchange for a reduction in rent. Under the terms of the amended sublease, the sublease is not cancelable prior to the expiration of the prime lease and the Management Company pays rent to Wendy's/Arby's in an amount that covers substantially all of the Company's rent obligations under the prime lease for the subleased space. Wendy's/Arby's recognized \$1,632, \$1,886, and \$1,633 from the Management Company under the Subleases for 2010, 2009, and 2008, respectively, which has been recorded as a reduction of "General and administrative."
- (j) In August 2007, Wendy's/Arby's entered into time share agreements under which the Chairman and then Chief Executive Officer and the Vice Chairman and then President and Chief Operating Officer of Wendy's/Arby's (the "Former Executives") and the Management Company used two Wendy's/Arby's corporate aircraft in exchange for payment of certain incremental flight and related costs of such aircraft. Those time share agreements expired during the second quarter of 2009 and, in the third quarter of 2009, one of the aircraft was sold to an unrelated third party. Such reimbursements for 2009 and 2008 amounted to \$553 and \$3,028 and have been recognized as a reduction of "General and administrative."
- In June 2009, Wendy's/Arby's and TASCOCO, LLC (an affiliate of the Management Company) ("TASCOCO") entered into an aircraft lease agreement (the "Aircraft Lease Agreement") for the other aircraft that was previously under the time share agreement mentioned above. The Aircraft Lease Agreement originally provided that Wendy's/Arby's would lease such corporate aircraft to TASCOCO from July 1, 2009 until June 30, 2010. Under the Aircraft Lease Agreement, TASCOCO pays \$10 per month for such aircraft plus substantially all operating costs of the aircraft including all costs of fuel, inspection, servicing and storage, as well as operational and flight crew costs relating to the operation of the aircraft, and all transit maintenance costs and other maintenance costs required as a result of TASCOCO's usage of the aircraft. Wendy's/Arby's continues to be responsible for calendar-based maintenance and any extraordinary and unscheduled repairs and/or maintenance for the aircraft, as well as insurance and other costs. The Aircraft Lease Agreement may be terminated by Wendy's/Arby's without penalty in the event it sells the aircraft to a third party, subject to a right of first refusal in favor of the Management Company with respect to such a sale.
- On June 24, 2010, Wendy's/Arby's and TASCOCO renewed the Aircraft Lease Agreement for an additional one year period (expiring June 30, 2011). We received lease income of \$120 and \$60 in 2010 and 2009, respectively, under this agreement, which is included as an offset to "General and administrative."
- (k) The Management Company assumed Wendy's/Arby's 25% fractional interest in a helicopter on October 1, 2008 for \$1,860 which is the amount Wendy's/Arby's would have received under the relevant agreement, if it exercised its right to sell the helicopter interest on October 1, 2008, which is equal to the then fair value, less a remarketing fee. The Management Company paid the monthly management fee and all other costs related to the helicopter interest to the owner on behalf of Wendy's/Arby's from July 1, 2007 until October 1, 2008.
- (l) In 2005, the Company invested \$75,000 in brokerage accounts (the "Equities Account"), which were managed by the Management Company. The Equities Account was invested principally in equity securities, cash equivalents and equity derivatives of a limited number of publicly-traded companies. In addition, the Equities Account sold securities short and invested in market put options in order to lessen the impact of significant market downturns. On September 12, 2008, 251 shares of Wendy's common stock, which were included in the Equities Account, were sold to the Management Company at the closing market value as of the day the Company decided to sell the shares. The sale resulted in a loss of \$38.

(continued)

(continued)

- (m) On June 10, 2009, Wendy's/Arby's and the Management Company entered into a withdrawal agreement (the "Withdrawal Agreement") which provided that Wendy's/Arby's would be permitted to withdraw all amounts in the Equities Account on an accelerated basis (the "Early Withdrawal") effective no later than June 26, 2009. Prior to the Withdrawal Agreement and as a result of an investment management agreement with the Management Company which was terminated on June 26, 2009, Wendy's/Arby's had not been permitted to withdraw any amounts from the Equities Account until December 31, 2010, although \$47,000 was released from the Equities Account in 2008 subject to an obligation to return that amount to the Equities Account by a specified date. In consideration for obtaining such Early Withdrawal right, Wendy's/Arby's agreed to pay the Management Company \$5,500 (the "Withdrawal Fee"), was not required to return the \$47,000 referred to above and was no longer obligated to pay investment management and incentive fees to the Management Company. The Equities Account investments were liquidated in June 2009 for \$37,401 (the "Equities Sale"), of which \$31,901 was received by Wendy's/Arby's, net of the Withdrawal Fee, and for which Wendy's/Arby's realized a gain of \$2,280 in 2009, which are both included in "Investment income (expense), net."
- (n) On June 10, 2009, Wendy's/Arby's and the Management Company entered into a liquidation services agreement (the "Liquidation Services Agreement") pursuant to which the Management Company assists us in the sale, liquidation or other disposition of our cost investments and DFR Notes, (the "Legacy Assets"), which are not related to the Equities Account. As of the date of the Liquidation Services Agreement, the Legacy Assets were valued at \$36,600 (the "Target Amount"), of which \$5,138 was owned by Wendy's/Arby's Restaurants. The Liquidation Services Agreement, which expires June 30, 2011, required Wendy's/Arby's to pay the Management Company a fee of \$900 in two installments in June 2009 and 2010, which is being amortized over the term of the agreement. \$441 and \$239 were amortized and recorded in "General and administrative" in 2010 and 2009, respectively. In addition, in the event that any or all of the Legacy Assets are sold, liquidated or otherwise disposed of and the aggregate net proceeds to us are in excess of the Target Amount, we would be required to pay the Management Company a success fee equal to 10% of the aggregate net proceeds in excess of the Target Amount. Assuming a current liquidation of all remaining Legacy Assets, the aggregate proceeds (\$32,209 as of January 2, 2011 primarily related to the cancellation and repayment of the DFR Notes) would not be expected to be in excess of the Target Amount.

#### Transactions with Other Related Parties

- (o) In 2008, the Companies pledged \$1,000 to be paid in equal annual installments over a five year period commencing in 2008 to be donated to the Dave Thomas Foundation for Adoption, a related party. The amount pledged was recorded in "General and administrative" in 2008.
- (p) During the 2010, 2009, and 2008, the Companies made charitable contributions of \$500 to Foundation, primarily utilizing funds reimbursed to it by one of the beverage companies used by Arby's as provided by their contract. Such payments are included in "General and administrative."
- (q) As part of its overall retention efforts, Wendy's/Arby's provided certain of its Former Executives and current and former employees, the opportunity to co-invest with Wendy's/Arby's in certain investments. Wendy's/Arby's and certain of its former management have one remaining co-investment, 280 BT, which is a limited liability holding company principally owned by Wendy's/Arby's and former company management that, among other things, invested in operating companies. During 2009 and 2008, Wendy's/Arby's received distributions of \$795 and \$2,014, respectively, from the liquidation of certain of the investments owned by 280 BT. The minority portions of these distributions of \$156 and \$402 in 2009 and 2008, respectively, were further distributed to 280 BT's minority shareholders. No distributions were received in 2010. The ownership percentages as of January 2, 2011 were 80.1%, 11.2% and 8.7% for Wendy's/Arby's, the former officers of Wendy's/Arby's and other investors, respectively.

## INFLATIONARY ACCOUNTING

### DISCLOSURE

**1.177** FASB ASC 255, *Changing Prices*, states that entities are encouraged to disclose supplementary information on the effects of changing prices (inflation). Entities are not discouraged from experimenting with other forms of disclosure.

**1.178** However, the Item 303 of the SEC's Regulation S-K requires that registrants discuss in "Management's Discussion and Analysis of Financial Condition and Results of Operations" the effects of inflation and other changes in prices when considered material. The SEC also encourages experimentation with these disclosures in order to provide the most meaningful presentation of the impact of price changes on the registrant's financial statements. Accordingly, many of the survey entities include comments about inflation in MD&A.

## PRESENTATION AND DISCLOSURE EXCERPT

### Inflationary Accounting

#### 1.179

#### H.J. HEINZ COMPANY (APR)

#### NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

#### Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations

#### Venezuela-Foreign Currency and Inflation

#### Foreign Currency

The local currency in Venezuela is the VEF. A currency control board exists in Venezuela that is responsible for foreign exchange procedures, including approval of requests for exchanges of VEF for U.S. dollars at the official (government established) exchange rate. Our business in Venezuela has historically been successful in obtaining U.S. dollars at the official exchange rate for imports of ingredients, packaging, manufacturing equipment, and other necessary inputs, and for dividend remittances, albeit on a delay. While an unregulated parallel market exists for exchanging VEF for U.S. dollars through securities transactions, our Venezuelan subsidiary has no recent history of entering into such exchange transactions.

The Company uses the official exchange rate to translate the financial statements of its Venezuelan subsidiary, since we expect to obtain U.S. dollars at the official rate for future dividend remittances. The official exchange rate in Venezuela had been fixed at 2.15 VEF to 1 U.S. dollar for several years, despite significant inflation. On January 8, 2010, the Venezuelan government announced the devaluation of its currency relative to the U.S. dollar. The official exchange rate for imported goods classified as essential, such as food and medicine, changed from 2.15 to 2.60, while payments for other non-essential goods moved to an exchange rate of 4.30. The majority, if not all, of our imported products in Venezuela are expected to fall into the essential classification and qualify for the 2.60 rate. However, our Venezuelan subsidiary's financial statements are translated using the 4.30 rate, as this is the rate expected to be applicable to dividend repatriations.

During Fiscal 2010, the Company recorded a \$62 million currency translation loss as a result of the currency devaluation, which has been reflected as a component of accumulated other comprehensive loss within unrealized translation adjustment. The net asset position of our Venezuelan subsidiary has also been reduced as a result of the devaluation to approximately \$81 million at April 28, 2010. While our future operating results in Venezuela will be negatively impacted by the currency devaluation, we plan to take actions to help mitigate these effects. Accordingly, we do not expect the devaluation to have a material impact on our operating results going forward.

#### *Highly Inflationary Economy*

An economy is considered highly inflationary under U.S. GAAP if the cumulative inflation rate for a three-year period meets or exceeds 100 percent. Based on the blended National Consumer Price Index, the Venezuelan economy exceeded the three-year cumulative inflation rate of 100 percent during the third quarter of Fiscal 2010. As a result, the financial statements of our Venezuelan subsidiary have been consolidated and reported under highly inflationary accounting rules beginning on January 28, 2010, the first day of our fiscal fourth quarter. Under highly inflationary accounting, the financial statements of our Venezuelan subsidiary are remeasured into the Company's reporting currency (U.S. dollars) and exchange gains and losses from the remeasurement of monetary assets and liabilities are reflected in current earnings, rather than accumulated other comprehensive loss on the balance sheet, until such time as the economy is no longer considered highly inflationary.

The impact of applying highly inflationary accounting for Venezuela on our consolidated financial statements is dependent upon movements in the applicable exchange rates (at this time, the official rate) between the local currency and the U.S. dollar and the amount of monetary assets and liabilities included in our subsidiary's balance sheet. At April 28, 2010, the U.S. dollar value of monetary assets, net of monetary liabilities, which would be subject to an earnings impact from exchange rate movements for our Venezuelan subsidiary under highly inflationary accounting was \$42 million.

## Section 2: Balance Sheet and Related Disclosures

### GENERAL BALANCE SHEET CONSIDERATIONS

#### PRESENTATION

**2.01** Financial Accounting Standards Board (FASB) *Accounting Standards Codification*<sup>™</sup> (ASC) describes the benefits of presenting comparative financial statements instead of single-period financial statements and addresses the required disclosures and how the comparative information should be presented. Securities and Exchange Commission (SEC) Regulation S-X, together with Financial Reporting Releases and Staff Accounting Bulletins, prescribe the form and content of, and requirements for, financial statements filed with the SEC. However, those requirements are modified for smaller reporting companies, as defined by SEC Regulation S-K, in Article 8 of Regulation S-X.

**2.02** FASB ASC 810, *Consolidation*, and Rule 3A-02 of Regulation S-X state that a presumption exists that consolidated financial statements are more meaningful than separate financial statements and that they are usually necessary for a fair presentation when one of the entities in the consolidated group directly or indirectly has a controlling financial interest in the other entities. Rule 3-01(a) of Regulation S-X requires an entity to present consolidated balance sheets as of the end of each of the two most recent fiscal years, unless the entity has been in existence for less than one year.

**2.03** FASB ASC does not require an entity to present a classified balance sheet or mandate any particular ordering of balance sheet accounts. However, FASB ASC 210-10-05-4 states that entities usually present a classified balance sheet to facilitate calculation of working capital. FASB ASC 210-10-05-5 indicates that in the statements of manufacturing, trading, and service entities, assets and liabilities are generally classified and segregated. Financial institutions generally present unclassified balance sheets. The FASB ASC glossary includes definitions of *current assets* and *current liabilities* for when an entity presents a classified balance sheet. FASB ASC 210-10-45 provides additional guidance for determining these classifications.

#### DISCLOSURE

**2.04** FASB ASC sets forth disclosure guidelines regarding capital structure and other balance sheet items. SEC regulations also contain additional requirements for disclosures that registrants should provide outside the financial statements.

**2.05** FASB ASC 205-10-50 states that reclassifications or other changes in the manner of, or basis for, presenting corresponding items for two or more periods should be explained. This conforms with the well-recognized principle that any change that affects comparability of financial statements should be disclosed.

#### PRESENTATION AND DISCLOSURE EXCERPTS

##### Reclassifications

#### 2.07

##### COSTCO WHOLESALE CORPORATION (AUG)

##### NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

(Dollars in millions, except share data)

*Note 1—Summary of Significant Accounting Policies (in part)*

##### *Reclassifications*

Certain reclassifications have been made to prior fiscal year amounts or balances to conform to the presentation in the current fiscal year. Additionally, as a result of the application of a new accounting pronouncement for noncontrolling interests in consolidated entities, as discussed below in Recently Adopted Accounting Pronouncements, the Company:

- Reclassified to noncontrolling interests, a component of total equity, \$80 at August 31, 2009, which was previously reported as minority interest on our consolidated balance sheet, after the correction of an immaterial error of \$6 relating to the noncontrolling interest component of accumulated other comprehensive income. A new subtotal, total Costco stockholders' eq-

uity, refers to the equity attributable to stockholders of Costco;

- Reported as separate captions within our consolidated statements of income, net income including noncontrolling interests, net income attributable to noncontrolling interests and net income attributable to Costco;
- Utilized net income including noncontrolling interests, as the starting point on our consolidated statements of cash flows in order to reconcile net income including noncontrolling interests to cash flows from operating activities; and
- Reported separately within our consolidated statements of equity and comprehensive income, distributions and cumulative balances attributable to noncontrolling interests.

These reclassifications did not have a material impact on the Company's previously reported consolidated financial statements.

## 2.08

### BEST BUY CO., INC. (FEB)

#### NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

(\$ in millions, except per share amounts or as otherwise noted)

##### 1. Summary of Significant Accounting Policies (in part)

###### Reclassifications

To maintain consistency and comparability, certain amounts from previously reported consolidated financial statements have been reclassified to conform to the current-year presentation. As a result of our adoption of accounting guidance related to the treatment of noncontrolling interests in consolidated financial statements, as described below in *New Accounting Standards*, we:

- reclassified to noncontrolling interests, a component of shareholders' equity, \$513 at February 28, 2009, which was previously reported as minority interests on our consolidated balance sheets;
- reported as separate captions within our consolidated statements of earnings, net earnings including noncontrolling interests, net earnings attributable to noncontrolling interests, and net earnings attributable to Best Buy Co., Inc. of \$1,033, \$(30) and \$1,003, respectively, for the fiscal year ended February 28, 2009, and \$1,410, \$(3) and \$1,407, respectively, for the fiscal year ended March 1, 2008;
- utilized net earnings including noncontrolling interests of \$1,033 and \$1,410 for the fiscal years ended February 28, 2009, and March 1, 2008, respectively, as the starting point on our consolidated statements of cash flows in order to reconcile net earnings to cash flows from operating activities, rather than beginning with net earnings, which was previously exclusive of noncontrolling interests; and

- reclassified \$(146) from acquisition of businesses, net of cash acquired within the investing activities section of our consolidated statements of cash flows to acquisition of noncontrolling interests within the financing activities section for the fiscal year ended February 28, 2009.

These reclassifications had no effect on previously reported consolidated operating income, net earnings attributable to Best Buy Co., Inc., or net cash flows from operating activities. Also, earnings per share continues to be based on net earnings attributable to Best Buy Co., Inc.

## CASH AND CASH EQUIVALENTS

### PRESENTATION

**2.09** Cash is commonly considered to consist of currency and demand deposits. The FASB ASC glossary defines *cash equivalents* as short-term, highly liquid investments that are both readily convertible into known amounts of cash and so near their maturity that they present an insignificant risk of changes in value because of changes in interest rates. Generally, only investments with original maturities of three months or less qualify under that definition.

### DISCLOSURE

**2.10** Rule 5-02.1 of Regulation S-X states that separate disclosure should be made of the cash and cash items that are restricted regarding withdrawal or usage. The provisions of any restrictions should be described in a note to the financial statements. Restrictions may include legally restricted deposits held as compensating balances against short-term borrowing arrangements, contracts entered into with others, or company statements of intention with regard to particular deposits; however, time deposits and short-term certificates of deposit are not generally included in legally restricted deposits. Compensating balance arrangements that do not legally restrict the use of cash should be described in the notes to the financial statements; the amount involved, if determinable, for the most recent audited balance sheet and any subsequent unaudited balance sheet should be disclosed. Compensating balances maintained under an agreement to assure future credit availability should be disclosed, along with the amount and terms of such agreement.

*NOTES TO CONSOLIDATED FINANCIAL STATEMENTS***3. Cash, Cash Equivalents and Marketable Securities**

Cash and cash equivalents primarily consist of deposits held at major banks, money market funds, Tier-1 commercial paper, U.S. Treasury obligations, U.S. government agency and government sponsored enterprise obligations, and other securities with original maturities of 90 days or less. Marketable

securities primarily consist of time deposits held at major banks, Tier-1 commercial paper, corporate notes, U.S. Treasury obligations and U.S. government agency and government sponsored enterprise debt obligations and certain other securities.

The amortized principal amounts of our cash, cash equivalents and marketable securities approximated their fair values at May 31, 2010 and 2009. We use the specific identification method to determine any realized gains or losses from the sale of our marketable securities classified as available-for-sale. Such realized gains and losses were insignificant for fiscal 2010, 2009 and 2008. The following table summarizes the components of our cash equivalents and marketable securities held, substantially all of which were classified as available-for-sale:

| (In millions)                                                             | May 31          |                |
|---------------------------------------------------------------------------|-----------------|----------------|
|                                                                           | 2010            | 2009           |
| Money market funds                                                        | \$ 2,423        | \$ 467         |
| U.S. Treasury, U.S. government and U.S. government agency debt securities | 3,010           | 4,078          |
| Commercial paper, corporate debt securities and other                     | 5,634           | 2,700          |
| <b>Total investments</b>                                                  | <b>\$11,067</b> | <b>\$7,245</b> |
| Investments classified as cash equivalents                                | \$ 2,512        | \$3,616        |
| Investments classified as marketable securities                           | \$ 8,555        | \$3,629        |

Substantially all of our marketable security investments held as of May 31, 2010 mature within one year. Our investment portfolio is subject to market risk due to changes in interest rates. We place our investments with high credit quality issuers as described above and, by policy, limit the amount of credit exposure to any one issuer. As stated in our investment policy, we are averse to principal loss and seek to preserve our invested funds by limiting default risk, market risk and reinvestment risk.

(\*) Other debt securities consist primarily of investment grade asset-backed and mortgage-backed securities.

*Maturities of Investments*

The following table summarizes the contractual maturities of Applied's investments at October 31, 2010:

| (In thousands)                         | Cost               | Estimated Fair Value |
|----------------------------------------|--------------------|----------------------|
| Due in one year or less                | \$ 699,095         | \$ 701,494           |
| Due after one through five years       | 964,098            | 981,459              |
| Due after five years                   | 3,457              | 3,899                |
| No single maturity date <sup>(*)</sup> | 329,348            | 347,349              |
|                                        | <b>\$1,995,998</b> | <b>\$2,034,201</b>   |

(\*) Securities with no single maturity date include publicly-traded and privately-held equity securities, and asset-backed and mortgage-backed securities.

*Gains and Losses on Investments*

Gross realized gains and losses on sales of investments during fiscal 2010, 2009, and 2008 were as follows:

| (In thousands)        | 2010    | 2009     | 2008     |
|-----------------------|---------|----------|----------|
| Gross realized gains  | \$6,184 | \$ 8,666 | \$13,483 |
| Gross realized losses | 1,622   | 10,486   | 14,690   |

At October 31, 2010, Applied had a gross unrealized loss of \$1 million due to a decrease in the fair value of certain fixed income securities. Applied regularly reviews its investment portfolio to identify and evaluate investments that have indications of possible impairment. Factors considered in determining whether an unrealized loss is temporary, or other-than-temporary and therefore impaired, include: the length of time and extent to which fair value has been lower than the cost basis; the financial condition, credit quality and near-term prospects of the investee; and whether it is more likely than not that Applied will be required to sell the security prior to recovery. Generally, the contractual terms of investments in marketable securities do not permit settlement at prices less than the amortized cost of the investments. Applied has determined that the gross unrealized losses on its marketable securities at October 31, 2010 are temporary in nature and therefore it did not recognize any impairment of its marketable securities for fiscal 2010. During fiscal 2010, Applied determined that certain of its equity investments in privately-held companies were other-than-temporarily impaired and, accordingly, recognized impairment charges in the amounts of \$13 million. Impairment charges associated with financial assets for fiscal 2009 totaled \$84 million, consisting of the following: equity method investment, \$45 million; publicly-traded equity securities, \$20 million; equity investments in privately-held companies, \$17 million; and marketable securities \$2 million. Applied did not recognize any impairment of its financial assets for fiscal 2008.

The following table provides the fair market value of Applied's investments with unrealized losses that are not deemed to be other-than-temporarily impaired as of October 31, 2010.

| (In thousands)                                                  | In Loss Position for<br>Less Than 12 Months |                               | In Loss Position for<br>12 Months or Greater |                               | Total            |                               |

| Total                                                           | <b>\$214,006</b>                            | <b>\$400</b>                  | <b>\$9,167</b>                               | <b>\$128</b>                  | <b>\$223,173</b> | <b>\$528</b>                  |

Unrealized gains and temporary losses on investments classified as available-for-sale are included within accumulated other comprehensive income (loss), net of any related tax effect. Upon realization, those amounts are reclassified from accumulated other comprehensive income (loss) to results of operations.

## MARKETABLE SECURITIES

### RECOGNITION AND MEASUREMENT

**2.13** FASB ASC 320, *Investments—Debt and Equity Securities*, provides guidance on accounting for and reporting investments in equity securities that have readily determinable fair values and all investments in debt securities.

**2.14** FASB ASC 320-10-25 requires that at acquisition, entities classify certain debt and equity securities into one of three categories: held to maturity, trading, or available for sale. Investments in debt securities that the entity has the positive intent and ability to hold to maturity are classified as held to maturity and reported at amortized cost in the statement of financial position. Securities that are bought and held principally for the purpose of selling them in the near term (thus held for only a short period of time) are classified as trading securities and reported at fair value. Trading generally reflects active and frequent buying and selling, and trading securities are generally used to generate profit on short-term differences in price. Investments not classified as either held-to-maturity or trading securities are classified as available-for-sale securities and reported at fair value. Unrealized holding gains and losses are included in earnings for trading securities and other comprehensive income for available-for-sale securities.

**2.15** FASB ASC 320 indicates when certain investments are considered impaired, whether that impairment is other than temporary, and the measurement and recognition of an impairment loss. FASB ASC 320 also provides guidance on accounting considerations for debt securities subsequent to the recognition of an other-than-temporary impairment and requires certain disclosures about unrealized losses that have not been recognized as other-than-temporary impairments.

### PRESENTATION

**2.16** Under FASB ASC 320-10-45-2, an entity that presents a classified balance sheet should report individual held-to-maturity securities, individual available-for-sale securities, and individual trading securities as either current or noncurrent.

### DISCLOSURE

**2.17** FASB ASC 320-10-50 includes detailed disclosure requirements for various marketable securities, including matters such as the nature and risks of the securities; cost, fair value, and transaction information; contractual maturities; impairment of securities; and certain transaction information.

**2.18** By definition, investments in debt and equity securities are financial instruments. FASB ASC 825, *Financial Instruments*, requires disclosure of the fair value of those investments for which it is practicable to estimate that value, the methods and assumptions used in estimating the fair value of marketable securities, and a description of any changes in the methods and assumptions during the period. Under FASB ASC 825-10-50-3, the fair value disclosures are optional for certain nonpublic entities with assets less than \$100 million.

**2.19** FASB ASC 820, *Fair Value Measurement*, defines *fair value*, sets out a framework for measuring fair value, and requires certain disclosures about fair value measurements. FASB ASC 820 clarifies the definition of fair value as an exit price (that is, a price that would be received to sell, versus acquire, an asset or paid to transfer a liability). FASB ASC 820 emphasizes that fair value is a market-based measurement. It establishes a fair value hierarchy that distinguishes between assumptions developed based on market data obtained from independent external sources and the reporting entity's own assumptions. Further, FASB ASC 820 specifies that fair value measurement should consider adjustment for risk, such as the risk inherent in a valuation technique or its inputs. For assets measured at fair value, whether on a recurring or nonrecurring basis, FASB ASC 820 specifies the required disclosures concerning the inputs used to measure fair value.

**2.20** FASB Accounting Standards Update (ASU) No. 2010-06, *Fair Value Measurements and Disclosures (Topic 820): Improving Disclosures about Fair Value Measurements*, requires more robust disclosures about different classes of assets and liabilities measured at fair value; the valuation techniques and inputs used; the activity in level 3 fair value measurements; and the transfers between levels 1, 2, and 3. FASB ASU No. 2010-06 is effective for fiscal years beginning after December 15, 2009, except for disclosures about certain level 3 activity. Those disclosures are effective for fiscal years beginning after December 15, 2010.

**2.21** FASB ASC 825 permits entities to choose to measure many financial instruments and certain other items at fair value that are not currently required to be measured at fair value. Further, under FASB ASC 825, a business entity shall report unrealized gains and losses on eligible items for which the fair value option has been elected in earnings at each subsequent reporting date. The irrevocable election of the fair value option is made on an instrument-by-instrument basis and applied to the entire instrument, not just a portion of it. FASB ASC 825 also establishes presentation and disclosure requirements designed to facilitate comparison between entities that choose different measurement attributes for similar types of assets and liabilities. The required disclosures are optional for certain nonpublic entities.

## 2.22

**TABLE 2-2: MARKETABLE SECURITIES—FAIR VALUE INPUTS**

Table 2-2 lists the level of input for the fair value of marketable securities.

*NOTES TO CONSOLIDATED FINANCIAL STATEMENTS**Note 1. Summary of Significant Accounting Policies (in part)**Short-Term and Long-Term Investments*

Our short-term and long-term investments consist primarily of investment grade debt securities, all of which are classified as available-for-sale. We have investments in auction rate securities within the long-term investment portfolio. Our trading portfolio is primarily comprised of equity mutual funds and equity exchange-traded funds. Trading securities are recorded at fair value with unrealized holding gains and losses included in net earnings. Available-for-sale securities are recorded at fair value, and unrealized holding gains and losses are recorded, net of tax, as a component of accumulated other comprehensive income. Available-for-sale securities with remaining maturities of less than one year and those identified by management at time of purchase for funding operations in less than one year are classified as short term, and all other available-for-sale securities are classified as long term. Unrealized losses are charged against net earnings when a decline in fair value is determined to be other than temporary. Management reviews several factors to determine whether a loss is other than temporary, such as the length and extent of the fair value decline, the financial condition and near term prospects of the issuer, and for equity investments, our intent and ability to hold the security for a period of time sufficient to allow for any anticipated recovery in fair value. For debt securities, management also evaluates

whether we have the intent to sell or will likely be required to sell before their anticipated recovery, which may be at maturity. Realized gains and losses are accounted for using the specific identification method. Purchases and sales are recorded on a trade date basis.

#### *Fair Value of Financial Instruments and Equity and Cost Investments*

The carrying value of cash and cash equivalents approximates fair value because of the short-term maturity of those instruments. The fair value of our investments in marketable debt and equity securities, equity mutual funds and equity exchange-traded funds is based upon the quoted market price on the last business day of the fiscal year. Where an observable quoted market price for a security does not exist,

we estimate fair value using a variety of valuation methodologies, which include observable inputs for comparable instruments and unobservable inputs. The specific methodologies include comparing the security with securities of publicly traded companies in similar lines of business, applying revenue multiples to estimated future operating results and estimating discounted cash flows. The fair value of our long-term debt is estimated based on the quoted market prices for the same or similar issues or on the current rates offered to us for debt of the same remaining maturities.

We measure our equity and cost method investments at fair value on a nonrecurring basis when they are determined to be other-than temporarily impaired. Fair values are determined using available quoted market prices or standard valuation techniques, including discounted cash flows, comparable transactions, and comparable company analyses.

#### *Available-for-Sale Securities*

Proceeds from sales of available-for-sale securities were \$1.1 million, \$5.0 million and \$75.9 million in fiscal years 2010, 2009 and 2008, respectively. For fiscal years 2010, 2009 and 2008, realized gains and losses on sales and maturities were immaterial.

As of October 3, 2010, long-term available-for-sale securities of \$191.8 million included \$41.3 million invested in auction rate securities ("ARS"). As of September 27, 2009, long-term available-for-sale securities of \$71.2 million included \$55.7 million invested in ARS. ARS have long-dated maturities but provide liquidity through a Dutch auction process that resets the applicable interest rate at pre-determined calendar intervals. Due to the auction failures that began in 2008,

these securities became illiquid and were classified as long-term investments. The investment principal associated with the failed auctions will not be accessible until:

- Successful auctions resume;
- An active secondary market for these securities develops;
- The issuers replace these securities with another form of financing; or
- Final payments are made according to the contractual maturities of the debt issues which range from 20 to 35 years.

We do not intend to sell the ARS, nor is it likely we will be required to sell the ARS before their anticipated recovery, which may be at maturity. In fiscal 2010, two ARS were fully

called at par value of \$6.1 million and three ARS were partially called at par value of \$6.0 million.

The gross unrealized holding losses on our state and local government obligations as of October 3, 2010 and September 27, 2009 are all related to our ARS investments. Our ARS are collateralized by portfolios of student loans, substantially all of which are guaranteed by the United States Department of Education.

Long-term investments (except for ARS) generally mature within three years.

#### Trading securities

Trading securities are comprised of marketable equity mutual funds and equity exchange-traded funds that approximate a

portion of the liability under the Management Deferred Compensation Plan ("MDCP"), a defined contribution plan. The corresponding deferred compensation liability of \$82.7 million and \$68.3 million as of October 3, 2010 and September 27, 2009, respectively, is included in accrued compensation and related costs on the consolidated balance sheets. The changes in net unrealized holding gains/losses in the trading portfolio included in earnings for fiscal years 2010 and 2009 were a net gain of \$4.1 million and a net loss of \$4.9 million, respectively.

#### Note 5. Fair Value Measurements (in part)

Fair value accounting guidance defines fair value, establishes a framework for measuring fair value under GAAP and expands disclosures about fair value measurements, for both financial and non-financial assets. It also establishes a fair value hierarchy that prioritizes the inputs used to measure fair value.

*Assets and Liabilities Measured at Fair Value on a Recurring Basis (in millions):*

Trading securities include equity mutual funds and exchange-traded funds. For these securities, we use quoted prices in active markets for identical assets to determine their fair value, thus they are considered to be Level 1 instruments.

Available-for-sale securities include government treasury securities, corporate and agency bonds and ARS. For government treasury securities, we use quoted prices in active markets for identical assets to determine their fair value, thus they are considered to be Level 1 instruments. We use ob-

servable direct and indirect inputs for corporate and agency bonds, which are considered Level 2 instruments. Level 3 instruments are comprised solely of ARS, all of which are considered to be illiquid due to the auction failures that began in 2008. We value ARS using an internally developed valuation model, using inputs that include interest rate curves, credit and liquidity spreads, and effective maturity.

## NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

## Note A —Description of Business and Significant Accounting Policies (in part)

*Funds held for clients and corporate investments:* Marketable securities included in funds held for clients and corporate investments consist primarily of securities classified as available-for-sale and are recorded at fair value obtained from

an independent pricing service. The funds held for clients portfolio also includes cash, money market securities, and short-term investments. Unrealized gains and losses, net of applicable income taxes, are reported as comprehensive income in the Consolidated Statements of Stockholders' Equity. Realized gains and losses on the sale of available-for-sale securities are determined by specific identification of the cost basis of each security. On the Consolidated Statements of Income, realized gains and losses from their respective portfolios are included in interest on funds held for clients and investment income, net.

## Note D—Funds Held for Clients and Corporate Investments

<sup>(1)</sup> Pre-refunded municipal bonds are secured by an escrow fund of U.S. government obligations.

<sup>(2)</sup> Beginning in November 2009, the Company began to invest in variable rate demand notes ("VRDNs") for the first time since September 2008.

Included in money market securities and other cash equivalents as of May 31, 2010 and May 31, 2009 are U.S. agency discount notes, government money market funds, and bank demand deposit accounts.

Classification of investments on the Consolidated Balance Sheets is as follows:

| (In thousands)                                         | May 31      |             |
|--------------------------------------------------------|-------------|-------------|
|                                                        | 2010        | 2009        |
| Funds held for clients                                 | \$3,541,054 | \$3,501,376 |
| Corporate investments                                  | 82,496      | 19,710      |
| Long-term corporate investments                        | 290,106     | 82,234      |
| Total funds held for clients and corporate investments | \$3,913,656 | \$3,603,320 |

The Company is exposed to credit risk in connection with these investments through the possible inability of borrowers to meet the terms of their bonds. In addition, the Company is exposed to interest rate risk, as rate volatility will cause fluctuations in the fair value of held investments and in the earn-

ings potential of future investments. The Company follows a conservative investment strategy of optimizing liquidity and protecting principal. The Company invests primarily in high credit quality securities with AAA and AA ratings and short-term securities with A-1/P-1 ratings. It limits the amounts that can be invested in any single issuer, and invests in short- to intermediate-term instruments whose fair value is less sensitive to interest rate changes. All the investments held as of May 31, 2010 are traded in active markets. The Company has not and does not utilize derivative financial instruments to manage interest rate risk.

The Company's available-for-sale securities reflected a net unrealized gain of \$66.6 million as of May 31, 2010 compared with a net unrealized gain of \$66.7 million as of May 31, 2009. The gross unrealized losses of \$0.4 million, included in the net unrealized gain as of May 31, 2010, were comprised of 23 available-for-sale securities, which had a total fair value of \$73.6 million. The gross unrealized losses of \$0.2 million, included in the net unrealized gain as of May 31, 2009, were comprised of 14 available-for-sale securities with a total fair value of \$39.4 million. The securities in an unrealized loss position were as follows as of May 31, 2010 and May 31, 2009:

The securities in an unrealized loss position were as follows:

| (In thousands)                     | May 31, 2010            |            |                         |            |                         |            |

The Company regularly reviews its investment portfolios to determine if any investment is other-than-temporarily impaired due to changes in credit risk or other potential valuation concerns. The Company believes that the investments held as of May 31, 2010 were not other-than-temporarily impaired. While \$73.6 million of available-for-sale securities had fair values that were below amortized cost, the Company believes that it is probable that the principal and interest will be collected in accordance with contractual terms, and that the decline in the fair value to \$0.4 million below amortized cost was due to changes in interest rates and was not due to increased credit risk or other valuation concerns. All of the securities in an unrealized loss position as of May 31, 2010 and the majority of the securities in an unrealized loss position as of May 31, 2009 held an AA rating or better. The Company intends to hold these investments until the recovery of their amortized cost basis or maturity, and further believes that it is more likely than not that it will not be required to sell these investments prior to that time. The Company's assessment that an investment is not other-than-temporarily impaired could change in the future due to new developments or changes in the Company's strategies or assumptions related to any particular investment.

Realized gains and losses from the sale of available-for-sale securities were as follows:

| (In thousands)        | Year Ended May 31 |         |         |
|-----------------------|-------------------|---------|---------|
|                       | 2010              | 2009    | 2008    |
| Gross realized gains  | \$3,235           | \$1,269 | \$7,161 |
| Gross realized losses | (3)               | (134)   | (711)   |
| Net realized gains    | \$3,232           | \$1,135 | \$6,450 |

The amortized cost and fair value of available-for-sale securities that had stated maturities as of May 31, 2010 are shown below by contractual maturity. Expected maturities can differ from contractual maturities because borrowers may have the right to prepay obligations without prepayment penalties.

| (In thousands)                           | May 31, 2010   |             |
|------------------------------------------|----------------|-------------|
|                                          | Amortized Cost | Fair Value  |
| Maturity date:                           |                |             |
| Due in one year or less                  | \$ 320,289     | \$ 323,966  |
| Due after one year through three years   | 756,267        | 783,097     |
| Due after three years through five years | 499,530        | 526,116     |
| Due after five years                     | 509,163        | 518,599     |
| Total                                    | \$2,085,249    | \$2,151,778 |

VRDNs are primarily categorized as due after five years in the table above as the contractual maturities on these securities are typically 20 to 30 years. Although these securities are issued as long-term securities, they are priced and traded as short-term instruments because of the liquidity provided through the tender feature.

#### Note E—Fair Value Measurements

The carrying values of cash and cash equivalents, accounts receivable, net of allowance for doubtful accounts, and accounts payable approximate fair value due to the short maturities of these instruments. Marketable securities included in funds held for clients and corporate investments consist primarily of securities classified as available-for-sale and are recorded at fair value on a recurring basis.

The accounting standards related to fair value measurements include a hierarchy for information and valuations used in measuring fair value that is broken down into three levels based on reliability, as follows:

- Level 1 valuations are based on quoted prices in active markets for identical instruments that the Company has the ability to access.
- Level 2 valuations are based on quoted prices for similar, but not identical, instruments in active markets; quoted prices for identical or similar instruments in markets that are not active; or other than quoted prices observable inputs.
- Level 3 valuations are based on information that is unobservable and significant to the overall fair value measurement.

The Company's financial assets and liabilities measured at fair value on a recurring basis were as follows:

| (In thousands)                      | May 31, 2010                   |                                                 |                                                     |                                                 |

| Other securities                    | 6,189                          | 6,189                                           | —                                                   | —                                               |
| <b>Liabilities:</b>                 |                                |                                                 |                                                     |                                                 |
| Other long-term liabilities         | 6,197                          | 6,197                                           | —                                                   | —                                               |

In determining the fair value of its assets and liabilities, the Company predominately uses the market approach. In determining the fair value of its available-for-sale securities, the Company utilizes the Interactive Data Pricing service. Other securities are comprised of mutual fund investments, which are valued based on quoted market prices. Other long-term liabilities include the liability for the Company's non-qualified and unfunded deferred compensation plans, and are valued based on the quoted market prices for various mutual fund investment choices.

The preceding methods described may produce a fair value calculation that may not be indicative of net realizable value or reflective of future fair values. Furthermore, although the Company believes its valuation methods are appropriate and consistent with other market participants, the use of different methodologies or assumptions to determine the fair value of certain financial instruments could result in a different fair value measurement at the reporting date.

## NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

## A. Summary of Significant Accounting Policies (in part)

*Cash and Equivalents and Investments in Debt and Equity Securities (in part).* We consider securities with a maturity of three months or less to be cash equivalents. We report our investments in available-for-sale securities at fair value. Changes in the fair value of available-for-sale securities are recognized as a component of accumulated other comprehensive income within shareholders' equity on the Consolidated Balance Sheet. We report our held-to-maturity securities at amortized cost. The interest income on these securities is a component of our net interest expense in the Consolidated Statement of Earnings. We had marketable securities and other investments totaling \$482 on December 31, 2009, and \$325 on December 31, 2010. These investments are included in other current and noncurrent assets on the Consolidated Balance Sheet (see note D). We had no trading securities at the end of either period.

## D. Fair Value of Financial Instruments

Our financial instruments include cash and equivalents, marketable securities and other investments; accounts receivable and accounts payable; short- and long-term debt; and derivative financial instruments. We did not have any significant non-financial assets or liabilities measured at fair value on December 31, 2009 or 2010.

Fair value is defined as the price that would be received to sell an asset or paid to transfer a liability in the principal or most advantageous market in an orderly transaction between marketplace participants. Various valuation approaches can be used to determine fair value, each requiring different valuation inputs.

The following hierarchy classifies the inputs used to determine fair value into three levels:

- Level 1—quoted prices in active markets for identical assets or liabilities;
- Level 2—inputs, other than quoted prices, observable by a marketplace participant either directly or indirectly and
- Level 3—unobservable inputs significant to the fair value measurement.

The carrying values of cash and equivalents, accounts receivable and payable, and short-term debt (commercial paper) on the Consolidated Balance Sheet approximate their fair value. The following tables present the fair values of our other financial assets and liabilities on December 31, 2009 and 2010, and the basis for determining their fair values:

| Financial Assets (Liabilities) <sup>(b)</sup> | Carrying Value | Fair Value | Quoted Prices in Active Markets for Identical Assets (Level 1) | Significant Other Observable Inputs (Level 2) <sup>(a)</sup> |
|-----------------------------------------------|----------------|------------|----------------------------------------------------------------|--------------------------------------------------------------|
| <b>December 31, 2009</b>                      |                |            |                                                                |                                                              |

| Long-term debt, including current portion     | (3,203)        | (3,436)    | —                                                              | (3,436)                                                      |

<sup>(a)</sup> Determined under a market approach using valuation models that incorporate observable inputs such as interest rates, bond yields and quoted prices for similar assets and liabilities.

<sup>(b)</sup> We had no Level 3 financial instruments on December 31, 2009 or 2010.

## CURRENT RECEIVABLES

### PRESENTATION

**2.26** FASB ASC 310, *Receivables*, indicates that loans or trade receivables may be presented on the balance sheet as aggregate amounts. However, major categories of loans or trade receivables should be presented separately either in the balance sheet or notes to the financial statements. Also, any such receivables held for sale should be a separate balance sheet category. Receivables from officers, employees, or affiliated companies should be shown separately and not included under a general heading, such as “Accounts Receivable.” Valuation allowance for credit losses or doubtful accounts and any unearned income included in the face amount of receivables should be shown as a deduction from the related receivables.

### DISCLOSURE

**2.27** FASB ASC 310 states that allowances for doubtful accounts should be deducted from the related receivables and appropriately disclosed. FASB ASC 310-10-50-4 requires, as applicable, any unearned income, unamortized premiums and discounts, and net unamortized deferred fees and costs be disclosed in the financial statements. Under FASB ASC 825, fair value disclosure is not required for trade receivables when the carrying amount of the trade receivable approximates its fair value.

<sup>(\*)</sup> 2009 recast to reflect a change in accounting principle. See Note 2—Changes in Accounting Principles, for more information.

#### Loans and Long-Term Receivables

As part of our normal ongoing business operations and consistent with industry practice, we enter into numerous agreements with other parties to pursue business opportunities. Included in such activity are loans and long-term receivables to certain affiliated and non-affiliated companies. Loans are recorded when cash is transferred or seller financing is provided to the affiliated or non-affiliated company pursuant to a loan agreement. The loan balance will increase as interest is earned on the outstanding loan balance and will decrease as interest and principal payments are received. Interest is earned at the loan agreement's stated interest rate. Loans and long-term receivables are assessed for impairment when events indicate the loan balance may not be fully recovered.

At December 31, 2010, significant loans to affiliated companies include the following:

- \$653 million in loan financing to Freeport LNG Development, L.P. for the construction of an LNG receiving terminal that became operational in June 2008. Freeport began making repayments in 2008 and is required to continue making repayments through full repayment of the loan in 2026. Repayment by Freeport is supported by “process-or-pay” capacity service payments made by us to Freeport under our terminal use agreement.
- \$1,118 million of project financing and an additional \$96 million of accrued interest to Qatar Liquefied Gas Company Limited (3) (QG3), which is an integrated project to produce and liquefy natural gas from Qatar's North Field. We own a 30 percent interest in QG3, for which we use the equity method of accounting. The other participants in the project are affiliates of Qatar Petroleum (68.5 percent) and Mitsui & Co., Ltd. (1.5 percent). QG3 secured project financing of \$4.0 billion in December 2005, consisting of \$1.3 billion of loans from export credit agencies (ECA), \$1.5 billion from commercial banks, and \$1.2 billion from ConocoPhillips. The ConocoPhillips loan facilities have substantially the same terms as the ECA and commercial bank facilities. Prior to project completion certification, all loans, including the ConocoPhillips loan facilities, are guaranteed by the participants based on their respective

ownership interests. Accordingly, our maximum exposure to this financing structure is \$1.2 billion. Upon completion certification, which is expected in 2011, all project loan facilities, including the ConocoPhillips loan facilities, will become nonrecourse to the project participants. At December 31, 2010, QG3 had approximately \$4.0 billion outstanding under all the loan facilities. Bi-annual repayments began in January 2011 and will extend through July 2022.

- \$550 million of loan financing to WRB Refining LP to assist it in meeting its operating and capital spending requirements. We have certain creditor rights in case of default or insolvency.

The long-term portion of these loans are included in the "Loans and advances—related parties" line on the consolidated balance sheet, while the short-term portion is in "Accounts and notes receivable—related parties."

At September 30, 2010, the Varandey Terminal Company was no longer considered a related party. Accordingly, the long-term portion of this loan is included in the "Investments and long-term receivables" line of the consolidated balance sheet, while the short-term portion is in "Prepaid expenses and other current assets."

At December 31, 2010, significant long-term receivables and loans to non-affiliated companies included \$372 million related to seller financing of U.S. retail marketing assets. In January 2009, we closed on the sale of a large part of our U.S. retail marketing assets which included a five-year note to finance the sale of certain assets. The note is collateralized by the underlying assets related to the sale.

Long-term receivables and the long-term portion of these loans are included in the "Investments and long-term receivables" line on the consolidated balance sheet, while the short-term portion related to non-affiliate loans is in "Accounts and notes receivable."

#### NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

(Tabular dollars in thousands, except per share data)

##### 17. Finance Assets

##### Finance Receivables

Finance receivables are comprised of sales-type lease receivables and unsecured revolving loan receivables. Sales-type leases are generally due in monthly, quarterly or semi-

annual installments over periods ranging from three to five years. Loan receivables arise primarily from financing services offered to our customers for postage and related supplies. Loan receivables are generally due each month; however, customers may rollover outstanding balances. The components of sales-type lease and loan receivables at December 31, 2010 and 2009 were as follows:

|                                                | U.S.        | International | Total       |

### Credit Quality

We use credit scores as one of many data elements in making the decision to grant credit at inception, setting credit lines at inception, managing credit lines through the life of the customer, and to assist in collections strategy.

We use a third party to score the majority of the North American portfolio on a quarterly basis using a commercial credit score. Accounts may not receive a score because of data issues related to SIC information, customer identification mismatches between the various data sources and other reasons. We do not currently score the portfolios outside of North America because the cost to do so is prohibitive, it is a fragmented process and there is no single credit score model that covers all countries. However, credit policies are similar to those in North America.

The table below shows the portfolio at December 31, 2010 and December 31, 2009 by relative risk class (low, medium and high) based on the relative scores of the accounts within each class. A fourth class is shown for accounts that are not scored. The degree of risk, as defined by the third party, refers to the likelihood that an account in the next 12 month period

may become delinquent. Absence of a score is not indicative of the credit quality of the account.

- Low risk accounts are companies with very good credit risk
- Medium risk accounts are companies with average to good credit risk
- High risk accounts are companies with poor credit risk, are delinquent, or are at risk of becoming delinquent

Although the relative score of accounts within each class is used as a factor for determining the establishment of a customer credit limit, it is not indicative of our actual history of losses due to the business essential nature of our products and services.

The aging schedule included above, showing approximately 1.9% of the portfolio as greater than 90 days past due, and the roll-forward schedule of the allowance for credit losses, showing the actual history of losses for the three most recent years ended December 31, 2010 are more representative of the potential loss performance of our portfolio than relative risk based on scores, as defined by the third party.

**Pitney Bowes Bank**

At December 31, 2010, PBB had assets of \$675 million and liabilities of \$626 million. The bank's assets consist of finance receivables, short and long-term investments and cash. PBB's key product offering, Purchase Power, is a revolving credit solution, which enables customers to finance their postage costs when they refill their meter. PBB earns

revenue through transaction fees, finance charges on outstanding balances, and other fees for services. The bank's liabilities consist primarily of PBB's deposit solution, Reserve Account, which provides value to large-volume mailers who prefer to prepay postage and earn interest on their deposits. PBB is regulated by the Federal Deposit Insurance Corporation (FDIC) and the Utah Department of Financial Institutions.

### Leveraged Leases

Our investment in leveraged lease assets consists of the following:

|                                                  | December 31 |             |
|--------------------------------------------------|-------------|-------------|
|                                                  | 2010        | 2009        |
| Rental receivables                               | \$1,802,107 | \$1,747,811 |
| Unguaranteed residual values                     | 14,141      | 13,399      |
| Principal and interest on non-recourse loans     | (1,373,651) | (1,341,820) |
| Unearned income                                  | (191,591)   | (186,031)   |
| Investment in leveraged leases                   | 251,006     | 233,359     |
| Less: deferred taxes related to leveraged leases | (192,128)   | (175,329)   |
| Net investment in leveraged leases               | \$ 58,878   | \$ 58,030   |

The following is a summary of the components of income from leveraged leases:

|                                | December 31 |         |         |
|--------------------------------|-------------|---------|---------|
|                                | 2010        | 2009    | 2008    |
| Pre-tax leveraged lease income | \$8,334     | \$ 918  | \$ 316  |
| Income tax effect              | (863)       | 6,676   | 7,063   |
| Income from leveraged leases   | \$7,471     | \$7,594 | \$7,379 |

Income from leveraged leases was positively impacted by \$2.2 million, \$2.8 million and \$2.6 million in 2010, 2009 and 2008, respectively, due to changes in statutory tax rates.

#### NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

##### (4) Trade Receivables Securitization

The Company participates in the Securitization Agreement with three commercial banks to which it sells qualifying trade

receivables on a revolving basis. Upon its renewal in March 2010, the maximum amount of the facility was established at \$295 million, down from \$345 million at March 31, 2009. The Securitization Agreement expires in March 2012 and contains customary events of termination, including standard cross default provisions with respect to outstanding debt. During the year ended March 31, 2010, the Company sold approximately \$3.5 billion of trade receivables and remitted to bank conduits, pursuant to a servicing agreement, approximately \$3.5 billion in collections on those receivables. The amount of receivables sold under the securitization agreements was \$295 million at March 31, 2010 and \$311 million at March 31, 2009.

The transaction has been accounted for as a sale, as control of the receivables has been surrendered. Under the Securitization Agreement, trade receivables are sold to bank conduits through a bankruptcy-remote special purpose entity, which is consolidated for financial reporting purposes. The difference between the proceeds from the sale and the carrying value of the receivables is recognized as "Discount on securitization of trade receivables" in the accompanying Consolidated Statements of Earnings and varies on a monthly basis depending on the amount of trade receivables sold and market rates. The Company retains a subordinated interest in the trade receivables sold, which is recorded at the trade receivables' previous carrying value. Accordingly, the Company is exposed to credit risk associated with its retained interest in the trade receivables. The Company is not exposed to interest rate risk due to the short-term nature of the trade receivables and their general collectability.

Subordinated retained interests of approximately \$142 million, net of an allowance for doubtful accounts of \$23 million, and \$148 million, net of an allowance for doubtful accounts of \$26 million, are included in trade receivables in the accompanying Consolidated Balance Sheets at March 31, 2010 and 2009, respectively. At March 31, 2010 and 2009, approximately 2.8% and 6.4%, respectively, of the accounts included in the retained interest were delinquent, as defined under the Securitization Agreement. Credit losses for the years ended March 31, 2010 and 2009 were \$13 million and \$22 million, respectively. On a monthly basis, management calculates the fair value of the retained interest based on management's best estimate of the undiscounted expected future cash collections on the trade receivables. Changes in the fair value are recognized as bad debt expense. Actual cash collections may differ from these estimates and would directly affect the fair value of the retained interest. In accordance with the servicing agreement, the Company continues to service, administer and collect the trade receivables on behalf of the bank conduits. The servicing fees charged to the bank conduits approximate the costs of collections. Accordingly, the net servicing asset is immaterial. The Company does not provide any financial guarantees of the bank conduits' obligations.

On April 1, 2010, the Company adopted new guidance establishing revised standards on accounting for the transfers of financial assets. These standards apply to the Company's Securitization Agreement and effectively require the Company to recognize the trade receivables sold under the Securitization Agreement and the related proceeds as debt on its Consolidated Balance Sheet. The Securitization Agreement will be reflected as such on the Company's Consolidated Balance Sheet for the fiscal quarter ending on June 30, 2010.

##### NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

##### Note A—Summary of Significant Accounting Policies (in part)

##### Insurance and Legal Claims

The Company has, and requires the majority of the subcontractors it uses to have, general liability insurance which includes construction defect coverage. The Company's general liability insurance policies protect it against a portion of its risk of loss from construction defect and other claims and lawsuits, subject to self-insured retentions and other coverage limits. For policy years ended June 30, 2004 through 2010, the Company is self-insured for up to \$22.5 million of the aggregate claims incurred, at which point the excess loss insurance begins, depending on the policy year. Once the Company has satisfied the annual aggregate limits, it is self-insured for the first \$250,000 to \$1.0 million for each claim occurrence, depending on the policy year. For policy years 2010 and 2011, the Company is self-insured for up to \$20.0 million and \$15.0 million, respectively, of the aggregate claims incurred and for up to \$0.5 million of each claim occurrence thereafter.

In some states where the Company believes it is too difficult or expensive for its subcontractors to obtain general liability insurance, the Company has waived its traditional subcontractor general liability insurance requirements to obtain lower costs from subcontractors. In these states, the Company purchases insurance policies from either third-party carriers or its wholly-owned captive insurance subsidiary, and names certain subcontractors as additional insureds. The policies issued by the captive insurance subsidiary represent self insurance of these risks by the Company and are considered in the self-insured amounts above. For policy years after April 2007, the captive insurance subsidiary has acquired \$15.0 million of reinsurance coverage with a third-party insurer.

The Company is self-insured for the deductible amounts under its workers' compensation insurance policies. The deductibles vary by policy year, but in no years exceed \$0.5 million per occurrence. The deductible for the 2010 and 2011 policy years was \$0.5 million per occurrence.

The Company records expenses and liabilities related to the costs for exposures related to construction defects and claims and lawsuits incurred in the ordinary course of business, including employment matters, personal injury claims, land development issues and contract disputes. Also, the Company records expenses and liabilities for any estimated costs of potential construction defect claims and lawsuits (including expected legal costs), based on an analysis of the Company's historical claims, which includes an estimate of construction defect claims incurred but not yet reported. Related to the exposures for actual construction defect claims and estimates of construction defect claims incurred but not yet reported and other legal claims and lawsuits incurred in the ordinary course of business, the Company estimates and records insurance receivables for these matters under applicable insurance policies when recovery is probable. Additionally, the Company may have the ability to recover a portion of its legal expenses from its subcontractors when the Company has been named as an additional insured on their insurance policies. The expenses, liabilities and receivables related to these claims are subject to a high degree of variability due to uncertainties such as trends in construction defect claims relative to the Company's markets, the types of products it builds, claim settlement patterns, insurance industry practices and legal interpretations, among others. See Note M.

##### Note M—Commitments and Contingencies (in part)

##### Insurance and Legal Claims

The Company has been named as defendant in various claims, complaints and other legal actions including construction defect claims on closed homes and other claims and lawsuits incurred in the ordinary course of business, including employment matters, personal injury claims, land development issues, contract disputes and claims related to its mortgage activities. The Company has established reserves for these contingencies, based on the expected costs of the claims. The Company's estimates of such reserves are based on the facts and circumstances of individual pending claims and historical data and trends, including costs relative to revenues, home closings and product types, and include estimates of the costs of construction defect claims incurred but not yet reported. These reserve estimates are subject to ongoing revision as the circumstances of individual pending claims and historical data and trends change. Adjustments to

estimated reserves are recorded in the accounting period in which the change in estimate occurs. The Company's liabilities for these items were \$571.3 million and \$534.0 million at September 30, 2010 and 2009, respectively, and are included in homebuilding accrued expenses and other liabilities in the consolidated balance sheets. Related to the contingencies for construction defect claims and estimates of construction defect claims incurred but not yet reported, and other legal claims and lawsuits incurred in the ordinary course of business, the Company estimates and records insurance receivables for these matters under applicable insurance policies when recovery is probable. Additionally, the Company may have the ability to recover a portion of its legal expenses from its subcontractors when the Company has been named as an additional insured on their insurance policies. Estimates of the Company's insurance receivables related to these matters totaled \$251.5 million and \$234.6 million at September 30, 2010 and 2009, respectively, and are included in homebuilding other assets in the consolidated balance sheets. Expenses related to these items were approximately \$43.2 million, \$58.3 million and \$53.8 million in fiscal 2010, 2009 and 2008, respectively.

Management believes that, while the outcome of such contingencies cannot be predicted with certainty, the liabilities arising from these matters will not have a material adverse effect on the Company's consolidated financial position, results of operations or cash flows. To the extent the liability arising from the ultimate resolution of any matter exceeds management's estimates reflected in the recorded reserves relating to these matters, the Company would incur additional charges that could be significant.

*Note N — Other Assets and Accrued Expenses and Other Liabilities (in part)*

The Company's homebuilding other assets at September 30, 2010 and 2009 were as follows:

|                               | <b>September 30</b> |                |

##### NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

(dollars in millions, except share data)

##### Note 1—Summary of Significant Accounting Policies (in part)

##### Receivables, Net (in part)

Receivables consist of the following at the end of 2010 and 2009:

|                                        | <b>2010</b>  | <b>2009</b>  |
|----------------------------------------|--------------|--------------|
| Vendor receivables, and other          | \$448        | \$418        |
| Reinsurance receivables                | 196          | 169          |
| Other receivables                      | 103          | 82           |
| Third-party pharmacy receivables       | 75           | 73           |
| Receivables from governmental entities | 64           | 95           |
| Allowance for doubtful accounts        | (2)          | (3)          |
| Receivables, net                       | <b>\$884</b> | <b>\$834</b> |

Vendor receivable balances are generally presented on a gross basis separate from any related payable due. In certain circumstances, these receivables may be settled against the related payable to that vendor.

##### Vendor Receivables and Allowances

Periodic payments from vendors in the form of volume rebates or other purchase discounts that are evidenced by signed agreements are reflected in the carrying value of the inventory when earned or as the Company progresses towards earning the rebate or discount and as a component of merchandise costs as the merchandise is sold. Other consideration received from vendors is generally recorded as a reduction of merchandise costs upon completion of contractual milestones, terms of the related agreement, or by other systematic approach.

## RECEIVABLES SOLD OR COLLATERALIZED

### RECOGNITION AND MEASUREMENT

**2.33** FASB ASC 860, *Transfers and Servicing*, establishes criteria for determining whether a transfer of financial assets in exchange for cash or other consideration should be accounted for as a sale or pledge of collateral in a secured borrowing. FASB ASC 860 also establishes the criteria for accounting for securitizations and other transfers of financial assets and collateral and requires certain disclosures.

**2.34** FASB ASC 860 requires that all separately recognized servicing assets and liabilities be initially measured at fair value. Further, FASB ASC 860 permits, but does not require, the subsequent measurement of servicing assets and liabilities at fair value.

**2.35** ASU No. 2009-16, *Transfers and Servicing (Topic 860): Accounting for Transfers of Financial Assets*, eliminated the exceptions for qualifying special-purpose entities from the consolidation guidance. Further, ASU No. 2009-16 provides clarifications of the requirements for isolation and limitations on portions of financial assets that are eligible for sale accounting. ASU No. 2009-16 was effective for fiscal years beginning after November 15, 2009.

### DISCLOSURE

**2.36** FASB ASC 860 requires additional disclosures and separate balance sheet presentation of the carrying amounts of servicing assets and liabilities that are subsequently measured at fair value. ASU No. 2009-16 requires enhanced disclosures about (a) the risks that a transferor continues to be exposed to because of its continuing involvement in transferred financial assets and (b) any restrictions on the assets of the entity.

The Company utilizes receivable securitization facilities in the normal course of business as part of its management of cash flows. Under its committed \$200 North American facility, the Company sells receivables, on a revolving basis, to a wholly-owned, bankruptcy-remote subsidiary. The subsidiary was formed for the sole purpose of buying and selling receivables generated by the Company and, in turn, sells undivided percentage ownership interests in the pool of purchased receivables to a syndicate of financial institutions. The Company generally retains an ownership interest in the pool of receivables that is subordinated to the ownership interests in the pool of receivables that are sold to third parties. Accordingly, the Company has determined that these transactions do not qualify for sale accounting and has therefore accounted for the transactions as secured borrowings.

Under the Company's committed €120 European securitization facility, certain subsidiaries in the U.K. and France sell receivables to an entity formed in France for the sole purpose of buying receivables from the selling subsidiaries. The buying entity finances the purchase of receivables through the issuance of senior units to a third party. Since the units issued to the third party are senior to the interests retained by the Company, the Company has determined that these transactions do not qualify for sale accounting and has therefore accounted for the transactions as secured borrowings.

In addition, the Company utilizes receivables factoring arrangements in the normal course of business as part of managing cash flows for its European operations. Under the arrangements, the Company sells its entire interest in specified receivables to various third parties. Where the Company has surrendered control over factored receivables, the Company has accounted for the transfers as sales.

The Company's continuing involvement in factored receivables accounted for as sales is limited to servicing the receivables. The Company receives adequate compensation for servicing the receivables; therefore, no servicing asset or liability was recorded.

At December 31, 2010, the Company's Consolidated Balance Sheet included \$208 of receivables that were securitized or factored and \$208 of associated liabilities. In addition, at December 31, 2010, the Company derecognized receivables of \$210 related to factoring arrangements accounted for as sales. At December 31, 2009, receivables of \$392 securitized or factored under the Company's facilities were accounted for as sales and reported as a reduction of receivables in the Company's Consolidated Balance Sheet.

In 2010, 2009 and 2008, the Company recorded expenses related to securitization and factoring facilities of \$10, \$10 and \$23 as interest expense, respectively.

Collections from customers on securitized or factored receivables and related fees and costs are included in operating activities in the Consolidated Statements of Cash Flows. Proceeds and repayments from issuances of ownership interests in the consolidated entity that buys and sells the Company's receivables under its securitization facilities as well as amounts received from factors for transactions that do not qualify for sale accounting are included in financing activities in the Consolidated Statements of Cash Flows.

#### NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

##### 5. Long-Term Debt, Short-Term Debt, and Financing Arrangements (in part)

**Accounts Receivable Securitization.** We also securitize some of our accounts receivable on a limited recourse basis in North America and Europe. As servicer under these accounts receivable securitization programs, we are responsible for performing all accounts receivable administration functions for these securitized financial assets including collections and processing of customer invoice adjustments. In North America, we have an accounts receivable securitization program with three commercial banks. We securitize original equipment and aftermarket receivables on a daily basis under the bank program. We had no outstanding third party investments in our securitized accounts receivable bank program as of December 31, 2010 and \$62 million at December 31, 2009. In February 2010, the North American program was amended and extended to February 18, 2011, at a maximum facility size of \$100 million. As part of this renewal, the margin we pay to our banks decreased. In March 2010, the North American program was further amended to extend the revolving terms of the program to March 25, 2011, add an additional bank and increase the available financing under the facility by \$10 million to a new maximum of \$110 million. In addition, we added a second priority facility to the North American program, which provides up to an additional \$40 million of financing against accounts receivable generated in the U.S. or Canada that would otherwise be ineligible under

the existing securitization facility. This new second priority facility also expires on March 25, 2011, and is subordinated to the existing securitization facility.

Each facility contains customary covenants for financings of this type, including restrictions related to liens, payments, mergers or consolidation and amendments to the agreements underlying the receivables pool. Further, each facility may be terminated upon the occurrence of customary events (with customary grace periods, if applicable), including breaches of covenants, failure to maintain certain financial ratios, inaccuracies of representations and warranties, bankruptcy and insolvency events, certain changes in the rate of default or delinquency of the receivables, a change of control and the entry or other enforcement of material judgments. In addition, each facility contains cross-default provisions, where the facility could be terminated in the event of non-payment of other material indebtedness when due and any other event which permits the acceleration of the maturity of material indebtedness.

We also securitize receivables in our European operations with regional banks in Europe. The amount of outstanding third party investments in our securitized accounts receivable in Europe was \$91 million and \$75 million at December 31, 2010 and December 31, 2009, respectively. The arrangements to securitize receivables in Europe are provided under seven separate facilities provided by various financial institutions in each of the foreign jurisdictions. The commitments for these arrangements are generally for one year, but some may be cancelled with notice 90 days prior to renewal. In some instances, the arrangement provides for cancellation by the applicable financial institution at any time upon 15 days, or less, notification.

If we were not able to securitize receivables under either the North American or European securitization programs, our borrowings under our revolving credit agreements might increase. These accounts receivable securitization programs provide us with access to cash at costs that are generally favorable to alternative sources of financing, and allow us to reduce borrowings under our revolving credit agreements.

We adopted the amended accounting guidance under ASC Topic 860, Accounting for Transfers of Financial Assets effective January 1, 2010. Prior to the adoption of this new guidance, we accounted for activities under our North American and European accounts receivable securitization programs as sales of financial assets to our banks. The new accounting guidance changed the conditions that must be met for the transfer of financial assets to be accounted for as a sale. The new guidance adds additional conditions that must be satisfied for transfers of financial assets to be accounted for as sales when the transferor has not transferred the entire original financial asset, including the requirement that no partial interest holder have rights in the transferred asset that are subordinate to the rights of other partial interest holders. In our North American accounts receivable securitization programs we transfer a partial interest in a pool of receivables and the interest that we retain is subordinate to the transferred interest. Accordingly, beginning January 1, 2010, we account for our North American securitization program as a secured borrowing. In our European programs we transfer accounts receivables in their entirety to the acquiring entities and satisfy all of the conditions established under amended ASC Topic 860 to report the transfer of financial assets in their entirety as a sale. The fair value of assets received as proceeds in exchange for the transfer of accounts receivable under our European securitization programs approximates

the fair value of such receivables. We recognized \$4 million in interest expense in 2010 relating to our North American securitization program which effective January 1, 2010, is accounted for as a secured borrowing arrangement under the amended accounting guidance for transfers of financial assets. In addition, we recognized a loss of \$3 million, \$9 million and \$10 million for the years ended 2010, 2009 and 2008, respectively, on the sale of trade accounts receivable in both the North American and European accounts receivable securitization programs, representing the discount from book values at which these receivables were sold to our banks. The discount rate varies based on funding costs incurred by our banks, which averaged approximately four percent during 2010.

The impact of the new accounting rules on our consolidated financial statements includes an increase of \$4 million in interest expense and a corresponding decrease in loss on sale of receivables on our income statement in 2010. In 2010, there was no cash flow impact as a result of the new accounting rules. Funding levels provided by our European securitization programs continue to be reflected as a change in receivables and included in net cash provided (used) by operating activities as under the previous accounting rules. Had the new accounting rules been in effect prior to 2010, reported receivables and short-term debt would both have been \$62 million higher as of December 31, 2009. The loss on sale of receivables would have been \$5 million lower, offset by a corresponding \$5 million increase to interest expense for 2009. The loss on sales of receivables would have been \$4 million lower, offset by a corresponding \$4 million increase to interest expense for 2008. Additionally, our cash provided (used) by operations would have decreased by \$62 million with a corresponding increase in cash provided by financing activities for the same amount for 2009.

## NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

### B. Accounts and Financing Receivable

| (Millions of dollars)                 | 2010      | 2009    |
|---------------------------------------|-----------|---------|
| Trade accounts receivable             | \$1,333.2 | \$486.4 |
| Trade notes receivable                | 61.9      | 45.7    |
| Other accounts receivables            | 78.3      | 31.8    |
| Gross accounts and notes receivable   | 1,473.4   | 563.9   |
| Allowance for doubtful accounts       | (56.3)    | (31.9)  |
| Accounts and notes receivable, net    | \$1,417.1 | \$532.0 |
| Long-term trade notes receivable, net | \$ 114.9  | \$ 93.2 |

Trade receivables are dispersed among a large number of retailers, distributors and industrial accounts in many countries. Adequate reserves have been established to cover anticipated credit losses. Long-term trade financing receivables are reported within Other assets in the Consolidated Balance Sheets. Financing receivables and long-term financing receivables are predominately related to certain security equipment leases with commercial businesses. Generally, the Company retains legal title to any equipment leases and bears the right to repossess such equipment in an event of default. All financing receivables are interest bearing and the Company has not classified any financing receivables as held-for-sale.

In December 2009, the Company entered into an accounts receivable sale program that was scheduled to expire on December 28, 2010. On December 13, 2010, the Company extended the term of that program for one year and the program is now scheduled to expire on December 12, 2011. According to the terms of that program the Company is required to sell certain of its trade accounts receivables at fair value to a wholly owned, bankruptcy-remote special purpose subsidiary ("BRS"). The BRS, in turn, must sell such receivables to a third-party financial institution ("Purchaser") for cash and a deferred purchase price receivable. The Purchaser's maximum cash investment in the receivables at any time is \$100.0 million. The purpose of the program is to provide liquidity to the Company. The Company accounts for these transfers as sales under ASC 860 "Transfers and Servicing." The Company has no retained interests in the transferred receivables, other than collection and administrative responsibilities and its right to the deferred purchase price receivable. At January 1, 2011 the Company did not record a servicing asset or liability related to its retained responsibility, based on its assessment of the servicing fee, market values for similar transactions and its cost of servicing the receivables sold.

As of January 1, 2011 and January 2, 2010, \$31.5 million and \$35.2 million of net receivables were derecognized. Gross receivables sold amounted to \$552.1 million (\$492.9 million, net) for the year ended January 1, 2011. These sales resulted in a pre-tax loss of \$1.4 million for the year ended January 1, 2011. Proceeds from transfers of receivables to the Purchaser totaled \$495.3 million for the year ended January 1, 2011. Collections of previously sold receivables, including deferred purchase price receivables, and all fees, which are settled one month in arrears, resulted in payments to the Purchaser of \$498.8 million for the year ended January 1, 2011. Servicing fees amounted to \$0.3 million for the year ended January 1, 2011. The Company's risk of loss following the sale of the receivables is limited to the deferred purchase price, which was \$13.8 million at January 1, 2011 and \$17.7

million at January 2, 2010. The deferred purchase price receivable will be repaid in cash as receivables are collected, generally within 30 days, and as such the carrying value of the receivable recorded approximates fair value. Delinquencies and credit losses on receivables sold in 2010 were less than \$0.2 million for the year ended January 1, 2011. Cash inflows related to the deferred purchase price receivable totaled \$174.4 million for the year ended January 1, 2011. All cash flows under the program are reported as a component of changes in accounts receivable within operating activities in the consolidated statements of cash flows since all the cash from the Purchaser is either: 1) received upon the initial sale of the receivable; or 2) from the ultimate collection of the underlying receivables and the underlying receivables are not subject to significant risks, other than credit risk, given their short-term nature.

## NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

(Amounts in thousands, except per share data)

### (5) Trade Accounts Receivable (in part)

#### Sales of Accounts Receivable

The Company has entered into agreements to sell selected trade accounts receivable to financial institutions. After the sale, the Company does not retain any interests in the receivables and the applicable financial institution services and collects these accounts receivable directly from the customer. Net proceeds of these accounts receivable sale programs are recognized in the Consolidated Statements of Cash Flows as part of operating cash flows. The Company recognized

funding fees of \$3,464 and \$163 in 2010 and 2009, respectively, for sales of accounts receivable to financial institutions in the "Other expenses" line in the Consolidated Statements of Income.

## NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

### 10. Credit Card Receivables (in part)

As a method of providing funding for our credit card receivables, we sell on an ongoing basis all of our consumer credit card receivables to Target Receivables Corporation (TRC), a wholly owned, bankruptcy remote subsidiary. TRC then transfers the receivables to the Target Credit Card Master Trust (the Trust), which from time to time will sell debt securities to third parties either directly or through a related trust. These debt securities represent undivided interests in the Trust assets. TRC uses the proceeds from the sale of debt securities and its share of collections on the receivables to pay the purchase price of the receivables to the Corporation.

We consolidate the receivables within the Trust and any debt securities issued by the Trust, or a related trust, in our Consolidated Statements of Financial Position based upon the applicable accounting guidance. The receivables transferred to the Trust are not available to general creditors of the Corporation. The payments to the holders of the debt securities issued by the Trust or the related trust are made solely from the assets transferred to the Trust or the related trust and are nonrecourse to the general assets of the Corporation. Upon termination of the securitization program and repayment of all debt securities, any remaining assets could be distributed to the Corporation in a liquidation of TRC.

In the second quarter of 2008, we sold an interest in our credit card receivables to JPMC. The interest sold represented 47 percent of the receivables portfolio at the time of the transaction. This transaction was accounted for as a secured borrowing, and accordingly, the credit card receivables within the Trust and the note payable issued are reflected in our Consolidated Statements of Financial Position. Notwithstanding this accounting treatment, the accounts receivable assets that collateralize the note payable supply the cash flow to pay principal and interest to the note holder; the receivables are not available to general creditors of the Corporation; and the payments to JPMC are made solely from the Trust and are nonrecourse to the general assets of the Corporation. Interest and principal payments due on the note are satisfied provided the cash flows from the Trust assets are sufficient. If the cash flows are less than the periodic interest, the available amount, if any, is paid with respect to interest. Interest shortfalls will be paid to the extent subsequent cash flows from the assets in the Trust are sufficient. Future principal payments will be made from JPMC's prorata share of cash flows from the Trust assets.

In the event of a decrease in the receivables principal amount such that JPMC's interest in the entire portfolio would exceed 47 percent for three consecutive months, TRC (using the cash flows from the assets in the Trust) would be required to pay JPMC a prorata amount of principal collections such that the portion owned by JPMC would not exceed 47 percent, unless JPMC provides a waiver. Conversely, at the option of the Corporation, JPMC may be required to fund an increase in the portfolio to maintain their 47 percent interest up to a maximum JPMC principal balance of \$4.2 billion. If a three-month average of monthly finance charge excess (JPMC's prorata share of finance charge collections less write-offs and specified expenses) is less than 2 percent of the outstanding principal balance of JPMC's interest, the Corporation must implement mutually agreed upon underwriting strategies. If the three-month average finance charge excess falls below 1 percent of the outstanding principal balance

of JPMC's interest, JPMC may compel the Corporation to implement underwriting and collections activities, provided those activities are compatible with the Corporation's systems, as well as consistent with similar credit card receivable portfolios managed by JPMC. If the Corporation fails to implement the activities, JPMC would cause the accelerated repayment of the note payable issued in the transaction. As noted in the preceding paragraph, payments would be made solely from the Trust assets.

#### 19. Notes Payable and Long-Term Debt (in part)

As further explained in Note 10, we maintain an accounts receivable financing program through which we sell credit card receivables to a bankruptcy remote, wholly owned subsidiary, which in turn transfers the receivables to a Trust. The Trust, either directly or through related trusts, sells debt securities to third parties. The following summarizes this activity for fiscal 2008 and 2009.

| Nonrecourse Debt Collateralized by Credit Card Receivables (millions) | Amount  |
|-----------------------------------------------------------------------|---------|
| At February 2, 2008                                                   | \$2,400 |
| Issued, net of \$268 discount                                         | 3,557   |
| Accretion <sup>(a)</sup>                                              | 33      |
| Repaid                                                                | (500)   |
| At January 31, 2009                                                   | 5,490   |
| Issued                                                                | —       |
| Accretion <sup>(a)</sup>                                              | 48      |
| Repaid                                                                | (163)   |
| At January 30, 2010                                                   | \$5,375 |

<sup>(a)</sup> Represents the accretion of the 7 percent discount on the 47 percent interest in credit card receivables sold to JPMC.

Other than debt backed by our credit card receivables and other immaterial borrowings, all of our outstanding borrowings are senior, unsecured obligations.

## INVENTORY

### RECOGNITION AND MEASUREMENT

**2.43** FASB ASC 330, *Inventory*, states that the primary basis of accounting for inventories is cost, but a departure from the cost basis of pricing the inventory is required when the utility of the goods is no longer as great as their cost.

**2.44** FASB ASC 330-10-35-14 states that if inventories are written down below cost at the close of a fiscal year, such reduced amount is to be considered the cost for subsequent accounting purposes. Similarly, the Topic 5(BB), "Inventory Valuation Allowances," of the SEC's *Codification of Staff Accounting Bulletins* indicates that a write-down of inventory creates a new cost basis that subsequently cannot be marked up.

## PRESENTATION

**2.45** Rule 5-02.6 of Regulation S-X requires separate presentation in the balance sheet or notes of the amounts of major classes of inventory, such as finished goods, work in process, raw materials, and supplies. Additional disclosures are required for amounts related to long-term contracts or programs.

## DISCLOSURE

**2.46** FASB ASC 330 requires disclosure of the basis for stating inventories. Rule 5-02.6 of Regulation S-X requires disclosure of the method by which amounts are removed from inventory (for example, average cost; first in, first out (FIFO); last in, first out (LIFO); estimated average cost per unit). Table 2-4 summarizes the methods used by the survey entities to determine inventory costs and indicates the portion of inventory cost determined by LIFO.

**2.47** Rule 5-02.6c of Regulation S-X requires that registrants using LIFO disclose the excess of replacement or current cost over stated LIFO value, if material. 325 survey entities disclosed the effect of income from using LIFO, rather than FIFO or average cost, to determine inventory cost.

*NOTES TO CONSOLIDATED FINANCIAL STATEMENTS**1. Business and Summary of Accounting Policies (in part)**Merchandise Inventories*

Merchandise inventories are valued at the lower of cost or market with cost determined on the first-in, first-out ("FIFO") basis using the retail inventory method ("RIM"). Under RIM, the valuation of inventory at cost and the resulting gross margins are calculated by applying a cost-to-retail ratio to the retail value inventory. RIM is an averaging method that has been widely used in the retail industry due to its practicality. The use of RIM will result in inventory being valued at the lower of cost or market since permanent markdowns are currently taken as a reduction of the retail value of inventory. We record an additional reserve when the future estimated selling price is less than cost.

*NOTES TO CONSOLIDATED FINANCIAL STATEMENTS**Note 1. Summary of Accounting Policies (in part)*

*Inventories:* Snap-on values its inventory at the lower of cost or market and adjusts for the value of inventory that is estimated to be excess, obsolete or otherwise unmarketable. Snap-on records allowances for excess and obsolete inventory based on historical and estimated future demand and market conditions. Allowances for raw materials are largely based on an analysis of raw material age and actual physical inspection of raw material for fitness for use. As part of evaluating the adequacy of allowances for work-in-progress and finished goods, management reviews individual product stock-keeping units (SKUs) by product category and product life cycle. Cost adjustments for each product category/product life-cycle state are generally established and maintained based on a combination of historical experience, forecasted sales and promotions, technological obsolescence, inventory age and other actual known conditions and circumstances. Should actual product marketability and raw material fitness for use be affected by conditions that are different from management estimates, further adjustments to inventory allowances may be required.

Snap-on adopted the "last-in, first-out" ("LIFO") inventory valuation method in 1973 for its U.S. locations. Snap-on's U.S. inventories accounted for on a LIFO basis consist of purchased product and inventory manufactured at the company's heritage U.S. manufacturing facilities (primarily hand tools and tool storage). As Snap-on began acquiring businesses in the 1990's, the company retained the "first-in, first-out" ("FIFO") inventory valuation methodology used by the predecessor businesses prior to their acquisition by Snap-on; the company does not adopt the LIFO inventory valuation

methodology for new acquisitions. See Note 4 for further information on inventories.

#### Note 4. Inventories

Inventories by major classification as of 2010 and 2009 year end are as follows:

| (Amounts in millions)                 | 2010    | 2009    |
|---------------------------------------|---------|---------|
| Finished goods                        | \$308.7 | \$254.3 |
| Work in progress                      | 25.0    | 28.3    |
| Raw materials                         | 64.1    | 60.5    |
| Total FIFO value                      | 397.8   | 343.1   |
| Excess of current cost over LIFO cost | (68.4)  | (68.4)  |
| Total inventories—net                 | \$329.4 | \$274.7 |

Inventories accounted for using the FIFO method as of 2010 and 2009 year end approximated 64% and 66%, respectively, of total inventories. The company accounts for its non-U.S. inventory on the FIFO method. As of 2010 year end, approximately 27% of the company's U.S. inventory was accounted for using the FIFO method and 73% was accounted for using the LIFO method. LIFO inventory liquidations resulted in a reduction of "Cost of goods sold" on the accompanying Consolidated Statements of Earnings of \$9.5 million in 2009; there were no LIFO inventory liquidations in 2010 or 2008.

## NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

### Note 4—Inventories

Inventories were stated at the lower of cost or market with cost determined principally on the last-in, first-out (LIFO) method. The following presents the effect on inventories, net income and net income per common share had the Company used the first-in, first-out (FIFO) inventory valuation method adjusted for income taxes at the statutory rate and assuming no other adjustments. Management believes that the use of LIFO results in a better matching of costs and revenues. This information is presented to enable the reader to make comparisons with companies using the FIFO method of inventory valuation. During 2009, certain inventories accounted for on the LIFO method were reduced, resulting in the liquidation of certain quantities carried at costs prevailing in prior years. The impact on Net income of such liquidations was \$8,634.

## NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

(In thousands except share and per share data)

### 1. Summary of Significant Accounting Policies (in part)

#### Merchandise Inventories

For financial reporting and tax purposes, merchandise inventories are determined by the retail method. As of January 30, 2010 and January 31, 2009, approximately 32% of the Company's merchandise inventories were valued using a first-in, first-out ("FIFO") cost basis and approximately 68% of merchandise inventories were valued using a last-in, first-out ("LIFO") cost basis. There was no effect on costs

of merchandise sold for LIFO valuations in 2009, 2008 and 2007. If the FIFO method of inventory valuation had been used for all inventories, the Company's merchandise inventories would have been lower by \$6,837 at January 30, 2010 and January 31, 2009.

Costs for merchandise purchases, product development and distribution are included in costs of merchandise sold.

| Total assets                            | \$12,581 | \$12,011 |

#### NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

##### 1) Nature of Operations and Summary of Significant Accounting Policies (in part)

##### Use of Estimates

The preparation of financial statements, in conformity with generally accepted accounting principles in the United States of America (GAAP), requires us to make assumptions and use estimates that affect the reported amounts of assets and liabilities and disclosure of contingent liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. The most significant estimates relate to: inventory valuation under the retail method, specifically permanent reductions to retail prices (markdowns) and adjustments for shortages (shrinkage); valuation of long-lived assets; valuation allowances and reserves for workers' compensation and general liability, environmental contingencies, income taxes and litigation; and pension accounting. While actual results could differ from these estimates, we do not expect the differences, if any, to have a material effect on the consolidated financial statements.

##### Merchandise Inventory

In the fourth quarter of 2009, we elected to change our method of valuing inventory to the FIFO method from the LIFO method. We believe that the FIFO method is preferable as it better reflects current and future operations with respect to the sourcing of merchandise, more accurately reflects the current value of our inventory presented in our con-

solidated balance sheet, and provides a better matching of cost of goods sold with revenue. The cumulative effect of the change was a \$1.8 million increase to gross margin recorded in the fourth quarter of 2009. The change was not applied retrospectively to prior periods, as the effect of the change was immaterial to the consolidated financial statements of all prior periods, including interim periods.

The table below presents the results, in the period of the change, with and without the change in accounting principle on inventory and cost of sales.

| (\$ in millions)      | Determined by |             |
|-----------------------|---------------|-------------|
|                       | LIFO Method   | FIFO Method |
| January 30, 2010      |               |             |
| Merchandise inventory | \$ 2,999      | \$ 3,024    |
| Cost of goods sold    | \$10,671      | \$10,646    |

For the year ended January 30, 2010, without the accounting change, income from continuing operations before income taxes would have been \$23 million lower, net income would have been \$14 million lower and EPS would have been \$0.06 lower; however, this would not have been reflective of our 2009 operating results, as described above.

Inventories are valued at the lower of cost or market. For department stores, regional warehouses and store distribution centers, we value inventories using the retail method. Lower of cost or market for Direct (Internet/catalog) is determined by standard cost, representing average vendor cost.

## NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

### Note 1. Description of Business and Summary of Significant Accounting Policies (in part)

#### Inventories

Inventory is valued at standard cost, which approximates actual cost computed on a first-in, first-out basis, not in excess of net realizable market value. The Company assesses the valuation on a quarterly basis and writes down the value for estimated excess and obsolete inventory based upon estimates of future demand, including warranty requirements.

### Note 5. Balance Sheet and Other Details (in part)

#### Inventories

Inventories are stated at the lower of cost or market, and include material, labor, and manufacturing overhead costs. The components of inventories were as follows (in millions):

|                                   | Years Ended     |                  |
|-----------------------------------|-----------------|------------------|
|                                   | July 3,<br>2010 | June 27,<br>2009 |
| Deferred cost of sales            | \$ 17.0         | \$ 11.5          |
| Finished goods                    | 43.7            | 52.3             |
| Work in process                   | 25.4            | 33.6             |
| Raw materials and purchased parts | 39.6            | 47.4             |
| Total inventories                 | \$125.7         | \$144.8          |

During fiscal 2010, 2009, and 2008, the Company recorded write-downs of inventories of \$14.6 million, \$12.9 million, and \$24.6 million respectively.

The Company also sold previously written-down inventories of \$10.4 million, \$13.8 million, and \$17.2 million during fiscal 2010, 2009, and 2008, respectively. In addition, the Company has an active scrap program and typically disposes of inventory that has been written down through the use of scrap dealers or physical disposal/destruction. During fiscal 2010, 2009, and 2008, the Company scrapped \$5.8 million, \$38.5 million, and \$31.2 million of previously written-down inventory, respectively.

The inventory write-downs were predominantly the result of changes in forecasted customer demand and technological changes in the Company's products. The majority of the inventory written down consisted of raw material and finished goods. The major elements of the written down raw material consists of components and items that had not entered into production. The finished goods inventory includes the cost of raw material inputs, labor, and overhead.

The Company operates in markets with relatively few customers and has historically experienced variability in product demand driven by the buying behavior of these customers. In addition, the Company's products utilize long-lead time parts which are available from a limited set of vendors. The

combined effects of a limited customer base, variability of demand among the customer base and significant long-lead time or single sourced materials has historically contributed to significant inventory write-downs. The Company routinely reviews inventory for usage potential, including fulfillment of customer warranty obligations and spare part requirements. The Company writes down to zero the value of excess and obsolete ("E&O") inventory that is not expected to be consumed through operations generally within 12 months. Excess is written down to zero value in large part due to the Company's history of changes in customer demand and inherent product obsolescence concerns.

For any written down inventory items retained, the Company evaluates the future realizable value of inventories and impact on gross margins, taking into consideration product life cycles, technological and product changes, demand visibility and other market conditions. The Company believes its current process for writing down inventory appropriately balances the risk in the marketplace with a fair representation of the realizable value of the Company's inventory.

## OTHER CURRENT ASSETS

### PRESENTATION

**2.55** Rule 5-02.8 of Regulation S-X requires that any amounts in excess of 5 percent of total current assets be stated separately on the balance sheet or disclosed in the notes.

*NOTES TO CONSOLIDATED FINANCIAL STATEMENTS**7. Income Taxes (in part)*

Deferred tax assets and liabilities result from differences in the bases of assets and liabilities for tax and financial statement purposes. The approximate tax effect of each type of temporary difference and carryforward that gives rise to a significant portion of the deferred tax assets and liabilities follows:

|                                                          | <b>As of December 31</b> |             |

| Long-term deferred assets                                            | <u>\$ (26,115)</u> | <u>\$ (17,679)</u> |
| Deferred liabilities (long-term):                                    |                    |                    |
| Depreciation                                                         | 2,436              | 2,467              |
|                                                                      | <u>\$ 2,436</u>    | <u>\$ 2,467</u>    |
| Net deferred tax assets                                              | <u>\$ (26,979)</u> | <u>\$ (20,382)</u> |

As of June 26, 2010 and June 27, 2009, the net long-term deferred tax asset and deferred tax liability respectively, on the balance sheet are as follows:

|                       | 2010               | 2009               |
|-----------------------|--------------------|--------------------|
| Long-term liabilities | \$ 2,436           | \$ 2,467           |
| Long-term assets      | (26,115)           | (17,679)           |
|                       | <u>\$ (23,679)</u> | <u>\$ (15,212)</u> |

Foreign operations deferred assets (current) relate primarily to book reserves.

Foreign operations net deferred assets (long-term) relate primarily to foreign NOL and foreign tax credits carryforwards.

Amounts related to foreign operations included in the long-term portion of deferred liabilities relate primarily to depreciation.

## NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

## 5. Inventory and Land Held for Sale (in part)

## Net Realizable Value Adjustments—Land Held for Sale

The Company acquires land primarily for the construction of homes for sale to customers but periodically sells select parcels of land to third parties for commercial or other development. Additionally, the Company may determine that certain of its land assets no longer fit into its strategic operating plans. In such instances, the Company classifies the land asset as land held for sale, assuming the criteria in ASC 360 are met.

The Company values land held for sale at the lower of carrying value or fair value less costs to sell. In determining the fair value of land held for sale, the Company considers recent legitimate offers received, prices for land in recent comparable sales transactions, and other factors. As a result of changing market conditions in the real estate industry, a portion of the Company's land held for sale was written down to net realizable value. During 2010, 2009, and 2008, the Company recognized net realizable value adjustments related to land held for sale of \$39.1 million, \$113.7 million, and \$271.1 million, respectively. The Company records these net realizable value adjustments in its Consolidated Statements of Operations within Homebuilding land cost of revenues.

The Company's land held for sale at December 31, 2010 and 2009 was as follows (\$000's omitted):

|                               | 2010             | 2009             |
|-------------------------------|------------------|------------------|
| Land held for sale, gross     | \$124,919        | \$ 84,495        |
| Net realizable value reserves | (53,864)         | (25,850)         |
| Land held for sale, net       | <u>\$ 71,055</u> | <u>\$ 58,645</u> |

##### NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

##### R. Dispositions (in part)

On February 1, 2011, the company completed the sale of its envelope products business for cash proceeds of \$55 million. During 2010, the company recorded pre-tax charges of \$19 million (\$15 million after taxes) comprised of impairment of long-lived assets of \$6 million, impairment of allocated goodwill of \$7 million and a pension curtailment loss of \$6 million. For 2010 and prior years, the operating results of this business, as well as the charges noted above, are reported in discontinued operations in the consolidated statements of operations on an after-tax basis. The results of operations and assets and liabilities of the envelope products business were previously included in the Consumer & Office Products segment.

On September 30, 2010, the company completed the sale of its media and entertainment packaging business for cash proceeds of \$68 million. The sale resulted in a pre-tax loss of \$153 million (\$126 million after taxes). For 2010 and prior years, the operating results of this business, as well as the loss on disposition, are reported in discontinued operations in the consolidated statements of operations on an after-tax basis. The results of operations and assets and liabilities of the media and entertainment packaging business were previously included in the Consumer Solutions segment.

On July 1, 2008, the company completed the sale of its Kraft business for net cash proceeds of \$466 million. The sale resulted in a pre-tax gain of \$13 million (\$8 million after taxes). For 2008, the operating results of this business, as well as the gain on sale, are reported as discontinued operations in the consolidated statements of operations on an after-tax basis. The results of operations and assets and liabilities of the Kraft business were previously included in the Packaging Resources segment.

Below are amounts attributed to the above dispositions included in discontinued operations in the consolidated statements of operations.

|                                                                 | Year Ended December 31 |        |         |

#### NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

*Note 1—Description of Business and Summary of Significant Accounting Policies (in part)*

*Costs and Estimated Earnings in Excess of Billings on Uncompleted Contracts, Including Claims, and Advanced Billings and Billings in Excess of Costs and Estimated Earnings on Uncompleted Contracts*

In accordance with normal practice in the construction industry, we include in current assets and current liabilities amounts related to construction contracts realizable and payable over a period in excess of one year. Costs and estimated earnings in excess of billings on uncompleted contracts represent the excess of contract costs and profits recognized to date using the percentage-of-completion method over billings to date on certain contracts. Billings in excess of costs and estimated earnings on uncompleted contracts represents the excess of billings to date over the amount of contract costs and profits recognized to date using the percentage-of-completion method on certain contracts.

*Note 5—Accounts Receivable, Concentrations of Credit Risk, and Inventories (in part)*

#### Concentrations of Credit

Amounts due from U.S. government agencies or entities were \$72.1 million and \$110.3 million at August 31, 2010, and August 31, 2009, respectively. Costs and estimated earnings in excess of billings on uncompleted contracts include \$309.3 million and \$217.1 million at August 31, 2010, and August 31,

2009, respectively, related to the U.S. government agencies and related entities.

Additionally, at August 31, 2010 and August 31, 2009, respectively, we had approximately \$110.0 million and \$94.6 million in retention and approximately \$74.8 million and \$13.3 million in trade receivables related to one customer.

#### NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

*Note 1—The Company and Summary of Significant Accounting Policies (in part)*

#### Derivative Instruments

We have significant international revenues as well as costs denominated in foreign currencies, subjecting us to foreign currency risk. We purchase foreign currency exchange contracts that qualify as cash flow hedges, generally with maturities of 15 months or less, to reduce the volatility of cash flows primarily related to forecasted revenue and intercompany transactions denominated in certain foreign currencies. All outstanding designated derivatives that qualify for hedge accounting are recognized on the balance sheet at fair value. The effective portion of the designated derivative's gain or loss is initially reported as a component of accumulated other comprehensive income and is subsequently reclassified into the financial statement line item in which the hedged item is recorded in the same period the forecasted transaction affects earnings. We also economically hedge our exposure to foreign currency denominated monetary assets and liabilities with foreign currency contracts. The gains and losses on the foreign exchange contracts economically offset transaction gains and losses on certain foreign currency denominated

monetary assets and liabilities recognized in earnings. Accordingly, these outstanding non-designated derivatives are recognized on the balance sheet at fair value and changes in fair value from these contracts are recorded in interest and other income (expense), net, in the consolidated statement of income. Our derivatives program is not designed or operated for trading or speculative purposes.

Our derivative instruments expose us to credit risk to the extent that our counterparties may be unable to meet the terms of the agreements. We seek to mitigate this risk by limiting our counterparties to major financial institutions and by

spreading the risk across several major financial institutions. In addition, the potential risk of loss with any one counterparty resulting from this type of credit risk is monitored on an ongoing basis. See “Note 9—Derivative Instruments” for additional information related to our derivative instruments.

*Note 8—Fair Value Measurement of Assets and Liabilities (in part)*

The following table summarizes our financial assets and liabilities measured at fair value on a recurring basis as of December 31, 2009 (in thousands):

| Description                      | Balance as of<br>December 31, 2009 | Quoted Prices in Active Markets<br>for Identical Assets (Level 1) | Significant Other<br>Observable Inputs (Level 2) |

| Derivatives                      | \$ 4,963                           | \$ —                                                              | \$ 4,963                                         |

Our financial assets and liabilities are valued using market prices on both active markets (level 1) and less active markets (level 2). Level 1 instrument valuations are obtained from real-time quotes for transactions in active exchange markets involving identical assets. Level 2 instrument valuations are obtained from readily available pricing sources for comparable instruments. As of December 31, 2010, we did not have any assets or liabilities requiring measurement at fair value without observable market values that would require a high level of judgment to determine fair value (level 3). Our derivative instruments are valued using pricing models that take into account the contract terms as well as multiple inputs where applicable, such as equity prices, interest rate yield

curves, option volatility and currency rates. Our derivative instruments are short-term in nature, typically one month to fifteen months in duration. We maintain our customer account balances in interest bearing bank deposits (including time deposits with maturity dates of less than a year), which are valued using market prices on active markets (level 1). As of December 31, 2010, our customer account balances were approximately \$1.9 billion.

*Note 9—Derivative Instruments (in part)*

The notional amounts associated with our foreign currency contracts at December 31, 2009 and December 31, 2010 were \$298.6 million and \$1.8 billion, respectively. Derivative transactions are measured in terms of the notional amount, but this amount is not recorded on the balance sheet and is not, when viewed in isolation, a meaningful measure of the risk profile of the instruments. The notional amount is generally not exchanged, but is used only as the basis on which the value of foreign exchange payments are determined.

*Fair Value of Derivative Contracts:* Derivative instruments are reported at fair value as follows (in thousands):

|                                                                  | December 31, 2009                                        |                                                                       | December 31, 2010                                        |                                                                       |

## NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

## 9. Financial Instruments (in part)

## A. Selected Financial Assets and Liabilities (in part)

Information about certain of our financial assets and liabilities follows:

| (Millions of dollars)                                                                  | As of December 31 |          |
|----------------------------------------------------------------------------------------|-------------------|----------|
|                                                                                        | 2010              | 2009     |
| Selected financial assets measured at fair value on a recurring basis <sup>(a)</sup> : |                   |          |
| Trading securities <sup>(b)</sup>                                                      | \$ 173            | \$ 184   |
| Available-for-sale debt securities <sup>(c)</sup>                                      | 32,699            | 32,338   |
| Available-for-sale money market funds <sup>(d)</sup>                                   | 1,217             | 2,569    |
| Available-for-sale equity securities, excluding money market funds <sup>(c)</sup>      | 230               | 281      |
| Derivative financial instruments in receivable positions <sup>(e)</sup> :              |                   |          |
| Interest rate swaps                                                                    | 603               | 276      |
| Foreign currency forward-exchange contracts                                            | 494               | 502      |
| Foreign currency swaps                                                                 | 128               | 798      |
| Total                                                                                  | 35,544            | 36,948   |
| Other selected financial assets <sup>(f)</sup> :                                       |                   |          |
| Held-to-maturity debt securities, carried at amortized cost <sup>(c)</sup>             | 1,178             | 812      |
| Private equity securities, carried at cost or equity method <sup>(g)</sup>             | 1,135             | 811      |
| Short-term loans, carried at cost <sup>(h)</sup>                                       | 467               | 1,195    |
| Long-term loans, carried at cost <sup>(h)</sup>                                        | 299               | 784      |
| Total                                                                                  | 3,079             | 3,602    |
| Total selected financial assets <sup>(i)</sup>                                         | \$38,623          | \$40,550 |

(a) Fair values are determined based on valuation techniques categorized as follows: Level 1 means the use of quoted prices for identical instruments in active markets; Level 2 means the use of quoted prices for similar instruments in active markets or quoted prices for identical or similar instruments in markets that are not active or are directly or indirectly observable; Level 3 means the use of unobservable inputs. All of our financial assets and liabilities measured at fair value on a recurring basis use Level 2 inputs in the calculation of fair value, except that included in available-for-sale equity securities, excluding money market funds, are \$105 million as of December 31, 2010 and \$77 million as of December 31, 2009 of investments that use Level 1 inputs in the calculation of fair value. None of our financial assets and liabilities measured at fair value on a recurring basis are valued using Level 3 inputs at December 31, 2010 or 2009.

(b) Trading securities are held in trust for legacy business acquisition severance benefits.

(c) Gross unrealized gains and losses are not significant.

(d) Includes approximately \$625 million as of December 31, 2010 and approximately \$1.2 billion as of December 31, 2009 of money market funds held in escrow to secure certain of Wyeth's payment obligations under its 1999 Nationwide Class Action Settlement Agreement, which relates to litigation against Wyeth concerning its former weight-loss products, Redux and Pondimin (see Note 9G. Financial Instruments: Guarantee).

(e) Designated as hedging instruments, except for certain foreign currency contracts used as offsets; namely, foreign currency forward-exchange contracts with fair values of \$326 million and foreign currency swaps with fair values of \$17 million at December 31, 2010; and foreign currency swaps with fair values of \$106 million and foreign currency forward-exchange contracts with fair values of \$100 million at December 31, 2009.

(f) The differences between the estimated fair values and carrying values of our financial assets and liabilities not measured at fair value on a recurring basis were not significant as of December 31, 2010 or December 31, 2009.

(g) Our private equity securities represent investments in the life sciences sector.

(h) Our short-term and long-term loans are due from companies with highly rated securities (Standard & Poor's (S&P) ratings of mostly AA or better).

(i) The decrease in selected financial assets is primarily due to the use of proceeds of short-term investments for repayment of short-term borrowings and for tax payments made in the first quarter of 2010, primarily associated with certain business decisions executed to finance the Wyeth acquisition, partially offset by cash flows from operations.

The following methods and assumptions were used to estimate the fair value of our financial assets and liabilities:

- Trading equity securities—quoted market prices.
- Trading debt securities—observable market interest rates.
- Available-for-sale debt securities—third-party matrix-pricing model that uses significant inputs derived from or corroborated by observable market data and credit-adjusted interest rate yield curves.
- Available-for-sale money market funds—observable Net Asset Value prices.

- Available-for-sale equity securities, excluding money market funds—third-party pricing services that principally use a composite of observable prices.
- Derivative financial instruments (assets and liabilities)—third-party matrix-pricing model that uses significant inputs derived from or corroborated by observable market data. Where applicable, these models discount future cash flow amounts using market-based observable inputs, including interest rate yield curves, and forward and spot prices for currencies. The credit risk impact to our derivative financial instruments was not significant.

- Held-to-maturity debt securities—third-party matrix-pricing model that uses significant inputs derived from or corroborated by observable market data and credit-adjusted interest rate yield curves.
- Private equity securities, excluding equity-method investments—application of the implied volatility associated with an observable biotech index to the carrying amount of our portfolio and, to a lesser extent, performance multiples of comparable securities adjusted for company-specific information.
- Short-term and long-term loans—third-party model that discounts future cash flows using current interest rates at which similar loans would be made to borrowers with similar credit ratings and for the same remaining maturities.
- Short-term borrowings and long-term debt—third-party matrix-pricing model that uses significant inputs derived from or corroborated by observable market data and our own credit rating.

In addition, we have long-term receivables where the determination of fair value employs discounted future cash flows, using current interest rates at which similar loans would be made to borrowers with similar credit ratings and for the same remaining maturities.

A single estimate of fair value for these financial instruments relies heavily on estimates and assumptions (see *Note 1C. Significant Accounting Policies: Estimates and Assumptions*).

These selected financial assets and liabilities are presented in our Consolidated Balance Sheets as follows (*in part*):

|                                                  | As of December 31 |                 |
|--------------------------------------------------|-------------------|-----------------|
| (Millions of dollars)                            | 2010              | 2009            |
| <b>Assets</b>                                    |                   |                 |
| Cash and cash equivalents                        | \$ 906            | \$ 666          |
| Short-term investments                           | 26,277            | 23,991          |
| Short-term loans                                 | 467               | 1,195           |
| Long-term investments and loans                  | 9,748             | 13,122          |
| Taxes and other current assets <sup>(a)</sup>    | 515               | 526             |
| Taxes and other noncurrent assets <sup>(b)</sup> | 710               | 1,050           |
| <b>Total</b>                                     | <b>\$38,623</b>   | <b>\$40,550</b> |

<sup>(a)</sup> As of December 31, 2010, derivative instruments at fair value include foreign currency forward-exchange contracts (\$494 million) and foreign currency swaps (\$21 million) and, as of December 31, 2009, include foreign currency forward-exchange contracts (\$503 million) and foreign currency swaps (\$23 million).

<sup>(b)</sup> As of December 31, 2010, derivative instruments at fair value include interest rate swaps (\$603 million) and foreign currency swaps (\$107 million) and, as of December 31, 2009, include foreign currency swaps (\$774 million) and interest rate swaps (\$276 million).

#### E. Derivative Financial Instruments and Hedging Activities (*in part*)

**Foreign Exchange Risk**—A significant portion of our revenues, earnings and net investments in foreign affiliates is exposed to changes in foreign exchange rates. We seek to manage our foreign exchange risk, in part, through operational means, including managing expected same-currency revenues in relation to same-currency costs and same-currency assets in relation to same-currency liabilities. Depending on market conditions, foreign exchange risk also is managed through the use of derivative financial instruments and for-

foreign currency debt. These financial instruments serve to protect net income and net investments against the impact of the translation into U.S. dollars of certain foreign exchange-denominated transactions. The aggregate notional amount of foreign exchange derivative financial instruments hedging or offsetting foreign currency exposures is \$47.6 billion. The derivative financial instruments primarily hedge or offset exposures in the euro, Japanese yen and U.K. pound. The maximum length of time over which we are hedging future foreign exchange cash flows relates to our \$2.3 billion U.K. pound debt maturing in 2038.

All derivative contracts used to manage foreign currency risk are measured at fair value and are reported as assets or liabilities on the consolidated balance sheet. Changes in fair value are reported in earnings or deferred, depending on the nature and purpose of the financial instrument (offset or hedge relationship) and the effectiveness of the hedge relationships, as follows:

- We defer on the balance sheet the effective portion of the gains or losses on foreign currency forward-exchange contracts and foreign currency swaps that are designated as cash flow hedges and reclassify those amounts, as appropriate, into earnings in the same period or periods during which the hedged transaction affects earnings.
- We recognize the gains and losses on forward-exchange contracts and foreign currency swaps that are used to offset the same foreign currency assets or liabilities immediately into earnings along with the earnings impact of the items they generally offset. These contracts essentially take the opposite currency position of that reflected in the month-end balance sheet to counterbalance the effect of any currency movement.
- We recognize the gain and loss impact on foreign currency swaps designated as hedges of our net investments in earnings in three ways: over time—for the periodic net swap payments; immediately—to the extent of any change in the difference between the foreign exchange spot rate and forward rate; and upon sale or substantial liquidation of our net investments—to the extent of change in the foreign exchange spot rates.
- We defer on the balance sheet foreign exchange gains and losses related to foreign exchange-denominated debt designated as a hedge of our net investments in foreign subsidiaries and reclassify those amounts into earnings upon the sale or substantial liquidation of our net investments.

Any ineffectiveness is recognized immediately into earnings. There was no significant ineffectiveness in 2010, 2009 or 2008.

**Interest Rate Risk**—Our interest-bearing investments, loans and borrowings are subject to interest rate risk. We seek to invest and loan primarily on a short-term or variable-rate basis; however, in light of current market conditions, we currently borrow primarily on a long-term, fixed-rate basis. From time to time, depending on market conditions, we will change the profile of our outstanding debt by entering into derivative financial instruments like interest rate swaps.

We entered into derivative financial instruments to hedge or offset the fixed interest rates on the hedged item, matching the amount and timing of the hedged item. The aggregate notional amount of interest rate derivative financial instruments is \$11.6 billion. The derivative financial instruments hedge U.S. dollar and euro fixed-rate debt.

All derivative contracts used to manage interest rate risk are measured at fair value and reported as assets or liabilities on the consolidated balance sheet. Changes in fair value are reported in earnings, as follows:

- We recognize the gains and losses on interest rate swaps that are designated as fair value hedges in earnings upon the recognition of the change in fair value of the hedged risk. We recognize the offsetting earnings impact of fixed-rate debt attributable to the hedged risk also in earnings.

Any ineffectiveness is recognized immediately into earnings. There was no significant ineffectiveness in 2010, 2009 or 2008.

## PROPERTY, PLANT, AND EQUIPMENT

### RECOGNITION AND MEASUREMENT

**2.63** *Property, plant, and equipment* are the long-lived, physical assets of the entity acquired for use in the entity's normal business operations and not intended for resale by the entity. FASB ASC 360, *Property, Plant, and Equipment*, states that these assets are initially recorded at historical cost, which includes the costs necessarily incurred to bring them to the condition and location necessary for their intended use. FASB ASC 835-20 establishes standards for capitalizing interest cost as part of the historical cost of acquiring assets constructed by an entity for its own use or produced for the entity by others for which deposits or progress payments have been made.

**2.64** An entity may acquire or develop computer software either for internal use or for sale or lease to others. If for internal use, FASB ASC 350-40 provides guidance on accounting for the costs of computer software and for determining whether the software is for internal use. Under FASB ASC 350-40, internal and external costs incurred to develop internal-use software during the application development stage should be capitalized and amortized over the software's estimated useful life. Accounting for software acquired or developed for sale or lease is addressed by FASB ASC 985-20. Whether for internal use or sale or lease, FASB ASC refers to capitalized software costs as amortizable intangible assets.

### PRESENTATION

**2.65** FASB ASC 210-10-45-4 indicates that property, plant, and equipment should be classified as noncurrent when a classified balance sheet is presented. Under FASB ASC 805-20-55-37, some use rights acquired in a business combination may have characteristics of tangible, rather than intangible, assets. An example is mineral rights.

**2.66** Under FASB ASC 985-20-45-2, capitalized costs related to software for sale or lease having a life of more than one year or one operating cycle should be presented as an other asset. Under FASB ASC 985-20, amortization expense should be on a product-by-product basis and charged to cost of sales or a similar expense category because it relates to a software product that is marketed to others. Presentations of capitalized computer software costs by survey entities vary.

## DISCLOSURE

**2.67** FASB ASC 360-10-50 requires the following disclosures in the financial statements or notes thereto:

- Depreciation expense for the period
- Balance of major classes of depreciable assets, by nature or function, at the balance sheet date
- Accumulated depreciation, either by major classes of depreciable assets or in total, at the balance sheet date
- A general description of the method(s) used in computing depreciation with respect to major classes of depreciable assets.

FASB ASC 360 also provides accounting and disclosure guidance for the long-lived assets that are impaired or held for disposal. Rule 5-02 of Regulation S-X requires that registrants state the basis of determining the amounts of property, plant, and equipment.

<sup>^</sup> N/C = Not compiled. Line item was not included in the table for the year shown.

and \$20.8 million in 2010, 2009 and 2008, respectively. Capital lease assets were \$283.2 million and \$167.1 million at December 31, 2010 and 2009, respectively. Corresponding accumulated amortization of capital leases included in respective allowances for depreciation were \$92.7 million and \$41.5 million at December 31, 2010 and 2009, respectively.

In December 2010, our North American Coal segment entered into a sale-leaseback arrangement. Under the arrangement, we sold the new longwall plow system at our Pinnacle mine in West Virginia and leased it back for a period of five years. The sale-leaseback arrangement was specific to the assets at the time of the agreement and does not include the longwall plow system assets pending delivery. The leaseback has been accounted for as a capital lease. We recorded assets and liabilities under the capital lease of \$57.3 million, reflecting the lower of the present value of the minimum lease payments or the fair value of the asset.

Future minimum payments under capital leases and non-cancellable operating leases at December 31, 2010 are as follows:

| (In millions)                               | Capital Leases         | Operating Leases |
|---------------------------------------------|------------------------|------------------|
| 2011                                        | \$ 46.5                | \$21.3           |
| 2012                                        | 43.5                   | 17.1             |
| 2013                                        | 37.6                   | 17.0             |
| 2014                                        | 37.1                   | 12.4             |
| 2015                                        | 41.3                   | 5.7              |
| 2016 and thereafter                         | 47.7                   | 8.0              |
| Total minimum lease payments                | 253.7                  | \$81.5           |
| Amounts representing interest               | 51.8                   |                  |
| Present value of net minimum lease payments | \$201.9 <sup>(1)</sup> |                  |

<sup>(1)</sup> The total is comprised of \$33.7 million and \$168.2 million classified as *Other current liabilities* and *Other liabilities*, respectively, on the Statements of Consolidated Financial Position at December 31, 2010.

Total minimum capital lease payments of \$253.7 million include \$166.4 million for our Asia Pacific Iron Ore segment, \$64.1 million for our North American Coal segment, \$21.9 million for our North American Iron Ore segment and \$1.3 million for our Corporate segment, respectively. Total minimum operating lease payments of \$81.5 million include \$52.3 million for our North American Iron Ore segment, \$18.4 million for our Corporate segment, and \$10.8 million for our Asia Pacific Iron Ore, North American Coal and Other segments.

*Note 1—Summary of Significant Accounting Policies (in part)*

**Property, Plant and Equipment:** Plant and equipment are depreciated under the straight-line method over their estimated lives. Estimated lives are as follows: land improvements over 20 years, leaseholds over the life of the lease, buildings over 40 years and machinery and equipment over two to 20 years. The estimated weighted-average life of the Company's machinery and equipment is 17.7 years. The Company recognizes costs associated with major maintenance activities at its operating facilities in the period in which they occur. The Company's property, plant and equipment balances as of December 31, 2010 and 2009 are as follows:

|                                        | 2010       | 2009       |
|----------------------------------------|------------|------------|
| Land, land improvements and leaseholds | \$ 154.7   | \$ 149.3   |
| Buildings                              | 363.8      | 366.2      |
| Machinery and equipment                | 4,688.8    | 4,714.3    |
| Construction in progress               | 460.9      | 155.3      |
| Total                                  | 5,668.2    | 5,385.1    |
| Less accumulated depreciation          | (3,635.0)  | (3,409.1)  |
| Property, plant and equipment, net     | \$ 2,033.2 | \$ 1,976.0 |

The amount of interest on capital projects capitalized in 2010, 2009 and 2008 was \$10.1, \$7.8 and \$4.4, respectively. The Company reviews the carrying value of long-lived assets to be held and used and long-lived assets to be disposed of when events and circumstances warrant such a review. The carrying value of a long-lived asset is not recoverable if it exceeds the sum of the undiscounted cash flows expected to result from the use and eventual disposition of the asset. If the carrying value of a long-lived asset exceeds its fair value an impairment has occurred and a loss is recognized based on the amount by which the carrying value exceeds the fair market value less cost to dispose for assets to be sold or

abandoned. Fair market value is determined using quoted market prices, estimates based on prices of similar assets or anticipated cash flows discounted at a rate commensurate with risk. During December 2010, the Company announced that it was permanently closing its Ashland, Kentucky coke plant during the first half of 2011 and recognized an approximate \$45.9 impairment charge for the coke plant assets in the fourth quarter of 2010.

The Company has historically considered the Ashland coke plant as a part of a collective asset grouping which included the operations of all the Company's steelmaking facilities. The Ashland coke plant produces coke, a commodity that is readily obtainable in the market. In 2010, the Company concluded that it could purchase coke at a price significantly below the cost to produce such coke at Ashland. As a result, the Company decided in late 2010 to permanently close the Ashland coke plant. Effectively, the Company viewed this as a make-versus-buy decision and decided to buy because it concluded that it is more beneficial to the Company to buy coke rather than continue to produce it at Ashland. As such, the Company has determined that the Ashland coke facility is no longer a part of the "integrated process," as the product produced there can be replaced cost-effectively in the market. The change that led to this determination was the added cost to produce coke resulting from increased maintenance cost due to age and more stringent environmental regulations. As it relates to asset groupings, the Company views this as an isolated situation that stemmed from the change in the cost-competitiveness of the Ashland coke plant. The Company has not changed its view of its other facilities from an integrated-process perspective.

## NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

## 2. Summary of Significant Accounting Policies (in part)

## Property and Equipment

Property and equipment are recorded at cost. Expenditures for major additions and improvements to facilities are capitalized, while maintenance and repairs are charged to expense as incurred. When property is retired or otherwise disposed of, the related cost and accumulated depreciation are removed from the accounts and any resulting gain or loss is reflected in the consolidated statements of income.

We revise the estimated useful lives of property and equipment acquired through business acquisitions to conform with our policies. Depreciation is provided over the estimated useful lives of the assets involved using the straight-line method. We assume no salvage value for our depreciable property and equipment. The estimated useful lives of our property and equipment are as follows:

|                            | Estimated Useful Lives |
|----------------------------|------------------------|
| Buildings and improvements | 7–40 years             |
| Vehicles                   | 5–12 years             |
| Landfill equipment         | 7–10 years             |
| Other equipment            | 3–15 years             |
| Furniture and fixtures     | 5–12 years             |

Landfill development costs are also included in property and equipment. Landfill development costs include direct costs incurred to obtain landfill permits and direct costs incurred to acquire, construct and develop sites as well as final capping, closure and post-closure assets. These costs are amortized or depleted based on consumed airspace. All indirect landfill development costs are expensed as incurred. (For additional information, see Note 8, *Landfill and Environmental Costs*.)

## 4. Property and Equipment, Net

A summary of property and equipment as of December 31 is as follows:

|                                                             | 2010       | 2009       |
|-------------------------------------------------------------|------------|------------|

## EQUITY METHOD AND JOINT VENTURES

## RECOGNITION AND MEASUREMENT

**2.73** FASB ASC 323, *Investments—Equity Method and Joint Ventures*, stipulates that the equity method should be used to account for investments in corporate joint ventures and certain other noncontrolled entities when an investor has the ability to exercise significant influence over operating and financial policies of an investee, even though the investor holds 50 percent or less of the common stock. FASB ASC 323 considers an investor to have the ability to exercise significant influence when it owns 20 percent or more of the voting stock of an investee. FASB ASC 323 specifies the criteria for applying the equity method of accounting to 50 percent or less owned entities and lists circumstances under which, despite 20 percent ownership, an investor may not be able to exercise significant influence.

## PRESENTATION

**2.74** Under the equity method, FASB ASC 323-10-45-1 requires that an investment in common stock be shown in the balance sheet of an investor as a single amount.

## DISCLOSURE

**2.75** Under FASB ASC 323-10-50-2, the significance of an equity method investment to the investor's financial position and results of operations should be considered in evaluating the extent of disclosures of the financial position and results of operations of an investee. If the investor has more than one investment in common stock, disclosures wholly or partly on a combined basis may be appropriate. FASB ASC 323-10-50-3 details disclosures required for equity method investments, including name and percentage of ownership of the investee, investor accounting policies, any difference between the amount at which an investment is carried and the amount of underlying equity in net assets, and the accounting treatment of the difference.

##### NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

#### Note 6. Equity Method Investments

Our consolidated net income includes our Company's proportionate share of the net income or loss of our equity method investees. When we record our proportionate share of net income, it increases equity income (loss)—net in our consolidated statements of income and our carrying value in that investment. Conversely, when we record our proportionate share of a net loss, it decreases equity income (loss)—net in our consolidated statements of income and our carrying value in that investment. The Company's proportionate share of the net income or loss of our equity method investees includes significant operating and nonoperating items recorded by our equity method investees. These items can have a significant impact on the amount of equity income (loss)—net in our consolidated statements of income and our carrying value in those investments. Refer to Note 17 for additional information related to significant operating and nonoperating items recorded by our equity method investees. The carrying values of our equity method investments are also impacted by our proportionate share of items impacting the equity investee's AOCI.

We eliminate from our financial results all significant intercompany transactions, including the intercompany portion of transactions with equity method investees.

#### Coca-Cola Enterprises Inc.

On October 2, 2010, we completed our acquisition of CCE's North American business and relinquished our indirect ownership interest in CCE's European operations. As a result of this transaction, the Company does not own any interest in New CCE. Refer to Note 2 for additional information related to this acquisition.

We accounted for our investment in CCE under the equity method of accounting until our acquisition of CCE's North American business was completed on October 2, 2010. Therefore, our consolidated net income for the year ended December 31, 2010, included equity income from CCE during the first nine months of 2010. The Company owned 33 percent of the outstanding common stock of CCE immediately prior to the acquisition. The following table provides summarized financial information for CCE for the nine months ended October 1, 2010, and for the years ended December 31, 2009 and 2008 (in millions):

|                         | Nine Months Ended<br>October 1, 2010 | Year Ended<br>December 31 |           |
|-------------------------|--------------------------------------|---------------------------|-----------|
|                         |                                      | 2009                      | 2008      |
| Net operating revenues  | \$16,464                             | \$21,645                  | \$21,807  |
| Cost of goods sold      | 10,028                               | 13,333                    | 13,763    |
| Gross profit            | \$ 6,436                             | \$ 8,312                  | \$ 8,044  |
| Operating income (loss) | \$ 1,369                             | \$ 1,527                  | \$(6,299) |
| Net income (loss)       | \$ 677                               | \$ 731                    | \$(4,394) |

The following table provides a summary of our significant transactions with CCE for the nine months ended October 1, 2010, and for the years ended December 31, 2009 and 2008 (in millions):

|                                                               | Nine Months Ended<br>October 1, 2010 | Year Ended<br>December 31 |         |
|---------------------------------------------------------------|--------------------------------------|---------------------------|---------|

| Concentrate, syrup and finished product sales to CCE          | \$4,737                              | \$6,032                   | \$6,431 |
| Syrup and finished product purchases from CCE                 | 263                                  | 351                       | 344     |
| CCE purchases of sweeteners through our company               | 251                                  | 419                       | 357     |
| Marketing payments made by us directly to CCE                 | 314                                  | 415                       | 626     |
| Marketing payments made to third parties on behalf of CCE     | 106                                  | 174                       | 131     |
| Local media and marketing program reimbursements from CCE     | 268                                  | 330                       | 316     |
| Payments made to CCE for dispensing equipment repair services | 64                                   | 87                        | 84      |
| Other payments—net                                            | \$ 19                                | \$ 66                     | \$ 75   |

Syrup and finished product purchases from CCE represent purchases of fountain syrup in certain territories that have been resold by our Company to major customers and purchases of bottle and can products. Marketing payments made by us directly to CCE represent support of certain marketing activities and our participation with CCE in cooperative advertising and other marketing activities to promote the sale of Company trademark products within CCE territories. These programs were agreed to on an annual basis. Marketing payments made to third parties on behalf of CCE represent support of certain marketing activities and programs to promote the sale of Company trademark products within CCE's territories in conjunction with certain of CCE's customers. Pursuant to cooperative advertising and trade agreements with CCE, we received funds from CCE for local media and marketing program reimbursements. Payments made to CCE for dispensing equipment repair services represent reimbursement to CCE for its costs of parts and labor for repairs on cooler, dispensing or post-mix equipment owned by us or our customers. The other payments—net line in the table above represents payments made to and received from CCE that are individually not significant.

Our Company had previously entered into programs with CCE designed to help develop cold-drink infrastructure. Under these programs, we paid CCE for a portion of the cost of developing the infrastructure necessary to support accelerated placements of cold-drink equipment. These payments supported a common objective of increased sales of Company Trademark Beverages from increased availability and consumption in the cold-drink channel. The amortizable carrying value of our investment in these infrastructure programs with CCE was \$307 million as of December 31, 2009.

#### *Preexisting Relationships*

The Company evaluated all of our preexisting relationships with CCE prior to the close of the transaction. Based on these evaluations, the Company recognized a charge of \$265 million related to preexisting relationships with CCE. This charge primarily related to the write-off of our investment in cold-drink infrastructure programs with CCE. This charge was recorded in the line item other income (loss)—net and impacted the Corporate operating segment. Refer to Note 17.

#### *Other Equity Method Investments*

Our other equity method investments include our ownership interests in Coca-Cola Hellenic, Coca-Cola FEMSA and Coca-Cola Amatil. As of December 31, 2010, we owned approximately 23 percent, 32 percent and 30 percent, respectively, of these companies' common shares. As of December 31, 2010, our investment in our equity method investees in the aggregate exceeded our proportionate share of the net assets of these equity method investees by approximately \$1,337 million. This difference is not amortized.

A summary of financial information for our equity method investees in the aggregate, other than CCE, is as follows (in millions):

| Year Ended December 31                                           | 2010     | 2009     | 2008     |
|------------------------------------------------------------------|----------|----------|----------|
| Net operating revenues                                           | \$38,663 | \$34,292 | \$34,482 |
| Cost of goods sold                                               | 23,053   | 20,205   | 19,974   |
| Gross profit                                                     | \$15,610 | \$14,087 | \$14,508 |
| Operating income                                                 | \$ 4,134 | \$ 3,657 | \$ 3,687 |
| Consolidated net income (loss)                                   | \$ 2,659 | \$ 2,269 | \$ 1,950 |
| Less: Net income (loss) attributable to noncontrolling interests | \$ 89    | \$ 78    | \$ 53    |
| Net income (loss) attributable to common shareowners             | \$ 2,570 | \$ 2,191 | \$ 1,897 |

| December 31               | 2010     | 2009     |
|---------------------------|----------|----------|
| Current assets            | \$12,223 | \$10,848 |
| Noncurrent assets         | 26,524   | 25,397   |
| Total assets              | \$38,747 | \$36,245 |
| Current liabilities       | \$ 9,039 | \$ 8,578 |
| Noncurrent liabilities    | 11,175   | 10,945   |
| Total liabilities         | \$20,214 | \$19,523 |
| Shareowners' equity       | \$18,046 | \$16,232 |
| Noncontrolling interest   | \$ 487   | \$ 490   |
| Total equity (deficit)    | \$18,533 | \$16,722 |
| Company equity investment | \$ 6,954 | \$ 6,192 |

Net sales to equity method investees other than CCE, the majority of which are located outside the United States, were approximately \$6.2 billion, \$5.6 billion and \$9.4 billion in 2010, 2009 and 2008, respectively. Total payments, primarily marketing, made to equity method investees other than CCE were approximately \$1,034 million, \$878 million and \$659 million in 2010, 2009 and 2008, respectively. In addition, purchases of finished products from equity method investees were approximately \$205 million, \$152 million and \$228 million in 2010, 2009 and 2008, respectively.

If valued at the December 31, 2010, quoted closing prices of shares actively traded on stock markets, the value of our equity method investments in publicly traded bottlers would have exceeded our carrying value by approximately \$6.8 billion.

#### *Net Receivables and Dividends from Equity Method Investees*

Total net receivables due from equity method investees was approximately \$899 million and \$949 million as of December 31, 2010 and 2009, respectively. The total amount of dividends received from equity method investees was approximately \$354 million, \$422 million and \$254 million for the years ended December 31, 2010, 2009 and 2008, respectively. Dividends received in 2009 included the receipt of a \$183 million special dividend from Coca-Cola Hellenic, which was incremental to its normal quarterly dividend. We classified the receipt of this cash dividend in cash flows from

operating activities due to the fact that our cumulative equity in earnings from Coca-Cola Hellenic exceeded the cumulative distributions received; therefore, the dividend was deemed to be a return on our investment and not a return of our investment.

<sup>(1)</sup> In 2010, amounts include the following items:

- In 2009, equity in earnings of affiliated companies included a charge of \$29 million (\$27 million after-tax) for our share of the restructuring charges and a credit of \$29 million (\$27 million after-tax) primarily for excess foreign tax credits that Dow Corning generated from foreign dividends.
- In 2008, Dow Corning recorded an other-than-temporary impairment for certain securities of Fannie Mae and Freddie Mac, which reduced Corning's equity earnings by \$18 million.

<sup>(2)</sup> Corning purchases machinery and equipment on behalf of Samsung Corning Precision to support its capital expansion initiatives. The machinery and equipment are transferred to Samsung Corning Precision at our cost basis, resulting in no revenue or gain being recognized on the transaction.

We have contractual agreements with several of our equity affiliates which include sales, purchasing, licensing and technology agreements.

At December 31, 2010, approximately \$4.4 billion of equity in undistributed earnings of equity companies was included in our retained earnings.

A discussion and summarized results of Corning's significant affiliates at December 31, 2010 follows:

*Samsung Corning Precision Materials Co., Ltd. (Samsung Corning Precision)*

Samsung Corning Precision is a South Korea-based manufacturer of liquid crystal display glass for flat panel displays. In 2010, they changed their name from Samsung Corning Precision Glass Co., Ltd. to Samsung Corning Precision Materials Co., Ltd.

<sup>(1)</sup> Corning purchases machinery and equipment on behalf of Samsung Corning Precision to support its capital expansion initiatives. The machinery and equipment are transferred to Samsung Corning Precision at our cost basis, resulting in no revenue or gain being recognized on the transaction.

In 2010, Samsung Corning Precision's earnings were positively impacted from a revised tax holiday calculation agreed to by the Korean National Tax service. Corning's share of this adjustment was \$61 million.

Balances due from Samsung Corning Precision were \$29 million at December 31, 2010. Balances due to Samsung Corning Precision were \$5 million at December 31, 2010. Balances due from Samsung Corning Precision were \$36 million at December 31, 2009. Balances due to Samsung Corning Precision were \$14 million at December 31, 2009.

Corning owns 50% of Samsung Corning Precision. Samsung Electronics Co., Ltd. owns 43% and other shareholders own the remaining 7%.

On December 31, 2007, Samsung Corning Precision acquired all of the outstanding shares of Samsung Corning Co., Ltd. (Samsung Corning). After the transaction, Corning retained its 50% interest in Samsung Corning Precision. Samsung Corning Precision accounted for the transaction at fair value, while Corning accounted for the transaction at historical cost.

Prior to their merger, Samsung Corning Precision and Samsung Corning were two of approximately thirty co-defendants in a lawsuit filed by Seoul Guarantee Insurance Co. and thirteen other creditors (SGI and Creditors) for alleged breach of an agreement that approximately twenty-eight affiliates of the Samsung group (Samsung Affiliates) entered into with SGI and Creditors on August 24, 1999 (the Agreement). The lawsuit is pending in the courts of South Korea. Under the Agreement it is alleged that the Samsung Affiliates agreed to sell certain shares of Samsung Life Insurance Co., Ltd. (SLI), which had been transferred to SGI and Creditors in connection with the petition for court receivership of Samsung Motor Inc. In the lawsuit, SGI and Creditors allege a breach of the Agreement by the Samsung Affiliates and are seeking the loss of principal (approximately \$1.95 billion) for loans extended to Samsung Motors Inc., default interest and a separate amount for breach. On January 31, 2008, the Seoul District Court ordered the Samsung Affiliates to pay approximately \$1.30 billion by disposing of 2,334,045 shares of SLI less 1,165,955 shares of SLI previously sold by SGI and Creditors and paying the proceeds to SGI and Creditors; to satisfy any shortfall by participating in the purchase of equity or subordinate debentures issued by them; and pay default interest of 6% per annum. The ruling has been appealed. On November 10, 2009, the Appellate Court directed the parties to attempt to resolve this matter through mediation. The parties agreed not to accept the court's attempt at mediation. A portion of an escrow account established upon completion of SLI's initial public offering ("IPO") on May 7, 2010 was used to pay court ordered interest for the delay of the IPO. Samsung Corning Precision has concluded that no provision for loss should be reflected in its financial statements. Possible appeals are being considered. Other than as described above, no claim in these matters has been asserted against Corning or any of its affiliates.

In connection with an investigation by the Commission of the European Communities, Competition DG, of alleged anticompetitive behavior relating to the worldwide production of LCD glass, Corning and Samsung Corning Precision received a request on March 30, 2009, for certain information from the Competition DG. Corning and Samsung Corning Precision have responded to those requests for information. On October 9, 2009, in connection with its investigation, the Competition DG made a further request for information from both Corning and Samsung Corning Precision to which each party has responded. Samsung Corning Precision has also responded to the Competition DG and authorities in other jurisdictions, including the United States in connection with similar investigations of alleged anticompetitive behavior relating to worldwide production of cathode ray tube glass.

In September 2009, Corning and Samsung Corning Precision formed Corsam Technologies LLC (Corsam), a new equity affiliate established to provide glass technology research for future product applications. Samsung Corning Precision

invested \$124 million in cash and Corning contributed intellectual property with a corresponding value. Corning and Samsung Corning Precision each own 50% of the common stock of Corsam, and Corning has agreed to provide research and development services at arms length to Corsam. Corning does not control Corsam because Samsung Corning Precision's other investors maintain significant participating voting rights. In addition, Corsam has sufficient equity to finance its activities, the voting rights of investors in Corsam are considered substantive, and the risks and rewards of Corsam's research are shared only by those investors noted. As a result, Corsam is accounted for under the equity method of accounting for investments.

#### *Dow Corning Corporation (Dow Corning)*

Dow Corning is a U.S.-based manufacturer of silicone products. Corning and the Dow Chemical Company (Dow Chemical) each own half of Dow Corning.

| Other long-term liabilities              | \$5,996     | \$5,108 |
| Non-controlling interest                 | \$ 625      | \$ 558  |

At December 31, 2010, Dow Corning's marketable securities included approximately \$535 million of auction rate securities, net of impairments of \$36 million. As a result of a temporary impairment, unrealized losses of \$29 million, net of \$8 million for a minority interests' share, were included in accumulated other comprehensive income in Dow Corning's consolidated balance sheet. Corning's share of this unrealized loss was \$14 million and is included in Corning's accumulated other comprehensive income.

In January 2010, Dow Corning received approval for U.S. Federal Advanced Energy Manufacturing Tax Credits of approximately \$169 million. The tax credits were granted as part of the American Reinvestment and Recovery Act of 2009, and

are focused on job creation from U.S. manufacturing capacity which supplies clean and renewable energy products.

In response to economic challenges, Dow Corning incurred restructuring charges associated with a global workforce reduction in 2009. Our share of these charges was \$29 million.

In 2008, Dow Corning recorded an other-than-temporary impairment of \$37 million, net of \$14 million for a minority interests' share, which was included in Dow Corning's net income for certain securities of Fannie Mae and Freddie Mac. Corning's share of this loss was \$18 million and is included in equity earnings in Corning's consolidated statements of income. No additional impairment on the Fannie Mae and Freddie Mac securities was recorded during the year ended December 31, 2009. The majority of Dow Corning's securities are collateralized by portfolios of student loans that are guaranteed by the U.S. government. Auctions for these securities have failed since the first quarter of 2008, reducing the immediate liquidity of these investments. Since Dow Corning does not know when a market will return or develop for these securities, Dow Corning has classified these securities as non-current. Market conditions could result in additional unrealized or realized losses for Dow Corning. Corning's equity earnings from Dow Corning would be reduced by our 50% share of any future impairment that is considered to be other-than-temporary.

In 2008, Dow Corning changed its depreciation method and the estimated useful lives of certain fixed assets. These changes were accounted for as a change in estimate resulting in increased net income of \$40 million of which Corning's share was \$20 million.

Dow Corning has borrowed the full amount under its \$500 million revolving credit facility and believes it has adequate liquidity to fund operations, its capital expenditure plan, breast implant settlement liabilities, and shareholder dividends.

In 1995, Corning fully impaired its investment of Dow Corning upon its entry into bankruptcy proceedings and did not recognize net equity earnings from the second quarter of 1995 through the end of 2002. Corning began recognizing equity earnings in the first quarter of 2003, when management concluded that Dow Corning's emergence from bankruptcy protection was probable. Dow Corning emerged from bankruptcy in 2004. See discussion below for additional information and for a history of this matter. Corning considers the \$249 million difference between the carrying value of its investment in Dow Corning and its 50% share of Dow Corning's equity to be permanent.

Corning and Dow Chemical each own 50% of the common stock of Dow Corning. In May 1995, Dow Corning filed for bankruptcy protection to address pending and claimed liabilities arising from many thousands of breast implant product lawsuits. On June 1, 2004, Dow Corning emerged from Chapter 11 with a Plan of Reorganization (the Plan), which provided for the settlement or other resolution of implant claims. The Plan also includes releases for Corning and Dow Chemical as shareholders in exchange for contributions to the Plan.

Under the terms of the Plan, Dow Corning has established and is funding a Settlement Trust and a Litigation Facility to provide a means for tort claimants to settle or litigate their claims. Inclusive of insurance, Dow Corning has paid approximately \$1.7 billion to the Settlement Trust. As of December 31, 2010, Dow Corning had recorded a reserve for breast implant litigation of \$1.6 billion and anticipates insurance receivables of \$3 million. As a separate matter arising from the

bankruptcy proceedings, Dow Corning is defending claims asserted by a number of commercial creditors who claim additional interest at default rates and enforcement costs, during the period from May 1995 through June 2004. As of December 31, 2010, Dow Corning has estimated the liability to commercial creditors to be within the range of \$81 million to \$267 million. As Dow Corning management believes no single amount within the range appears to be a better estimate than any other amount within the range, Dow Corning has recorded the minimum liability within the range. Should Dow Corning not prevail in this matter, Corning's equity earnings would be reduced by its 50% share of the amount in excess of \$81 million, net of applicable tax benefits. In addition, the London Market Insurers (the LMI Claimants) have claimed a reimbursement right with respect to a portion of insurance proceeds previously paid by the LMI Claimants to Dow Corning. This claim is based on a theory that the LMI Claimants overestimated Dow Corning's liability for the resolution of implant claims pursuant to the Plan. The LMI Claimants offered two calculations of their claim amount: \$54 million and \$93 million, plus minimum interest of \$67 million and \$116 million, respectively. These estimates were explicitly characterized as preliminary and subject to change. Litigation regarding this claim is in the discovery stage. Dow Corning disputes the claim. Based on settlement negotiations, Dow Corning has estimated that the most likely outcome will result in payment to the LMI Claimants in a range of \$10 million to \$20 million. Dow Corning has recorded a liability for an amount within this range as of December 31, 2010. There are a number of other claims in the bankruptcy proceedings against Dow Corning awaiting resolution by the U.S. District Court, and it is reasonably possible that Dow Corning may record bankruptcy-related charges in the future. The remaining tort claims against Corning relating to breast implant products are expected to be channeled by the Plan into facilities established by the Plan or otherwise defended by the Litigation Facility.

#### *Pittsburgh Corning Corporation (PCC)*

Corning and PPG Industries, Inc. (PPG) each own 50% of the capital stock of Pittsburgh Corning Corporation (PCC). Over a period of more than two decades, PCC and several other defendants have been named in numerous lawsuits involving claims alleging personal injury from exposure to asbestos. On April 16, 2000, PCC filed for Chapter 11 reorganization in the U.S. Bankruptcy Court for the Western District of Pennsylvania. At the time PCC filed for bankruptcy protection, there were approximately 11,800 claims pending against Corning in state court lawsuits alleging various theories of liability based on exposure to PCC's asbestos products and typically requesting monetary damages in excess of one million dollars per claim. Corning has defended those claims on the basis of the separate corporate status of PCC and the absence of any facts supporting claims of direct liability arising from PCC's asbestos products. Corning is also currently involved in approximately 10,300 other cases (approximately 38,700 claims) alleging injuries from asbestos and similar amounts of monetary damages per case. Those cases have been covered by insurance without material impact to Corning to date. As described below, several of Corning's insurance carriers have filed a legal proceeding concerning the extent of any insurance coverage for these claims. Asbestos litigation is inherently difficult, and past trends in resolving these claims may not be indicators of future outcomes.

On March 28, 2003, Corning announced that it had reached agreement with the representatives of asbestos claimants for the resolution of all current and future asbestos claims against it and PCC, which might arise from PCC products or operations (the 2003 Plan). The 2003 Plan would have required Corning to relinquish its equity interest in PCC, contribute its equity interest in Pittsburgh Corning Europe N.V. (PCE), a Belgian corporation, contribute 25 million shares of Corning common stock, and pay a total of \$140 million in six annual installments (present value \$131 million at March 2003), beginning one year after the plan's effective date, with 5.5 percent interest from June 2004. In addition, the 2003 Plan provided that Corning would assign certain insurance policy proceeds from its primary insurance and a portion of its excess insurance.

On December 21, 2006, the Bankruptcy Court issued an order denying confirmation of the 2003 Plan for reasons it set out in a memorandum opinion. Several parties, including Corning, filed motions for reconsideration. These motions were argued on March 5, 2007, and the Bankruptcy Court reserved decision. On January 29, 2009, a proposed plan of reorganization (the Amended PCC Plan) resolving issues raised by the Court in denying confirmation of the 2003 Plan was filed with the Bankruptcy Court.

As a result, Corning believes the Amended PCC Plan, modified as indicated below, now represents the most probable outcome of this matter and expects that the Amended PCC Plan will be confirmed by the Court. At the same time, Corning believes the 2003 Plan no longer serves as the basis for the Company's best estimate of liability. Key provisions of the Amended PCC Plan address the concerns expressed by the Bankruptcy Court. Accordingly, in the first quarter of 2008, Corning adjusted its asbestos litigation liability to reflect components of the Amended PCC Plan. The proposed resolution of PCC asbestos claims under the Amended PCC Plan requires Corning to contribute its equity interests in PCC and PCE and to contribute a fixed series of payments, recorded at present value. Corning will have the option to use its shares rather than cash to make these payments, but the liability is fixed by dollar value and not the number of shares. The Amended PCC Plan originally required Corning to make (1) one payment of \$100 million one year from the date the Amended PCC Plan becomes effective and certain conditions are met and (2) five additional payments of \$50 million, on each of the five subsequent anniversaries of the first payment, the final payment of which is subject to reduction based on the application of credits under certain circumstances. Documents were filed with the Bankruptcy Court further modifying the Amended PCC Plan by reducing Corning's initial payment by \$30 million and reducing its second and fourth payments by \$15 million each. In return, Corning will relinquish its claim for reimbursement of its payments and contributions under the Amended PCC Plan from the insurance carriers involved in the bankruptcy proceeding with certain exceptions. These modifications are expected to resolve objections to the Amended PCC Plan filed by some of the insurance carriers. Confirmation hearings on the Amended PCC Plan were held in June 2010 and briefs discussing the legal issues have been filed. The Bankruptcy Court's opinion on the Amended Plan is pending.

The Amended PCC Plan does not include non-PCC asbestos claims that may be or have been raised against Corning. Corning has recorded an additional \$150 million for such claims in its estimated asbestos litigation liability. The liability for non-PCC claims was estimated based upon industry

data for asbestos claims since Corning does not have recent claim history due to the injunction issued by the Bankruptcy Court. The estimated liability represents the undiscounted projection of claims and related legal fees over the next 20 years. The amount may need to be adjusted in future periods as more data becomes available.

The liability for the Amended PCC Plan and the non-PCC asbestos claims was estimated to be \$633 million at December 31, 2010, compared with an estimate of liability of \$682 million at December 31, 2009. For the years ended December 31, 2010 and 2009, Corning recorded asbestos litigation expense of \$5 million and \$20 million, respectively. In the first quarter of 2010, Corning recorded a credit of \$54 million to reflect the change in terms of Corning's proposed payments under the Amended Plan. The entire obligation is classified as a non-current liability as installment payments for the cash portion of the obligation are not planned to commence until more than 12 months after the Amended PCC Plan becomes effective and the PCE portion of the obligation will be fulfilled through the direct contribution of Corning's investment in PCE (currently recorded as a non-current other equity method investment).

In the first quarter of 2008, Corning recorded a credit to asbestos settlement expense of \$327 million as a result of the increase in likelihood of a settlement under the Amended PCC Plan and a corresponding decrease in the likelihood of a settlement under the 2003 Plan. For the year ended December 31, 2008, after the first quarter adjustment to the settlement amount, Corning recorded a benefit of \$13 million to reflect the change in value of the estimated liability under an Amended PCC Plan.

The Amended PCC Plan is subject to a number of contingencies. Payment of the amounts required to fund the Amended PCC Plan from insurance and other sources are subject to a number of conditions that may not be achieved. The approval of the Amended PCC Plan by the Bankruptcy Court is not certain and faces objections by some parties. Any approval of the Amended PCC Plan by the Bankruptcy Court is subject to appeal. For these and other reasons, Corning's liability for these asbestos matters may be subject to changes in subsequent quarters. The estimate of the cost of resolving the non-PCC asbestos claims may also be subject to change as developments occur. Management continues to believe that the likelihood of the uncertainties surrounding these proceedings causing a material adverse impact to Corning's financial statements is remote.

Several of Corning's insurers have commenced litigation for a declaration of the rights and obligations of the parties under insurance policies, including rights that may be affected by the potential resolutions described above. Corning is vigorously contesting these cases. Management is unable to predict the outcome of this insurance litigation and therefore cannot estimate the range of any possible loss.

At December 31, 2010 and 2009, the fair value of PCE significantly exceeded its carrying value of \$129 million and \$125 million, respectively. There have been no impairment indicators for our investment in PCE and we continue to recognize equity earnings of this affiliate. PCC filed for Chapter 11 reorganization in the U.S. Bankruptcy Court on April 16, 2000. At that time, Corning determined it lacked the ability to recover the carrying amount of its investment in PCC and its investment was other than temporarily impaired. As a result, we reduced our investment in PCC to zero.

##### NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

###### Note 1—Summary of Significant Accounting Policies (in part)

###### Affiliates

Investments in unconsolidated affiliates over which the Company has significant influence are accounted for under the equity method of accounting, whereby the investment is carried at the cost of acquisition, including subsequent capital contributions and loans from the Company, plus the Company's equity in undistributed earnings or losses since acquisition. Investments in affiliates which the Company does not have the ability to exert significant influence over the investees' operating and financing activities are accounted for under the cost method of accounting. The Company's investment in TAMCO, a steel mini-mill in California, was accounted for under the equity method. On October 21, 2010, the Company completed the sale of its 50% ownership interest in TAMCO. Investments in Ameron Saudi Arabia, Ltd. and Bondstrand, Ltd. are accounted for under the cost method due to Management's current assessment of the Company's influence over these affiliates.

*Note 6—Affiliates (in part)*

Investments, advances and equity in undistributed earnings of affiliates were as follows at November 30:

| (In thousands)                     | 2010    | 2009     |
|------------------------------------|---------|----------|
| Investment—equity method affiliate | —       | \$30,626 |
| Investments—cost method affiliates | \$3,784 | 3,784    |
|                                    | \$3,784 | \$34,410 |

The Company's ownership of affiliates at November 30, 2010 is summarized below:

| Products        | Affiliates                | Ownership Interest |
|-----------------|---------------------------|--------------------|
| Fiberglass pipe | Bondstrand, Ltd.          | 40%                |
| Concrete pipe   | Ameron Saudi Arabia, Ltd. | 30%                |

On October 21, 2010 the Company completed the sale of its 50% ownership interest in TAMCO. The Company sold its TAMCO investment and extinguished all outstanding debt owed by TAMCO to the Company under a shareholder loan for gross proceeds of \$78,067,000 after estimated working capital adjustments of \$697,000 and before closing costs of approximately \$2,128,000, recognizing an estimated pretax gain of \$48,401,000. Under the terms of the sale, an additional \$5,000,000 is to be held in escrow for a period of time to cover potential working capital adjustments and potential indemnification obligations related to the transaction.

Investments in affiliates and the amount of undistributed earnings were as follows:

| (In thousands)                                | Fiberglass Pipe | Concrete Pipe | TAMCO    | Total    |
|-----------------------------------------------|-----------------|---------------|----------|----------|

*NOTES TO CONSOLIDATED FINANCIAL STATEMENTS**Note 2. Accounting Policies (in part)**Fair Value*

Fair value is the price that would be received from selling an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. When determining fair value, we consider the principal or most advantageous market in which we would transact, and we consider assumptions that market participants would use when pricing the asset or liability. Our financial instruments are measured and recorded at fair value, except for equity method investments, cost method investments, cost method loans receivable, and most of our liabilities.

*Fair Value Hierarchy*

The three levels of inputs that may be used to measure fair value are as follows:

*Level 1.* Quoted prices in active markets for identical assets or liabilities.

*Level 2.* Observable inputs other than Level 1 prices, such as quoted prices for similar assets or liabilities, quoted prices in markets with insufficient volume or infrequent transactions (less active markets), or model-derived valuations in which all significant inputs are observable or can be derived principally from or corroborated with observable market data for substantially the full term of the assets or liabilities. Level 2 inputs also include non-binding market consensus prices that can be corroborated with observable market data, as well as quoted prices that were adjusted for security-specific restrictions.

*Level 3.* Unobservable inputs to the valuation methodology that are significant to the measurement of the fair value of assets or liabilities. Level 3 inputs also include non-binding market consensus prices or non-binding broker quotes that we were unable to corroborate with observable market data.

For further discussion of fair value, see “Note 5: Fair Value” and “Note 22: Retirement Benefit Plans.”

#### *Non-Marketable and Other Equity Investments*

Our non-marketable equity and other equity investments are included in other long-term assets. We account for non-marketable equity and other equity investments for which we do not have control over the investee as:

- *Equity method investments* when we have the ability to exercise significant influence, but not control, over the investee. Gains (losses) on equity method investments, net may be recorded with up to a one-quarter lag. Equity method investments include marketable and non-marketable investments.
- *Non-marketable cost method investments* when the equity method does not apply. We record the realized gains or losses on the sale of non-marketable cost method investments in gains (losses) on other equity investments, net.

#### *Note 5. Fair Value (in part)*

##### *Assets/Liabilities Measured and Recorded at Fair Value on a Recurring Basis (in part)*

Assets and liabilities measured and recorded at fair value on a recurring basis, excluding accrued interest components, consisted of the following types of instruments as of December 25, 2010 and December 26, 2009:

| (In millions)                                    | December 25, 2010                                        |          |         |          | December 26, 2009                                        |          |         |          |

## NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

1. Description of Business, Basis of Presentation and  
Summary of Significant Accounting Policies (in part)

## Asset Impairments

## Investments

The Company's investments consist of (i) fair-value investments, including available-for-sale securities and deferred compensation-related investments, (ii) investments accounted for using the cost method of accounting and (iii) investments accounted for using the equity method of accounting. The Company regularly reviews its investments for impairment, including when the carrying value of an investment exceeds its related market value. If it has been determined that an investment has sustained an other-than-temporary decline in its value, the investment is written down to its fair value by a charge to earnings. Factors that are considered by the Company in determining whether an other-than-temporary decline in value has occurred include the (i) market value of the security in relation to its cost basis, (ii) financial condition of the investee and (iii) the Company's intent and ability to retain the investment for a sufficient period of time to allow for recovery in the market value of the investment.

In evaluating the factors described above for available-for-sale securities, the Company presumes a decline in value to be other-than-temporary if the quoted market price of the security is 20% or more below the investment's cost basis for a period of six months or more (the "20% criterion") or the quoted market price of the security is 50% or more below the security's cost basis at any quarter end (the "50% criterion"). However, the presumption of an other-than-temporary decline in these instances may be overcome if there is persuasive evidence indicating that the decline is temporary in nature (e.g., the investee's operating performance is strong, the market price of the investee's security is historically volatile, etc.). Additionally, there may be instances in which impairment losses are recognized even if the 20% and 50% criteria are not satisfied (e.g., there is a plan to sell the security in the near term and the fair value is below the Company's cost basis).

For investments accounted for using the cost or equity method of accounting, the Company evaluates information (e.g., budgets, business plans, financial statements, etc.) in addition to quoted market prices, if any, in determining whether an other-than-temporary decline in value exists. Factors indicative of an other-than-temporary decline include recurring operating losses, credit defaults and subsequent rounds of financing at an amount below the cost basis of the Company's investment. For more information, see Note 4.

## 4. Investments (in part)

The Company's investments consist of equity-method investments, fair-value and other investments, including available-for-sale securities, and cost-method investments. Time Warner's investments, by category, consist of (millions):

|                                                                              | December 31 |         |
|------------------------------------------------------------------------------|-------------|---------|
|                                                                              | 2010        | 2009    |
| Equity-method investments                                                    | \$ 883      | \$ 641  |
| Fair-value and other investments, including<br>available-for-sale securities | 600         | 578     |
| Cost-method investments                                                      | 313         | 323     |
| Total                                                                        | \$1,796     | \$1,542 |

Fair-Value and Other Investments, Including  
Available-for-Sale Securities

Fair-value and other investments include deferred compensation-related investments and available-for-sale securities of \$547 million and \$53 million, respectively, as of December 31, 2010 and \$544 million and \$33 million respectively, as of December 31, 2009. Equity derivative instruments were \$1 million as of December 31, 2009.

Deferred compensation-related investments included \$248 million and \$238 million at December 31, 2010 and 2009, respectively, which were recorded at fair value, and \$299 million and \$306 million at December 31, 2010 and 2009, respectively, of life insurance-related investments, which were recorded at cash surrender value.

Equity derivative instruments and available-for-sale securities are recorded at fair value in the consolidated balance sheet, and the realized gains and losses are included as a component of Other income, net.

The cost basis, unrealized gains, unrealized losses and fair market value of available-for-sale securities are set forth below (millions):

|                        | December 31 |      |
|------------------------|-------------|------|
|                        | 2010        | 2009 |
| Cost basis             | \$39        | \$21 |
| Gross unrealized gain  | 14          | 14   |
| Gross unrealized loss  | —           | (2)  |
| Fair value             | \$53        | \$33 |
| Deferred tax liability | \$ 5        | \$ 5 |

During 2010, 2009 and 2008, \$(2) million, \$20 million and \$6 million, respectively, of net unrealized gains (losses) were reclassified from Accumulated other comprehensive income, net, to Other income, net, in the consolidated statement of operations, based on the specific identification method.

#### 5. Fair Value Measurements (in part)

A fair value measurement is determined based on the assumptions that a market participant would use in pricing an asset or liability. A three-tiered hierarchy draws distinctions between market participant assumptions based on (i) observable inputs such as quoted prices in active markets (Level 1), (ii) inputs other than quoted prices in active markets that are observable either directly or indirectly (Level 2) and (iii) unobservable inputs that require the Company to use present value and other valuation techniques in the determination of fair value (Level 3). The following tables present information about assets and liabilities required to be carried at fair value on a recurring basis as of December 31, 2010 and December 31, 2009, respectively (millions):

| Description                    | Fair Value Measurements |         |         |       |                   |         |         |       |

## NONCURRENT RECEIVABLES

### PRESENTATION

**2.82** FASB ASC 210, *Balance Sheet*, states that the concept of current assets excludes receivables arising from unusual transactions that are not expected to be collected within 12 months, such as the sale of capital assets or loans or advances to affiliates, officers, or employees.

**2.83** FASB ASC 825 includes noncurrent receivables as financial instruments. FASB ASC 820 requires disclosure of both the fair value and bases for estimating the fair value of noncurrent receivables, unless it is not practicable to estimate that value. However, FASB ASC 825-10-50-14 indicates that for trade receivables and payables, fair value disclosure is not required if the carrying amount approximates fair value.

##### NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

##### Note 1—Nature of Operations and Significant Accounting Policies (in part)

**Use of Estimates**—The Company's consolidated financial statements are prepared in conformity with accounting principles generally accepted in the United States of America ("U.S. GAAP"). These accounting principles require management to make estimates and assumptions that affect the reported amounts of assets and liabilities at the date of the financial statements and the reported amounts of revenue and expense during the reporting period. Actual results may differ from those estimated. Estimates and assumptions are reviewed periodically, and the effects of revisions are reflected in the financial statements in the period in which they are determined to be necessary. Estimates are used when accounting for such items as asset valuations, allowance for doubtful accounts, depreciation and amortization, impairment assessments, restructuring provisions, employee benefits, taxes, asbestos liability and related insurance receivable, environmental liability and contingencies.

##### Note 10—Commitments and Contingencies Leases (in part)

##### Asbestos Liability (in part)

**Insurance Coverage and Receivables.** Prior to 2005, a significant portion of the Company's settlement and defense costs were paid by its primary insurers. With the exhaustion of that primary coverage, the Company began negotiations with its excess insurers to reimburse the Company for a portion of its settlement and/or defense costs as incurred. To date, the Company has entered into agreements

providing for such reimbursements, known as "coverage-in-place," with eleven of its excess insurer groups. Under such coverage-in-place agreements, an insurer's policies remain in force and the insurer undertakes to provide coverage for the Company's present and future asbestos claims on specified terms and conditions that address, among other things, the share of asbestos claims costs to be paid by the insurer, payment terms, claims handling procedures and the expiration of the insurer's obligations. The most recent such agreement became effective July 7, 2010, between the Company and Travelers Casualty & Surety Company. On March 3, 2008, the Company reached agreement with certain London Market Insurance Companies, North River Insurance Company and TIG Insurance Company, confirming the aggregate amount of available coverage under certain London policies and setting forth a schedule for future reimbursement payments to the Company based on aggregate indemnity and defense payments made. In addition, with six of its excess insurer groups, the Company entered into policy buyout agreements, settling all asbestos and other coverage obligations for an agreed sum, totaling \$79.5 million in aggregate. The most recent of these buyouts was reached with Munich Reinsurance America, Inc. and involved certain historical policies issued by American Re-Insurance Company and American Excess Insurance Company. Reimbursements from insurers for past and ongoing settlement and defense costs allocable to their policies have been made as coverage-in-place and other agreements are reached with such insurers. All of these agreements include provisions for mutual releases, indemnification of the insurer and, for coverage-in-place, claims handling procedures. With the agreements referenced above, the Company has concluded settlements with all but one of its solvent excess insurers whose policies are expected to respond to the aggregate costs included in the updated liability estimate. That insurer, which issued a single applicable policy, has agreed to pay the shares of defense and indemnity costs the Company has allocated to it, subject to a reservation of rights, pending negotiation of a formal settlement agreement with the Company. If the Company is not successful in concluding an agreement with that insurer, then the Company anticipates that it would pursue litigation to enforce its rights under such insurer's policy. There are no pending legal proceedings between the Company and any insurer contesting the Company's asbestos claims under its insurance policies.

In conjunction with developing the aggregate liability estimate referenced above, the Company also developed an estimate of probable insurance recoveries for its asbestos liabilities. In developing this estimate, the Company considered its coverage-in-place and other settlement agreements described above, as well as a number of additional factors. These additional factors include the financial viability of the insurance companies, the method by which losses will be allocated to the various insurance policies and the years covered by those policies, how settlement and defense costs will be covered by the insurance policies and interpretation of the effect on coverage of various policy terms and limits and their interrelationships. In addition, the timing and amount of reimbursements will vary because the Company's insurance coverage for asbestos claims involves multiple insurers, with different policy terms and certain gaps in coverage. In addition to consulting with legal counsel on these insurance matters, the Company retained insurance consultants to assist management in the estimation of probable insurance recoveries based upon the aggregate liability estimate

described above and assuming the continued viability of all solvent insurance carriers. Based upon the analysis of policy terms and other factors noted above by the Company's legal counsel, and incorporating risk mitigation judgments by the Company where policy terms or other factors were not certain, the Company's insurance consultants compiled a model indicating how the Company's historical insurance policies would respond to varying levels of asbestos settlement and defense costs and the allocation of such costs between such insurers and the Company. Using the estimated liability as of September 30, 2007 (for claims filed through 2017), the insurance consultant's model forecasted that approximately 33% of the liability would be reimbursed by the Company's insurers. An asset of \$351 million was recorded as of September 30, 2007 representing the probable insurance reimbursement for such claims. The asset is reduced as reimbursements and other payments from insurers are received. The asset was \$214 million as of December 31, 2010.

The Company reviews the aforementioned estimated reimbursement rate with its insurance consultants on a periodic basis in order to confirm its overall consistency with the Company's established reserves. The reviews encompass consideration of the performance of the insurers under coverage-in-place agreements, the effect of any additional lump-sum payments under policy buyout agreements, and, following consultation with legal counsel, the consistency of any new coverage-in-place agreements with the assumptions in the model. Since September 2007, there have been no developments that have caused the Company to change the estimated 33% rate, although actual insurance reimbursements vary from period to period, and will decline over time, for the reasons cited above. While there are overall limits on the aggregate amount of insurance available to the Company with respect to asbestos claims, those overall limits were not reached by the total estimated liability currently recorded by the Company, and such overall limits did not influence the Company in its determination of the asset amount to record. The proportion of the asbestos liability that is allocated to certain insurance coverage years, however, exceeds the limits of available insurance in those years. The Company allocates to itself the amount of the asbestos liability (for claims filed through 2017) that is in excess of available insurance coverage allocated to such years.

**Uncertainties.** Estimation of the Company's ultimate exposure for asbestos-related claims is subject to significant uncertainties, as there are multiple variables that can affect the timing, severity and quantity of claims. The Company cautions that its estimated liability is based on assumptions with respect to future claims, settlement and defense costs based on recent experience during the last few years that may not prove reliable as predictors. A significant upward or downward trend in the number of claims filed, depending on the nature of the alleged injury, the jurisdiction where filed and the quality of the product identification, or a significant upward or downward trend in the costs of defending claims, could change the estimated liability, as would substantial adverse verdicts at trial. A legislative solution or a revised structured settlement transaction could also change the estimated liability.

The same factors that affect developing estimates of probable settlement and defense costs for asbestos-related liabilities also affect estimates of the probable insurance reimbursements, as do a number of additional factors. These additional factors include the financial viability of the insurance companies, the method by which losses will be allocated to

the various insurance policies and the years covered by those policies, how settlement and defense costs will be covered by the insurance policies and interpretation of the effect on coverage of various policy terms and limits and their interrelationships. In addition, due to the uncertainties inherent in litigation matters, no assurances can be given regarding the outcome of any litigation, if necessary, to enforce the Company's rights under its insurance policies.

Many uncertainties exist surrounding asbestos litigation, and the Company will continue to evaluate its estimated asbestos-related liability and corresponding estimated insurance reimbursement as well as the underlying assumptions and process used to derive these amounts. These uncertainties may result in the Company incurring future charges or increases to income to adjust the carrying value of recorded liabilities and assets, particularly if the number of claims and settlement and defense costs change significantly or if legislation or another alternative solution is implemented; however, the Company is currently unable to estimate such future changes and, accordingly, while it is probable that the Company will incur additional charges for asbestos liabilities and defense costs in excess of the amounts currently provided, the Company does not believe that any such amount can be reasonably determined. Although the resolution of these claims may take many years, the effect on the results of operations, financial position and cash flow in any given period from a revision to these estimates could be material.

## NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

### Note 1—Description of Business and Summary of Significant Accounting Policies (in part)

**Financing Receivables**—Financing receivables consist of customer receivables, residual interest and retained interest in securitized receivables. Customer receivables include revolving loans and fixed-term leases and loans resulting from the sale of Dell products and services. Financing receivables are presented net of the allowance for losses. See Note 4 of Notes to Consolidated Financial Statements for additional information.

### Note 4—Financial Services (in part)

#### Financing Receivables

#### Customer Receivables

The following is the description of the components of Dell's customer receivables:

- Revolving loans offered under private label credit financing programs provide qualified customers with a revolving credit line for the purchase of products and services offered by Dell. Revolving loans bear interest at a variable annual percentage rate that is tied to the prime rate. Based on historical payment patterns, revolving loan transactions are typically repaid on average within 12 months. Revolving loans are included in short-term financing receivables in the table above. From time to time, account holders may have the opportunity to finance their Dell purchases with special programs during which, if the outstanding balance is paid in full by a specific date, no interest is charged. These special programs generally range from 3 to 12 months. At January 29, 2010, and January 30, 2009, receivables under these special programs were \$442 million and \$352 million, respectively.
- Revolving loans includes customer receivables that were previously securitized and held by a nonconsolidated qualifying special purpose entity. In the second quarter of Fiscal 2010, the beneficial interest in the securitization conduit held by third parties fell below 10% and the special purpose entity was consolidated.

Upon consolidation, these customer receivables were recorded at fair value and the associated retained interest was eliminated. The balance of these customer receivables was \$435 million as of January 29, 2010.

- Dell enters into sales-type lease arrangements with customers who desire lease financing. Leases with business customers have fixed terms of two to five years. Future maturities of minimum lease payments at January 29, 2010, for Dell are as follows: Fiscal 2011—\$303 million; Fiscal 2012—\$188 million; Fiscal 2013—\$76 million; and Fiscal 2014—\$4 million. Fixed-term loans are offered to qualified small businesses, large commercial accounts, governmental organizations, and educational entities.

Delinquency and charge-off statistics for customer receivables are:

- As of January 29, 2010, and January 30, 2009, customer financing receivables 60 days or more delinquent were \$127 million and \$58 million, respectively. These amounts represent 4.4% and 3.7% of the ending gross customer financing receivables balance for the respective periods.
- Net principal write-offs charged to the allowance for Fiscal 2010 and Fiscal 2009, were \$130 million and \$86 million, respectively. These amounts represent 6.2% and 5.5% of the average quarterly gross outstanding customer financing receivables balance (including accrued interest) for the respective periods.

#### Residual Interest

Dell retains a residual interest in equipment leased under its fixed-term lease programs. The amount of the residual interest is established at the inception of the lease based upon estimates of the value of the equipment at the end of the lease term using historical studies, industry data, and future value-at-risk demand valuation methods. On a quarterly basis, Dell assesses the carrying amount of its recorded residual values for impairment. Anticipated declines in specific future residual values that are considered to be other-than-temporary are recorded currently in earnings.

#### Retained Interest

Certain transfers of financial assets to nonconsolidated qualified special purpose entities are accounted for as a sale. Upon the sale of the customer receivables to nonconsolidated qualifying special purpose entities, Dell recognizes a gain on the sale and retains a residual beneficial interest in the pool of assets sold, referred to as retained interest. The retained interest represents Dell's right to receive collections for assets securitized exceeding the amount required to pay interest, principal, and other fees and expenses.

Retained interest is stated at the present value of the estimated net beneficial cash flows after payment of all senior interests. Dell values the retained interest at the time of each receivable transfer and at the end of each reporting period. The fair value of the retained interest is determined using a discounted cash flow model with various key assumptions, including payment rates, credit losses, discount rates, and the remaining life of the receivables sold. These assumptions are supported by both Dell's historical experience and anticipated trends relative to the particular receivable pool. The key valuation assumptions for retained interest can be affected by many factors, including repayment terms and the credit quality of receivables securitized.

The following table summarizes the activity in retained interest balances:

| (In millions)                                  | Fiscal Year Ended |                  |                  |
|------------------------------------------------|-------------------|------------------|------------------|
|                                                | January 29, 2010  | January 30, 2009 | February 1, 2008 |
| <b>Retained Interest:</b>                      |                   |                  |                  |
| Retained interest at beginning of period       | \$ 396            | \$ 223           | \$ 159           |
| Issuances                                      | 322               | 427              | 173              |
| Distributions from conduits                    | (91)              | (246)            | (132)            |
| Net accretion                                  | 31                | 16               | 31               |
| Change in fair value for the period            | (5)               | (24)             | (8)              |
| Impact of special purpose entity consolidation | (502)             | —                | —                |
| Retained interest at end of the period         | \$ 151            | \$ 396           | \$ 223           |

The following table summarizes the key assumptions used to measure the fair value of the retained interest of the fixed term leases and loans at time of transfer within the period and at January 29, 2010, the balance sheet date:

|                                                 | Weighted Average Key Assumptions |                          |                             |               |
|-------------------------------------------------|----------------------------------|--------------------------|-----------------------------|---------------|
|                                                 | Monthly Payment Rates            | Credit Losses (Lifetime) | Discount Rates (Annualized) | Life (Months) |
| Time of transfer valuation of retained interest | 5%                               | 1%                       | 12%                         | 20            |
| Valuation of retained interest                  | 8%                               | 3%                       | 12%                         | 14            |

The impact of adverse changes to the key valuation assumptions to the fair value of retained interest at January 29, 2010 is shown in the following table:

| (In millions)                  | January 29, 2010 |
|--------------------------------|------------------|
| <b>Adverse Change of:</b>      |                  |
| Expected prepayment speed: 10% | \$(0.1)          |
| Expected prepayment speed: 20% | \$(0.2)          |
| Expected credit losses: 10%    | \$(1.1)          |
| Expected credit losses: 20%    | \$(2.2)          |
| Discount rate: 10%             | \$(1.7)          |
| Discount rate: 20%             | \$(3.4)          |

The analysis above utilized 10% and 20% adverse variation in assumptions to assess the sensitivities in the fair value of the retained interest. However, these changes generally cannot be extrapolated because the relationship between a change in one assumption to the resulting change in fair value may not be linear. For the above sensitivity analyses, each key assumption was isolated and evaluated separately. Each assumption was adjusted by 10% and 20% while holding the other key assumptions constant. Assumptions may be interrelated, and changes to one assumption may impact others and the resulting fair value of the retained interest. For example, increases in market interest rates may result in lower prepayments and increases in credit losses. The effect of multiple assumption changes were not considered in the analysis.

During Fiscal 2010 and Fiscal 2009, \$784 million and \$1.4 billion, respectively, of customer receivables were funded via securitization through nonconsolidated qualified special purpose

entities. The principal balance of securitized receivables reported off-balance sheet as of January 29, 2010, and January 30, 2009, were \$774 million and \$1.4 billion, respectively. Dell's risk of loss related to securitized receivables is limited to the amount of its retained interest.

Lease and loan receivables transferred to the nonconsolidated qualified special purpose entities exceed the level of debt issued. As of January 29, 2010, the nonconsolidated securitized receivables were \$774 million, and the associated debt was \$624 million. Upon consolidation of these customer receivables and associated debt in the first quarter of Fiscal 2011 as previously discussed, Dell's retained interest in securitized receivables of \$151 million at January 29, 2010, will be eliminated.

Delinquency and charge-off statistics for securitized receivables held by nonconsolidated qualified special purpose entities are:

- As of January 29, 2010, and January 30, 2009, securitized financing receivables 60 days or more delinquent were \$11 million and \$63 million, respectively. These amounts represent 1.5% and 4.6% of the ending securitized financing receivables balances for the respective periods.
- Net principal chargeoffs for Fiscal 2010 and Fiscal 2009, were \$72 million and \$114 million, respectively. These amounts represent 6.9% and 8.2% of the average quarterly outstanding securitized financing receivables balance (including accrued interest) for the respective years.

## INTANGIBLE ASSETS

### RECOGNITION AND MEASUREMENT

**2.86** FASB ASC 350, *Intangibles—Goodwill and Other*, specifies that goodwill and intangible assets that have indefinite lives are not subject to amortization but, rather, should be tested at least annually for impairment. In addition, FASB ASC 350 provides specific guidance on how to determine and measure impairment of goodwill and intangible assets not subject to amortization. Intangible assets that have finite useful lives should be amortized over their useful lives.

**2.87** FASB ASC 350 also provides guidance on accounting for the cost of computer software developed or obtained for internal use and website development costs.

### PRESENTATION

**2.88** FASB ASC 350-20-45-1 requires that the aggregate amount of goodwill be presented as a separate line item in the balance sheet. Under FASB ASC 350-30-45-1, at minimum, all intangible assets should be aggregated and presented as a separate line item in the balance sheet. However, that requirement does not preclude the presentation of individual intangible assets or classes of intangible assets as separate line items. Rule 5-02 of Regulation S-X also calls for separately stating each class of intangible assets in excess of 5 percent of total assets and for separate presentation of the amount of accumulated amortization of intangible assets.

### DISCLOSURE

**2.89** FASB ASC 350 requires additional disclosures for each period for which a balance sheet is presented, including information about gross carrying amounts and changes therein of goodwill and other intangible assets, accumulated amortization for amortizable assets, and estimates about intangible asset amortization expense for each of the five succeeding fiscal years. For intangibles, the balance sheet disclosures should be in total and by major intangible asset class.

## 2.90

**TABLE 2-9: INTANGIBLE ASSETS\***

Table 2-9 lists those intangible assets, amortized or not, which are most frequently disclosed by the survey entities.

## NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

(Thousands of dollars unless otherwise indicated)

*Note 1—Significant Accounting Policies (in part)*

**Goodwill.** Goodwill represents the cost in excess of fair value of net assets acquired in business combinations accounted for by the purchase method. In accordance with the Impairments Topic of the ASC, goodwill is tested for impairment on an annual basis and in between annual tests if events or circumstances indicate potential impairment. See Note 5.

*Note 5—Goodwill, Intangible and Long-Lived Assets (in part)*

During 2010, the Company recognized \$79,909 of goodwill and \$18,007 of trademarks in the acquisitions of Sayerlack, Acroma and Pinturas Condor. Customer relationships valued at \$35,886 recognized in the acquisitions of Acroma and Pinturas Condor are being amortized over periods of 15 and 19 years, respectively, from the date of acquisition.

During 2009, the Company recognized \$4,147 of goodwill, \$3,211 of trademarks and \$2,643 of other intangibles in the acquisition of Altax. Customer relationships valued at \$1,572 and intellectual property valued at \$1,071 are being amortized over 10 and 8 years, respectively, from the date of acquisition.

During 2008, the Company recognized \$24,383 of goodwill in the acquisitions of Euronavy, Inchem, Becker and Columbia. There was no goodwill recognized in the acquisition of Wagman Primus. Trademarks of \$10,265 were recognized in the acquisition valuation of Inchem and Euronavy. Covenants not to compete of \$3,000, obtained in the acquisitions of Inchem, Becker and Wagman Primus, are being amortized over five years from the date of acquisition. Customer lists valued at \$6,950, recognized in the acquisitions of Inchem and Becker, are being amortized over periods of 4.5 years and 10 years, respectively. A value for formulations acquired of \$300, recognized in the acquisition of Becker, is being amortized over 5 years. No significant residual value was estimated for any of the acquired identified intangible assets.

In accordance with the Goodwill and Other Intangibles Topic of the ASC, goodwill and indefinite-lived intangible assets are tested for impairment annually, and interim impairment tests are performed whenever an event occurs or circumstances change that indicate an impairment has more likely than not occurred. October 1 has been established for

the annual impairment review. At the time of impairment testing, values are estimated separately for goodwill and trademarks with indefinite lives using a discounted cash flow valuation model, incorporating discount rates commensurate with the risks involved for each group of assets. Impairments of goodwill and trademarks with indefinite lives have been reported as a separate line in the Statements of Consolidated Income.

The annual impairment review performed as of October 1, 2010 resulted in a trademark impairment in the Paint Stores Group of \$120 and no goodwill impairment. The trademark impairment related primarily to lower-than-anticipated sales of an acquired brand.

The annual impairment review performed as of October 1, 2009 resulted in trademark impairments of \$14,144 (\$10,998 in the Paint Stores Group, \$86 in the Consumer Group and \$3,060 in the Global Finishes Group), and no goodwill impairment. The trademark impairments related primarily to lower-than-anticipated sales of certain acquired brands.

The annual impairment review performed as of October 1, 2008 resulted in reductions in the carrying values of goodwill of \$8,113 and trademarks with indefinite lives of \$22,579. The goodwill impairment was included in the Consumer Group. The trademark impairments were in the Paint Stores Group (\$22,474) and the Consumer Group (\$105). The goodwill and trademark impairments related primarily to lower-than-anticipated cash flow in a certain acquired business and lower-than-anticipated sales of certain acquired brands, respectively.

During the second quarter of 2008, the Company performed an interim impairment review of its goodwill and indefinite-lived intangible assets. Soft domestic architectural paint sales in the new residential, residential repaint, DIY and commercial markets indicated that certain domestic indefinite-lived trademarks might be impaired. In addition, continued low cash flow projections in one foreign business unit indicated that goodwill impairment might be likely. The interim impairment review resulted in reductions in the carrying values of certain trademarks with indefinite lives of \$23,121. The trademark impairments were charged to the Paint Stores Group (\$20,364) and the Consumer Group (\$2,757). The goodwill impairment of a foreign business unit aggregated \$791 and was charged to the Global Finishes Group.

Amortization of finite-lived intangible assets is as follows for the next five years: \$24,187 in 2011, \$22,645 in 2012, \$18,402 in 2013 and \$15,222 in 2014 and \$12,375 in 2015.

A summary of changes in the Company's carrying value of goodwill by reportable operating segment is as follows:

| <b>Goodwill</b>                             | <b>Paint Stores Group</b> | <b>Consumer Group</b> | <b>Global Finishes Group</b> | <b>Consolidated Totals</b> |
|---------------------------------------------|---------------------------|-----------------------|------------------------------|----------------------------|
| Balance at January 1, 2008                  | \$274,250                 | \$689,635             | \$ 32,728                    | \$ 996,613                 |
| Acquisitions                                | 10,133                    |                       | 14,250                       | 24,383                     |
| Impairment charged to operations            |                           | (8,113)               | (791)                        | (8,904)                    |

#### NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

Amounts are in millions or shares unless indicated otherwise (per share data assume dilution).

#### Note 1. Summary of Significant Accounting Policies (in part)

##### Goodwill and Indefinite Life Intangible Assets

Goodwill and indefinite life intangible assets are tested annually for impairment as of July 1 using a discounted cash flow model and other valuation techniques. Additionally, goodwill and indefinite life intangible assets are evaluated for impairment whenever events or circumstances indicate there may be a possible permanent loss of value.

Goodwill is tested for impairment at the reporting unit level, which is equivalent to Eaton's operating segments, and based on the net assets for each segment, including goodwill and intangible assets. Goodwill is assigned to each operating segment, as this represents the lowest level that constitutes a business and for which discrete financial information is available and is the level which management regularly reviews the operating results. A discounted cash flow model is used to estimate the fair value of each operating segment, which considers forecasted cash flows discounted at an estimated weighted-average cost of capital. The Company selected the discounted cash flow methodology as it believes that it is comparable to what would be used by market participants. The forecasted cash flows are based on the Company's long-term operating plan, and a terminal value is used to estimate the operating segment's cash flows beyond the period covered by the operating plan. The weighted-average cost of capital is an estimate of the overall after-tax rate of return required by equity and debt market participants of a business enterprise. These analyses require the exercise of significant judgments, including judgments about appropriate discount rates, perpetual growth rates and the timing of expected future cash flows. Discount rate assumptions are based on an assessment of the risk inherent in the future

cash flows of the respective operating segment. Sensitivity analyses are performed around these assumptions in order to assess the reasonableness of the assumptions and the resulting estimated fair values.

Indefinite life intangible assets primarily consist of trademarks. The fair value of these assets is determined using a royalty relief methodology similar to that employed when the associated assets were acquired, but using updated estimates of future sales, cash flows and profitability.

For 2010, the fair value of Eaton's reporting units and indefinite life intangible assets substantially exceeded the respective carrying values. For additional information about goodwill and other intangible assets, see Note 4.

*Note 4. Goodwill and Other Intangible Assets (in part)*

A summary of goodwill follows:

|                          | 2010    | 2009    |
|--------------------------|---------|---------|
| Electrical Americas      | \$2,061 | \$2,003 |
| Electrical Rest of World | 985     | 1,005   |
| Hydraulics               | 1,007   | 1,016   |
| Aerospace                | 1,037   | 1,047   |
| Truck                    | 151     | 147     |
| Automotive               | 213     | 217     |
| Total goodwill           | \$5,454 | \$5,435 |

The increase in goodwill in 2010 was due to businesses acquired during 2010, the finalization of purchase price allocations related to businesses acquired in 2009, and foreign currency translation. For additional information regarding acquired businesses, see Note 2.

##### NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

#### 6. Acquisition of Assets

On June 4, 2010, the Company acquired the Simply Saline brand from Blairex Laboratories ("Simply Saline Acquisition") for cash consideration of \$70.0 million. Simply Saline annual net sales are approximately \$20.0 million. The Simply Saline brand will be managed principally within the Consumer Domestic segment.

On September 2, 2010, the Company acquired certain oral care technology ("Technology Acquisition") for cash consideration of \$10.0 million. The new oral care technology will be managed principally within the Consumer Domestic segment.

On December 21, 2010, the Company acquired the Feline Pine cat litter brand from Nature's Earth Products, Inc. ("Feline Pine Acquisition") for cash consideration of \$46.0 million. Feline Pine annual net sales are approximately \$20.0 million. The acquired brand will complement the existing Arm & Hammer's cat litter business. The Feline Pine brand will be managed within the Consumer Domestic segment.

The fair values of the assets acquired in 2010 are as follows:

| (In thousands)                   | Fair Value of Assets Acquired in 2010 |            |             |           |
|----------------------------------|---------------------------------------|------------|-------------|-----------|
|                                  | Simply Saline                         | Technology | Feline Pine | Total     |
| Inventory/current assets         | \$ 1,725                              | \$ 0       | \$ 1,417    | \$ 3,142  |
| Tradenames and other intangibles | 55,635                                | 10,000     | 38,500      | 104,135   |
| Goodwill                         | 12,665                                | 0          | 6,083       | 18,748    |
| Total assets                     | 70,025                                | 10,000     | 46,000      | 126,025   |
| Liabilities                      | 0                                     | 0          | 0           | 0         |
| Purchase price                   | \$70,025                              | \$10,000   | \$46,000    | \$126,025 |

The asset allocation of the Feline Pine Acquisition is based on a preliminary valuation. Pro forma results reflecting the Simply Saline and Feline Pine Acquisitions are not presented because they did not have a material effect on the Company's consolidated financial results.

The weighted average life of the amortizable intangible assets recognized from the Simply Saline Acquisition was 15 years and from the Technology Acquisition was 10 years.

On July 7, 2008, the Company purchased substantially all of the assets and certain liabilities of Del Pharmaceuticals, Inc. from Coty, Inc. (the "Orajel Acquisition") for cash consideration of \$383.4 million including fees. Products acquired from Del Pharmaceuticals, Inc. include the Orajel brand of oral analgesics and various other over-the-counter brands.

#### 7. Goodwill and Other Intangibles (in part)

The following table provides information related to the carrying value of all intangible assets, other than goodwill:

| (In thousands)                                           | December 31, 2010     |                          |           |                             | December 31, 2009     |                          |           |
|----------------------------------------------------------|-----------------------|--------------------------|-----------|-----------------------------|-----------------------|--------------------------|-----------|

| Patents/Formulas                                         | 38,520                | (21,049)                 | 17,471    | 4–20                        | 27,370                | (18,084)                 | 9,286     |
| Non compete agreement                                    | 1,378                 | (1,059)                  | 319       | 5–10                        | 1,143                 | (918)                    | 225       |
| Total                                                    | \$407,515             | \$(126,475)              | \$281,040 |                             | \$388,526             | \$(102,928)              | \$285,598 |
| <b>Indefinite Lived Intangible Assets—Carrying Value</b> |                       |                          |           |                             |                       |                          |           |
| Tradenames                                               | \$591,420             |                          |           |                             | \$509,293             |                          |           |

Intangible amortization expense amounted to \$23.7 million for 2010, \$24.2 million for 2009 and \$21.8 million in 2008. The Company estimates that intangible amortization expense will be approximately \$24.8 million in 2011 and \$22.0 to \$24.0 million in each of the next four years.

Other intangible assets increased in 2010 due to the Simply Saline, Technology and Feline Pine Acquisitions. The acquired intangible assets reflect their allocable purchase price as of their respective purchase dates.

The Company recognized tradename impairment charges within selling, general and administrative expenses during the three year period ended December 31, 2010 as follows:

| (In thousands)         | 2010 | 2009 | 2008    |
|------------------------|------|------|---------|
| Segments:              |      |      |         |
| Consumer domestic      | \$0  | \$0  | \$1,910 |
| Consumer international | 0    | 0    | 3,764   |
| Total                  | \$0  | \$0  | \$5,674 |

The tradename impairment charges recorded in 2008 were a result of management's decision to exit a business, a potential change of a brand's name, lost distribution at key customer accounts and reduced profitability. The amount of the impairment charge was determined by comparing the estimated fair value of the asset to its carrying amount. Fair value was estimated based on a "relief from royalty" discounted cash flow method. Under this method, the owner of an intangible asset must determine the arm's length royalty that likely would have been charged if the owner had to license that asset from a third party. Estimates under the relief from royalty method involve numerous variables that are subject to change as business conditions change, and therefore could impact fair values in the future. The Company determined that the remaining carrying value of all tradenames was recoverable based upon the forecasted cash flows and profitability of the related brands.

## NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

### 1. Summary of Significant Accounting Policies (in part)

**Intangible and Other Assets**—Identifiable intangible assets, other than trademarks that have indefinite lives, are typically amortized over the following range of estimated useful lives:

| Asset                           | Useful Life                        |
|---------------------------------|------------------------------------|
| Customer relationships          | 5 to 15 years                      |
| Certain finite lived trademarks | 5 to 15 years                      |
| Customer supply contracts       | Over the terms of the agreements   |
| Noncompetition agreements       | Over the terms of the agreements   |
| Deferred financing costs        | Over the terms of the related debt |

In accordance with Accounting Standards related to “Goodwill and Other Intangible Assets”, we do not amortize goodwill and other intangible assets determined to have indefinite useful lives. Instead, we conduct impairment tests on our goodwill, trademarks and other intangible assets with indefinite lives annually and when circumstances indicate that the carrying value may not be recoverable. To determine whether impairment exists, we primarily utilize a discounted future cash flow analysis.

### 6. Goodwill and Intangible Assets (in part)

The gross carrying amount and accumulated amortization of our intangible assets other than goodwill as of December 31, 2010 and 2009 are as follows:

|                                          | December 31           |                          |                     |                       |                          |                     |
|------------------------------------------|-----------------------|--------------------------|---------------------|-----------------------|--------------------------|---------------------|
|                                          | 2010                  |                          |                     | 2009                  |                          |                     |
| (In thousands)                           | Gross Carrying Amount | Accumulated Amortization | Net Carrying Amount | Gross Carrying Amount | Accumulated Amortization | Net Carrying Amount |
| Intangible assets with indefinite lives: |                       |                          |                     |                       |                          |                     |
| Trademarks <sup>(1)(2)</sup>             | \$593,387             | \$ —                     | \$593,387           | \$608,339             | \$ —                     | \$608,339           |
| Intangible assets with finite lives:     |                       |                          |                     |                       |                          |                     |
| Customer-related and other               | 133,829               | (44,622)                 | 89,207              | 135,993               | (35,737)                 | 100,256             |
| Trademarks                               | 18,614                | (4,474)                  | 14,140              | 10,146                | (1,940)                  | 8,206               |
| Total                                    | \$745,830             | \$(49,096)               | \$696,734           | \$754,478             | \$(37,677)               | \$716,801           |

<sup>(1)</sup> A trademark with a gross carrying amount of \$7.5 million was moved from indefinite lived intangible assets to finite lived intangible assets in the first quarter of 2010. The remaining decrease in the gross carrying amount of intangible assets with indefinite lives is the result of foreign currency translation adjustments.

<sup>(2)</sup> In the third quarter of 2010, \$2.1 million of indefinite lived intangible assets attributable to Rachel's were sold. Amounts at December 31, 2009 have been moved to assets held for sale to reflect this change.

Amortization expense on intangible assets for the years ended December 31, 2010, 2009 and 2008 was \$11.3 million, \$9.6 million and \$9.8 million, respectively. Estimated aggregate intangible asset amortization expense for the next five years is as follows:

|      |                |
|------|----------------|
| 2011 | \$11.2 million |
| 2012 | 9.9 million    |
| 2013 | 9.8 million    |
| 2014 | 9.1 million    |
| 2015 | 9.0 million    |

Our goodwill and intangible assets have resulted from acquisitions. Upon acquisition, the purchase price is first allocated

to identifiable assets and liabilities, including trademarks and customer-related intangible assets, with any remaining purchase price recorded as goodwill. Goodwill and trademarks with indefinite lives are not amortized.

A trademark is recorded with an indefinite life if it has a history of strong sales and cash flow performance that we expect to continue for the foreseeable future. If these perpetual trademark criteria are not met, the trademarks are amortized over their expected useful lives. Determining the expected life of a trademark is based on a number of factors including the competitive environment, trademark history and anticipated future trademark support.

We conduct impairment tests of goodwill and intangible assets with indefinite lives annually in the fourth quarter or when circumstances arise that indicate a possible

impairment might exist. If the fair value of an evaluated asset is less than its book value, an impairment charge is recorded. Our reporting units are Fresh Dairy Direct, WhiteWave, Morningstar and Alpro. We did not recognize any impairment charges related to goodwill during 2010, 2009 or 2008.

Considerable management judgment is necessary to evaluate goodwill for impairment. We determine fair value using widely acceptable valuation techniques including discounted cash flows, market multiples analyses and relief from royalty analyses. Increasing our discount rates assumed in these analyses by 0.25% would not have resulted in an impairment charge. Assumptions used in our valuations, such as forecasted growth rates and our cost of capital, are consistent with our internal projections and operating plans. The terminal growth rates utilized in calculating the fair value of our reporting units (ranging from 1.8% to 3.5%) is also dependent upon meeting our internal projections and operating plans, as well as other factors and assumptions. A 0.25% reduction in the terminal growth rate assumptions used could result in a material impairment charge.

Based on our analysis performed in the fourth quarter of 2010, each of our reporting units tested had fair values in excess of book values by approximately \$229 million or 6.4%, \$367 million or 65.1%, \$856 million or 80.4% and \$33 million or 7.8% for Fresh Dairy Direct, Morningstar, WhiteWave and Alpro, respectively. The sum of the fair values of our reporting units was in excess of our market capitalization. We believe that the difference between the fair value and market capitalization is reasonable (in the context of assessing whether any asset impairment exists) when market-based control premiums are taken into consideration. While the results of our testing indicate that each of our reporting units has a fair value in excess of its carrying value and no impairment charge was required; the excess of the reporting unit fair values over carrying values, specifically with respect to our Fresh Dairy Direct reporting unit, is significantly less than in prior years. We can provide no assurance that we will not have an impairment charge in future periods as a result of changes in our operating results or our assumptions.

While the results of our testing indicate that each of our reporting units has a fair value in excess of its carrying value and no impairment charge was required; the excess of the reporting unit fair values over carrying values, specifically with respect to our Fresh Dairy Direct reporting unit, is significantly less than in prior years. While testing results do not indicate an impairment charge, we can provide no assurance that we will not have an impairment charge in future periods as a result of changes in our operating results.

The sum of the fair values of our reporting units was in excess of our market capitalization. We believe that the difference between the fair value and market capitalization is reasonable (in the context of assessing whether any asset impairment exists) when market-based control premiums are taken into consideration.

In 2009, we recognized an impairment charge of \$0.5 million in Fresh Dairy Direct related to a perpetual trademark for a regional brand due to projected declining annualized sales volumes and profitability. This trademark was no longer deemed to have a perpetual life and therefore is amortized over its estimated remaining life. In 2008, we recognized an impairment charge of \$2.3 million related to three perpetual trademarks for regional brands in Fresh Dairy Direct. The write-downs were the result of lower annualized sales volumes from certain facilities partly related to movement of production between regional brands. These trademarks were no

longer deemed to have a perpetual life and are being amortized over their respective estimated remaining lives.

Amortizable intangible assets are only evaluated for impairment upon a significant change in the operating environment. If an evaluation of the undiscounted cash flows indicates impairment, the asset is written down to its estimated fair value, which is generally based on discounted future cash flows.

##### *NOTES TO CONSOLIDATED FINANCIAL STATEMENTS*

##### *Note 1. Basis of Presentation and Significant Accounting Policies (in part)*

##### *Goodwill, Purchased Intangibles and Other Long-Lived Assets (in part)*

We amortize intangible assets with finite lives over their estimated useful lives and review them for impairment whenever an impairment indicator exists. We continually monitor events and changes in circumstances that could indicate carrying amounts of our long-lived assets, including our intangible assets may not be recoverable. When such events or changes in circumstances occur, we assess recoverability by determining whether the carrying value of such assets will be recovered through the undiscounted expected future cash flows. If the future undiscounted cash flows are less than the carrying amount of these assets, we recognize an impairment loss based on the excess of the carrying amount over the fair value of the assets. We did not recognize any intangible asset impairment charges in fiscal 2010, 2009 or 2008.

Our intangible assets are amortized over their estimated useful lives of 1 to 13 years as shown in the table below. Amortization is based on the pattern in which the economic benefits of the intangible asset will be consumed.

|                                      | Weighted Average<br>Useful Life (Years) |
|--------------------------------------|-----------------------------------------|

| Localization                         | 1                                       |
| Trademarks                           | 8                                       |
| Customer contracts and relationships | 10                                      |
| Other intangibles                    | 2                                       |

#### Note 2. Acquisitions (in part)

##### Fiscal 2010 Acquisitions (in part)

On October 28, 2010, we completed our acquisition of Day Software Holding AG ("Day"). Under the terms of the agreement, we completed our public tender offer to acquire all of the publicly held registered shares of Day for 139 Swiss Francs per share in cash in a transaction valued at approximately \$248.3 million on a fully diluted equity-value basis. In order to hedge the economic exposure related to this acquisition, we entered into a forward contract to purchase 254.7 million Swiss Francs for \$242.5 million U.S. dollars maturing near the expected closing date of the acquisition. Upon maturity of the forward contract, we recorded a \$20.8 million gain to interest and other income (expense), net. This forward contract is accounted for as a separate transaction apart from the acquisition.

Under the acquisition method, the total preliminary purchase price was allocated to Day's net tangible and intangible assets based upon their estimated fair values as of October 28, 2010. The excess purchase price over the value of the net tangible and identifiable intangible assets was recorded as goodwill. Goodwill represents the excess of the purchase price over the fair value of the underlying acquired net tangible and intangible assets. The factors that contributed to the recognition of goodwill included securing buyer-specific synergies to increase revenue and profits and are not otherwise available to a marketplace participant in addition to acquiring a talented workforce.

The total preliminary purchase price for Day was approximately \$248.3 million of which approximately \$159.9 million was allocated to goodwill, \$79.2 million for substantially all of the identifiable intangible assets, and \$6.1 million to net tangible assets. The impact of this acquisition was not material to our consolidated balance sheets and results of operations.

##### Fiscal 2009 Acquisitions

On October 23, 2009, we completed the acquisition of Omniture, Inc. ("Omniture"), an industry leader in Web analytics and online business optimization based in Orem, Utah, for approximately \$1.8 billion. Under the terms of the agreement, we completed our tender offer to acquire all of the outstanding shares of Omniture common stock at a price of \$21.50 per share, net to the seller in cash, without interest. Acquiring

Omniture accelerates our strategy of delivering more effective solutions for creating, delivering, measuring and optimizing Web content and applications. The transaction was accounted for using the purchase method of accounting. We have included the financial results of Omniture in our Consolidated Financial Statements beginning on the acquisition date. Following the closing, we disclosed Omniture as a new segment for financial reporting purposes.

Assets acquired and liabilities assumed were recorded at their fair values as of October 23, 2009. The total \$1.8 billion purchase price was comprised of the following (in thousands):

|                                                                                                                     |                    |
|---------------------------------------------------------------------------------------------------------------------|--------------------|
| Acquisition of approximately 79 million shares of outstanding common stock of Omniture at \$21.50 per share in cash | \$1,698,926        |
| Estimated fair value of earned stock options and restricted stock units assumed and converted                       | 84,968             |
| Estimated direct transaction costs                                                                                  | 14,365             |
| <b>Total purchase price</b>                                                                                         | <b>\$1,798,259</b> |

##### Purchase Price Allocation

Under the purchase accounting method, the total purchase price was allocated to Omniture's net tangible and intangible assets based upon their estimated fair values as of October 23, 2009. The excess purchase price over the value of the net tangible and identifiable intangible assets was recorded as goodwill.

The table below summarizes the allocation of the purchase price to the acquired net assets of Omniture based on their estimated fair values as of October 23, 2009 and the associated estimated useful lives at that date. During the first half of fiscal 2010, we finalized our purchase accounting after adjustments were made to the preliminary purchase price allocation to reflect the finalization of the valuation of intangible assets and deferred revenue. Additional adjustments were also made to restructuring liabilities, taxes and residual goodwill.

| (In thousands)                         | Amount             | Weighted Average<br>Useful Life<br>(Years) |
|----------------------------------------|--------------------|--------------------------------------------|
| Net tangible assets                    | \$ 33,397          |                                            |
| Identifiable intangible assets:        |                    |                                            |

| Other intangibles                     | 51,265    | (34,127)                 | 17,138    | 54,535      | (2,979)                  | 51,556    |
| Total other intangible assets         | \$636,473 | \$(377,421)              | \$259,052 | \$ 610,771  | \$(282,604)              | \$328,167 |
| Purchased and other intangible assets | \$896,671 | \$(439,408)              | \$457,263 | \$1,197,723 | \$(670,335)              | \$527,388 |

During the first half of fiscal 2010, purchased and other intangible assets from prior acquisitions, primarily Macromedia, became fully amortized and were removed from the balance sheet. Amortization expense related to purchased and other intangible assets was \$156.7 million, \$151.3 million and \$184.4 million for fiscal 2010, 2009 and 2008, respectively. Of these amounts, for fiscal 2010, 2009 and 2008, \$84.5 million, \$88.3 million and \$116.1 million, respectively, was included in cost of sales.

Purchased and other intangible assets are amortized over their estimated useful lives of 1 to 13 years. As of December 3, 2010, we expect amortization expense in future periods to be as follows (in thousands):

| Fiscal Year                         | Purchased Technology | Other Intangible Assets |
|-------------------------------------|----------------------|-------------------------|
| 2011                                | \$ 44,306            | \$ 57,980               |
| 2012                                | 42,699               | 29,374                  |
| 2013                                | 38,691               | 27,029                  |
| 2014                                | 35,801               | 26,191                  |
| 2015                                | 30,938               | 25,777                  |
| Thereafter                          | 5,776                | 92,701                  |
| Total expected amortization expense | \$198,211            | \$259,052               |

## NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

### Note 2. Summary of Significant Accounting Policies and Other Information (in part)

#### Summary of Significant Accounting Policies (in part)

##### Long-Lived Asset Impairment

Sprint evaluates long-lived assets, including intangible assets subject to amortization, for impairment whenever events or changes in circumstances indicate that the carrying amount of an asset group may not be recoverable. Asset groups are determined at the lowest level for which identifiable cash flows are largely independent of cash flows of other groups of assets and liabilities. When it is probable that undiscounted future cash flows will not be sufficient to recover an asset group's carrying amount, an impairment is determined by the excess of the asset group's net carrying value over the estimated fair value. Refer to note 8 for additional information on asset impairments.

Certain assets that have not yet been deployed in the business, including network equipment, cell site development costs and software in development, are periodically assessed to determine recoverability. Network equipment and cell site development costs are expensed whenever events or changes in circumstances cause the Company to conclude the assets are no longer needed to meet management's strategic network plans and will not be deployed. Software development costs are expensed when it is no longer probable that the software project will be deployed. Network equipment that has been removed from the network is also periodically assessed to determine recoverability. If we continue to have operational challenges, including obtaining and

retaining subscribers, future cash flows of the Company may not be sufficient to recover the carrying value of our wireless asset group, and we could record asset impairments that are material to Sprint's consolidated results of operations and financial condition.

During 2010, we assessed the recoverability of the wireless asset group, which includes tangible and intangible long-lived assets subject to amortization as well as indefinite-lived intangible assets. We included cash flow projections from wireless operations along with cash flows associated with the eventual disposition of the long-lived assets, which included estimated proceeds from the assumed sale of FCC licenses, trademarks and customer relationships. The estimated undiscounted future cash flows of the wireless long-lived assets exceeded their carrying amount and, as a result, no impairment charge was recorded. In addition, we re-assessed the remaining useful lives of these long-lived assets and concluded they were appropriate.

#### Note 6. Intangible Assets (in part)

##### Intangible Assets Subject to Amortization

Sprint's customer relationships are amortized using the sum of the years' digits method. As customer relationships amortize and reach the end of their amortization period, we remove the gross and accumulated amounts associated with these fully amortized intangible assets. During 2010, we reduced the gross carrying value and accumulated amortization by \$10.3 billion associated with fully amortized intangible assets primarily related to customer relationships associated with the Nextel acquisition in 2005. Other intangible assets primarily include certain rights under affiliation agreements that were reacquired in connection with the acquisitions of Affiliates and Nextel Partners, Inc., which are being amortized over the remaining terms of those affiliation agreements on a straight-line basis, and the Nextel, Direct Connect and Virgin Mobile trade names, which are being amortized on a straight-line basis.

##### NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

##### Note 3. Summary of Significant Accounting Policies (in part)

###### Goodwill

Goodwill represents the excess of costs over the fair value of assets of businesses acquired. Goodwill and intangible assets acquired in a purchase business combination and determined to have an indefinite useful life are not amortized, but instead tested for impairment at least annually or if impairment indicators are present. The evaluation includes comparing the fair value of the relevant reporting unit to the carrying value, including goodwill, of such unit. If the fair value exceeds the carrying value, no impairment loss is recognized. However, if the carrying value of the reporting unit exceeds its fair value, the goodwill of the reporting unit may be impaired. Impairment is measured by comparing the derived fair value of the goodwill to its carrying value. Separately identifiable intangible assets with estimable useful lives are amortized over their respective estimated useful lives to their estimated residual values, and reviewed for impairment at least annually or if impairment indicators are present.

The Company has two reporting units—domestic operations and international operations. Its reporting units are the same as its operating segments. Approximately 95 percent of the Company's goodwill is attributable to its domestic operations. The Company estimates the fair value of its reporting units using both an income approach and a market approach. The valuation process considers management's estimates of the future operating performance of each reporting unit. Companies in similar industries are researched and analyzed and management considers the domestic and international economic and financial market conditions, both in general and specific to the industry in which the Company operates,

prevailing as of the valuation date. The income approach utilizes discounted cash flows. The Company calculates a weighted average cost of capital for each reporting unit in order to estimate the discounted cash flows. The Company performs its annual testing for impairment of goodwill and other intangible assets as of June 30 of each year. The fair value of each of the Company's reporting units as of June 30, 2010 exceeded its carrying value by more than 50 percent.

##### Note 5. Acquisitions (in part)

###### Year Ended June 30, 2010 (in part)

The Company has completed its detailed valuations of the assets acquired and liabilities assumed, including recognizing a liability of \$35.8 million for the fair value as of the acquisition date of Contingent Consideration. See Note 23 for additional information on the valuation of Contingent Consideration. Based on its valuations, the total consideration of \$129.1 million has been allocated to assets acquired, including identifiable intangible assets and goodwill, and liabilities assumed, as follows (in thousands):

|                                                                   |           |
|-------------------------------------------------------------------|-----------|
| Cash                                                              | \$ 4,843  |
| Accounts receivable                                               | 6,980     |
| Prepaid expenses and other current assets                         | 6,950     |
| Property and equipment                                            | 2,220     |
| Customer contracts, customer relationships, acquired technologies | 48,245    |
| Goodwill                                                          | 83,049    |
| Other assets                                                      | 93        |
| Accounts payable                                                  | (705)     |
| Accrued expenses and other current liabilities                    | (8,662)   |
| Long-term deferred taxes                                          | (13,944)  |
| Total consideration paid                                          | \$129,069 |

The value attributed to customer contracts, customer relationships and acquired technologies is being amortized on an accelerated basis over periods ranging from two to 10 years.

##### Note 9. Intangible Assets

Intangible assets consisted of the following (in thousands):

|                                                       | June 30    |            |
|-------------------------------------------------------|------------|------------|
|                                                       | 2010       | 2009       |
| Customer contracts and related customer relationships | \$ 253,031 | \$ 233,531 |
| Acquired technologies                                 | 27,177     | —          |
| Covenants not to compete                              | 2,373      | 2,409      |
| Other                                                 | 1,631      | 851        |
| Intangible assets                                     | 284,212    | 236,791    |
| Less accumulated amortization                         | (175,914)  | (138,962)  |
| Total intangible assets, net                          | \$ 108,298 | \$ 97,829  |

Intangible assets are primarily amortized on an accelerated basis over periods ranging from 12 to 120 months. The weighted-average period of amortization for customer contracts and related customer relationships as of June 30, 2010 is 8.3 years, and the weighted-average remaining period of amortization is 5.6 years. The weighted-average period of amortization for acquired technologies as of June 30, 2010

is 6.7 years, and the weighted-average remaining period of amortization is 6.3 years.

Amortization expense for the years ended June 30, 2010, 2009 and 2008 was \$37.2 million, \$32.1 million, and \$31.8 million, respectively. Expected amortization expense for each of the fiscal years through June 30, 2015 and for periods thereafter is as follows (in thousands):

|                              | Amount    |
|------------------------------|-----------|
| Year ending June 30, 2011    | \$ 35,141 |
| Year ending June 30, 2012    | 23,467    |
| Year ending June 30, 2013    | 15,938    |
| Year ending June 30, 2014    | 12,801    |
| Year ending June 30, 2015    | 9,003     |
| Thereafter                   | 11,948    |
| Total intangible assets, net | \$108,298 |

| Balance at December 31, 2010                                | \$3,828                             | \$131    |

Our franchise license agreements contain performance requirements and convey to us the rights to distribute and sell products of the licensor within specified territories. Our license agreements with TCCC for each of our territories have terms of 10 years each and expire on October 2, 2020, with each containing the right for us to request a 10-year renewal. While these agreements contain no automatic right of renewal beyond that date, we believe that our interdependent relationship with TCCC and the substantial cost and disruption to TCCC that would be caused by nonrenewals ensure that these agreements will continue to be renewed and, therefore, are essentially perpetual. We have never had a franchise license agreement with TCCC terminated due to nonperformance of the terms of the agreement or due to a decision by TCCC to terminate an agreement at the expiration of a term. After evaluating the contractual provisions of our franchise license agreements, our mutually beneficial relationship with TCCC, and our history of renewals, we have assigned indefinite lives to all of our franchise license intangible assets.

We do not amortize our franchise license intangible assets and goodwill. Instead, we test these assets for impairment annually, or more frequently if facts or circumstances indicate they may be impaired. The annual testing date for impairment purposes is the last reporting day of October, which was established upon discontinuing the amortization of our franchise license intangible assets and goodwill in 2002. The impairment tests for our franchise license intangible assets involves comparing the estimated fair value of franchise license intangible assets for a reporting unit to its carrying amount to determine if a write down to fair value is required. If the carrying amount of the franchise license intangible assets exceeds its estimated fair value, an impairment charge is recognized in an amount equal to the excess, not to exceed the carrying amount. The impairment test for our goodwill involves comparing the fair value of a reporting unit to its carrying amount, including goodwill, and after adjusting for any franchise license impairment charges (net of tax). If the carrying amount of the reporting unit exceeds its fair value, a second step is required to measure the goodwill impairment loss. This step compares the implied fair value of the reporting

unit's goodwill to the carrying amount of that goodwill. If the carrying amount of the reporting unit's goodwill exceeds the implied fair value of the goodwill, an impairment loss is recognized in an amount equal to the excess, not to exceed the carrying amount. Any subsequent recoveries in the estimated fair values of our franchise license intangible assets or goodwill are not recorded. The fair values calculated in these impairment tests are determined using discounted cash flow models involving assumptions that are based upon what we believe a hypothetical marketplace participant would use in estimating fair value on the measurement date. In developing these assumptions, we compare the resulting estimated enterprise value to our observable market enterprise value.

#### 2010 Impairment Analysis

Based on our review of the facts and circumstances and updated assumptions, we did not perform a full annual impairment analysis of our franchise license intangible assets or goodwill during 2010 since we concluded it was remote that changes in the facts and circumstances would have caused the fair value of these assets to fall below their carrying amounts. This conclusion was based on the following factors: (1) the fair value of our franchise license intangible assets exceeded its carrying amount by a substantial margin in the most recent annual impairment analysis performed; (2) our business performance during 2010 exceeded the forecast used to estimate fair value in the most recent impairment analysis performed; (3) our outlook for 2011 and beyond is greater than the forecast used to estimate fair value in the most recent impairment analysis performed; (4) other significant assumptions used in estimating fair value, such as our weighted average cost of capital, have improved since the most recent impairment analysis performed; and (5) we have experienced significant appreciation in our market capitalization.

#### 2009 and 2008 Impairment Analyses

During 2009 and 2008, our franchise license intangible assets were included as part of Legacy CCE's impairment testing. Legacy CCE performed its impairment tests at its operating segment level, which were Legacy CCE's reporting units. The results of the impairment tests performed by Legacy CCE during these periods indicated that the fair value of our franchise license intangible assets (Legacy CCE's Europe operating segment) exceeded their carrying amounts by a substantial margin.

#### Note 17—Acquisition of Norway and Sweden Bottling Operations (in part)

On October 2, 2010, two indirect, wholly owned subsidiaries of CCE acquired TCCC's bottling operations in Norway and Sweden, pursuant to the Norway-Sweden SPA, for a purchase price of \$822 million plus a working capital adjustment of \$55 million (of which \$6 million, representing the final working capital settlement, is owed to TCCC as of December 31, 2010 and has been recorded in Amounts payable to TCCC on our Consolidated Balance Sheets; refer to Note 1). These operations serve approximately 14 million people across Norway and Sweden and allow us to further expand our operations across Western Europe.

The following table summarizes the allocation of the purchase price based on the fair value of the acquired assets and liabilities assumed (in millions):

| Assets & liabilities <sup>(a)</sup>                | Amounts |
|----------------------------------------------------|---------|
| Current assets <sup>(b)</sup>                      | \$210   |
| Property, plant, and equipment                     | 357     |
| Franchise license intangible assets <sup>(c)</sup> | 496     |
| Customer relationships <sup>(d)</sup>              | 23      |
| Other noncurrent assets                            | 1       |
| Current liabilities                                | (183)   |
| Noncurrent liabilities                             | (158)   |
| Net assets acquired                                | 746     |
| Goodwill <sup>(e)</sup>                            | 131     |
| Total purchase price                               | \$877   |

(a) amounts are subject to change based on the final determination of the fair value of the assets acquired and liabilities assumed.

(b) current assets include cash and cash equivalents of \$72 million, trade accounts receivable of \$73 million, inventories of \$48 million, and other current assets of \$17 million.

(c) we have assigned the acquired franchise license intangible assets an indefinite life. While our franchise license agreements contain no automatic right of renewal, we believe that our interdependent relationship with TCCC and the substantial cost and disruption to TCCC that would be caused by nonrenewals ensure that these agreements will continue to be renewed and, therefore, are essentially perpetual. Refer to Note 2.

(d) the value assigned to customer relationships is being amortized over a period of 20 years, beginning on the date of acquisition.

(e) goodwill represents the excess of the purchase price (including the working capital adjustment) over the net tangible and intangible assets acquired, and is not deductible for tax purposes. This goodwill is primarily attributable to additional company-specific synergies we expect to be able to achieve by integrating Norway and Sweden into our existing operations. Additionally, a portion of the goodwill is attributable to future cash flows we expect to generate by expanding certain non-TCCC brands, such as Monster Energy drinks, into these territories.

##### NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

##### Basis of Presentation (in part)

In the Notes to Consolidated Financial Statements, all dollar and share amounts in tabulations are in millions of dollars and shares, respectively, unless otherwise indicated.

##### Note 2. Acquisitions (in part)

##### Acquisition of BJ Services (in part)

On April 28, 2010, we acquired 100% of the outstanding common stock of BJ Services Company (including its successor, “BJ Services”) in a cash and stock transaction valued at \$6,897 million. BJ Services is a leading provider of pressure pumping and other oilfield services and was acquired to expand our suite of service and product offerings. Revenues and net income of BJ Services from the acquisition date included in our consolidated statement of operations for 2010 were \$3,686 million and \$290 million, respectively.

##### Recording of Assets Acquired and Liabilities Assumed (in part)

The transaction has been accounted for using the acquisition method of accounting which requires that, among other things, assets acquired and liabilities assumed be recorded at their fair values as of the acquisition date. The excess of the consideration transferred over those fair values is recorded as goodwill. While we have substantially completed the determination of the fair values of the assets acquired and liabilities assumed, some of the estimated fair values set forth

below are subject to adjustment once the valuations are completed. We will finalize these items as we obtain the information necessary to complete the analysis, which we expect to be completed during the first quarter of 2011. Under U.S. generally accepted accounting principles, companies have one year from the date of an acquisition to finalize the acquisition accounting. The following table summarizes the estimated amounts recognized for assets acquired and liabilities assumed as of the acquisition date.

|                                                        | Estimated Fair Value |
|--------------------------------------------------------|----------------------|
| <b>Assets:</b>                                         |                      |
| Cash and cash equivalents                              | \$ 113               |
| Accounts receivable                                    | 951                  |
| Inventories                                            | 419                  |
| Other current assets                                   | 125                  |
| Property, plant and equipment                          | 2,757                |
| Intangible assets                                      | 1,404                |
| Goodwill                                               | 4,336                |
| Other long-term assets                                 | 109                  |
| <b>Liabilities:</b>                                    |                      |
| Liabilities for change in control and transaction fees | (210)                |
| Current liabilities                                    | (759)                |
| Deferred income taxes and other tax liabilities        | (1,455)              |
| Debt                                                   | (531)                |
| Pension and other postretirement liabilities           | (154)                |
| Other long-term liabilities                            | (29)                 |
| Noncontrolling interests                               | (179)                |
| Net assets acquired                                    | \$ 6,897             |

##### Intangible Assets

We identified intangible assets including trade names, technology, in-process research and development (“IPR&D”), and customer relationships. We consider the BJ Services trade name to be an indefinite life intangible asset, which will not be amortized and will be subject to an annual impairment test. We account for IPR&D as an indefinite-lived intangible asset until completion or abandonment of the associated project. Therefore, such assets would not be amortized but would be tested for impairment. Once the research and development activities are completed, the assets would be amortized over the related product’s useful life. If the project is abandoned, the assets would be written off if they have no alternative future use.

The following table summarizes the fair values recorded for the identifiable intangible assets and their estimated useful lives:

|                                      | Fair Value | Estimated Useful Life |
|--------------------------------------|------------|-----------------------|
| Customer relationships               | \$ 428     | 3–16 years            |
| Technology                           | 451        | 5–15 years            |
| BJ Services trade name               | 360        | Indefinite            |
| Other trade names                    | 38         | 5–12 years            |
| IPR&D                                | 127        | Indefinite            |
| Total identifiable intangible assets | \$1,404    |                       |

*Note 10. Goodwill and Intangible Assets (in part)*

Intangible assets are comprised of the following at December 31:

|                               | 2010                  |                          |         | 2009                  |                          |       |
|-------------------------------|-----------------------|--------------------------|---------|-----------------------|--------------------------|-------|
|                               | Gross Carrying Amount | Accumulated Amortization | Net     | Gross Carrying Amount | Accumulated Amortization | Net   |
| Definite lived intangibles:   |                       |                          |         |                       |                          |       |
| Technology                    | \$ 760                | \$(181)                  | \$ 579  | \$278                 | \$(141)                  | \$137 |
| Contract-based                | 20                    | (11)                     | 9       | 13                    | (9)                      | 4     |
| Trade names                   | 84                    | (18)                     | 66      | 36                    | (13)                     | 23    |
| Customer relationships        | 495                   | (39)                     | 456     | 41                    | (10)                     | 31    |
| Subtotal                      | 1,359                 | (249)                    | 1,110   | 368                   | (173)                    | 195   |
| Indefinite lived intangibles: |                       |                          |         |                       |                          |       |
| Trade name                    | 360                   | —                        | 360     | —                     | —                        | —     |
| IPR&D                         | 99                    | —                        | 99      | —                     | —                        | —     |
| Total                         | \$1,818               | \$(249)                  | \$1,569 | \$368                 | \$(173)                  | \$195 |

Intangible assets are amortized either on a straight-line basis with estimated useful lives ranging from 1 to 20 years, or on a basis that reflects the pattern in which the economic benefits of the intangible assets are expected to be realized, which range from 15 to 30 years. As a result of the acquisition of BJ Services, we recognized intangible assets of \$1,404 million (See Note 2—Acquisitions).

Amortization expense included in net income for the years ended December 31, 2010, 2009 and 2008 was \$76 million, \$31 million and \$20 million, respectively. Estimated amortization expense for each of the subsequent five fiscal years is expected to be as follows: 2011—\$100 million; 2012—\$107 million; 2013—\$108 million; 2014—\$107 million; and 2015—\$99 million.

## NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

### Note 2. Financial Statement Presentation and Summary of Significant Accounting Policies (in part)

#### Amortizable Intangible and Other Long-Lived Assets

We review amortizable intangible and other long-lived assets ("long-lived assets") for impairment whenever events or changes in circumstances indicate the carrying amount of such assets may not be recoverable. Indicators we consider include adverse changes in the business climate that could affect the value of our long-lived assets, changes in our stock price and resulting market capitalization relative to book value, downward revisions in our revenue outlook, decreases or slower than expected growth in sales of products and relative weakness in customer channels.

A long-lived asset or asset group that is held for use is required to be grouped with other assets and liabilities at the lowest level for which identifiable cash flows are largely independent of the cash flows of other assets and liabilities. When an asset or asset group does not have identifiable cash flows that are largely independent of the cash flows of other assets and liabilities, the asset group for that long-lived asset includes all assets and liabilities of the entity.

We evaluate the company as a single reporting unit for business and operating purposes. We have attempted to identify cash flows at levels lower than the consolidated company; however, this is not possible because many of our revenue streams are generated by technology related to more than a single long-lived asset, and individual long-lived assets support more than one of our three reported revenue categories. In addition, the majority of our costs are, by their nature, shared costs that are not specifically identifiable with a particular long-lived asset or product line but relate to multiple products. As a result, there is a high degree of interdependency among our cash flows for levels below the consolidated company, and we do not have identifiable cash flows for an asset group separate from the consolidated company. Therefore, we consider the consolidated company as a single asset group for purposes of impairment testing.

We evaluate the recoverability of the asset group using an undiscounted cash flow approach. Estimates of future cash flows incorporate company forecasts and our expectations of future use of our long-lived assets, and these factors are impacted by market conditions. We determine the remaining useful life of an asset group based on the remaining useful life of the primary asset of the group, where the primary asset is defined as the asset with the greatest cash flow generating ability. Our primary long-lived asset is an intangible technology asset supporting disk products and software license revenue. If the primary asset of the asset group does not have the longest remaining life in the group, then a sale of the asset group is assumed at the end of life of the primary asset. Our primary long-lived asset does not have the longest remaining life of long-lived assets in our asset group; therefore, for purposes of impairment testing, we assume the asset group is sold after the end of the primary asset's useful life, or our first quarter of fiscal 2015.

If the undiscounted cash flows, including residual value, exceed the carrying value of the consolidated company asset group we conclude no impairment of our long-lived assets

exists. If the carrying value of the consolidated company asset group exceeds the undiscounted cash flows, including residual value, then we measure the impairment charge for the excess of the carrying value over the fair value of the asset group. We monitor relevant market and economic conditions on a quarterly basis, and perform impairment reviews when there are indicators of impairment.

### Note 5. Goodwill and Intangible Assets (in part)

Net goodwill and intangible assets as of March 31, 2010 and 2009 represented approximately 24% and 28% of total assets, respectively. The goodwill and intangible asset balances, net of amortization, as of March 31, 2010 and 2009 were \$119.9 million and \$156.0 million, respectively.

#### Intangible Assets

Acquired intangible assets are amortized over their estimated useful lives, which generally range from one to eight years. In estimating the useful lives of intangible assets, we considered the following factors:

- The cash flow projections used to estimate the useful lives of the intangible assets showed a trend of growth that was expected to continue for an extended period of time;
- Our tape automation products, disk backup products and software, in particular, have long development cycles; these products have experienced long product life cycles; and
- Our ability to leverage core technology into backup, recovery and archive solutions and, therefore, to extend the lives of these technologies.

Following is the weighted average amortization period for our intangible assets:

|                        | Amortization<br>(Years) |
|------------------------|-------------------------|
| Purchased technology   | 6.2                     |
| Trademarks             | 7.5                     |
| Non-compete agreements | 5.0                     |
| Customer lists         | 7.0                     |
| All intangible assets  | 6.6                     |

Intangible amortization within our Consolidated Statements of Operations for the years ended March 31, 2010, 2009 and 2008 follows (in thousands):

|                        | For the Year Ended March 31 |          |          |
|------------------------|-----------------------------|----------|----------|
|                        | 2010                        | 2009     | 2008     |
| Purchased technology   | \$22,469                    | \$25,067 | \$31,857 |
| Trademarks             | 810                         | 2,018    | 3,457    |
| Non-compete agreements | 100                         | 100      | 100      |
| Customer lists         | 12,765                      | 13,018   | 13,297   |
|                        | \$36,144                    | \$40,203 | \$48,711 |

The following tables provide a summary of the carrying amount of intangible assets that will continue to be amortized (in thousands):

|                        | As of March 31, 2010 |                          |            | As of March 31, 2009 |                          |            |
|------------------------|----------------------|--------------------------|------------|----------------------|--------------------------|------------|
|                        | Gross Amount         | Accumulated Amortization | Net Amount | Gross Amount         | Accumulated Amortization | Net Amount |
| Purchased technology   | \$188,167            | \$(161,488)              | \$26,679   | \$188,167            | \$(139,019)              | \$ 49,148  |

The total expected future amortization related to intangible assets is provided in the table below (in thousands):

|                            | Amortization |
|----------------------------|--------------|
| Fiscal 2011                | \$28,381     |
| Fiscal 2012                | 20,385       |
| Fiscal 2013                | 12,834       |
| Fiscal 2014                | 8,400        |
| Fiscal 2015                | 3,092        |
| Total as of March 31, 2010 | \$73,092     |

We did not have impairment indicators for our long-lived assets in fiscal 2010 and fiscal 2008. In fiscal 2009, we had impairment indicators and performed an impairment analysis of our long-lived assets. The result of our fiscal 2009 impairment analysis was that the undiscounted cash flows exceeded the carrying value of the asset group and we concluded no impairment of our long-lived assets.

## OTHER NONCURRENT ASSETS

### RECOGNITION AND MEASUREMENT

**2.101** FASB ASC 210 indicates that the concept of current assets excludes resources such as the following:

- Cash restricted regarding withdrawal or use for other than current operations, designated for expenditure in the acquisition or construction of noncurrent assets, or segregated for the liquidation of long-term debts
- Investments or advances for the purposes of control, affiliation, or other continuing business advantage
- Certain receivables (see the “Noncurrent Receivables” section)
- Cash surrender value of life insurance
- Land and other natural resources
- Long-term prepayments chargeable to operations over several years

## DISCLOSURE

**2.102** Rule 5-02 of Regulation S-X requires that any item not classed in another Regulation S-X caption and in excess of 5 percent of total assets be stated separately on the balance sheet or disclosed in the notes.

### 2.103

#### TABLE 2-10: OTHER NONCURRENT ASSETS\*

Table 2-10 summarizes the nature of assets (other than property, investments, noncurrent receivables, and intangible assets) classified as non-current assets on the balance sheet of the survey entities.

|                                            | Number of Entities |                  |                  |

**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS***1. Summary of Significant Accounting Policies (in part)**Discontinued Operations*

As a result of the November 2009 plan to divest Devon's offshore assets, all amounts related to Devon's International operations are classified as discontinued operations. The Gulf of Mexico properties that were divested in 2010 do not qualify as discontinued operations under accounting rules. As such, amounts in these notes and the accompanying consolidated financial statements that pertain to continuing operations include amounts related to Devon's offshore Gulf of Mexico operations. See Note 5 for additional details of the offshore divestiture program.

The captions assets held for sale and liabilities associated with assets held for sale in the accompanying consolidated balance sheets present the assets and liabilities associated with Devon's discontinued operations. Devon measures its assets held for sale at the lower of its carrying amount or estimated fair value less costs to sell. Additionally, Devon does not recognize depreciation, depletion and amortization on its long-lived assets held for sale.

*18. Discontinued Operations (in part)*

For the three-year period ended December 31, 2010, Devon's discontinued operations include amounts related to its assets in Azerbaijan, Brazil, China, Angola and other minor International properties. Additionally, during 2008, Devon's discontinued operations included amounts related to its assets in Egypt and West Africa, including Equatorial Guinea, Cote d'Ivoire, Gabon and other countries in the region, until they were sold.

The following table presents the main classes of assets and liabilities associated with Devon's discontinued operations.

|                              | <b>December 31</b> |             |
|------------------------------|--------------------|-------------|

| Long-term liabilities        | \$ 26              | \$ 213      |

*Reductions of Carrying Value of Oil and Gas Properties*

During 2009 and 2008, Devon reduced the carrying values of certain of its oil and gas properties that are now held for sale. These reductions primarily resulted from full cost ceiling limitations. A summary of these reductions and additional discussion is provided below.

|               | <b>Year Ended December 31</b> |                    |              |                    |
|---------------|-------------------------------|--------------------|--------------|--------------------|
|               | <b>2009</b>                   |                    | <b>2008</b>  |                    |
| (In millions) | <b>Gross</b>                  | <b>After Taxes</b> | <b>Gross</b> | <b>After Taxes</b> |
| Brazil        | \$103                         | \$103              | \$437        | \$437              |
| Other         | 6                             | 2                  | 57           | 28                 |
| Total         | \$109                         | \$105              | \$494        | \$465              |

Brazil's 2009 reduction resulted largely from an exploratory well drilled at the BM-BAR-3 block in the offshore Barreirinhas Basin. After drilling this well in the first quarter of 2009, Devon concluded that the well did not have adequate reserves for commercial viability. As a result, the seismic, leasehold and drilling costs associated with this well contributed to the reduction recognized in the first quarter of 2009.

Brazil's 2008 reduction was recognized in the fourth quarter of 2008 and resulted primarily from a significant decrease in its full cost ceiling. The lower ceiling value largely resulted from the effects of sharp declines in oil prices compared to previous quarter-end prices.

## NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

### 11. Pension Plans and Other Postretirement Benefit Plans (in part)

**Pension Plans** The following table presents the funded status of Grace's fully-funded, underfunded, and unfunded pension plans:

| (In millions)                                                                        | December 31,<br>2010 | December 31,<br>2009 |
|--------------------------------------------------------------------------------------|----------------------|----------------------|
| Overfunded defined benefit pension plans                                             | \$ 35.6              | \$ 36.7              |
| Underfunded defined benefit pension plans                                            | (383.9)              | (372.2)              |
| Unfunded defined benefit pension plans                                               | (155.9)              | (158.2)              |
| Total underfunded and unfunded defined benefit pension plans                         | (539.8)              | (530.4)              |
| Unfunded defined benefit pension plans included in liabilities subject to compromise | (113.8)              | (105.4)              |
| Pension liabilities included in other current liabilities                            | (12.9)               | (12.9)               |
| Net funded status                                                                    | \$(630.9)            | \$(612.0)            |

Fully-funded plans include several advance-funded plans where the fair value of the plan assets exceeds the projected benefit obligation ("PBO"). This group of plans was overfunded by \$35.6 million as of December 31, 2010, and the overfunded status is reflected as "overfunded defined benefit pension plans" in the Consolidated Balance Sheets. Underfunded plans include a group of advance-funded plans that are underfunded on a PBO basis. Unfunded plans include several plans that are funded on a pay-as-you-go basis, and therefore, the entire PBO is unfunded. The combined balance of the underfunded and unfunded plans was \$666.5 million as of December 31, 2010 and is presented as a liability on the Consolidated Balance Sheets as follows: \$12.9 million in "other current liabilities;" \$539.8 million included in "underfunded and unfunded defined benefit pension plans," of which \$383.9 million relates to underfunded plans and \$155.9 million relates to unfunded plans; and \$113.8 million in "liabilities subject to compromise."

Grace maintains defined benefit pension plans covering current and former employees of certain business units and divested business units who meet age and service requirements. Benefits are generally based on final average salary and years of service. Grace funds its U.S. qualified pension plans ("U.S. qualified pension plans") in accordance with U.S. federal laws and regulations. Non-U.S. pension plans ("non-U.S. pension plans") are funded under a variety of methods, as required under local laws and customs.

Grace also provides, through nonqualified plans, supplemental pension benefits in excess of U.S. qualified pension plan limits imposed by federal tax law. These plans cover officers and higher-level employees and serve to increase the combined pension amount to the level that they otherwise would have received under the U.S. qualified pension plans in the absence of such limits. The nonqualified plans are un-

funded and Grace pays the costs of benefits as they are due to the participants.

At the December 31, 2010 measurement date for Grace's defined benefit pension plans, the PBO was approximately \$1,616 million as measured under U.S. GAAP compared with \$1,531 million as of December 31, 2009. The PBO basis reflects the present value (using a 5.25% discount rate for U.S. plans and a 5.45% weighted average discount rate for non-U.S. plans as of December 31, 2010) of vested and non-vested benefits earned from employee service to date, based upon current services and estimated future pay increases for active employees.

On a quarterly basis, Grace analyzes pension assets and pension liabilities along with the resulting funded status and updates its estimate of these measures. Funded status is adjusted for contributions, benefit payments, actual return on assets, current discount rates, and other identifiable and material actuarial changes. A full remeasurement is performed annually.

## NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

### Note 4. Financial Instruments (in part)

#### Fair Value

Pursuant to the accounting guidance for fair value measurement and its subsequent updates, the Company defines fair value as the price that would be received from selling an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. When

determining the fair value measurements for assets and liabilities required or permitted to be recorded at fair value, the Company considers the principal or most advantageous market in which it would transact, and it considers assumptions that market participants would use when pricing the asset or liability.

The FASB has established a fair value hierarchy that prioritizes the inputs to valuation techniques used to measure fair value. An asset or liability's level in the hierarchy is based on the lowest level of input that is significant to the fair value measurement. Assets and liabilities carried at fair value

are classified and disclosed in one of the following three categories:

Level 1: Valuations based on quoted prices in active markets for identical assets or liabilities with sufficient volume and frequency of transactions.

Level 2: Valuations based on observable inputs other than Level 1 prices such as quoted prices for similar assets or liabilities, quoted prices in markets that are not active, or model-derived valuations techniques for which all significant inputs are observable in the market or can be corroborated by, observable market data for substantially the full term of the assets or liabilities.

Level 3: Valuations based on unobservable inputs to the valuation methodology that are significant to the measurement of fair value of assets or liabilities and based on non-binding, broker-provided price quotes and may not have been corroborated by observable market data.

The following table sets forth the Company's financial assets and liabilities measured at fair value on a recurring basis as of June 27, 2010:

| Fair Value Measurement at June 27, 2010 |           |                                                                         |                                                        |                                                    |

|                                                | \$951,684 | \$672,479 | \$279,127 | \$78      |
| Accrued expenses and other current liabilities | \$ 470    | \$ —      | \$ 470    | \$ —      |

At June 27, 2010 the fair value of Level 3 assets measured on a recurring basis was \$0.1 million and consisted of a corporate note security. Fair values were based on non-binding, broker-provided price quotes and may not have been corroborated by observable market data.

The following table sets forth the Company's financial assets and liabilities measured at fair value on a recurring basis as of June 28, 2009:

|                                        |           | Fair Value Measurement at June 28, 2009                                 |                                                     |                                                    |

The Company's primary financial instruments include its cash, cash equivalents, short-term investments, restricted cash and investments, long-term investments, accounts receivable, accounts payable, long-term debt and capital leases, and foreign currency related derivatives. The estimated fair value of cash, accounts receivable and accounts payable approximates their carrying value due to the short period of time to their maturities. The estimated fair values

of long-term debt and capital lease obligations approximate their carrying value as the substantial majority of these obligations have interest rates that adjust to market rates on a periodic basis. The fair value of cash equivalents, short-term investments, restricted cash and investments, long-term investments, and foreign currency related derivatives are based on quotes from brokers using market prices for similar instruments.

## Investments

The following tables summarize the Company's investments (in thousands):

|                                        | June 27, 2010 |                 |                   |             | June 28, 2009 |                 |                   |            |

The Company accounts for its investment portfolio at fair value. Realized gains (losses) for investments sold are specifically identified. Management assesses the fair value of investments in debt securities that are not actively traded through consideration of interest rates and their impact on the present value of the cash flows to be received from the investments. The Company also considers whether changes in the credit ratings of the issuer could impact the assessment of fair value. Net realized gains (losses) on investments

included other-than-temporary impairment charges of \$0.9 million, \$0.3 million and \$1.0 million in fiscal years 2010, 2009 and 2008, respectively. Additionally, realized gains (losses) from sales of investments were approximately \$0.8 million and \$(0.2) million in fiscal year 2010, \$2.2 million and \$(1.9) million in fiscal year 2009 and \$3.3 million and \$(1.3) million in fiscal year 2008, respectively.

The following is an analysis of the Company's fixed income securities in unrealized loss positions as of June 27, 2010 (in thousands):

|                                        | June 27, 2010                            |                       |                                           |                       |            |                       |

| Total fixed income                     | \$47,121                                 | \$ (179)              | \$599                                     | \$ (43)               | \$47,720   | \$ (222)              |

The amortized cost and fair value of cash equivalents and short-term investments and restricted cash and investments with contractual maturities are as follows:

| (In thousands)            | June 27, 2010 |                      | June 28, 2009 |                      |
|---------------------------|---------------|----------------------|---------------|----------------------|
|                           | Cost          | Estimated Fair Value | Cost          | Estimated Fair Value |
| Due in less than one year | \$723,143     | \$723,707            | \$504,359     | \$504,597            |
| Due in more than one year | 196,855       | 200,154              | 153,732       | 157,233              |
|                           | \$919,998     | \$923,861            | \$658,091     | \$661,830            |

Management has the ability, if necessary, to liquidate any of its investments in order to meet the Company's liquidity needs in the next 12 months. Accordingly, those investments with contractual maturities greater than one year from the date of purchase nonetheless are classified as short-term on the accompanying consolidated balance sheets.

*Note 13. Commitments (in part)*

*Operating Leases (in part)*

The Company is required, pursuant to the terms of the Operating Leases and associated documents, to maintain collateral in an aggregate of approximately \$164.9 million in separate interest-bearing accounts as security for the Company's obligations under the Operating Leases. As of June 27, 2010, the Company had \$164.9 million recorded as restricted cash in its consolidated balance sheet as collateral required under the Operating Leases related to the amounts currently outstanding on the facilities.

| Total net deferred tax liabilities                          | \$ (12)  | \$ (26)  |

<sup>(1)</sup> Primarily unlimited carryforward period.

At December 31, 2010, we had \$372 million of tax assets for net operating loss, capital loss and tax credit carryforwards related to certain international subsidiaries that are primarily from countries with unlimited carryforward periods. A valuation allowance totaling \$542 million has been recorded against these and other deferred tax assets where recovery of the asset or carryforward is uncertain. In addition, we had \$708 million of Federal and \$107 million of state tax assets for net operating loss and tax credit carryforwards. The state carryforwards are subject to expiration from 2011 to 2031. The Federal carryforwards consist of \$454 million of Federal tax net operating losses that expire in 2028 and 2030, \$231 million of foreign tax credits which are subject to expiration in 2016 and 2018, and \$23 million of tax assets related to research and development credits that are subject to expiration from 2027 to 2030. The amount of tax credit and loss carryforwards reflected in the table above has been reduced by \$36 million related to unrealized stock option deductions. A full valuation allowance has also been recorded against these deferred tax assets as recovery is uncertain.

At December 31, 2010, we had unrecognized tax benefits of \$87 million that if recognized, would have a favorable impact on our tax expense of \$81 million. We had accrued interest of \$13 million as of December 31, 2010. If not favorably settled, \$23 million of the unrecognized tax benefits and \$13 million of the accrued interest would require the use of our cash.

During 2010, our European entities have settled various tax years, resulting in a \$48 million reduction of our unrecognized tax benefits. It is reasonably possible that the total amount of unrecognized tax benefits will change during the next 12 months. However, we do not expect those changes to have a significant impact on our financial position or results of operations.

| Total deferred income taxes                                                       | \$303          | \$ 514                           | \$377          | \$ 423                           |

<sup>(1)</sup> United States deferred income tax assets of \$37 for income tax loss carryforwards were reduced by \$32 for the excess income tax benefit related to the exercise of stock options. A tax benefit and a credit to Capital in excess of par value for the excess benefit will not be recognized until the deduction reduces income taxes payable. The net income tax loss carryforward of \$37 in the table below reflects the \$32 related to the excess income tax benefit.

### Recoverability of Deferred Income Tax Assets

Eaton is subject to the income tax laws in the jurisdictions in which it operates. In order to determine its income tax provision for financial statement purposes, Eaton must make significant estimates and judgments about its business operations in these jurisdictions. These estimates and judgments are also used in determining the deferred income tax assets and liabilities that have been recognized for differences between the financial statement and income tax basis of assets and liabilities, and income tax loss carryforwards and income tax credit carryforwards.

Management evaluates the realizability of deferred income tax assets for each of the jurisdictions in which it operates. If the Company experiences cumulative pretax income in a particular jurisdiction in the three-year period including the current and prior two years, management normally concludes that the deferred income tax assets will more likely than not be realizable and no valuation allowance is recognized, unless known or planned operating developments would lead management to conclude otherwise. However, if the Company experiences cumulative pretax losses in a particular jurisdiction in the three-year period including the current and prior two years, management then considers a series of significant factors in the determination of whether the deferred income tax assets can be realized. The significant factors include historical operating results, known or planned operating developments, the period of time over which certain temporary differences will reverse, consideration of the utilization of certain deferred income tax liabilities, tax law carryback capability in the particular country, prudent and feasible tax planning strategies, and estimates of future earnings and taxable income using the same assumptions as the Company's goodwill and other impairment testing. After evaluation of these factors, if the deferred income tax assets are expected to be realized within the tax carryforward period allowed for that specific country, management would conclude that no valuation allowance would be required. To the extent that the deferred income tax assets exceed the amount that is expected to be realized within the tax carryforward period for a particular jurisdiction, management would conclude that a valuation allowance is required.

As of December 31, 2010, United States federal deferred income tax assets were \$1.3 billion. The largest component of the deferred income tax assets is due to timing differences between revenue and expense recognition for income tax versus financial statement purposes. In addition, the Company had a tax net operating loss in the United States in 2010 and possesses certain income tax credit carryforwards that comprise the remainder of the balance. Over the 20 year carryforward period available for net operating losses and general business credits, taxable income of approximately \$3.7 billion would need to be realized to utilize all deferred income tax assets. As of December 31, 2010, management believes that, with a couple of very limited exceptions totaling \$24, it is more likely than not that the entire United States federal deferred income tax assets will be realized.

Applying the above methodology, valuation allowances have been established for certain United States federal, state and local income, as well as certain non-United States, deferred income tax assets to the extent they are not expected to be realized within the particular tax carryforward period.

#### NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

All amounts are in thousands of dollars except share and per share data and elsewhere as noted.

#### 6. Retirement Plans (in part)

The Company has two non-contributory, defined benefit pension plans covering a majority of its domestic employees. The Company's principal defined benefit pension plan provides benefits based on the employee's years of service and final average earnings (as defined in the plan), while the other plan provides benefits at a fixed rate per year of service.

The Company has a Supplemental Executive Retirement Plan (the "SERP") for certain current and former employees that entitles a participating employee to receive payments from the Company following retirement based on the employee's years of service and final average earnings (as defined in the SERP). Under the SERP, the employees can elect early retirement with a corresponding reduction in benefits. The Company also has individual deferred compensation

agreements with certain former employees that entitle these employees to receive payments from the Company for a period of fifteen to eighteen years following retirement. The Company maintains life insurance policies with a cash surrender value of \$36,042 at January 1, 2011 and \$35,405 at January 2, 2010 that are intended to fund deferred compensation benefits under the SERP and deferred compensation agreements.

| Property and equipment, net of accumulated depreciation of \$337,251 and \$338,001, respectively | 186,999       | 200,474       |
| Goodwill                                                                                         | 2,443         | 2,608         |
| Other intangible assets, net of accumulated amortization of \$63,595 and \$62,481, respectively  | 8,113         | 10,181        |
| Other assets                                                                                     | 25,673        | 20,218        |
| Total assets                                                                                     | \$636,751     | \$642,269     |

## NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

### Note 1 Summary of Significant Accounting Policies (in part)

**Derivative Instruments and Hedging Activities:** Derivative financial instruments are recognized on the balance sheet as assets and liabilities and are measured at fair value. Changes in the fair value of derivatives are recorded each period in earnings or Accumulated Other Comprehensive Income (Loss), depending on whether a derivative is designated and effective as part of a hedge transaction, and if it is, the type of hedge transaction. Hedge accounting is utilized when a derivative is expected to be highly effective upon execution and continues to be highly effective over the duration of the hedge transaction. Hedge accounting permits gains and losses on derivative instruments to be deferred in Accumulated Other Comprehensive Income (Loss) and subsequently included in earnings in the periods in which earnings are affected by the hedged item, or when the derivative is determined to be ineffective. The Company's use of derivatives is generally limited to forward purchases of foreign currency to manage exposure to the variability of cash flows, primarily related to the foreign exchange rate risks inherent in forecasted transactions denominated in foreign currency. See Note 12—Derivative Instruments of Notes to Consolidated Financial Statements for more information on derivative instruments and hedging activities.

### Note 11 Fair Value (in part)

The Company categorizes assets and liabilities measured at fair value into three levels based upon the assumptions (inputs) used to price the assets or liabilities. Level 1 provides the most reliable measure of fair value, whereas level 3 generally requires significant management judgment. The three levels are defined as follows:

- Level 1: Unadjusted quoted prices in active markets for identical assets and liabilities.
- Level 2: Observable inputs other than those included in level 1. For example, quoted prices for similar assets or liabilities in active markets or quoted prices for identical assets or liabilities in inactive markets.
- Level 3: Unobservable inputs reflecting management's own assumptions about the inputs used in pricing the asset or liability.

### Financial Instruments Recognized at Fair Value

The following methods and assumptions were used to measure fair value:

| Financial Instrument                                                                        | Valuation Technique/Inputs Used                                                                                                                                                                      |
|---------------------------------------------------------------------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Cash Equivalents                                                                            | Market—Quoted market prices                                                                                                                                                                          |
| Available-for-sale securities: Municipal securities                                         | Market—Based on market data which use evaluated pricing models and incorporate available trade, bid, and other market information                                                                    |
| Available-for-sale securities: Convertible debt securities                                  | Market—Fair value approximated using the amortized cost basis of promissory notes, with the discount amortized to interest income over the term of the notes                                         |
| Derivative Assets: Foreign exchange contracts                                               | Market—Based on observable market inputs using standard calculations, such as time value, forward interest rate yield curves, and current spot rates, considering counterparty credit risk           |
| Derivative Assets: Stock warrants                                                           | Market—Based on a Black-Scholes valuation model with the following inputs: risk-free interest rate, volatility, expected life, and estimated stock price                                             |
| Trading securities: Mutual funds held by nonqualified supplemental employee retirement plan | Market—Quoted market prices                                                                                                                                                                          |
| Derivative Liabilities: Foreign exchange contracts                                          | Market—Based on observable market inputs using standard calculations, such as time value, forward interest rate yield curves, and current spot rates adjusted for the Company's non-performance risk |

*Recurring Fair Value Measurements (in part)*

As of June 30, 2010 and 2009, the fair values of financial assets and liabilities that are measured at fair value on a recurring basis using the market approach are categorized as follows:

| (Amounts in thousands)                                                                      | June 30, 2010 |          |         |          |
|---------------------------------------------------------------------------------------------|---------------|----------|---------|----------|
|                                                                                             | Level 1       | Level 2  | Level 3 | Total    |
| <b>Assets</b>                                                                               |               |          |         |          |
| Cash equivalents                                                                            | \$32,706      | \$ -0-   | \$ -0-  | \$32,706 |
| Available-for-sale securities: Convertible debt securities                                  | -0-           | -0-      | 2,496   | 2,496    |
| Derivatives: Foreign exchange contracts                                                     | -0-           | 2,223    | -0-     | 2,223    |
| Derivatives: Stock warrants                                                                 | -0-           | -0-      | 395     | 395      |
| Trading securities: Mutual funds held by nonqualified supplemental employee retirement plan | 13,071        | -0-      | -0-     | 13,071   |
| Total assets at fair value                                                                  | \$45,777      | \$ 2,223 | \$2,891 | \$50,891 |
| <b>Liabilities</b>                                                                          |               |          |         |          |
| Derivatives: Foreign exchange contracts                                                     | \$ -0-        | \$ 392   | \$ -0-  | \$ 392   |
| Total liabilities at fair value                                                             | \$ -0-        | \$ 392   | \$ -0-  | \$ 392   |

| (Amounts in thousands)                                                                      | June 30, 2009 |          |         |          |
|---------------------------------------------------------------------------------------------|---------------|----------|---------|----------|
|                                                                                             | Level 1       | Level 2  | Level 3 | Total    |
| <b>Assets</b>                                                                               |               |          |         |          |
| Cash equivalents                                                                            | \$42,114      | \$ -0-   | \$ -0-  | \$42,114 |
| Available-for-sale securities: Municipal securities                                         | -0-           | 25,376   | -0-     | 25,376   |
| Derivatives: Foreign exchange contracts                                                     | -0-           | 784      | -0-     | 784      |
| Trading securities: Mutual funds held by nonqualified supplemental employee retirement plan | 10,992        | -0-      | -0-     | 10,992   |
| Total assets at fair value                                                                  | \$53,106      | \$26,160 | \$ -0-  | \$79,266 |
| <b>Liabilities</b>                                                                          |               |          |         |          |
| Derivatives: Foreign exchange contracts                                                     | \$ -0-        | \$ 3,407 | \$ -0-  | \$ 3,407 |
| Total liabilities at fair value                                                             | \$ -0-        | \$ 3,407 | \$ -0-  | \$ 3,407 |

During fiscal year 2010, the Company purchased convertible debt securities of \$2.3 million and stock warrants of \$0.4 million. See Note 13—Short-Term Investments of Notes to Consolidated Financial Statements for further information regarding the convertible debt securities. See Note 12—Derivative Instruments of Notes to Consolidated Financial Statements for further information regarding the stock warrants. The changes in fair value of Level 3 investment assets during fiscal year 2010 were immaterial. There were no Level 3 investments as of June 30, 2009.

*Note 12. Derivative Instruments (in part)**Foreign Exchange Contracts*

The Company operates internationally and is therefore exposed to foreign currency exchange rate fluctuations in the normal course of its business. The Company's primary means of managing this exposure is to utilize natural hedges, such as aligning currencies used in the supply chain with the sale currency. To the extent natural hedging techniques do not fully offset currency risk, the Company uses derivative instruments with the objective of reducing the residual exposure to certain foreign currency rate movements. Factors considered in the decision to hedge an underlying market exposure include the materiality of the risk, the volatility of the market, the duration of the hedge, the degree to which the underlying exposure is committed to, and the availability, effectiveness,

and cost of derivative instruments. Derivative instruments are only utilized for risk management purposes and are not used for speculative or trading purposes.

The Company uses forward contracts designated as cash flow hedges to protect against foreign currency exchange rate risks inherent in forecasted transactions denominated in a foreign currency. Foreign exchange contracts are also used to hedge against foreign currency exchange rate risks related to intercompany balances denominated in currencies other than the functional currencies. As of June 30, 2010, the Company had outstanding foreign exchange contracts to hedge currencies against the U.S. dollar in the aggregate notional amount of \$13.1 million and to hedge currencies against the Euro in the aggregate notional amount of 28.4 million EUR. The notional amounts are indicators of the volume of derivative activities but are not indicators of the potential gain or loss on the derivatives.

In limited cases due to unexpected changes in forecasted transactions, cash flow hedges may cease to meet the criteria to be designated as cash flow hedges. Depending on the type of exposure hedged, the Company may either purchase a derivative contract in the opposite position of the undesignated hedge or may retain the hedge until it matures if the hedge continues to provide an adequate offset in earnings against the currency revaluation impact of foreign currency denominated liabilities.

The fair value of outstanding derivative instruments is recognized on the balance sheet as a derivative asset or liability. When derivatives are settled with the counterparty, the derivative asset or liability is relieved and cash flow is impacted for the net settlement. For derivative instruments that meet the criteria of hedging instruments under FASB guidance, the effective portions of the gain or loss on the derivative instrument are initially recorded net of related tax effect in Accumulated Other Comprehensive Income (Loss), a component of Share Owners' Equity, and are subsequently reclassified into earnings in the period or periods during which the hedged transaction is recognized in earnings. The ineffective portion of the derivative gain or loss is reported in the Non-operating income or expense line item on the Consolidated Statements of Income immediately. The gain or loss associated with derivative instruments that are not designated as hedging instruments or that cease to meet the criteria for hedging under FASB guidance is also reported in the Non-operating income or expense line item on the Consolidated Statements of Income immediately. Based on fair values as of June 30, 2010, the Company estimates that \$0.1 million of pre-tax derivative losses deferred in Accumulated Other Comprehensive Income (Loss) will be reclassified into earnings, along with the earnings effects of related forecasted transactions, within the fiscal year ending June 30, 2011. Losses on foreign exchange contracts are generally offset by gains in operating costs in the income statement when the underlying hedged transaction is recognized in earnings. Because gains or losses on foreign exchange contracts fluctuate partially based on currency spot rates, the future effect on earnings of the cash flow hedges alone is not determinable,

but in conjunction with the underlying hedged transactions, the result is expected to be a decline in currency risk. The maximum length of time the Company had hedged its exposure to the variability in future cash flows was 11 and 15 months as of June 30, 2010 and June 30, 2009, respectively.

#### Stock Warrants:

In conjunction with the Company's investments in convertible debt securities of a privately-held company during fiscal year 2010, the Company received common and preferred stock warrants which provide the right to purchase the privately-held company's equity securities at a specified exercise price. Specifically, the Company received stock warrants to purchase 2,750,000 shares of common stock at a \$0.15 per share exercise price and received stock warrants to purchase a number of shares of preferred stock based on the latest preferred stock offering price (1,833,000 shares of preferred stock at a \$1.50 per share exercise price, based on the last offering price of outstanding preferred stock). The value of the stock warrants will fluctuate primarily in relation to the value of the privately-held company's underlying securities, either providing an appreciation in value or potentially expiring with no value. Gains and losses on the revaluation of stock warrants are recognized in the Non-operating income or expense line item on the Consolidated Statements of Income.

See Note 11—Fair Value of Notes to Consolidated Financial Statements for further information regarding the fair value of derivative assets and liabilities and Note 17—Comprehensive Income of Notes to Consolidated Financial Statements for the amount and changes in derivative gains and losses deferred in Accumulated Other Comprehensive Income (Loss). Information on the location and amounts of derivative fair values in the Consolidated Balance Sheets and derivative gains and losses in the Consolidated Statements of Income are presented below.

**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS***Note 3. Summary of Significant Accounting Policies (in part)**External Software Development Costs*

Costs incurred in creating a software product to be sold or licensed for external use are charged to expense when incurred as indirect costs and selling expenses until technological feasibility has been established for the software. Technological feasibility is established upon completion of a detailed program design or, in its absence, completion of a working software version. Thereafter, all such software development costs are capitalized and subsequently reported at the lower of unamortized cost or estimated net realizable value. Capitalized costs are amortized on a straight-line basis over the remaining estimated economic life of the product.

*Note 11. Capitalized External Software Development Costs (in part)*

A summary of changes in capitalized external software development costs, including costs capitalized and amortized during each of the years in the three-year period ended June 30, 2010, is as follows (in thousands):

|                                                           | <b>Year Ended June 30</b> |             |             |

## NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

### Note 1. Basis of Presentation and Significant Accounting Policies (in part)

#### Supply Agreements

The Company from time to time enters into long term supply agreements with its customers to sell its branded products to customers in exchange for minimum sales volume or a minimum percentage of the customer's sales or space on the retail floor. Such agreements generally cover a period of two to five years. In these long term agreements, the Company reserves the right to pass on its cost increases to its customers. Other costs such as transportation and warranty costs are factored into the wholesale price of the Company's products and passed on to the customer. Initial cash outlays by the Company for such agreements are capitalized and amortized generally as a reduction of sales over the life of the contract. The majority of these cash outlays are ratably recoverable upon contract termination. Such capitalized amounts are included in "Prepaid expenses and other current assets" and "Debt issuance costs, net, and other assets" in the Company's Consolidated Balance Sheets.

#### Debt Issuance Costs

The Company capitalizes costs associated with the issuance of debt and amortizes them as additional interest expense over the lives of the debt on a straight-line basis which approximates the effective interest method. Upon the prepayment of the related debt, the Company accelerates the recognition of an appropriate amount of the costs as refinancing and extinguishment of debt and interest rate derivatives. Additional expense arising from such prepayments during fiscal 2010, 2009 and 2008 was \$2.7 million, \$0.1 million and \$0.0 million, respectively.

In connection with the refinancing of the Company's senior secured credit facilities in May 2009, the Company recorded fees in the amount of \$27.6 million which were deferred and will be amortized over the life of the new agreements. Since the old senior secured term loans are considered terminated, the remaining unamortized debt issuance costs of \$2.1 million were expensed and recognized as a component of refinancing and extinguishment of debt and interest rate derivatives in the Consolidated Statements of Operations. The remaining unamortized debt issuance costs associated with the old senior revolving credit facility will continue to be amortized over the life of the Company's new asset-based revolving credit facility as such credit facility met the criteria for modification treatment rather than extinguishment.

In connection with the Second Amendment to the Third Amended and Restated Credit Agreement entered into in November 2008, the Company paid fees to the creditor in the amount of \$5.4 million, which were recorded as a component of refinancing and extinguishment of debt and interest rate derivatives in the Consolidated Statements of Operations. In accordance with the FASB's authoritative guidance surrounding a debtor's accounting for a modification or exchange of debt instruments, these costs were expensed as incurred. The Company also paid approximately \$0.1 million of fees to third parties that were deferred and will be amortized over the life of the amended agreement. The Company

has the following amounts recorded in debt issuance costs, net, and other assets (in thousands):

|                                     | November 28,<br>2010 | November 29,<br>2009 |

## NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

## 1. Accounting Policies (in part)

## Health Insurance Costs

The Company provides group health insurance coverage to its worksite employees through a national network of carriers including UnitedHealthcare ("United"), PacifiCare, Kaiser Permanente, Blue Shield of California, Hawaii Medical Service Association, Unity Health Plans and Tufts, all of which provide fully insured policies or service contracts.

The policy with United provides the majority of the Company's health insurance coverage. As a result of certain contractual terms, the Company has accounted for this plan since its inception using a partially self-funded insurance accounting model. Accordingly, Administaff records the costs of the United plan, including an estimate of the incurred claims, taxes and administrative fees (collectively the "Plan Costs") as benefits expense in the Consolidated Statements of Operations. The estimated incurred claims are based upon: (i) the level of claims processed during each quarter; (ii) estimated completion rates based upon recent claim development patterns under the plan; and (iii) the number of participants in the plan, including both active and COBRA enrollees. Each reporting period, changes in the estimated ultimate costs resulting from claim trends, plan design and migration, participant demographics and other factors are incorporated into the benefits costs.

Additionally, since the plan's inception, under the terms of the contract, United establishes cash funding rates 90 days in advance of the beginning of a reporting quarter. If the Plan Costs for a reporting quarter are greater than the premiums paid and owed to United, a deficit in the plan would be incurred and a liability for the excess costs would be accrued in the Company's Consolidated Balance Sheet. On the other hand, if the Plan Costs for the reporting quarter are less than the premiums paid and owed to United, a surplus in the plan would be incurred and the Company would record an asset for the excess premiums in its Consolidated Balance Sheet. The terms of the arrangement require Administaff to maintain an accumulated cash surplus in the plan of \$9.0 million, which is reported as long-term prepaid insurance. As of December 31, 2010, Plan Costs were less than the net premiums paid and owed to United by \$28.9 million. As this amount is in excess of the agreed-upon \$9.0 million surplus maintenance level, the \$19.9 million balance is included in prepaid insurance, a current asset, in the Company's Consolidated Balance Sheet. The premiums owed to United at December 31, 2010, were \$12.1 million, which is included in accrued health insurance costs, a current liability in the Company's Consolidated Balance Sheet.

## SHORT-TERM DEBT

## PRESENTATION

**2.115** FASB ASC 470, *Debt*, addresses classification determination for specific debt obligations, such as the following:

- Short-term obligations expected to be refinanced on a long-term basis
- Due-on-demand loan arrangements
- Callable debt
- Sales of future revenue
- Increasing-rate debt
- Debt that includes covenants
- Revolving credit agreements subject to lock-box arrangements and subjective acceleration clauses

## DISCLOSURE

**2.116** Rule 5-02 of Regulation S-X calls for disclosure of the amount and terms of unused lines of credit for short-term financing, if significant. The weighted average interest rate on short-term borrowings outstanding as of the date of each balance sheet presented should be furnished. Further, the amount of these lines of credit that support commercial paper or similar borrowing arrangements should be separately identified.

**2.117** By definition, *short-term notes payable*, *loans payable*, and *commercial paper* are financial instruments. FASB ASC 825 requires disclosure of both the fair value and bases for estimating the fair value of short-term notes payable, loans payable, and commercial paper, unless it is not practicable to estimate that value.

## 2.118

TABLE 2-11: SHORT-TERM DEBT\*

Table 2-11 lists the captions used by the survey entities to describe short-term notes payable, loans payable and commercial paper. By definition, such short-term obligations are financial instruments.

## NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

## Note 4. Short-Term Borrowings and Long-Term Debt (in part)

Information on short-term borrowings and interest rates is as follows:

|                                             | Fiscal Year Ended January 31 |         |         |
|---------------------------------------------|------------------------------|---------|---------|
| (Dollar amounts in millions)                | 2010                         | 2009    | 2008    |
| Maximum amount outstanding at any month-end | \$4,536                      | \$7,866 | \$9,176 |
| Average daily short-term borrowings         | 1,596                        | 4,520   | 5,657   |
| Weighted-average interest rate              | 0.5%                         | 2.1%    | 4.9%    |

Short-term borrowings consist of commercial paper and lines of credit. Short term borrowings outstanding at January 31, 2010 and 2009 were \$523 million and \$1.5 billion, respectively. The company has certain lines of credit totaling \$9.0 billion, most of which were undrawn as of January 31, 2010. Of the \$9.0 billion in lines of credit, \$8.6 billion is committed with 34 financial institutions. In conjunction with these lines of credit, the company has agreed to observe certain covenants, the most restrictive of which relates to maximum amounts of secured debt and long-term leases. Committed lines of credit are primarily used to support commercial paper. The portion of committed lines of credit used to support commercial paper remained undrawn as of January 31, 2010. The committed lines of credit mature at various times starting between June 2010 and June 2012, carry interest rates in some cases equal to the company's one-year credit default swap mid-rate spread and in other cases LIBOR plus 15 basis points and incur commitment fees of 4.0 to 10.0 basis points on undrawn amounts.

The company had trade letters of credit outstanding totaling \$2.4 billion at January 31, 2010 and 2009. At January 31, 2010 and 2009, the company had standby letters of credit outstanding totaling \$2.4 billion and \$2.0 billion, respectively. These letters of credit were issued primarily for the purchase of inventory and self-insurance purposes.

## NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

## Note 1 Summary of Significant Accounting Policies (in part)

## Fair Value Measurements of Financial Instruments

The carrying amounts of cash, receivables and payables in the financial statements approximate their fair values due to the short-term nature of these financial instruments. Short-term debt is comprised of notes payable drawn against the Company's lines of credit and commercial paper. Because of its short-term nature, the carrying amount of the short-term debt also approximates fair value. Included in other assets is insurance policies on various individuals that were associated with the Company. The carrying amounts of these insurance policies approximates their fair value.

## Note 4 Short-Term Debt and Credit Lines (in part)

Short-term debt at December 31, 2010 and 2009 consisted of:

| (In thousands)         | 2010     | 2009    |
|------------------------|----------|---------|
| Notes payable to banks | \$ 2,278 | \$2,574 |
| Commercial paper       | 10,600   | —       |
| Total short-term debt  | \$12,878 | \$2,574 |

Included in notes payable to banks was \$2.3 million and \$2.5 million outstanding in 2010 and 2009, respectively, under a 4.0 million euro-based revolving loan facility (U.S. dollar equivalent of \$5.4 million and \$5.7 million at December 31, 2010 and 2009, respectively) that does not expire and which bore interest at 2.37% and 2.01% during 2010 and 2009, respectively. Included in 2009 was also \$0.1 million borrowed under a 3.4 million euro-based revolving loan facility (U.S. dollar equivalent of \$4.9 million at December 31, 2009) that bore interest at 2.41% and expired in October 2010. The Company has \$61.5 million of short-term credit lines with domestic and foreign banks, which includes a \$50.0 million line of credit that can also support the issuance of commercial paper.

*NOTES TO CONSOLIDATED FINANCIAL STATEMENTS**E. Convertible Debt*

In November 2006, we issued our Notes for total gross proceeds of \$3.45 billion. The Notes are senior unsecured obligations and rank equally with all other existing and future senior unsecured debt. Holders may convert their Notes at their option on any day prior to the close of business on the scheduled trading day immediately preceding (i) September 1, 2011, with respect to the 2011 Notes, and (ii) September 1, 2013, with respect to the 2013 Notes, in each case only under the following circumstances: (1) during the five business-day period after any five consecutive trading-day period (the "measurement period") in which the price per Note of the applicable series for each day of that measurement period was less than 98% of the product of the last reported sale price of our common stock and the conversion rate on each such day; (2) during any calendar quarter, if the last reported sale price of our common stock for 20 or more trading days in a period of 30 consecutive trading days ending on the last trading day of the immediately preceding calendar quarter exceeds 130% of the applicable conversion price in effect on the last trading day of the immediately preceding calendar quarter; or (3) upon the occurrence of certain events specified in the Notes. Additionally, the Notes will become convertible during the last three months prior to the respective maturities of the 2011 Notes and the 2013 Notes.

Upon conversion, we will pay cash up to the principal amount of the debt converted. With respect to any conversion value in excess of the principal amount of the Notes converted, we have the option to settle the excess with cash, shares of our common stock, or a combination of cash and shares of our common stock based on a daily conversion value, determined in accordance with the indenture, calculated on a proportionate basis for each day of the relevant 20-day observation period. The initial conversion rate for the Notes will be 62.1978 shares of our common stock per one thousand dollars of principal amount of Notes, which represents a 27.5% conversion premium from the date the Notes were issued and is equivalent to a conversion price of approximately \$16.08 per share of our common stock. The conversion price is subject to adjustment in some events as set forth in the indenture. In addition, if a "fundamental change" (as defined in the indenture) occurs prior to the maturity date, we will in some cases increase the conversion rate for a holder

of Notes that elects to convert its Notes in connection with such fundamental change.

Based upon the closing price of our common stock for the prescribed measurement period during the three months ended December 31, 2010, the contingent conversion thresholds on the Notes were exceeded. As a result, the Notes are convertible at the option of the holder through March 31, 2011. Accordingly, since the terms of the Notes require the principal to be settled in cash, we reclassified from equity the portion of the Notes attributable to the conversion feature which had not yet been accreted to its face value and the Notes have been classified as a current liability. Contingencies continue to exist regarding the holders' ability to convert such Notes in future quarters. The determination of whether the Notes are convertible will be performed on a quarterly basis. Consequently, the Notes might not be convertible in future quarters and therefore the 2013 Notes may be reclassified as long-term debt, if the contingent conversion thresholds are not met.

The carrying amount reported in the consolidated balance sheet as of December 31, 2010 for our convertible debt was \$3,450.0 million and the fair value was \$5,102.8 million. The carrying amount of the equity component was \$433.9 million at December 31, 2010.

The Notes pay interest in cash at a rate of 1.75% semi-annually in arrears on December 1 and June 1 of each year.

The following table represents the key components of our convertible debt (table in thousands):

|                                                                       | For the Twelve Months Ended |           |           |
|-----------------------------------------------------------------------|-----------------------------|-----------|-----------|
|                                                                       | 2010                        | 2009      | 2008      |
| Contractual interest expense on the coupon                            | \$ 60,375                   | \$ 60,375 | \$ 60,375 |
| Amortization of the discount component recognized as interest expense | 114,481                     | 108,347   | 102,581   |
| Total interest expense on the convertible debt                        | \$174,856                   | \$168,722 | \$162,956 |

As of December 31, 2010, the unamortized discount consists of \$58.4 million which will be amortized over 2011 and an unamortized discount of \$176.8 million which will be amortized over 3 years. The effective interest rate on the Notes was 5.6% for the years ended December 31, 2010, 2009 and 2008.

In connection with the sale of the Notes, we entered into separate convertible note hedge transactions with respect to our common stock (the "Purchased Options"). The Purchased Options allow us to receive shares of our common stock and/or cash related to the excess conversion value that we would pay to the holders of the Notes upon conversion. The Purchased Options will cover, subject to customary anti-dilution adjustments, approximately 215 million shares of our common stock. Half of the Purchased Options expire on December 1, 2011 and the remaining half of the Purchased Options expire on December 1, 2013. We paid an aggregate amount of \$669.1 million of the proceeds from the sale of the Notes for the Purchased Options that was recorded as additional paid-in-capital in Shareholders' Equity.

We also entered into separate transactions in which we sold warrants to acquire, subject to customary anti-dilution adjustments, approximately 215 million shares of our common stock at an exercise price of approximately \$19.55 per share of our common stock. Half of the associated warrants have expiration dates between February 15, 2012 and March 15, 2012 and the remaining half of the associated warrants have expiration dates between February 18, 2014 and March 18, 2014. We received aggregate proceeds of \$391.1 million from the sale of the associated warrants. Upon exercise, the value of the warrants is required to be settled in shares.

The Purchased Options and associated warrants will generally have the effect of increasing the conversion price of the Notes to approximately \$19.55 per share of our common stock, representing an approximate 55% conversion premium based on the closing price of \$12.61 per share of our common stock on November 13, 2006.

## TRADE ACCOUNTS PAYABLE

### RECOGNITION AND MEASUREMENT

**2.122** FASB ASC 210 states that current liabilities generally include obligations for items that have entered into the operating cycle, such as payables incurred in the acquisition of materials and supplies to be used in the production of goods or in providing services to be offered for sale.

### PRESENTATION

**2.123** Rule 5.02 of Regulation S-X requires that amounts payable to trade creditors be separately stated.

### DISCLOSURE

**2.124** Under FASB ASC 825, fair value disclosure is not required for trade payables when the carrying amount of the trade payable approximates its fair value.

#### NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

##### 1. Description of Business and Summary of Significant Accounting Policies (in part)

##### Operating Leases (in part)

To account for construction allowance reimbursements from landlords and rent holidays, the Company records a deferred rent liability included in trade accounts payable and accrued expenses and other liabilities on the consolidated balance sheets and amortizes the deferred rent over the lease term, as a reduction to rent expense on the consolidated income statements. For leases containing rent escalation clauses, the Company records minimum rent expense on a straight-line basis over the lease term on the consolidated income statement. The lease term used for lease evaluation includes renewal option periods only in instances in which the exercise of the option period can be reasonably assured and failure to exercise such options would result in an economic penalty.

**Gift Card Revenue Recognition**—The Company establishes a liability upon the sale of a gift card. The liability is relieved and revenue is recognized when gift cards are redeemed for merchandise. The Company uses a homogeneous pool to recognize gift card breakage and will recognize income over the period when the likelihood of the gift card being redeemed is remote and the Company determines that it does not have a legal obligation to remit the value of unredeemed gift cards to the relevant jurisdiction as abandoned property. The Company determines gift card breakage income based upon historical redemption patterns. At that time, the Company will recognize breakage income over the performance period for those gift cards (i.e. 60 months) as a reduction of cost of sales. As of January 30, 2010 and January 31, 2009, gift card liabilities of \$58.5 million and \$65.1 million, respectively, were included in trade accounts payable and accrued expenses and other liabilities.

### 7. Trade Accounts Payable and Accrued Expenses

Trade accounts payable and accrued expenses consist of the following:

| (In thousands of dollars)             | January 30,<br>2010 | January 31,<br>2009 |
|---------------------------------------|---------------------|---------------------|
| Trade accounts payable                | \$494,372           | \$457,062           |
| Accrued expenses:                     |                     |                     |

## EMPLOYEE-RELATED LIABILITIES

### PRESENTATION

**2.126** FASB ASC 715, *Compensation—Retirement Benefits*, requires that an entity recognize the overfunded or underfunded status of a single-employer defined benefit postretirement plan as an asset or a liability in its statement of financial position. FASB ASC 715 also requires that an employer that presents a classified balance sheet should classify the liability for an underfunded plan as a current liability, a noncurrent liability, or a combination of both. The current portion (determined on a plan-by-plan basis) is the amount by which the actuarial present value of benefits included in the benefit obligation that is payable in the next 12 months, or operating cycle if longer, exceeds the fair value of plan assets. The asset for an overfunded plan shall be classified as a noncurrent asset in a classified balance sheet. The amount classified as a current liability is limited to the amount of the plan's unfunded status recognized in the employer's balance sheet.

### DISCLOSURE

**2.127** FASB ASC 715 requires that employers recognize changes in that funded status in comprehensive income and disclose in the notes to financial statements additional information about plan assets, the benefit obligation, reconciliations of beginning and ending balances of both plan assets and obligations, and net periodic benefit cost.

##### NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

##### Note 1—Summary of Significant Accounting Policies (in part)

##### Retirement Benefit Plans

We account for retirement benefit obligations under FASB ASC Topic 715, *Compensation—Retirement Benefits*. We derive the discount rates used to measure the present value of our benefit obligations using the cash flow matching method. Under this method, we compare the plan's projected payment obligations by year with the corresponding yields on the Mercer Yield Curve. Each year's projected cash flows are then discounted back to their present value at the measurement date and an overall discount rate is determined. The overall discount rate is then rounded to the nearest tenth of a percentage point. We use a similar approach to select the discount rates for major non-U.S. plans. For other non-U.S. plans, discount rates are developed based on a bond index within the country of domicile.

We select the expected long-term rate of return assumption for our U.S. pension plan and retiree medical plans using advice from an investment advisor and an actuary. The selected rate considers plan asset allocation targets, expected overall investment manager performance and long-term historical average compounded rates of return.

Benefit plan experience gains and losses are recognized in other comprehensive income (loss). Accumulated net benefit plan experience gains and losses that exceed 10% of the greater of a plan's benefit obligation or plan assets at the beginning of the year are amortized into earnings from other comprehensive income (loss) on a straight-line basis. The amortization period for pension plans is the average remaining service period of employees expected to receive benefits under the plans. The amortization period for other retirement plans is primarily the average remaining life expectancy of inactive participants.

*Note 3—Retirement Benefits (in part)**Defined-benefit Pension Plans (in part)**Summary*

We have various defined-benefit pension plans covering eligible current and former employees. Benefits under most plans are based on salary and years of service. There are limits to the amount of benefits which can be paid to participants from a U.S. qualified pension plan. We maintain a nonqualified U.S. plan to pay benefits for those eligible current and former employees in the U.S. whose benefits exceed the regulatory limits.

*Obligations and Funded Status*

Changes in the projected benefit obligation (“PBO”) and plan assets for our pension plans are as follows:

| (In millions)                                      | Years Ended December 31 |           |                |          |           |           |
|----------------------------------------------------|-------------------------|-----------|----------------|----------|-----------|-----------|
|                                                    | U.S. Plans              |           | Non-U.S. Plans |          | Total     |           |

*Retirement Benefits Other than Pensions (in part)**Summary*

We provide retirement health care benefits for eligible current and former U.S. and Canadian employees, including former employees of our former U.S. coal operation. Retirement

benefits related to our former coal operation include medical benefits provided by the Pittston Coal Group Companies Employee Benefit Plan for UMWA Represented Employees (the “UMWA plans”) as well as costs related to Black Lung obligations.

*Obligations and Funded Status*

Changes in the APBO and plan assets related to retirement health care benefits are as follows:

*NOTES TO CONSOLIDATED FINANCIAL STATEMENTS***9. Employee Related Obligations**

At the end of 2010 and 2009, employee related obligations recorded on the Consolidated Balance Sheet were:

| (Dollars in millions)                    | 2010    | 2009  |
|------------------------------------------|---------|-------|
| Pension benefits                         | \$2,175 | 2,792 |
| Postretirement benefits                  | 2,359   | 2,245 |
| Postemployment benefits                  | 1,379   | 1,504 |
| Deferred compensation                    | 820     | 790   |
| Total employee obligations               | 6,733   | 7,331 |
| Less current benefits payable            | 646     | 562   |
| Employee related obligations—non-current | \$6,087 | 6,769 |

Prepaid employee related obligations of \$615 million and \$266 million for 2010 and 2009, respectively, are included in other assets on the consolidated balance sheet.

**10. Pensions and Other Benefit Plans (in part)**

The Company sponsors various retirement and pension plans, including defined benefit, defined contribution and termination indemnity plans, which cover most employees worldwide. The Company also provides postretirement benefits, primarily health care, to all U.S. retired employees and their dependents.

Many international employees are covered by government-sponsored programs and the cost to the Company is not significant.

Retirement plan benefits are primarily based on the employee's compensation during the last three to five years before retirement and the number of years of service. International subsidiaries have plans under which funds are deposited with trustees, annuities are purchased under group contracts, or reserves are provided.

The Company does not fund retiree health care benefits in advance and has the right to modify these plans in the future.

The Company uses the date of its consolidated financial statements (January 2, 2011 and January 3, 2010, respectively) as the measurement date for all U.S. and international retirement and other benefit plans.

In accordance with U.S. GAAP, the Company has adopted the recent standards related to employers' accounting for defined benefit pension and other postretirement plans.

The following table sets forth information related to the benefit obligation and the fair value of plan assets at year-end 2010 and 2009 for the Company's defined benefit retirement plans and other postretirement plans:

| (Dollars in millions)                                                                   | Retirement Plans |            | Other Benefit Plans |            |
|-----------------------------------------------------------------------------------------|------------------|------------|---------------------|------------|

#### NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

##### Note I—Employee Benefit Plans (in part)

##### Nonunion Defined Benefit Pension, Supplemental Benefit Pension and Postretirement Health Benefit Plans

The Company has a noncontributory defined benefit pension plan covering substantially all noncontractual employees hired before January 1, 2006. Noncontractual employees hired after 2005 participate in a defined contribution plan (see Defined Contribution Plans within this note). Benefits under the defined benefit pension plan are generally based on years of service and employee compensation. The Company's contributions to the defined benefit pension plan are based upon the minimum funding levels required under provisions of the

Employee Retirement Income Security Act of 1974 and the Pension Protection Act of 2006 (the "PPA"), with the maximum contributions not to exceed deductible limits under the U.S. Internal Revenue Code ("IRC").

The Company also has an unfunded supplemental benefit plan ("SBP") for the purpose of supplementing benefits under the Company's defined benefit pension plan. Under the SBP, the Company will pay sums in addition to amounts payable under the defined benefit plan to eligible participants. Participation in the SBP is limited to employees of the Company who are participants in the Company's defined benefit plan and who are designated as participants in the SBP by the Company's Board of Directors. The SBP provides for a lump-sum payment following termination made in accordance with the six month delay provision for key employees as required by Section 409A of the IRC. The Compensation Committee of the Company's Board of Directors ("Compensation Committee") elected to close the SBP to new entrants and to place a cap on the maximum payment per participant to existing participants in the SBP effective January 1, 2006. In place of the SBP, eligible officers of the Company appointed after 2005 participate in a long-term cash incentive plan (see Long-Term Cash Incentive Plan within this note).

Effective December 31, 2009, the Compensation Committee elected to freeze the accrual of benefits for remaining participants under the SBP, resulting in a plan curtailment. The Compensation Committee provided the SBP participants an option to freeze their SBP benefits without early retirement penalties and continue participation in the deferred salary agreement program (see Deferred Compensation Plans within this note) or to freeze their benefits in both the SBP and deferred salary agreement program and begin participation in the Company's long-term cash incentive plan. With the exception of early retirement penalties that may apply in certain cases, the valuation inputs for calculating the frozen SBP benefits to be paid to participants, including final average salary and the interest rate, were established at December 31, 2009. The curtailment decreased the projected benefit obligation resulting in a curtailment gain of \$0.1 million, which was netted with the unrecognized actuarial loss at December 31, 2009, to be amortized over the remaining service period of the SBP participants.

The Company also sponsors an insured postretirement health benefit plan that provides supplemental medical benefits and dental benefits primarily to certain officers of the Company and certain subsidiaries. Effective January 1, 2011, retirees pay a portion of the premiums under the plan according to age and coverage levels. The amendment to the plan to implement retiree premiums resulted in an unrecognized prior service credit which is included in accumulated other comprehensive loss as of December 31, 2010.

Amounts recognized in the consolidated balance sheets at December 31 consist of the following:

*NOTES TO CONSOLIDATED FINANCIAL STATEMENTS**1. Accounting Policies (in part)**Workers' Compensation Costs*

The Company's workers' compensation coverage has been provided through an arrangement with the ACE Group of Companies ("the ACE Program") since 2007. The ACE Program is fully insured in that ACE has the responsibility to pay all claims incurred regardless of whether the Company satisfies its responsibilities. Through September 30, 2010, the Company bore the economic burden for the first \$1 million layer of claims per occurrence and the insurance carrier was and remains responsible for the economic burden for all claims in excess of such first \$1 million layer.

Effective for the ACE Program year beginning on October 1, 2010, in addition to the Company bearing the economic burden for the first \$1 million layer of claims per occurrence, the Company will also bear the economic burden for those claims exceeding \$1 million, up to a maximum aggregate amount of \$5 million per policy year.

Because the Company bears the economic burden for claims up to the levels noted above, such claims, which are the primary component of the Company's workers' compensation costs, are recorded in the period incurred. Workers' compensation insurance includes ongoing health care and indemnity coverage whereby claims are paid over numerous years following the date of injury. Accordingly, the accrual of related incurred costs in each reporting period includes estimates, which take into account the ongoing development of claims and therefore requires a significant level of judgment.

The Company employs a third party actuary to estimate its loss development rate, which is primarily based upon the nature of worksite employees' job responsibilities, the lo-

cation of worksite employees, the historical frequency and severity of workers compensation claims, and an estimate of future cost trends. Each reporting period, changes in the actuarial assumptions resulting from changes in actual claims experience and other trends are incorporated into the Company's workers' compensation claims cost estimates. During the year ended December 31, Administaff reduced accrued workers' compensation costs by \$6.2 million and \$5.7 million, respectively, in 2010 and 2009, for changes in estimated losses related to prior reporting periods. Workers' compensation cost estimates are discounted to present value at a rate based upon the U.S. Treasury rates that correspond with the weighted average estimated claim payout period (the average discount rates utilized in 2010 and 2009 were 1.4% and 1.8%, respectively) and are accreted over the estimated claim payment period and included as a component of direct costs in the Company's Consolidated Statements of Operations.

The following table provides the activity and balances related to incurred but not reported workers' compensation claims for the years ended December 31, 2010 and 2009 (in thousands):

|                                     | Year Ended |           |
|-------------------------------------|------------|-----------|
|                                     | 2010       | 2009      |
| Beginning balance                   | \$ 88,450  | \$ 83,055 |
| Accrued claims                      | 34,345     | 35,525    |
| Present value discount              | (1,675)    | (2,203)   |
| Paid claims                         | (24,186)   | (27,927)  |
| Ending balance                      | \$ 96,934  | \$ 88,450 |
| Current portion of accrued claims   | \$ 41,204  | \$ 36,436 |
| Long-term portion of accrued claims | 55,730     | 52,014    |
|                                     | \$ 96,934  | \$ 88,450 |

The current portion of accrued workers' compensation costs at December 31, 2010 and 2009, includes \$877,000 and \$613,000, respectively, of workers' compensation administrative fees.

As of December 31, the undiscounted accrued workers' compensation costs were \$111.5 million in 2010 and \$103.8 million in 2009.

At the beginning of each policy period, the insurance carrier establishes monthly funding requirements comprised of premium costs and funds to be set aside for payment of future claims ("claim funds"). The level of claim funds is primarily based upon anticipated worksite employee payroll levels and expected workers compensation loss rates, as determined by the insurance carrier. Monies funded into the program for incurred claims expected to be paid within one year are recorded as restricted cash, a short-term asset, while the remainder of claim funds are included in deposits, a long-term asset in the Company's Consolidated Balance Sheets. In 2010, the Company received \$15.6 million for the return of excess claim funds related to the ACE program, which reduced deposits. As of December 31, 2010, the Company had restricted cash of \$41.2 million and deposits of \$51.7 million.

The Company's estimate of incurred claim costs expected to be paid within one year are recorded as accrued workers' compensation costs and included in short-term liabilities, while its estimate of incurred claim costs expected to be paid beyond one year are included in long-term liabilities on the Company's Consolidated Balance Sheets.

<sup>(\*)</sup> As adjusted for the retrospective adoption of the accounting standard for convertible debentures in the first quarter of fiscal 2010 (see Note 2).

###### NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

###### Note 2. Summary of Significant Accounting Policies and Concentrations of Risk (in part)

###### Income Taxes

All income tax amounts reflect the use of the liability method under the accounting for income taxes, as interpreted by FASB authoritative guidance for measuring uncertain tax positions. Under this method, deferred tax assets and liabilities are determined based on the expected future tax consequences of temporary differences between the carrying amounts of assets and liabilities for financial and income tax reporting purposes.

###### NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

###### Note 15 Income Taxes (in part)

For fiscal 2010, U.S. income taxes have not been provided for approximately \$652 million of cumulative undistributed earnings of several non-U.S. subsidiaries. Applied intends to reinvest these earnings indefinitely in operations outside of the U.S. If these earnings were distributed to the United States in the form of dividends or otherwise, or if the shares of the relevant foreign subsidiaries were sold or otherwise transferred, the Company would be subject to additional U.S. income taxes (subject to an adjustment for foreign tax credits) and foreign withholding taxes. Determination of the amount of unrecognized deferred income tax liability related to these earnings is not practicable.

At October 31, 2010, Applied's state net operating loss carryforwards were \$55 million. The carryforwards expire between fiscal 2021 and fiscal 2031. Applied has a California research and development tax credit carryforward of \$31 million which has an unlimited life. Applied also has net operating loss carryforwards in foreign jurisdictions of \$105 million. The carryforwards have lives ranging from five years to indefinite. Management believes it is more likely than not that all loss and tax credit carryforwards at October 31, 2010 will be utilized in future periods.

Applied's income taxes payable have been reduced by the tax benefits associated with employee stock option transactions. These benefits, credited directly to stockholders' equity, amounted to \$2 million for fiscal 2010, \$1 million for fiscal 2009, and \$7 million for fiscal 2008 with a corresponding reduction to taxes payable of \$2 million in fiscal 2010, \$1 million in fiscal 2009, and \$7 million for fiscal 2008.

## CURRENT AMOUNT OF LONG-TERM DEBT

### PRESENTATION

**2.136** FASB ASC 470 addresses classification determination for specific debt obligations, such as the following:

- Short-term obligations expected to be refinanced on a long-term basis
- 'Due-on-demand loan arrangements
- Callable debt
- Sales of future revenue
- Increasing rate debt
- Debt that includes covenants
- Revolving credit agreements subject to lock-box arrangements and subjective acceleration clauses

### DISCLOSURE

**2.137** FASB ASC 470 includes disclosures required for long-term debt (see the "Long-Term Debt" section). FASB ASC 825 requires disclosure of both the fair value and bases for estimating the fair value of the current amount of long-term debt, unless it is not practicable to estimate that value.

### NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

(In Millions, Except Per Share Data or Otherwise Stated Herein)

#### 13. Debt

##### Short-Term Borrowings

We are a member of the Federal Home Loan Bank of Indianapolis and the Federal Home Loan Bank of Cincinnati, collectively, the FHLBs, and as a member we have the ability to obtain cash advances subject to certain requirements. In order to obtain cash advances, we are required to pledge securities as collateral to the FHLBs, initially equal to a certain percentage of the cash borrowings, depending on the type of securities pledged as collateral. The market value of the collateral is monitored daily by the FHLBs, and if it falls below the required percentage of the cash borrowings, we are required to pledge additional securities as collateral or repay a portion of the outstanding cash advance balance. In addition, our borrowings may be limited based on the amount of our investment in the FHLBs' common stock. Our investment in the FHLBs' common stock at December 31, 2010 totaled \$11.4, which is reported in "Investments available-for-sale—Equity securities" on the consolidated balance sheets. On December 21, 2010, we borrowed \$100.0 from the FHLBs with a one-month term at a fixed interest rate of 0.120%, which was outstanding at December 31, 2010 and was repaid on January 18, 2011. On January 18, 2011, we borrowed another \$100.0 for a two-month period at 0.200%, with a maturity date of March 21, 2011. In addition, on April 12, 2010, we borrowed \$100.0 from the FHLBs with a two-year term at a fixed interest rate of 1.430%, which is reported with "Long-term debt, less current portion" on the consolidated balance sheets. Securities, primarily certain U.S. government sponsored mortgage-backed securities, with a fair value of \$237.9 at December 31, 2010, have been pledged as collateral. The securities pledged are reported in "Investments available-for-sale—Fixed maturity securities" on the consolidated balance sheets.

### Long-Term Debt

The carrying value of long-term debt at December 31 consists of the following:

|                                                                                 | 2010      | 2009      |
|---------------------------------------------------------------------------------|-----------|-----------|

| Senior term loan                                                                | —         | 433.1     |
| Fixed rate 1.430% FHLBs secured loan, due 2012                                  | 100.0     | —         |
| Capital leases, stated or imputed rates from 4.860% to 26.030% due through 2012 | 6.6       | 13.2      |
| Total long-term debt                                                            | 8,853.7   | 8,399.1   |
| Current portion of long-term debt                                               | (705.9)   | (60.8)    |
| Long-term debt, less current portion                                            | \$8,147.8 | \$8,338.3 |

At maturity on January 15, 2011, we repaid the \$700.0 outstanding balance of our 5.000% senior unsecured notes.

On September 30, 2010, we entered into a senior credit facility, or the facility, with certain lenders for general corporate purposes. The facility provides credit up to \$2,000.0 and matures on September 30, 2013. The interest rate on the facility is based on either, (i) the LIBOR rate plus a predetermined percentage rate based on our credit rating at the date of utilization, or (ii) a base rate as defined in the facility agreement plus a predetermined percentage rate based on our credit rating at the date of utilization. Our ability to borrow under the facility is subject to compliance with certain covenants. Commitment and legal fees paid for the facility were \$7.6 and there are no conditions that are probable of occurring under which the facility may be withdrawn. There were no amounts outstanding under the facility as of or during the three months ended December 31, 2010, or under a previous facility during the nine months ended September 30, 2010. At December 31, 2010, we had \$2,000.0 available under the facility. This facility replaced our previous senior credit facility, which provided credit up to \$2,392.0.

On August 12, 2010, we issued \$700.0 of 4.350% notes due 2020 and \$300.0 of 5.800% notes due 2040 under our shelf registration statement. We used the proceeds from this debt issuance to repay the remaining outstanding balance of our variable rate senior term loan and for general corporate purposes. The notes have a call feature that allows us to repurchase the notes at any time at our option and a put feature that allows a note holder to require us to repurchase the notes upon the occurrence of both a change of control event and a downgrade of the notes.

Surplus notes are unsecured obligations of Anthem Insurance Companies, Inc., or Anthem Insurance, a wholly owned subsidiary, and are subordinate in right of payment to all of Anthem Insurance's existing and future indebtedness. Any payment of interest or principal on the surplus notes may be made only with the prior approval of the Indiana Department of Insurance, or IDOI, and only out of capital and surplus funds of Anthem Insurance that the IDOI determines to be available for the payment under Indiana insurance laws. During April 2010, we repaid the remaining \$42.0 outstanding balance of our 9.125% surplus notes.

In July 2009, May 2009 and March 2009, we repurchased \$390.0, \$300.0 and \$400.0, respectively, of our \$1,090.0 face value due at maturity zero coupon notes. The notes were issued in August 2007 in a private placement transaction. We paid cash totaling \$553.8 to repurchase the notes, which had a remaining carrying value of zero at December 31, 2009.

On February 5, 2009, we issued \$400.0 of 6.000% notes due 2014 and \$600.0 of 7.000% notes due 2019 under our shelf registration statement. The proceeds from this debt issuance were used for general corporate purposes, including, but not limited to, repayment of short-term debt and repurchasing shares of our common stock. The notes have a call feature that allows us to repurchase the notes at any time at our option and a put feature that allows a note holder to require us to repurchase the notes upon the occurrence of both a change of control event and a downgrade of the notes.

We have an authorized commercial paper program of up to \$2,500.0, the proceeds of which may be used for general corporate purposes. The weighted-average interest rate on commercial paper borrowings at December 31, 2010 and 2009 was 0.359% and 0.340%, respectively. Commercial paper borrowings have been classified as long-term debt at December 31, 2010 and 2009 as our practice and intent is to replace short-term commercial paper outstanding at expiration with additional short-term commercial paper for an uninterrupted period extending for more than one year or our ability to redeem our commercial paper with borrowings under the senior credit facility described above.

Interest paid during 2010, 2009 and 2008 was \$419.6, \$409.2 and \$443.4, respectively.

We were in compliance with all applicable covenants under our outstanding debt agreements.

Future maturities of debt, including capital leases, are as follows: 2011, \$1,043.9; 2012, \$1,297.1; 2013, \$0.0; 2014, \$945.1; 2015, \$0.0 and thereafter, \$5,567.6.

| Thereafter | 1     |
|            | \$887 |

**Revolving Credit Facilities**

On April 21, 2008, the Company replaced its existing \$500 million unsecured revolving credit facility with an aggregate of \$3 billion of unsecured credit facilities and borrowed \$2 billion to finance the cash portion of the Grant Prideco acquisition. These facilities consisted of a \$2 billion, five-year revolving credit facility and a \$1 billion, 364-day revolving credit facility which was terminated early in February 2009. At December 31, 2010, there were no borrowings against the remaining credit facility, and there were \$477 million in outstanding letters of credit issued under this facility, resulting in \$1,523 million of funds available under this revolving credit facility. Interest under this multicurrency facility is based upon LIBOR, NIBOR or EURIBOR plus 0.26% subject to a ratings-based grid, or the prime rate.

The Company also had \$1,366 million of additional outstanding letters of credit at December 31, 2010, primarily in Norway, that are essentially under various bilateral committed letter of credit facilities. Other letters of credit are issued as bid bonds and performance bonds. The Senior Notes contain reporting covenants and the credit facility contains a financial covenant regarding maximum debt to capitalization. The Company was in compliance with all covenants at December 31, 2010.

**OTHER CURRENT LIABILITIES****PRESENTATION**

**2.140** Rule 5-02 of Regulation S-X requires that any items in excess of 5 percent of total current liabilities be stated separately on the balance sheet or disclosed in the notes. In addition, registrants should state separately amounts payable to the following:

- Banks for borrowings
- Factors or other financial institutions for borrowings
- Holders of commercial paper
- Trade creditors
- Related parties
- Underwriters, promoters, and employees (other than related parties)
- Others

Amounts applicable to the first three categories may be stated separately in the balance sheet or in a note thereto.

## 2.141

**TABLE 2-12: OTHER CURRENT LIABILITIES\***

Table 2-12 summarizes other identified current liabilities. The most common types of other current liabilities are liabilities related to derivatives, discontinued operations, deferred revenue, accrued interest, and deferred taxes.

|                                                              | Number of Entities |                  |                  |
|--------------------------------------------------------------|--------------------|------------------|------------------|
|                                                              | 2010               | 2009             | 2008             |

## NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

### Note 7. Accrued Expenses and Other Current Liabilities

Accrued expenses and other current liabilities consist of the following:

| (In thousands)                 | June 27, 2010 | June 28, 2009 |
|--------------------------------|---------------|---------------|
| Accrued compensation           | \$164,579     | \$171,609     |
| Warranty reserves              | 31,756        | 21,185        |
| Income and other taxes payable | 54,874        | 31,970        |
| Other                          | 58,188        | 56,571        |
|                                | \$309,397     | \$281,335     |

Following a voluntary independent review of the Company's historical employee stock option grant process, the Company considered whether Section 409A ("Section 409A") of the Internal Revenue Code of 1986, as amended ("IRC") and similar provisions of state law would apply to certain stock option grants that were found to have intrinsic value at the time of their respective measurement dates. If a stock option is not considered as issued with an exercise price of at least the fair market value of the underlying stock on the date of grant, it may be subject to penalty taxes under Section 409A and similar provisions of state law. In such a case, such taxes may be assessed not only on the intrinsic value increase, but on the entire stock option gain as measured at various times. On March 30, 2008, the Board of Directors of the Company authorized the Company to assume potential tax liabilities of certain employees, including the Company's Chief Executive Officer and certain other executive officers, relating to options that might be subject to Section 409A and similar provisions of state law. The assumed Section 409A liability was \$53.7 million as of June 28, 2009 and is included in accrued compensation in the table above.

During fiscal year 2010, the Company reached a final settlement with respect to its Section 409A liabilities, which resulted in a reduction of the liability and net credits recognized in the statements of operations of \$(5.8) million recorded in cost of goods sold and \$(38.6) million recorded in operating expenses.

## Product Warranty

### 2.145

#### JOHNSON CONTROLS, INC. (SEP)

##### NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

### 6. Product Warranties

The Company offers warranties to its customers depending upon the specific product and terms of the customer purchase agreement. A typical warranty program requires that the Company replace defective products within a specified time period from the date of sale. The Company records an estimate for future warranty-related costs based on actual historical return rates and other known factors. Based on analysis of return rates and other factors, the adequacy of the Company's warranty provisions are adjusted as

necessary. While the Company's warranty costs have historically been within its calculated estimates, the Company monitors its warranty activity and adjusts its reserve estimates when it is probable that future warranty costs will be different than those estimates. Accruals related to pre-existing warranties includes incremental warranty charges of \$105 million recorded in the fourth quarter of fiscal 2009 by the building efficiency North America unitary products segment, of which \$76 million was due to a specific product issue and \$29 million was a result of the Company's periodic warranty review process and analysis of return rates. The portion of the incremental charge due to a specific product issue related to the anticorrosive film applied to certain coils used in residential indoor heating, ventilating and air conditioning units as a means to promote flow of condensation and adding to the efficiency of the units.

The Company's product warranty liability is recorded in the consolidated statement of financial position in other current liabilities if the warranty is less than one year and in other noncurrent liabilities if the warranty extends longer than one year.

The changes in the carrying amount of the Company's total product warranty liability for the fiscal years ended September 30, 2010 and 2009 were as follows (in millions):

|                                                                                 | <b>Year Ended<br/>September 30</b> |             |

## NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

### Note 19. Discontinued Operations (in part)

In September 2010, the Company's Board of Directors authorized management to proceed with a sale of Harmonix. Management is actively marketing Harmonix for sale and is committed to a plan that management believes will result in the sale of the business within twelve months. Accordingly, the results of operations of Harmonix, which were previously included in the *Media Networks* segment, are presented as discontinued operations in all periods presented.

Assets and liabilities classified as held for sale as of September 30, 2010 and December 31, 2009 are related to Harmonix and are as follows:

| <b>Harmonix Net Assets</b><br>(In millions) | <b>September 30,<br/>2010</b> | <b>December 31,<br/>2009</b> |

## Self-Insurance Reserves

2.148

AVIS BUDGET GROUP, INC. (DEC)

### NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

(Unless otherwise noted, all dollar amounts are in millions, except per share amounts)

#### 2. Summary of Significant Accounting Policies (in part)

##### Self-Insurance Reserves

The Consolidated Balance Sheets include \$305 million and \$308 million of liabilities with respect to self-insured public liability and property damage as of December 31, 2010 and 2009, respectively. Such liabilities relate to supplemental liability insurance, personal effects protection insurance, public liability, property damage and personal accident insurance claims for which the Company is self-insured. These obligations represent an estimate for both reported claims not yet paid and claims incurred but not yet reported. The Company estimates the required reserve for such claims on an undiscounted basis utilizing an actuarial method that is based upon various assumptions which include, but are not limited to, the Company's historical loss experience and projected loss development factors. The required liability is also subject to adjustment in the future based upon the changes in claims experience, including changes in the number of incidents and changes in the ultimate cost per incident. These amounts are included within accounts payable and other current liabilities and other non-current liabilities.

The Consolidated Balance Sheets also include liabilities of approximately \$56 million and \$65 million as of December 31, 2010 and 2009, respectively, related to health and welfare, workers' compensation and other benefits the Company provides to its employees. The Company estimates the liability required for such benefits based on actual claims outstanding and the estimated cost of claims incurred as of the balance sheet date. These amounts are included within accounts payable and other current liabilities.

### NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

#### Note 2. Summary of Significant Accounting Policies (in part)

##### Advertising and Promotional Costs

The Company expenses the production costs of advertising when the advertisements are first aired or displayed. All other advertising and promotional costs are expensed in the period incurred.

Franchise restaurants and Company restaurants contribute to advertising funds managed by the Company in the United States and certain international markets where Company restaurants operate. Under the Company's franchise agreements, contributions received from franchisees must be spent on advertising, marketing and related activities, and result in no gross profit recognized by the Company. Advertising expense, net of franchisee contributions, totaled \$91.3 million for the year ended June 30, 2010, \$93.3 million for the year ended June 30, 2009, and \$91.5 million for the year ended June 30, 2008, and is included in selling, general and administrative expenses in the accompanying consolidated statements of income.

To the extent that contributions received exceed advertising and promotional expenditures, the excess contributions are accounted for as a deferred liability and are recorded in accrued advertising in the accompanying consolidated balance sheets.

Franchisees in markets where no Company restaurants operate contribute to advertising funds not managed by the Company. Such contributions and related fund expenditures are not reflected in the Company's results of operations or financial position.

#### Note 19—Related Party Transactions (in part)

RAI and its operating subsidiaries engage in transactions with affiliates of BAT. The following is a summary of balances and transactions with such BAT affiliates as of and for the years ended December 31:

Balances: (Dollars in millions)

|                     | 2010 | 2009 |
|---------------------|------|------|
| Accounts receivable | \$48 | \$96 |
| Accounts payable    | (4)  | (3)  |
| Deferred revenue    | (53) | (57) |

Significant transactions: (Dollars in Millions)

|                                            | 2010  | 2009  | 2008  |
|--------------------------------------------|-------|-------|-------|
| Net sales                                  | \$381 | \$404 | \$468 |
| Purchases                                  | 12    | 16    | 12    |
| RAI common stock purchases from B&W        | —     | —     | 75    |
| Research and development services billings | 4     | 2     | 3     |

RAI's operating subsidiaries sell contract-manufactured cigarettes, processed strip leaf, pipe tobacco and little cigars to BAT affiliates. During the second quarter of 2010, RJR Tobacco and BAT concluded their negotiations over certain contract manufacturing arrangements, which resulted in the termination of a prior contract manufacturing agreement between RJR Tobacco and an affiliate of BAT and entering into a new contract manufacturing agreement with pricing based on negotiated cost plus 10% for 2010. For contract years 2011 through 2014, prices will increase or decrease by a multiple equal to changes in the Producer Price Index, reported by the U.S. Bureau of Labor Statistics. Net sales, primarily of cigarettes, to BAT affiliates represented approximately 4.0% of RAI's total net sales in 2010 and 5.0% in each of 2009 and 2008.

RJR Tobacco recorded deferred sales revenue relating to leaf sold to BAT affiliates that had not been delivered as of

December 31, given that RJR Tobacco had a legal right to bill the BAT affiliates. Leaf sales revenue to BAT affiliates will be recognized when the product is shipped to the customer.

#### NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

#### Note 2—Summary of Significant Accounting Policies (in part)

##### Environmental Liabilities

The Company estimates future costs for known environmental remediation requirements and accrues for them on an undiscounted basis when it is probable that the Company has incurred a liability and the related costs can be reasonably estimated but the timing of incurring the estimated costs is unknown. The Company considers various factors when estimating its environmental liabilities. Adjustments to the liabilities are made when additional information becomes available that affects the estimated costs to study or remediate any environmental issues or when expenditures are made for which reserves were established. Legal costs incurred in connection with environmental contingencies are expensed as incurred.

When only a wide range of estimated amounts can be reasonably established and no other amount within the range is better than another, the low end of the range is recorded in the financial statements. In a number of cases, it is possible that the Company may receive reimbursement through insurance or from other potentially responsible parties for a site. In these situations, recoveries of environmental remediation costs from other parties are recognized when the claim for recovery is actually realized. The amounts recorded for environmental liabilities are reviewed periodically as site assessment and remediation progresses at individual sites and adjusted to reflect additional information that becomes available. Due to evolving remediation technology, changing regulations, possible third party contributions, the inherent shortcomings of the estimation process and other factors, amounts accrued could vary significantly from amounts paid.

*Note 12—Commitments and Contingencies (in part)**Contingencies—Environmental*

The Company evaluates the adequacy of its environmental liabilities on a quarterly basis in accordance with Company policy. Adjustments to the liabilities are made when additional information becomes available that affects the estimated costs to study or remediate any environmental issues or expenditures are made for which reserves were established.

Changes in the Company's environmental liabilities for the years ended August 31, 2010 and 2009 were as follows (in thousands):

| Reporting Segment         | Balance<br>9/1/2008 | Reserves<br>Released,<br>Net <sup>(1)</sup> | Payments | Ending<br>Balance<br>8/31/2009 | Reserves<br>Established<br>(Released),<br>Net <sup>(2)</sup> | Payments | Ending<br>Balance<br>8/31/2010 | Short-<br>Term | Long-<br>Term |

| Total                     | \$43,704            | \$(1,219)                                   | \$(577)  | \$41,908                       | \$(1,090)                                                    | \$(944)  | \$39,874                       | \$2,588        | \$37,286      |

<sup>(1)</sup> During fiscal 2009, the Company released \$4 million in environmental reserves, primarily related to the resolution of the Hylebos Waterway litigation, which was partially offset by \$2 million in environmental liabilities recorded in purchase accounting related to acquisitions completed in fiscal 2009 and \$1 million in new reserves.

<sup>(2)</sup> During fiscal 2010, the Company released \$2 million in environmental reserves through discontinued operations related to the full-service auto parts operation, which was partially offset by \$1 million in environmental liabilities recorded in purchase accounting.

*Metals Recycling Business*

As of August 31, 2010, MRB had environmental reserves of \$25 million for the potential remediation of locations where it has conducted business and has environmental liabilities from historical or recent activities.

*Portland Harbor*

The Company has been notified by the US Environmental Protection Agency ("EPA") under the Comprehensive Environmental Response, Compensation and Liability Act ("CERCLA") that it is one of at least 100 potentially responsible parties ("PRPs") that own or operate or formerly owned or operated sites adjacent to the Portland Harbor Superfund site (the "Site"). The precise nature and extent of any cleanup of the Site, the parties to be involved, the process to be followed for any cleanup and the allocation of the costs for any cleanup among responsible parties have not yet been determined, but the process of identifying additional PRPs and beginning allocation of costs is underway. It is unclear to what extent the Company will be liable for environmental costs or natural resource damage claims or third party contribution or damage claims with respect to the Site. While the Company participated in certain preliminary Site study efforts, it is not party to the consent order entered into by the EPA with certain other PRPs, referred to as the "Lower Willamette Group" ("LWG"), for a remedial investigation/feasibility study ("RI/FS").

During fiscal 2007, the Company and certain other parties agreed to an interim settlement with the LWG under which the Company made a cash contribution to the LWG RI/FS. The Company has also joined with more than 80 other PRPs, including the LWG, in a voluntary process to establish an allocation of costs at the Site. These parties have selected an allocation team and are finalizing an allocation process design agreement. The LWG has also commenced federal court litigation, which has been stayed, seeking to bring additional parties into the allocation process.

In January 2008, the Natural Resource Damages Trustee Council ("Trustees") for Portland Harbor invited the Company and other PRPs to participate in funding and implementing the Natural Resource Injury Assessment for the Site. Following meetings among the Trustees and the PRPs, a funding and participation agreement was negotiated under which the participating PRPs agreed to fund the first phase of natural resource damage assessment. The Company joined in that Phase I agreement and paid a portion of those costs. The Company did not participate in funding the second phase of the natural resource damage assessment.

The cost of the investigations and any remediation associated with the Site will not be reasonably estimable until completion of the data review and further investigations now being conducted by the LWG and the Trustees and the selection and approval of a remedy by the EPA. However, given the size of the Site and the nature of the conditions identified to date, the total cost of the investigations and remediation is likely to be substantial. In addition, because there has not been a determination of the total cost of the investigations, the remediation that will be required, the amount of natural resource damages or how the costs of the ongoing investigations and any remedy and natural resource damages will be allocated among the PRPs, it is not possible to estimate the costs which the Company might incur in connection with the Site, although such costs could be material to the Company's financial position or results of operations. The Company has insurance policies that we believe will provide reimbursement for costs we incur for defense and remediation in connection with the Site, although there is no assurance that those policies will cover all of the costs which we may incur. In fiscal 2006, the Company recorded a liability for its then estimated share of the costs of the investigation incurred by the LWG to date. As of August 31, 2010 and 2009, the Company's reserve for third party investigation costs of the Site was \$1 million.

The Oregon Department of Environmental Quality is separately providing oversight of voluntary investigation by the Company involving the Company's sites adjacent to the Portland Harbor which are focused on controlling any current "uplands" releases of contaminants into the Willamette River. No reserves have been established in connection with these investigations because the extent of contamination (if any) and the Company's responsibility for the contamination (if any) has not yet been determined.

#### *Other Metals Recycling Business Sites*

As of August 31, 2010, the Company had environmental reserves related to various MRB sites of \$24 million. The reserves, which range in amounts from less than \$1 million to \$2 million per site, relate to the potential future remediation of soil contamination, groundwater contamination and storm water runoff issues. No material environmental compliance enforcement proceedings are currently pending related to these sites.

#### *Auto Parts Business*

As of August 31, 2010, the Company had environmental reserves related to various APB sites of \$15 million. The reserves, which range in amounts from less than \$1 million to \$2 million per site, relate to the potential future remediation of soil contamination, groundwater contamination and storm water runoff issues. No material environmental compliance enforcement proceedings are currently pending related to these sites.

#### *Steel Manufacturing Business*

SMB's electric arc furnace generates dust ("EAF dust") that is classified as hazardous waste by the EPA because of its zinc and lead content. As a result, the Company captures the EAF dust and ships it in specialized rail cars to a domestic firm that applies a treatment that allows the EAF dust to be delisted as hazardous waste so it can be disposed of as a non-hazardous solid waste.

SMB has an operating permit issued under Title V of the Clean Air Act Amendments of 1990, which governs certain air quality standards. The permit was first issued in 1998 and has since been renewed through 2012. The permit is based on an annual production capacity of 950 thousand tons.

SMB had no environmental reserves as of August 31, 2010.

Other than Portland Harbor, which is discussed above, management currently believes that adequate provision has been made in the financial statements for the potential impact of these issues and that the outcomes will not significantly impact the financial position or the results of operations of the Company, although they may have a material impact on earnings for a particular quarter. Historically, the amounts the Company has ultimately paid for such remediation activities have not been material.

#### *NOTES TO CONSOLIDATED FINANCIAL STATEMENTS*

#### *16. Commitments and Contingent Liabilities (in part)*

PPG is involved in a number of lawsuits and claims, both actual and potential, including some that it has asserted against others, in which substantial monetary damages are sought. These lawsuits and claims, the most significant of which are described below, relate to contract, patent, environmental, product liability, antitrust and other matters arising out of the conduct of PPG's current and past business activities. To the extent that these lawsuits and claims involve personal injury and property damage, PPG believes it has adequate insurance; however, certain of PPG's insurers are contesting coverage with respect to some of these claims, and other insurers, as they had prior to the asbestos settlement described below, may contest coverage with respect to some of the asbestos claims if the settlement is not implemented. PPG's lawsuits and claims against others include claims against insurers and other third parties with respect to actual and contingent losses related to environmental, asbestos and other matters.

The results of any future litigation and the above lawsuits and claims are inherently unpredictable. However, management believes that, in the aggregate, the outcome of all lawsuits and claims involving PPG, including asbestos-related claims in the event the settlement described below does not become effective, will not have a material effect on PPG's consolidated financial position or liquidity; however, such outcome may be material to the results of operations of any particular period in which costs, if any, are recognized.

#### *Asbestos Matters*

For over 30 years, PPG has been a defendant in lawsuits involving claims alleging personal injury from exposure to asbestos. Most of PPG's potential exposure relates to allegations by plaintiffs that PPG should be liable for injuries involving asbestos-containing thermal insulation products, known as Unibestos, manufactured and distributed by Pittsburgh Corning Corporation ("PC"). PPG and Corning Incorporated are each 50% shareholders of PC. PPG has denied responsibility for, and has defended, all claims for any

injuries caused by PC products. As of the April 16, 2000 order which stayed and enjoined asbestos claims against PPG (as discussed below), PPG was one of many defendants in numerous asbestos-related lawsuits involving approximately 114,000 claims served on PPG. During the period of the stay, PPG generally has not been aware of the dispositions, if any, of these asbestos claims.

#### *Background of PC Bankruptcy Plan of Reorganization*

On April 16, 2000, PC filed for Chapter 11 Bankruptcy in the U.S. Bankruptcy Court for the Western District of Pennsylvania located in Pittsburgh, Pa. Accordingly, in the first quarter of 2000, PPG recorded an after-tax charge of \$35 million for the write-off of all of its investment in PC. As a consequence of the bankruptcy filing and various motions and orders in that proceeding, the asbestos litigation against PPG (as well as against PC) has been stayed and the filing of additional asbestos suits against them has been enjoined, until 30 days after the effective date of a confirmed plan of reorganization for PC substantially in accordance with the settlement arrangement among PPG and several other parties discussed below. The stay may be terminated if the Bankruptcy Court determines that such a plan will not be confirmed, or the settlement arrangement set forth below is not likely to be consummated.

On May 14, 2002, PPG announced that it had agreed with several other parties, including certain of its insurance carriers, the official committee representing asbestos claimants in the PC bankruptcy, and the legal representatives of future asbestos claimants appointed in the PC bankruptcy, on the terms of a settlement arrangement relating to certain asbestos claims against PPG and PC (the "2002 PPG Settlement Arrangement").

On March 28, 2003, Corning Incorporated announced that it had separately reached its own arrangement with the representatives of asbestos claimants for the settlement of certain asbestos claims against Corning and PC (the "2003 Corning Settlement Arrangement").

The terms of the 2002 PPG Settlement Arrangement and the 2003 Corning Settlement Arrangement were incorporated into a bankruptcy reorganization plan for PC along with a disclosure statement describing the plan, which PC filed with the Bankruptcy Court on April 30, 2003. Amendments to the plan and disclosure statement were subsequently filed. On November 26, 2003, after considering objections to the second amended disclosure statement and plan of reorganization, the Bankruptcy Court entered an order approving such disclosure statement and directing that it be sent to creditors, including asbestos claimants, for voting. In March 2004, the second amended PC plan of reorganization (the "second amended PC plan of reorganization") received the required votes to approve the plan with a channeling injunction for present and future asbestos claimants under §524(g) of the Bankruptcy Code. After voting results for the second amended PC plan of reorganization were received, the Bankruptcy Court judge conducted a hearing regarding the fairness of the settlement, including whether the plan would be fair with respect to present and future claimants, whether such claimants would be treated in substantially the same manner, and whether the protection provided to PPG and its participating insurers would be fair in view of the assets they would convey to the asbestos settlement trust (the "Trust") to be established as part of the second amended PC plan of reorganization. At that hearing, creditors and other parties in

interest raised objections to the second amended PC plan of reorganization. Following that hearing, the Bankruptcy Court scheduled oral arguments for the contested items.

The Bankruptcy Court heard oral arguments on the contested items on November 17-18, 2004. At the conclusion of the hearing, the Bankruptcy Court agreed to consider certain post-hearing written submissions. In a further development, on February 2, 2005, the Bankruptcy Court established a briefing schedule to address whether certain aspects of a decision of the U.S. Third Circuit Court of Appeals in an unrelated case had any applicability to the second amended PC plan of reorganization. Oral arguments on these matters were subsequently held in March 2005. During an omnibus hearing on February 28, 2006, the Bankruptcy Court judge stated that she was prepared to rule on the PC plan of reorganization in the near future, provided certain amendments were made to the plan. Those amendments were filed, as directed, on March 17, 2006. After further conferences and supplemental briefings, in December 2006, the court denied confirmation of the second amended PC plan of reorganization, on the basis that the plan was too broad in the treatment of allegedly independent asbestos claims not associated with PC.

#### *Terms of 2002 PPG Settlement Arrangement*

PPG had no obligation to pay any amounts under the 2002 PPG Settlement Arrangement until 30 days after the second amended PC plan of reorganization was finally approved by an appropriate court order that was no longer subject to appellate review (the "Effective Date"). If the second amended PC plan of reorganization had been approved as proposed, PPG and certain of its insurers (along with PC) would have made payments on the Effective Date to the Trust, which would have provided the sole source of payment for all present and future asbestos bodily injury claims against PPG, its subsidiaries or PC alleged to be caused by the manufacture, distribution or sale of asbestos products by these companies. PPG would have conveyed the following assets to the Trust: (i) the stock it owns in PC and Pittsburgh Corning Europe, (ii) 1,388,889 shares of PPG's common stock and (iii) aggregate cash payments to the Trust of approximately \$998 million, payable according to a fixed payment schedule over 21 years, beginning on June 30, 2003, or, if later, the Effective Date. PPG would have had the right, in its sole discretion, to prepay these cash payments to the Trust at any time at a discount rate of 5.5% per annum as of the prepayment date. In addition to the conveyance of these assets, PPG would have paid \$30 million in legal fees and expenses on behalf of the Trust to recover proceeds from certain historical insurance assets, including policies issued by certain insurance carriers that were not participating in the settlement, the rights to which would have been assigned to the Trust by PPG.

Under the proposed 2002 PPG Settlement Arrangement, PPG's participating historical insurance carriers would have made cash payments to the Trust of approximately \$1.7 billion between the Effective Date and 2023. These payments could also have been prepaid to the Trust at any time at a discount rate of 5.5% per annum as of the prepayment date. In addition, as referenced above, PPG would have assigned to the Trust its rights, insofar as they related to the asbestos claims to have been resolved by the Trust, to the proceeds of policies issued by certain insurance carriers that were not participating in the 2002 PPG Settlement Arrangement and from the estates of insolvent insurers and state insurance guaranty funds.

Under the proposed 2002 PPG Settlement Arrangement, PPG would have granted asbestos releases to all participating insurers, subject to a coverage-in-place agreement with certain insurers for the continuing coverage of premises claims (discussed below). PPG would have granted certain participating insurers full policy releases on primary policies and full product liability releases on excess coverage policies. PPG would have also granted certain other participating excess insurers credit against their product liability coverage limits.

If the second amended PC plan of reorganization incorporating the terms of the 2002 PPG Settlement Arrangement and the 2003 Corning Settlement Arrangement had been approved by the Bankruptcy Court, the Court would have entered a channeling injunction under §524(g) and other provisions of the Bankruptcy Code, prohibiting present and future claimants from asserting bodily injury claims after the Effective Date against PPG or its subsidiaries or PC relating to the manufacture, distribution or sale of asbestos-containing products by PC or PPG or its subsidiaries. The injunction would have also prohibited codefendants in those cases from asserting claims against PPG for contribution, indemnification or other recovery. All such claims would have been filed with the Trust and only paid from the assets of the Trust.

#### *Modified Third Amended PC Plan of Reorganization*

To address the issues raised by the Bankruptcy Court in its December 2006 ruling, the interested parties engaged in extensive negotiations regarding the terms of a third amended PC plan of reorganization, including modifications to the 2002 PPG Settlement Arrangement. A modified third amended PC plan of reorganization (the “third amended PC plan of reorganization”), including a modified PPG settlement arrangement (the “2009 PPG Settlement Arrangement”), was filed with the Bankruptcy Court on January 29, 2009. The parties also filed a disclosure statement describing the third amended PC plan of reorganization with the court. The third amended PC plan of reorganization also includes a modified settlement arrangement of Corning Incorporated.

Several creditors and other interested parties filed objections to the disclosure statement. Those objections were overruled by the Bankruptcy Court by order dated July 6, 2009 approving the disclosure statement. The third amended PC plan of reorganization and disclosure statement were then sent to creditors, including asbestos claimants, for voting. The report of the voting agent, filed on February 18, 2010, reveals that all voting classes, including asbestos claimants, voted overwhelmingly in favor of the third amended PC plan of reorganization, which included the 2009 PPG Settlement Arrangement. In light of the favorable vote on the third amended PC plan of reorganization, the Bankruptcy Court conducted a hearing regarding the fairness of the proposed plan, including whether (i) the plan would be fair with respect to present and future claimants, (ii) such claimants would be treated in substantially the same manner, and (iii) the protection provided to PPG and its participating insurers would be fair in view of the assets they would convey to the Trust to be established as part of the third amended PC plan of reorganization. The hearing was held in June of 2010. The remaining objecting parties (a number of objections were resolved through plan amendments and stipulations filed before the hearing) appeared at the hearing and presented their cases. At the conclusion of the hearing, the Bankruptcy Court established a briefing schedule for its consideration of con-

firmation of the plan and the objections to confirmation. That briefing was completed and final oral arguments held in October 2010. Following those arguments, the Bankruptcy Court, after considering the objections to the third amended PC plan of reorganization, will enter a confirmation order if all requirements to confirm a plan of reorganization under the Bankruptcy Code have been satisfied. Such an order could be appealed to the U.S. District Court for the Western District of Pennsylvania. Assuming that the District Court approves a confirmation order, interested parties could appeal the order to the U.S. Third Circuit Court of Appeals and subsequently could seek review by the U.S. Supreme Court.

The 2009 PPG Settlement Arrangement will not become effective until the third amended PC plan of reorganization is finally approved by an appropriate court order that is no longer subject to appellate review, and PPG’s initial contributions will not be due until 30 business days thereafter (the “Funding Effective Date”).

#### *Asbestos Claims Subject to Bankruptcy Court’s Channeling Injunction*

If the third amended PC plan of reorganization is approved by the Bankruptcy Court and becomes effective, a channeling injunction will be entered under §524(g) of the Bankruptcy Code prohibiting present and future claimants from asserting asbestos claims against PC. With regard to PPG, the channeling injunction by its terms will prohibit present and future claimants from asserting claims against PPG that arise, in whole or in part, out of exposure to Unibestos, or any other asbestos or asbestos-containing products manufactured, sold and/or distributed by PC, or asbestos on or emanating from any PC premises. The injunction by its terms will also prohibit codefendants in these cases that are subject to the channeling injunction from asserting claims against PPG for contribution, indemnification or other recovery. Such injunction will also preclude the prosecution of claims against PPG arising from alleged exposure to asbestos or asbestos-containing products to the extent that a claimant is alleging or seeking to impose liability, directly or indirectly, for the conduct of, claims against or demands on PC by reason of PPG’s: (i) ownership of a financial interest in PC; (ii) involvement in the management of PC, or service as an officer, director or employee of PC or a related party; (iii) provision of insurance to PC or a related party; or (iv) involvement in a financial transaction affecting the financial condition of PC or a related party. The foregoing PC related claims are referred to as “PC Relationship Claims” and constitute, in PPG management’s opinion, the vast majority of the pending asbestos personal injury claims against PPG. All claims channeled to the Trust will be paid only from the assets of the Trust.

#### *Asbestos Claims Retained by PPG*

The channeling injunction provided for under the third amended PC plan of reorganization will not extend to any claim against PPG that arises out of exposure to any asbestos or asbestos-containing products manufactured, sold and/or distributed by PPG or its subsidiaries that is not a PC Relationship Claim, and in this respect differs from the channeling injunction contemplated by the second amended PC plan of reorganization filed in 2003. While management believes that the vast majority of the approximately 114,000 claims against PPG alleging personal injury from exposure to asbestos relate to products manufactured, distributed or

sold by PC, the potential liability for any non-PC Relationship Claims will be retained by PPG. Because a determination of whether an asbestos claim is a non-PC Relationship Claim would typically not be known until shortly before trial and because the filing and prosecution of asbestos claims (other than certain premises claims) against PPG has been enjoined since April 2000, the actual number of non-PC Relationship Claims that may be pending at the expiration of the stay or the number of additional claims that may be filed against PPG in the future cannot be determined at this time. PPG does not expect the Bankruptcy Court to lift the stay until after confirmation or rejection of the third amended PC plan of reorganization. PPG intends to defend against all such claims vigorously and their ultimate resolution in the court system is expected to occur over a period of years.

In addition, similar to what was contemplated by the second amended PC plan of reorganization, the channeling injunction will not extend to claims against PPG alleging personal injury caused by asbestos on premises owned, leased or occupied by PPG (so called "premises claims"), which generally have been subject to the stay imposed by the Bankruptcy Court. Historically, a small proportion of the claims against PPG and its subsidiaries have been premises claims, and based upon review and analysis, PPG believes that the number of premises claims currently comprises less than 2% of the total asbestos related claims against PPG. Beginning in late 2006, the Bankruptcy Court lifted the stay with respect to certain premises claims against PPG. As a result, PPG and its primary insurers have settled approximately 500 premises claims. PPG's insurers agreed to provide insurance coverage for a major portion of the payments made in connection with the settled claims, and PPG accrued the portion of the settlement amounts not covered by insurance. PPG, in conjunction with its primary insurers as appropriate, evaluates the factual, medical, and other relevant information pertaining to additional claims as they are being considered for potential settlement. The number of such claims under consideration for potential settlement, currently approximately 300, varies from time to time. Premises claims remain subject to the stay, as outlined above, although certain claimants have requested the Court to lift the stay with respect to these claims and the stay has been lifted as to some claims. PPG believes that any financial exposure resulting from such premises claims, taking into account available insurance coverage, will not have a material adverse effect on PPG's consolidated financial position, liquidity or results of operations.

#### *PPG's Funding Obligations*

PPG has no obligation to pay any amounts under the third amended PC plan of reorganization until the Funding Effective Date. If the third amended PC plan of reorganization is approved, PPG and certain of its insurers will make the following contributions to the Trust. On the Funding Effective Date, PPG will relinquish any claim to its equity interest in PC, convey the stock it owns in Pittsburgh Corning Europe and transfer 1,388,889 shares of PPG's common stock or cash equal to the fair value of such shares as defined in the 2009 PPG Settlement Arrangement. PPG will make aggregate cash payments to the Trust of approximately \$825 million, payable according to a fixed payment schedule over a period ending in 2023. The first payment is due on the Funding Effective Date. PPG would have the right, in its sole discretion, to prepay these cash payments to the Trust at

any time at a discount rate of 5.5% per annum as of the prepayment date. PPG's historical insurance carriers participating in the third amended PC plan of reorganization will also make cash payments to the Trust of approximately \$1.7 billion between the Funding Effective Date and 2027. These payments could also be prepaid to the Trust at any time at a discount rate of 5.5% per annum as of the prepayment date. PPG will grant asbestos releases and indemnifications to all participating insurers, subject to amended coverage-in-place arrangements with certain insurers for remaining coverage of premises claims. PPG will grant certain participating insurers full policy releases on primary policies and full product liability releases on excess coverage policies. PPG will also grant certain other participating excess insurers credit against their product liability coverage limits.

PPG's obligation under the 2009 PPG Settlement Arrangement at December 31, 2008 was \$162 million less than the amount that would have been due under the 2002 PPG Settlement Arrangement. This reduction is attributable to a number of negotiated provisions in the 2009 PPG Settlement Arrangement, including the provisions relating to the channeling injunction under which PPG retains liability for any non-PC Relationship Claims. PPG will retain such amount as a reserve for asbestos-related claims that will not be channeled to the Trust, as this amount represents PPG's best estimate of its liability for these claims. PPG does not have sufficient current claim information or settlement history on which to base a better estimate of this liability, in light of the fact that the Bankruptcy Court's stay has been in effect since 2000. As a result, PPG's reserve at December 31, 2010 and 2009 for asbestos-related claims that will not be channeled to the Trust is \$162 million. In addition, under the 2009 PPG Settlement Arrangement, PPG will retain for its own account rights to recover proceeds from certain historical insurance assets, including policies issued by non-participating insurers. Rights to recover these proceeds would have been assigned to the Trust by PPG under the 2002 PPG Settlement Arrangement.

Following the effective date of the third amended PC plan of reorganization and the lifting of the Bankruptcy Court stay, PPG will monitor the activity associated with asbestos claims which are not channeled to the Trust pursuant to the third amended PC plan of reorganization, and evaluate its estimated liability for such claims and related insurance assets then available to the Company as well as underlying assumptions on a periodic basis to determine whether any adjustment to its reserve for these claims is required.

Of the total obligation of \$821 million and \$772 million under the 2009 PPG Settlement Arrangement at December 31, 2010 and 2009, respectively, \$578 million and \$534 million are reported as a current liabilities and the present value of the payments due in the years 2012 to 2023 totaling \$243 and 2011 to 2023 totaling \$238 million are reported as a non-current liability in the accompanying consolidated balance sheet as of December 31, 2010 and 2009. The future accretion of the non-current portion of the liability will total \$136 million at December 31, 2010, and be reported as expense in the consolidated statement of income over the period through 2023, as follows (in millions):

|           |       |
|-----------|-------|
| 2011      | \$ 14 |
| 2012      | 14    |
| 2013-2023 | 108   |
| Total     | \$136 |

The following table summarizes the impact on PPG's financial statements for the three years ended December 31, 2010 resulting from the 2009 PPG Settlement Arrangement including the change in fair value of the stock to be transferred to the Trust and the equity forward instrument (see Note 12, "Derivative Financial Instruments and Hedge Activities") and the increase in the net present value of the future payments to be made to the Trust.

| (Millions)                                                         | Consolidated Balance Sheet    |           |                                     |                  |

<sup>(1)</sup> Amounts have been reclassified to Other liabilities and retained as a reserve for asbestos-related claims that will not be channeled to the Trust. The balance in this reserve at December 31, 2010 remains \$162 million.

The fair value of the equity forward instrument is included as an Other current asset as of December 31, 2010 and 2009 in the accompanying consolidated balance sheet. Payments under the fixed payment schedule require annual payments that are due each June. The current portion of the asbestos settlement liability included in the accompanying consolidated balance sheet as of December 31, 2010, consists of all

such payments required through June 2011, the fair value of PPG's common stock and the value of PPG's investment in Pittsburgh Corning Europe. The amount due June 30, 2012 of \$16 million and the net present value of the remaining payments is included in the long-term asbestos settlement liability in the accompanying consolidated balance sheet as of December 31, 2010.

##### NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

#### 12. Warrants

##### Warrants

The detached warrants with dual optionality issued in connection with previously paid credit facilities qualified as derivatives under ASC 815, *Derivatives and Hedging*. The

fair values of the warrants have been recorded on the balance sheet within current liabilities. As of January 30, 2010, the Company had outstanding 3,683,959 and as of January 31, 2009, the Company had outstanding 12,017,292 warrants. On June 10, 2009, the 8,333,333 outstanding Conversion Warrants expired and Retail Ventures repaid in full the \$250,000 remaining balance along with the related accrued interest on the Senior Non-Convertible Loan, as amended and restated on August 16, 2006, made by Schottenstein Stores Corporation in favor of Value City, which loan was assumed by RVI in connection with the disposition of its 81% ownership interest in the Value City operations on January 23, 2008. The warrants outstanding as of January 30, 2010 expire on June 11, 2012.

During fiscal 2007, Retail Ventures issued 1,333,333 of its Common Shares at an exercise price of \$4.50 per share to Cerberus in connection with Cerberus' exercise of its remaining Conversion Warrants. In connection with this exercise, Retail Ventures received \$6.0 million and reclassified \$19.6 million from the warrant liability to paid in capital during fiscal 2007.

For fiscal 2009, the Company recorded a non-cash charge of \$16.8 million for the change in fair value of warrants, of which the portion held by related parties was a non-cash charge of \$6.9 million. For fiscal 2008 and fiscal 2007, the Company recorded a non-cash reduction of expense of \$35.9 million and \$154.6 million, respectively, for the change in fair value of warrants, of which the portion held by related parties was a non-cash reduction of expenses of \$30.0 million and \$151.9 million, respectively. No tax benefit has been recognized in connection with this charge. These derivative instruments do not qualify for hedge accounting under ASC 815, *Derivatives and Hedging*, therefore, changes in the fair values are recognized in earnings in the period of change.

Retail Ventures estimates the fair values of derivatives based on the Black-Scholes Pricing Model using current market rates and records all derivatives on the balance sheet at fair value. The fair market value of the warrants was \$23.1 million and \$6.3 million at January 30, 2010 and January 31, 2009 and, respectively. The values ascribed to warrants were estimated using the Black-Scholes Pricing Model with the following assumptions.

|                                      | Term Warrants    |                  | Conversion Warrants |
|--------------------------------------|------------------|------------------|---------------------|
|                                      | January 30, 2010 | January 31, 2009 | January 31, 2009    |
| Assumptions:                         |                  |                  |                     |

| Expected volatility of common shares | 123.0%           | 95.9%            | 114.3%              |
| Expected option term                 | 2.4 years        | 3.4 years        | 0.4 years           |
| Expected dividend yield              | 0.0%             | 0.0%             | 0.0%                |

*VCHI Acquisition Co. Warrants*

On January 23, 2008, Retail Ventures disposed of an 81% ownership interest in its Value City Department Stores business to VCHI Acquisition Co., a newly formed entity owned by VCDs Acquisition Holdings, LLC, Emerald Capital Management LLC and Crystal Value, LLC. As part of the transaction, Retail Ventures issued VCHI Warrants to VCHI Acquisition Co. to purchase 150,000 RVI Common Shares, at an exercise price of \$10.00 per share, and exercisable within 18 months of January 23, 2008. The VCHI Warrants expired in the quarter ended August 1, 2009.

An update to ASC 815-40, *Derivatives and Hedging, Contracts in Entity's Own Equity*, resulted in the redesignation and reclassification of the VCHI Warrants from Equity to Liabilities within the balance sheets during the quarter ended May 2, 2009. In addition, the VCHI Warrants were marked to market and continued to be marked to market through their expiration date. A charge of \$0.1 million was recorded in other comprehensive income as of February 1, 2009, which represented the change in fair value of the VCHI Warrants from the date of issuance to the date of adoption of ASC 815-40. During fiscal 2009, the Company recorded an immaterial non-cash charge related to the change in fair value of the VCHI warrants.

**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS***1. Summary of Significant Accounting Policies (in part)**Revenue Recognition (in part)**Pricing and Sales Incentives*

We record estimated reductions to revenue for customer programs and incentive offerings including pricing arrangements, promotions and other volume-based incentives at the later of the date revenue is recognized or the incentive is offered. Sales incentives given to our customers are recorded as a reduction of revenue unless we (1) receive an identifiable benefit for the goods or services in exchange for the consideration and (2) we can reasonably estimate the fair value of the benefit received. The following represents a description of our pricing arrangements, promotions and other volume-based incentives:

*Pricing Arrangements*

Pricing is established up front with our customers and we record sales at the agreed-upon net selling price. However, one of our businesses allows customers to apply for a refund of a percentage of the original purchase price if they can demonstrate sales to a qualifying OEM customer. At the time of sale, we estimate the anticipated refund to be paid based on historical experience and reduce sales for the probable cost of the discount. The cost of these refunds is recorded as a reduction in gross sales.

*Promotions*

Our primary promotional activity is what we refer to as cooperative advertising. Under our cooperative advertising programs, we agree to pay the customer a fixed percentage of sales as an allowance that may be used to advertise and promote our products. The customer is generally not required to provide evidence of the advertisement or promotion. We recognize the cost of this cooperative advertising at the time of sale. The cost of this program is recorded as a reduction in gross sales.

*Volume-Based Incentives*

These incentives involve rebates that are negotiated up front with the customer and are redeemable only if the customer achieves a specified cumulative level of sales or sales increase. Under these incentive programs, at the time of sale, we reforecast the anticipated rebate to be paid based on forecasted sales levels. These forecasts are updated at least quarterly for each customer and sales are reduced for the anticipated cost of the rebate. If the forecasted sales for a customer changes, the accrual for rebates is adjusted to reflect the new amount of rebates expected to be earned by the customer.

##### *NOTES TO CONSOLIDATED FINANCIAL STATEMENTS*

##### *Note 1. Description of Business and Summary of Significant Accounting Policies (in part)*

##### *Asset Retirement Obligations*

Asset retirement obligations ("ARO") are legal obligations associated with the retirement of long-lived assets. These liabilities are initially recorded at fair value and the related asset retirement costs are capitalized by increasing the carrying amount of the related assets by the same amount as the liability. Asset retirement costs are subsequently depreciated over the useful lives of the related assets. Subsequent to initial recognition, the Company records period-to-period changes in the ARO liability resulting from the passage of time and revisions to either the timing or the amount of the original estimate of undiscounted cash flows. The Company derecognizes ARO liabilities when the related obligations are settled. At July 3, 2010 and June 27, 2009, \$0.5 million and \$7.3 million of ARO was included in the Consolidated Balance Sheets in "Other current liabilities" and the remainder of \$7.4 million and \$6.6 million was included in "Other non-current liabilities."

## LONG-TERM DEBT

### PRESENTATION

**2.156** FASB ASC 470 addresses classification determination for specific debt obligations. FASB ASC 470-10-45-11 states that the current liability classification is intended to include long-term obligations that are or will be callable by the creditor either because the debtors' violation of a provision of the debt agreement at the balance sheet date makes the obligation callable, or the violation, if not cured within a specified grace period, will make the obligation callable. Accordingly, such callable obligations should be classified as current liabilities, unless one of the following conditions is met:

- The creditor has waived or subsequently lost the right to demand payment for more than one year, or operating cycle if longer, from the balance sheet date. For example, the debtor may have cured the violation after the balance sheet date, and the obligation is not callable at the time the financial statements are issued or available to be issued.
- For long-term obligations containing a grace period within which the debtor may cure the violation, it is probable that the violation will be cured within that period, thus preventing the obligation from becoming callable.

### DISCLOSURE

**2.157** FASB ASC 470 requires, for each of the five years following the date of the latest balance sheet presented, disclosure of the combined aggregate amount of maturities and sinking fund requirements for all long-term borrowings. In addition, FASB ASC 440, *Commitments*, requires disclosure of terms and conditions provided in loan agreements, such as assets pledged as collateral and covenants to limit additional debt, maintain working capital, and restrict dividends. Regulation S-X has similar or expanded requirements for matters such as debt details, assets subject to lien, defaults, dividend restrictions, and changes in long-term debt.

**2.158** FASB ASC 825 requires disclosure of both the fair value and bases for estimating the fair value of long-term debt, unless it is not practicable to estimate the value.

### 2.159

**TABLE 2-13: LONG-TERM DEBT\***

Table 2-13 summarizes the types of long-term debt most frequently disclosed by the survey companies.

### Debt Obligations

**Senior and Subordinated Notes.** On December 15, 2010, the Company closed on the sale of \$500.0 million of 7 7/8% Senior Notes due 2018 (the "2018 Notes"). The 2018 Notes are unsecured obligations of the Company and are guaranteed by one of the Company's subsidiaries. Interest is payable on December 15 and June 15 of each year, commencing on June 15, 2011. The proceeds from the sale of the notes, after initial purchasers' discounts and expenses, were used to (i) repay all indebtedness outstanding under the Term A loan commitments of our Exit Credit Facility and (ii) repay a portion of the indebtedness outstanding under the Term B-1 loans commitments of our Exit Credit Facility. The indenture governing the 2018 Notes contains various covenants that may adversely affect our ability, among other things, to incur additional indebtedness, incur liens, pay dividends or make certain restricted payments, consummate certain asset sales, enter into certain transactions with JBS USA and our other affiliates, merge, consolidate and/or sell or dispose of all or substantially all of our assets. Additionally, we have \$3.6 million of 7 5/8% senior unsecured notes and 8 3/8% senior subordinated unsecured notes outstanding in the aggregate.

**Exit Credit Facility.** Upon exiting from bankruptcy, the Company and certain of its subsidiaries, consisting of To-Ricos, Ltd. and To-Ricos Distribution, Ltd. (collectively, the "To-Ricos Borrowers"), entered into the Exit Credit Facility, which provides for an aggregate commitment of \$1.75 billion consisting of (i) a revolving loan commitment of \$600.0 million, (ii) a Term A loans commitment of \$375.0 million and (iii) a Term B loans commitment of \$775.0 million. The Exit Credit Facility also includes an accordion feature that allows us at any time to increase the aggregate revolving loan commitment by up to an additional \$250 million and to increase the aggregate Term B loans commitment by up to an additional \$400 million, in each case subject to the satisfaction of certain conditions, including an aggregate cap on all commitments under the Exit Credit Facility of \$1.85 billion. The proceeds received from the Exit Credit Facility and sale of common stock to JBS USA were used to repay prepetition notes and bank debt as well as fund distributions to holders of other allowed claims. On January 13, 2011, we increased the amount of the revolving loan commitments under the Exit Credit Facility to \$700.0 million. The Term A loan was repaid on December 15, 2010 with proceeds from the 2018 Notes. The revolving loan commitment and the Term B loans will mature on December 28, 2014.

On December 26, 2010, a principal amount of \$632.5 million under the Term B loans commitment and \$205.3 million under the revolving loan commitment were outstanding. On December 28, 2009, the Company also paid loan costs totaling \$50.0 million related to the Exit Credit Facility that it recognized as an asset on its balance sheet. The Company amortizes these capitalized costs to expense over the life of the Exit Credit Facility.

Subsequent to the end of each fiscal year, a portion of our cash flow must be used to repay outstanding principal amounts under the Term B loans. With respect to 2010, the Company must pay approximately \$46.3 million of its cash

flow toward the outstanding principal under the Term B loans. After giving effect to this prepayment and other prepayments of the Term B Loans, the Term B Loans must be repaid in 16 quarterly installments of approximately \$3.9 million beginning on April 15, 2011, with the final installment due on December 28, 2014. The Exit Credit Facility also requires us to use the proceeds we receive from certain asset sales and specified debt or equity issuances and upon the occurrence of other events to repay outstanding borrowings under the Exit Credit Facility.

The Exit Credit Facility includes a \$50.0 million sub-limit for swingline loans and a \$200.0 million sub-limit for letters of credit. Outstanding borrowings under the revolving loan commitment bear interest at a per annum rate equal to 3.00% plus the greater of (i) the US prime rate as published by the *Wall Street Journal*, (ii) the average federal funds rate plus 0.5%, and (iii) the one-month LIBOR rate plus 1.0%, in the case of alternate base rate loans, or 4.00% plus the one, two, three or six month LIBOR rate adjusted by the applicable statutory reserve, in the case of Eurodollar loans. Outstanding Term B-1 loans bear interest at a per annum rate equal to 3.50% plus greater of (i) the US prime rate, as published by the *Wall Street Journal*, (ii) the average federal funds rate plus 0.5%, and (iii) the one month LIBOR rate plus 1.0%, in the case of alternate base rate loans, or 4.50%, plus the one, two, three or six month LIBOR Rate adjusted by the applicable statutory reserve, in the case of Eurodollar loans. Outstanding Term B-2 loans bear interest at a per annum rate equal to 9.00%. Commitment fees charged on the revolving commitments under the Exit Credit Facility accrue at a per annum rate equal to 0.50%.

Actual borrowings by the Company under the revolving credit commitment part of the Exit Credit Facility are subject to a borrowing base, which is a formula based on certain eligible inventory, eligible receivables and restricted cash under the control of CoBank ACB, as administrative agent under the Exit Credit Facility. The borrowing base formula is reduced by the sum of (i) inventory reserves, (ii) rent and collateral access reserves, and (iii) any amount more than 15 days past due that is owed by the Company or its subsidiaries to any person on account of the purchase price of agricultural products or services (including poultry and livestock) if that person is entitled to any grower's or producer's lien or other security arrangement. Revolving loan availability under the borrowing base is also limited to an aggregate of \$25.0 million with respect to the To-Ricos Borrowers. As of December 26, 2010, the applicable borrowing base was \$600.0 million, the amount available for borrowing under the revolving loan commitment was \$354.2 million and outstanding borrowings and letters of credit under the revolving loan commitment totaled \$245.8 million.

The Exit Credit Facility provides that the Company may not incur capital expenditures in excess of \$275.0 million in 2011 and \$350.0 million per fiscal year thereafter. The Company must also maintain a minimum fixed charge coverage ratio and a minimum level of tangible net worth and may not

exceed a maximum senior secured leverage ratio. The Company must maintain compliance with these covenants at the following levels:

|                                                        |                                                                                                                                                                                                          |
|--------------------------------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Minimum fixed charge coverage ratio <sup>(a)</sup>     | At least 1.05 to 1.00 on or before December 31, 2012 and at least 1.10 to 1.00 after January 1, 2013.                                                                                                    |
| Maximum senior secured leverage ratio <sup>(b)</sup>   | No greater than (i) 4.00 to 1.00 on or before December 31, 2012, (ii) 3.75 to 1.00 for the period from January 1, 2013 to December 31, 2013 and (iii) 3.50 to 1.00 for any period after January 1, 2014. |
| Minimum consolidated tangible net worth <sup>(c)</sup> | At least \$656.1 million plus 50.0% of the cumulative net income (excluding any losses) of the Company and its subsidiaries from the Effective Date through the date of calculation.                     |

<sup>(a)</sup> Fixed charge coverage ratio means the ratio of (i) EBITDA, as adjusted, minus the unfinanced portion of capital expenditures, minus taxes paid in cash, in each case for the period of eight consecutive fiscal quarters ending as of such date; to (ii) Fixed Charges as of such date, all calculated for the Company on a consolidated basis. EBITDA, as adjusted, means (i) net income (loss) for such period plus interest, taxes, depreciation and amortization, plus (ii) cash (if taken in connection with or during the bankruptcy of the Company) and non-cash tangible and intangible asset impairment charges, lease termination costs, severance costs, facility shutdown costs, and other related restructuring charges for such period related to a permanent reduction in capacity, plant or facility closures/cut-backs or a significant reconfiguration of a plant or facility and extraordinary, unusual or non-recurring non-cash charges or losses (other than for write-down or write-off of inventory); minus (iii) any extraordinary, unusual or nonrecurring income or gains; provided however, that aggregate principal amount of Plan Sponsor Subordinated Indebtedness included in the calculating EBITDA shall not exceed \$100.0 million. Plan Sponsor Subordinated Indebtedness means additional unsecured Indebtedness owed to JBS USA Holdings, Inc., a Delaware corporation, or any wholly-owned subsidiary thereof that is (i) organized under the laws of the United States, any state thereof or the District of Columbia, and (ii) has been formed for the purpose of acquiring a majority of the equity interests of the Company, or merging or consolidating with the Company for the purpose of acquiring a majority of the equity interests of the Company. Fixed Charges means all amounts that are required to be paid by the Company during an eight fiscal quarter period for scheduled principal payments on indebtedness and capital lease obligations; plus all amounts that were paid in cash by the Company during the preceding eight fiscal quarter period in respect of interest, dividends, contributions to certain employee pension benefit plans and non-cancellable operating lease payments not included in the calculation of EBITDA.

<sup>(b)</sup> Senior secured leverage ratio means the ratio of Senior Secured Indebtedness on such date to EBITDA, as adjusted, during the preceding four consecutive fiscal quarters. Senior Secured Indebtedness means, at any date, the aggregate principal amount of all Indebtedness (other than unsecured Indebtedness) of the Company at such date, determined on a consolidated basis, to the extent required to be reflected in the "Liabilities" section of the Consolidated Balance Sheet of the Company. Indebtedness means the aggregate principal amount of all (i) borrowed money and capital lease obligations, (ii) deposits or advances owed by the Company, (iii) obligations evidenced by bonds, debentures, notes or similar instruments, (iv) obligations under conditional sale or other title retention agreements, (v) obligations related to the deferred purchase price of property or services, (vi) all indebtedness of others secured by liens on property of the Company, (vii) guarantor obligations, (viii) obligations in respect to letters of credit, letters of guaranty, bankers' acceptances and liquidated earn-outs and (ix) any other off-balance sheet liability, each to the extent required to be reflected in the Liabilities section of our Consolidated Balance Sheets.

<sup>(c)</sup> Consolidated tangible net worth means shareholders' equity minus intangible assets.

The Company is currently in compliance with these covenants. However, chicken prices, commodity prices, access to export markets and other factors could affect the Company's ability to maintain compliance with its financial covenants.

Under the Exit Credit Facility, JBS USA, the Company's majority stockholder, or its affiliates may make loans to the Company on a subordinated basis on terms reasonably satisfactory to the agents under the Exit Credit Facility and up to \$100 million of such subordinated indebtedness may be included in the calculation of EBITDA (as defined in the Exit Credit Facility).

The Exit Credit Facility contains various covenants that may adversely affect our ability to, among other things, incur additional indebtedness, incur liens, pay dividends or make certain restricted payments, consummate certain assets sales, enter into certain transactions with JBS USA and our other affiliates, merge, consolidate and/or sell or dispose of all or substantially all of our assets.

All obligations under the Exit Credit Facility are unconditionally guaranteed by certain of the Company's subsidiaries and are secured by a first priority lien on (i) the domestic (including Puerto Rico) accounts and inventory of the Company and its subsidiaries, (ii) 100% of the equity interests in the To-Ricos Borrowers and the Company's domestic subsidiaries and 65% of the equity interests in the Company's direct foreign subsidiaries, (iii) substantially all of the personal property and intangibles of the Company, the To-Ricos Borrowers and the guarantor subsidiaries, and (iv) substantially all of the real

estate and fixed assets of the Company and the subsidiary guarantors.

**ING Credit Agreement.** On September 25, 2006, a subsidiary of the Company, Avicola Pilgrim's Pride de México, S. de R.L. de C.V. (the "Mexico Borrower"), entered into a secured revolving credit agreement (the "ING Credit Agreement") with ING Capital, LLC, as agent (the "Mexico Agent") and the lenders party thereto (the "Mexico Lenders"). The ING Credit Agreement has a final maturity date of September 25, 2011 and a revolving commitment of 557.4 million Mexican pesos, a US dollar-equivalent \$45.1 million at December 26, 2010. There were no outstanding borrowings under the ING Credit Agreement at December 26, 2010. Outstanding amounts under the ING Credit Agreement bear interest at a rate per annum equal to: the LIBOR Rate, the Base Rate, or the Interbank Equilibrium Interest Rate (the "TIIE Rate"), as applicable, plus the Applicable Margin (as those terms are defined in the ING Credit Agreement). While the Company was operating in Chapter 11, the Applicable Margin for LIBOR loans, Base Rate loans, and TIIE loans was 6.0%, 4.0%, and 5.8%, respectively. Following the Effective Date, the Applicable Margin for LIBOR loans and Base Rate loans is 0.375% higher than the highest applicable interest rate margin under the Exit Credit Facility and for TIIE loans is 0.20% less than the Applicable Margin for LIBOR loans.

The ING Credit Agreement requires the Company to make a mandatory prepayment of the revolving loans, in an aggregate amount equal to 100.0% of the net cash proceeds received by any Mexican subsidiary of the Company (a "Mexico

Subsidiary”), as applicable, in excess of thresholds specified in the ING Credit Agreement (i) from the occurrence of certain asset sales by the Mexico Subsidiaries; (ii) from the occurrence of any casualty or other insured damage to, or any taking under power of eminent domain or by condemnation or similar proceedings of, any property or asset of any Mexico Subsidiary; or (iii) from the incurrence of certain indebtedness by a Mexico Subsidiary. Any such mandatory prepayments will permanently reduce the amount of the commitment under the ING Credit Agreement. The Mexico Subsidiaries have pledged substantially all of their receivables, inventory, and equipment and certain fixed assets. The Mexico Subsidiaries were excluded from the US bankruptcy proceedings.

#### *Other Disclosures*

Most of our domestic inventories and domestic fixed assets are pledged as collateral on our long-term debt and credit facilities.

Annual maturities of long-term debt for the five years subsequent to December 26, 2010 are as follows:

| (In thousands)                                                      | Debt Maturities |
|---------------------------------------------------------------------|-----------------|

As of November 30, 2010, the Company's annual fiscal year debt contractual principal maturities are summarized as follows (in millions):

|                     |         |
|---------------------|---------|
| 2011 <sup>(1)</sup> | \$ 69.9 |
| 2012                | 0.7     |
| 2013                | 125.3   |
| 2014                | 200.2   |
| 2015                | 0.2     |
| Thereafter          | 0.4     |
| Total debt          | \$396.7 |

<sup>(1)</sup> Includes the \$68.6 million of principal 2 ¼% Debentures due November 2024 that can be put to us in November 2011 at a price equal to 100% of the principal amount plus accrued and unpaid interest, including liquidated damages, if any, payable in cash, to but not including the repurchase date, plus, in certain circumstances, a make-whole premium, payable in common stock.

#### a. Senior Debt

| (In millions)                                                                                                                                                                  | As of November 30 |        |
|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-------------------|--------|
|                                                                                                                                                                                | 2010              | 2009   |
| Term loan, bearing interest at various rates (rate of 3.55% as of November 30, 2010), payable in quarterly installments of \$0.1 million plus interest, maturing in April 2013 | \$51.1            | \$68.3 |

#### Senior Credit Facility

The Company's Senior Credit Facility provides for a \$65.0 million revolving credit facility ("Revolver") and a \$175.0 million credit-linked facility, consisting of a \$100.0 million letter of credit subfacility and a \$75.0 million term loan subfacility. On March 17, 2010, the Company executed an amendment (the "Second Amendment") to the Company's existing Amended and Restated Credit Agreement, originally entered into as of June 21, 2007, by and among the Company, as borrower, the subsidiaries of the Company from time to time

party thereto, as guarantors, the lenders from time to time party thereto and Wachovia Bank, National Association, as administrative agent for the lenders, as amended to date (the "Credit Agreement"). The Second Amendment, among other things, (i) permits the Company to repurchase its outstanding convertible subordinated notes and senior subordinated notes, subject to certain conditions; (ii) permits the Company to incur additional senior unsecured or subordinated indebtedness, subject to specified limits and other conditions; (iii) permits the Company to conduct a rescission offer, using stock and/or cash up to \$15.0 million, with respect to certain units issued under the GenCorp Savings Plan; (iv) permits the Company to repurchase its stock, subject to certain conditions; (v) limits the circumstances under which the Company would have to mandatorily prepay loans under the Senior Credit Facility with the proceeds from equity issuances; and (vi) amends the definitions of the leverage ratio and net cash proceeds from permitted real estate sales. The Second Amendment reduced the Revolver capacity from \$80.0 million to \$65.0 million and the letter of credit subfacility capacity from \$125.0 million to \$100.0 million. Under the Second Amendment, the interest rate on LIBOR rate borrowings is LIBOR plus 325 basis points, an increase of 100 basis points, and the letter of credit subfacility commitment fee has been similarly amended. The Second Amendment also provides for a commitment fee on the unused portion of the Revolver in the amount of 62.5 basis points, an increase of 12.5 basis points.

As of November 30, 2010, the borrowing limit under the Revolver was \$65.0 million, of which \$50.0 million can be utilized for letters of credit, with all of it available. Also, as of November 30, 2010, the Company had \$69.4 million outstanding letters of credit under the \$100.0 million letter of credit subfacility and had permanently reduced the amount of its term loan subfacility to the \$51.1 million outstanding.

During the first quarter of fiscal 2010, the Company made a required principal payment of \$16.6 million on the term loan subfacility due to the excess cash flow prepayment provisions of the Credit Agreement.

The Senior Credit Facility is collateralized by a substantial portion of the Company's real property holdings and substantially all of the Company's other assets, including the stock and assets of its material domestic subsidiaries that are guarantors of the facility. The Company is subject to certain limitations including the ability to: incur additional senior debt, release collateral, retain proceeds from asset sales and issuances of debt or equity, make certain investments and acquisitions, grant additional liens, and make restricted payments, including stock repurchases and dividends. In addition, the Credit Agreement contains certain restrictions surrounding the ability of the Company to refinance its subordinated debt, including provisions that, except on terms no less favorable to the Credit Agreement, the Company's subordinated debt cannot be refinanced prior to maturity. Furthermore, provided that the Company has cash and cash equivalents of at least \$25.0 million after giving effect thereto, the Company may redeem (with funds other than Senior Credit Facility proceeds) the subordinated notes to the extent required by the mandatory redemption provisions of the subordinated note indenture. The Company is also subject to the following financial covenants:

| Financial Covenant                                                         | Actual Ratios as of<br>November 30, 2010 | Required Ratios<br>December 1,<br>2009 and<br>thereafter |
|----------------------------------------------------------------------------|------------------------------------------|----------------------------------------------------------|
| Interest coverage ratio,<br>as defined under the<br>Credit Agreement       | 4.56 to 1.00                             | Not less than:<br>2.25 to 1.00                           |
| Leverage ratio, as<br>defined under the<br>Credit Agreement <sup>(1)</sup> | 1.67 to 1.00                             | Not greater than:<br>5.50 to 1.00                        |

<sup>(1)</sup> As a result of the March 17, 2010 amendment, the leverage ratio calculation was amended to allow for all cash and cash equivalents to reduce funded debt in the calculation as long as there are no loans outstanding under the Revolver.

The Company was in compliance with its financial and non-financial covenants as of November 30, 2010.

#### NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

(In thousands)

#### Note H—Long-Term Debt (in part)

The Company completed a number of refinancing transactions, which are described below.

#### Senior Secured Credit Facility

On July 2, 2009, the Company entered into a Credit Agreement (the “Credit Agreement”), with a syndicate of banks that replaced the Company’s \$305,000 Amended and Restated Credit Agreement dated March 30, 2007 and provides for a

senior secured credit facility (the “Credit Facility”) that consists of:

- A three and one-quarter year \$270,000 revolver (the “Revolver”) which initially accrues interest at a rate of LIBOR plus 2.50%.

The interest rate for the Revolver may increase or decrease according to a consolidated interest coverage ratio pricing matrix as defined in the Credit Agreement. The Credit Agreement permits the Company to add \$55,000 in commitments from existing or additional lenders which would increase the amount of the Revolver to \$325,000. As of April 7, 2010, the Company exercised \$20,000 of the \$55,000 incremental borrowing to increase the amount of the Revolver to \$290,000.

**First Amendment.** On August 24, 2009, the Company closed the First Amendment to the Credit Agreement which included the following modifications effective August 24, 2009:

- Amended the definition for Senior Notes to allow for the issuance of up to an additional \$100,000 of Senior Notes due 2016 within 90 days of the First Amendment Effective Date;
- Amended the definition of Consolidated Total Senior Debt to exclude the Existing Senior Notes 2005;
- Amended the definition of Applicable Percentage to clarify the effective date of the change in the Applicable Percentage;
- Modifications to several schedules within the Credit Agreement.

**Second Amendment.** Effective June 9, 2010, the Company closed the Second Amendment to the Credit Agreement. See Note U “Subsequent Event” to the “Notes to Consolidated Financial Statements” for further information.

**Borrowers and Guarantors.** One of the Company’s primary foreign holding companies, Intabex Netherlands B.V. (“Intabex”), is co-borrower under the Revolver, and the Company’s portion of the borrowings under the Revolver is limited to \$200,000 outstanding at any one time. One of the Company’s primary foreign trading companies, Alliance One International AG (“AOIAG”), is a guarantor of Intabex’s obligations under the Credit Agreement. Such obligations are also guaranteed by the Company and must be guaranteed by any of its material direct or indirect domestic subsidiaries of which the Company has none.

**Collateral.** The Company’s borrowings under the Credit Facility are secured by a first priority pledge of:

- 100% of the capital stock of any domestic subsidiary held directly by the Company or by any material domestic subsidiary;
- 100% of the capital stock of any material domestic subsidiary;
- 100% of the capital stock of any material foreign subsidiary held directly by the Company or any domestic subsidiary; provided that not more than 65% of the voting stock of any material foreign subsidiary is required to be pledged to secure obligations of the Company or any domestic subsidiary;
- U.S. accounts receivable and U.S. inventory owned by the Company or its material domestic subsidiaries (other than inventory the title of which has passed to a customer and inventory financed through customer advances and certain other exceptions); and
- Intercompany notes evidencing loans or advances the Company makes to subsidiaries.

In addition, Intabex’s borrowings under the Credit Facility are secured by a pledge of 100% of the capital stock of Intabex,

AOIAG, certain of the Company's and Intabex's material and other foreign subsidiaries and the collateral described above for the Company's borrowings.

**Financial Covenants.** The Credit Facility includes certain financial covenants and required financial ratios, including:

- A minimum consolidated interest coverage ratio of not less than 1.90 to 1.00;
- A maximum consolidated leverage ratio in an amount not more than a ratio specified for each fiscal quarter, which ratio is 5.50 to 1.00 for the fiscal quarter ended March 31, 2010;
- A maximum consolidated total senior debt to working capital amount ratio of not more than 0.80 to 1.00; and
- A maximum amount of annual capital expenditures of \$75,000 during fiscal year ending March 31, 2010 and \$40,000 during any fiscal year thereafter, with a one-year carry-forward for capital expenditures in any fiscal year below the maximum amount.

Certain of these financial covenants and required financial ratios adjust over time in accordance with schedules in the Credit Agreement.

The Credit Agreement also contains certain customary affirmative and negative covenants, including, without limitation, restrictions on additional indebtedness, guarantees, liens and asset sales.

The Company continuously monitors its compliance with these covenants. If the Company fails to comply with any of these covenants and is unable to obtain the necessary amendments or waivers under the Credit Agreement, the lenders under the Credit Agreement have the right to accelerate the outstanding loans thereunder and demand repayment in full and to terminate their commitment to make any further loans under the Credit Facility. Certain defaults under the Credit Facility would result in a cross default under the indentures governing the Company's senior notes and convertible senior subordinated notes and could impair access to its seasonal operating lines of credit in local jurisdictions. A default under the Credit Agreement would have a material adverse effect on the Company's liquidity and financial condition. At March 31, 2010, the Company is in compliance with these covenants. The Company records all fees and third-party costs associated with the Credit Agreement, including amendments thereto, in accordance with accounting guidance for changes in line of credit or revolving debt arrangements.

As a result of terminating the \$305,000 Amended and Restated Credit Agreement dated March 30, 2007, the Company accelerated approximately \$5,741 of deferred financing costs.

#### Summary of Debt

The carrying value and estimated fair value of the Company's long-term debt are \$789,337 and \$845,642, respectively, as of March 31, 2010 and \$670,426 and \$613,336, respectively, as of March 31, 2009.

The following table summarizes the Company's debt financing as of March 31, 2010:

|                                                                                | Outstanding    |                | March 31, 2010              |                      | Long Term Debt Repayment Schedule |         |          |      |           |           |

##### NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

#### 11. Debt (in part)

##### Convertible Debt

Convertible debt as of December 31, 2010 consists of the following (in thousands):

| December 31, 2010                                 | Outstanding Principal Amount | Unamortized Debt Discount | Carrying Value |
|---------------------------------------------------|------------------------------|---------------------------|----------------|
| 1.25% Convertible senior notes due March 2015     | \$575,000                    | \$(98,770)                | \$476,230      |
| 0.75% Convertible senior notes due September 2013 | 213                          | (38)                      | 175            |
| Outstanding convertible debt                      | \$575,213                    | \$(98,808)                | \$476,405      |

Convertible debt as of December 31, 2009 consisted of the following (in thousands):

| December 31, 2009                                 | Outstanding Principal Amount | Unamortized Debt Discount | Carrying Value |
|---------------------------------------------------|------------------------------|---------------------------|----------------|
| 0.50% Convertible senior notes due September 2011 | \$ 39,990                    | \$ (4,730)                | \$ 35,260      |
| 0.75% Convertible senior notes due September 2013 | 133,000                      | (31,151)                  | 101,849        |
| 2.25% Convertible senior notes due January 2025   | 22,873                       | (104)                     | 22,769         |
| Outstanding convertible debt                      | \$195,863                    | \$(35,985)                | \$159,878      |

Based upon the closing price of the Company's common stock for the prescribed measurement periods during the three months ended December 31, 2010 and 2009, the contingent conversion thresholds of the 2013 Notes were exceeded as of December 31, 2010 and the contingent conversion thresholds of the 2013 Notes, the 2011 Notes and the 2.25% Convertible Notes due 2025 (the "2025 Notes") were exceeded as of December 31, 2009. Accordingly, the carrying value of the aforementioned notes was classified as a current liability at those dates. Since the notes are convertible at the option of the holder and the principal amount is required to be paid in cash, the difference between the principal amount and the carrying value of these notes is reflected as convertible debt in mezzanine on the Company's Balance Sheets as of those dates. The determination of whether or not the notes are convertible must continue to be performed on a quarterly basis. Consequently, the 2013 Notes may not be convertible in future quarters, and therefore may again be classified as long-term debt, if the contingent conversion thresholds are not met in such quarters. The contingent conversion threshold on the 2015 Notes was not exceeded at December 31, 2010, and therefore that debt is reported as a non-current liability. The determination of whether or not the 2015 Notes are convertible must also continue to be performed on a quarterly basis.

If the note holders exercise their option to convert, the Company delivers cash to repay the principal amount of the notes and delivers shares of common stock or cash, at its option, to satisfy the conversion value in excess of the principal amount. In cases where holders decide to convert prior to the maturity date or the first stated put date, the Company writes off the proportionate amount of remaining debt issuance costs to interest expense. In the year ended December 31, 2010, \$39.9 million aggregate principal amount of 2011 Notes, \$132.8 million aggregate principal amount of 2013 Notes and \$22.9 million of the 2025 Notes were converted. The Company delivered cash of \$195.6 million to repay the principal amount and issued 3,457,828 shares and delivered \$99.8 million in cash in satisfaction of the conversion value in excess of the principal amount for the year ended December 31, 2010.

As of December 31, 2010 and 2009, the estimated market value of the outstanding senior notes was approximately \$0.9 billion and \$1.1 billion, respectively. Fair value was estimated based upon actual trades at the end of the reporting period or the most recent trade available as well as the Company's stock price at the end of the reporting period. A substantial portion of the market value of the Company's debt in excess of the carrying value relates to the conversion premium on the bonds.

##### Description of Senior Notes

In March 2010, the Company issued in a private placement \$575.0 million aggregate principal amount of Convertible Senior Notes due March 15, 2015, with an interest rate of 1.25% (the "2015 Notes"). The Company paid \$13.3 million in debt financing costs associated with the 2015 Notes for the year ended December 31, 2010. The 2015 Notes are convertible, subject to certain conditions, into the Company's common stock at a conversion price of approximately \$303.06 per share. The 2015 Notes are convertible, at the option of the holder, prior to March 15, 2015 upon the occurrence of specified events, including, but not limited to a change in control, or if the closing sales price of the Company's common

stock for at least 20 consecutive trading days in the period of the 30 consecutive trading days ending on the last trading day of the immediately preceding calendar quarter is more than 150% of the applicable conversion price in effect for the notes on the last trading day of the immediately preceding quarter. In the event that all or substantially all of the Company's common stock is acquired on or prior to the maturity of the 2015 Notes in a transaction in which the consideration paid to holders of the Company's common stock consists of all or substantially all cash, the Company would be required to make additional payments in the form of additional shares of common stock to the holders of the 2015 Notes in aggregate value ranging from \$0 to approximately \$132.7 million depending upon the date of the transaction and the then current stock price of the Company. As of December 15, 2014, holders will have the right to convert all or any portion of the 2015 Notes. The 2015 Notes may not be redeemed by the Company prior to maturity. The holders may require the Company to repurchase the 2015 Notes for cash in certain circumstances. Interest on the 2015 Notes is payable on March 15 and September 15 of each year.

In 2006, the Company issued in a private placement \$172.5 million aggregate principal amount of Convertible Senior Notes due September 30, 2011, with an interest rate of 0.50% (the "2011 Notes"), and \$172.5 million aggregate principal amount of Convertible Senior Notes due September 30, 2013, with an interest rate of 0.75% (the "2013 Notes"). The 2011 Notes and the 2013 Notes were convertible, subject to certain conditions, into the Company's common stock at a conversion price of approximately \$40.38 per share. The 2011 Notes and the 2013 Notes were convertible, at the option of the holder, prior to June 30, 2011 in the case of the 2011 Notes, and prior to June 30, 2013 in the case of the 2013 Notes, upon the occurrence of specified events, including, but not limited to a change in control, or if the closing sale price of the Company's common stock for at least 20 consecutive trading days in the period of the 30 consecutive trading days ending on the last trading day of the immediately preceding calendar quarter was more than 120% of the applicable conversion price in effect for the notes on the last trading day of the immediately preceding quarter. Neither the 2011 Notes nor the 2013 Notes could be redeemed by the Company prior to maturity.

In 2006, the Company entered into hedge transactions relating to potential dilution of the Company's common stock upon conversion of the 2011 Notes and the 2013 Notes (the "Conversion Spread Hedges"). Under the Conversion Spread Hedges, the Company is entitled to purchase from Goldman Sachs and Merrill Lynch approximately 8.5 million shares of the Company's common stock (4.27 million shares underlying each of the 2011 Notes and the 2013 Notes) at a strike price of \$40.38 per share (subject to adjustment in certain circumstances) in 2011 and 2013, and the counterparties are entitled to purchase from the Company approximately 8.5 million shares of the Company's common stock at a strike price of \$50.47 per share (subject to adjustment in certain circumstances) in 2011 and 2013. The Conversion Spread Hedges increase the effective conversion price of the 2011 Notes and the 2013 Notes to \$50.47 per share from the Company's perspective and were designed to reduce the potential dilution upon conversion of the 2011 Notes and the 2013 Notes. If the market value per share of the Company's common stock at maturity is above \$40.38, the Conversion Spread Hedges entitle the Company to receive from

the counterparties net shares of the Company's common stock based on the excess of the then current market price of the Company's common stock over the strike price of the hedge (up to \$50.47). The Conversion Spread Hedges are separate transactions entered into by the Company with the counterparties and were not part of the terms of the Notes. The Conversion Spread Hedges were designed to be exercisable at dates coinciding with the scheduled maturities of the 2011 Notes and 2013 Notes. The Conversion Spread Hedges did not immediately hedge against the associated dilution from conversions of the Notes prior to their stated maturities. Therefore, upon early conversion of the 2011 Notes or the 2013 Notes, the Company has delivered any related conversion premium in shares of common stock or a combination of cash and shares. However, the hedging counterparties were not obligated to deliver the Company shares or cash that would offset the dilution associated with the early conversion activity. Because of this timing difference, the number of shares, if any, that the Company receives from its Conversion Spread Hedges can differ materially from the number of shares that it was required to deliver to holders of the Notes upon their early conversion. The actual number of shares to be received will depend upon the Company's stock price on the date the Conversion Spread Hedges are exercisable, which coincides with the scheduled maturity of the 2013 Notes. During the year ended December 31, 2010, the Company and the counterparties agreed to terminate the Conversion Spread Hedges associated with 4.27 million shares underlying the 2011 Notes. The Company recorded the \$43 million received as an increase to additional paid-in capital.

Accounting guidance requires that cash-settled convertible debt, such as the Company's convertible senior notes, be separated into debt and equity at issuance and each be assigned a value. The value assigned to the debt component is the estimated fair value, as of the issuance date, of a similar bond without the conversion feature. The difference between the bond cash proceeds and this estimated fair value, representing the value assigned to the equity component, is recorded as a debt discount. Debt discount is amortized using the effective interest method over the period from origination or modification date through the earlier of the first stated put date or the stated maturity date.

The Company estimated the straight debt borrowing rates at debt origination to be 5.89% for the 2015 Notes and 8.0% for the 2013 Notes. The yield to maturity was estimated at an at-market coupon priced at par.

Debt discount after tax of \$69.1 million (\$115.2 million before tax) partially offset by financing costs associated with the equity component of convertible debt of \$1.6 million were recorded in additional paid-in capital related to the 2015 Notes at December 31, 2010.

For the years ended December 31, 2010, 2009 and 2008, the Company recognized interest expense of \$27.6 million, \$22.1 million and \$33.4 million, respectively, related to convertible notes, comprised of \$5.8 million, \$2.9 million and \$4.6 million, respectively, for the contractual coupon interest, \$20.1 million, \$18.2 million and \$26.7 million, respectively, related to the amortization of debt discount and \$1.7 million, \$1.0 million and \$2.1 million, respectively, related to the amortization of debt issuance costs. In addition, unamortized debt issuance costs written off to interest expense related to debt conversions in 2010, 2009 and 2008 was \$1.4 million, \$1.2 million, and \$0.3 million, respectively. The remaining period for amortization of debt discount and debt issuance costs is

the stated maturity dates for the respective debt. The effective interest rates for the years ended December 31, 2010, 2009, and 2008 are 6.7%, 8.5% and 8.5%, respectively.

In addition, if the Company's convertible debt is redeemed or converted prior to maturity, a gain or loss on extinguishment will be recognized. The gain or loss is the difference between the fair value of the debt component immediately prior to extinguishment and its carrying value. To estimate the fair value at each conversion date, the Company used an applicable LIBOR rate plus an applicable credit default spread based upon the Company's credit rating at the respective conversion dates. In the years ended December 31, 2010, 2009 and 2008, the Company recognized a loss of \$11.3 million (\$6.8 million after tax), a loss of \$1.0 million (\$0.6 million after tax) and a gain of \$6.0 million (\$3.6 million after tax), respectively, in "Foreign currency transactions and other" in the Consolidated Statements of Operations.

| Total Finance group debt                                                                       | \$3,660            | \$5,667            |

<sup>(\*)</sup> Variable-rate notes totaled \$0.3 billion and \$1.4 billion at January 1, 2011 and January 2, 2010, respectively.

### Financial Covenants

Under a Support Agreement, Textron Inc. is required to ensure that TFC maintains fixed charge coverage of no less than 125% and consolidated shareholder's equity of no less than \$200 million. In addition, TFC has lending agreements that contain provisions restricting additional debt, which is not to exceed nine times consolidated net worth and qualifying subordinated obligations. Due to certain charges as discussed in Note 11, on December 29, 2008, Textron Inc. made a cash payment of \$625 million to TFC, which was reflected as a capital contribution, to maintain compliance with the fixed charge coverage ratio required by the Support Agreement and to maintain the leverage ratio required by its credit facility. Cash payments of \$383 million in 2010 and \$270 million in 2009 were paid to TFC to maintain compliance with the fixed charge coverage ratio. In addition, we paid \$63 million on January 11, 2011 related to 2010.

| Total long-term debt                                       | \$699,169   | \$1,004,875 |

#### Credit Facility and Other Debt (in part)

#### Our Senior Secured Credit Facility (in part)

**Covenants**—Subject to customary and otherwise agreed upon exceptions, our senior secured credit facility contains affirmative and negative covenants, including, but not limited to:

- The payment of other obligations;
- The maintenance of organizational existences, including, but not limited to, maintaining our property and insurance;
- Compliance with all material contractual obligations and requirements of law;
- Limitations on the incurrence of indebtedness;
- Limitations on creation and existence of liens;

- Limitations on certain fundamental changes to our corporate structure and nature of our business, including mergers;
- Limitations on asset sales;
- Limitations on restricted payments, including certain dividends and stock repurchases;
- Limitations on capital expenditures;
- Limitations on any investments, provided that certain "permitted acquisitions" and strategic investments are allowed;

- Limitations on optional prepayments and modifications of certain debt instruments;
- Limitations on modifications to material agreements;
- Limitations on transactions with affiliates;
- Limitations on entering into certain swap agreements;
- Limitations on negative pledge clauses or clauses restricting subsidiary distributions;
- Limitations on sale-leaseback and other lease transactions; and
- Limitations on changes to our fiscal year.

Our senior secured credit facility also requires us to comply with a maximum senior secured leverage ratio, as defined in our senior secured credit facility (generally, the ratio of our consolidated senior secured indebtedness to consolidated earnings before interest, taxes, depreciation and amortization, or EBITDA, for the most recent four quarters), of 3.50:1.00 and a minimum consolidated interest coverage ratio, as defined in our senior secured credit facility (generally, the ratio of our consolidated EBITDA for such period to consolidated interest expense for such period), of 2.00:1.00. For purposes of calculating the minimum consolidated interest coverage ratio, the First Amendment permits us to exclude from the definition of "consolidated interest expense" in our senior secured credit facility swap termination and cancellation costs incurred in connection with any purchase, repurchase, payments or repayment of any loans under our senior secured credit facility, including pursuant to a modified Dutch auction. The table below shows the required and actual financial ratios under our senior secured credit facility as of December 31, 2010.

|                                              | Required Ratio            | Actual Ratio |
|----------------------------------------------|---------------------------|--------------|
| Maximum senior secured leverage ratio        | No greater than 3.50:1.00 | 0.59:1.00    |
| Minimum consolidated interest coverage ratio | No less than 2.00:1.00    | 12.44:1.00   |

In addition, we are required to give notice to the administrative agent and the lenders under our senior secured credit facility of defaults under the facility documentation and other material events, make any new wholly-owned restricted domestic subsidiary (other than an immaterial subsidiary) a subsidiary guarantor and pledge substantially all after-acquired property as collateral to secure our and our subsidiary guarantors' obligations in respect of the facility.

| Total long-term debt                                            | 2,094             | 2,015             |
| Less: Current portion of long-term debt                         | 11                | 175               |
| Long-term debt                                                  | \$2,083           | \$1,840           |

<sup>(a)</sup> Represents debt that is securitized through bankruptcy remote SPEs, the creditors of which have no recourse to the Company for principal and interest.

<sup>(b)</sup> Represents a 364-day, \$600 million, non-recourse vacation ownership bank conduit facility, with a term through September 2011 whose capacity is subject to the Company's ability to provide additional assets to collateralize the facility. As of December 31, 2010, the total available capacity of the facility was \$448 million.

<sup>(c)</sup> The balance as of December 31, 2010 represents \$800 million aggregate principal less \$2 million of unamortized discount.

<sup>(d)</sup> The term loan facility was fully repaid during March 2010.

<sup>(e)</sup> The revolving credit facility has a total capacity of \$970 million, which includes availability for letters of credit. As of December 31, 2010, the Company had \$28 million of letters of credit outstanding and, as such, the total available capacity of the revolving credit facility was \$788 million.

<sup>(f)</sup> Represents senior unsecured notes issued by the Company during May 2009. The balance at December 31, 2010 represents \$250 million aggregate principal less \$9 million of unamortized discount.

<sup>(g)</sup> Represents convertible notes issued by the Company during May 2009, which includes debt principal, less unamortized discount, and a liability related to a bifurcated conversion feature. During the third and fourth quarters of 2010, the Company repurchased a portion of its 3.50% convertible notes. The following table details the components of the convertible notes:

|                                                            | December 31, 2010 | December 31, 2009 |
|------------------------------------------------------------|-------------------|-------------------|
| Debt principal                                             | \$116             | \$230             |
| Unamortized discount                                       | (12)              | (39)              |
| Debt less discount                                         | 104               | 191               |
| Fair value of bifurcated conversion feature <sup>(*)</sup> | 162               | 176               |
| Convertible notes                                          | \$266             | \$367             |

<sup>(\*)</sup> The Company also has an asset with a fair value equal to the bifurcated conversion feature, which represents cash-settled call options that the Company purchased concurrent with the issuance of the convertible notes.

<sup>(h)</sup> Represents senior unsecured notes issued by the Company during February 2010. The balance as of December 31, 2010 represents \$250 million aggregate principal less \$3 million of unamortized discount.

<sup>(i)</sup> Represents senior unsecured notes issued by the Company during September 2010. The balance as of December 31, 2010 represents \$250 million aggregate principal less \$3 million of unamortized discount.

<sup>(j)</sup> Represents a 364-day, AUD 213 million, secured, revolving foreign credit facility, which was paid down and terminated during March 2010.

<sup>(k)</sup> Represents capital lease obligations with corresponding assets classified within property and equipment on the Company's Consolidated Balance Sheets.

### Covenants

The revolving credit facility is subject to covenants including the maintenance of specific financial ratios. The financial ratio covenants consist of a minimum consolidated interest coverage ratio of at least 3.0 to 1.0 as of the measurement date and a maximum consolidated leverage ratio not to exceed 3.75 to 1.0 on the measurement date. The consolidated interest coverage ratio is calculated by dividing consolidated EBITDA (as defined in the credit agreement) by consolidated interest expense (as defined in the credit agreement), both as measured on a trailing 12 month basis preceding the measurement date. Consolidated interest expense excludes, among other things, interest expense on any securitization indebtedness (as defined in the credit agreement). The consolidated leverage ratio is calculated by dividing consolidated

total indebtedness (as defined in the credit agreement and which excludes, among other things, securitization indebtedness) as of the measurement date by consolidated EBITDA as measured on a trailing 12 month basis preceding the measurement date. Covenants in this credit facility also include limitations on indebtedness of material subsidiaries; liens; mergers, consolidations, liquidations and dissolutions; sale of all or substantially all of the Company's assets; and sale and leaseback transactions. Events of default in this credit facility include failure to pay interest, principal and fees when due; breach of a covenant or warranty; acceleration of or failure to pay other debt in excess of \$50 million (excluding securitization indebtedness); insolvency matters; and a change of control.

The 6.00% senior unsecured notes, 9.875% senior unsecured notes, 7.375% senior unsecured notes and 5.75% senior unsecured notes contain various covenants including limitations on liens, limitations on potential sale and lease-back transactions and change of control restrictions. In addition, there are limitations on mergers, consolidations and potential sale of all or substantially all of the Company's assets. Events of default in the notes include failure to pay interest and principal when due, breach of a covenant or warranty, acceleration of other debt in excess of \$50 million and insolvency matters. The Convertible Notes do not contain affirmative or negative covenants; however, the limitations on mergers, consolidations and potential sale of all or substantially all of the Company's assets and the events of default for the Company's senior unsecured notes are applicable to such notes. Holders of the Convertible Notes have the right to require the Company to repurchase the Convertible Notes at 100% of principal plus accrued and unpaid interest in the event of a fundamental change, defined to include, among other things, a change of control, certain recapitalizations and if the Company's common stock is no longer listed on a national securities exchange.

As of December 31, 2010, the Company was in compliance with all of the financial covenants described above.

Each of the Company's non-recourse, securitized term notes and the bank conduit facility contain various triggers relating to the performance of the applicable loan pools. For example, if the vacation ownership contract receivables pool that collateralizes one of the Company's securitization notes fails to perform within the parameters established by the contractual triggers (such as higher default or delinquency rates), there are provisions pursuant to which the cash flows for that pool will be maintained in the securitization as extra collateral for the note holders or applied to accelerate the repayment of outstanding principal to the noteholders. As of December 31, 2010, all of the Company's securitized loan pools were in compliance with applicable contractual triggers.

## 2.168

### R.R. DONNELLEY & SONS COMPANY (DEC)

#### NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

(In millions, except per share data and unless otherwise indicated)

#### Note 13. Debt (in part)

The Company's debt at December 31, 2010 and 2009 consists of the following:

|                                          | 2010      | 2009      |
|------------------------------------------|-----------|-----------|
| Credit facility borrowings               | \$ 120.0  | \$ —      |
| 4.95% senior notes due May 15, 2010      | —         | 325.7     |
| 5.625% senior notes due January 15, 2012 | 158.6     | 158.5     |
| 4.95% senior notes due April 1, 2014     | 599.2     | 599.0     |
| 5.50% senior notes due May 15, 2015      | 499.6     | 499.6     |
| 8.60% senior notes due August 15, 2016   | 346.0     | 345.3     |
| 6.125% senior notes due January 15, 2017 | 622.0     | 621.5     |
| 11.25% senior notes due February 1, 2019 | 400.0     | 400.0     |
| 7.625% senior notes due June 15, 2020    | 400.0     | —         |
| 8.875% debentures due April 15, 2021     | 80.9      | 80.9      |
| 6.625% debentures due April 15, 2029     | 199.3     | 199.3     |
| 8.820% debentures due April 15, 2031     | 68.9      | 68.9      |
| Other, including capital leases          | 35.5      | 23.7      |
| Total debt                               | 3,530.0   | 3,322.4   |
| Less: current portion                    | (131.4)   | (339.9)   |
| Long-term debt                           | \$3,398.6 | \$2,982.5 |

The fair values of the senior notes and debentures, which were based upon interest rates available to the Company for borrowings with similar terms and maturities, were determined to be Level 2 under the fair value hierarchy. The fair value of the Company's debt was greater than its book value by approximately \$259.3 million and \$177.9 million at December 31, 2010 and 2009, respectively.

On December 17, 2010, the Company entered into a \$1.75 billion unsecured and committed revolving credit agreement (the "Credit Agreement") which expires December 17, 2013, subject to a possible one-year extension if agreed to by the lending financial institutions. Borrowings under the Credit Agreement bear interest at a rate dependent on the Company's credit ratings at the time of borrowing that will be calculated according to a base Eurocurrency rate plus an applicable margin. The Company will pay annual commitment fees at rates dependent on the Company's credit ratings. The Credit Agreement replaced the Company's previous \$2.0 billion unsecured and committed revolving credit facility (the "previous Facility"). All amounts outstanding under the previous Facility were repaid with borrowings under the Credit Agreement. The Credit Agreement will be used for general corporate purposes, including letters of credit and as a backstop for the Company's commercial paper program. The Credit Agreement is subject to a number of financial covenants that, in part, may limit the use of proceeds, and the ability of the Company to create liens on assets, incur subsidiary debt, engage in mergers and consolidations, or dispose of assets. The financial covenants require a minimum interest coverage ratio and maximum leverage ratio.

On June 21, 2010, the Company issued \$400.0 million of 7.625% senior notes due June 15, 2020. Interest on the notes is payable semi-annually on June 15 and December 15 of each year, commencing on December 15, 2010. The net proceeds from the offering were used to repay borrowings under the previous Facility and for general corporate purposes.

On August 26, 2009, the Company issued \$350.0 million of 8.60% senior notes due August 15, 2016. Interest on the notes is payable semi-annually on February 15 and August 15 of each year, commencing on February 15, 2010. The net proceeds from the offering, along with borrowings under the previous Facility and cash on hand, were used to repurchase \$466.4 million of the 5.625% senior notes due January 15, 2012 and \$174.2 million of the 4.95% senior notes due May 15, 2010. These repurchases resulted in a pre-tax loss on debt extinguishment of \$10.3 million, which is reflected in investment and other expense on the Consolidated Statements of Operations for the year ended December 31, 2009.

On January 14, 2009, the Company issued \$400.0 million of 11.25% senior notes due February 1, 2019. Interest on the notes is payable semi-annually on February 1 and August 1 of each year, commencing on August 1, 2009. The net proceeds from the offering were used to pay down short-term debt. If the Company experiences certain downgrades in its credit ratings, these notes would be subject to a coupon step-up resulting in higher interest payments.

As of December 31, 2010, the Company had \$120.0 million of borrowings outstanding under the Credit Agreement. The proceeds from these borrowings were used to repay borrowings under the previous Facility. The borrowings under the previous Facility, along with cash on hand, were used to fund the acquisition of Bowne. The weighted average interest rate on borrowings during the year ended December 31, 2010 was 1.27% per annum.

Additionally, the Company had \$107.4 million in credit facilities (the "Foreign Facilities") at its foreign locations, most of which are uncommitted. As of December 31, 2010 and 2009, total borrowings under the Credit Agreement, the previous Facility and the Foreign Facilities (the "Combined Facilities") were \$129.1 million and \$12.7 million, respectively. As of December 31, 2010, the Company had \$57.0 million in outstanding letters of credit. At December 31, 2010, approximately \$1.7 billion was available under the Company's Combined Facilities, of which the Company may borrow approximately \$1.4 billion, as borrowings above \$1.4 billion would cause the Company to violate certain debt covenants in the Facility.

The Company was in compliance with its debt covenants as of December 31, 2010, and is expected to remain in compliance based on management's estimates of operating and financial results for 2011 and the foreseeable future.

## LONG-TERM LEASES

### RECOGNITION AND MEASUREMENT

**2.169** FASB ASC 840 establishes standards of financial accounting and reporting for leases on the financial statements of lessees and lessors. FASB ASC 840 classifies leases as capital or operating. Capital leases are accounted for as the acquisition of

an asset and the incurrence of an obligation by the lessee and as a sale or financing by the lessor. All other leases are accounted for as operating leases.

### PRESENTATION

**2.170** Under FASB ASC 840-30, lessees should separately identify on the balance sheet or notes thereto assets recorded under capital leases, the accumulated amortization thereon, and obligations. Capital lease obligations are subject to the same considerations as other obligations in classifying them with current and noncurrent liabilities in classified balance sheets. Similarly, a lessor's net investment in a sales-type or direct financing lease is also subject to the same considerations as other assets in classification as current or noncurrent assets.

**2.171** FASB ASC 840-20 requires that lessors include property subject to operating leases with or near property, plant, and equipment in the balance sheet. Accumulated depreciation should be deducted by lessors from the investments in the leased property.

### DISCLOSURE

**2.172** FASB ASC 840-20-50 and 840-30-50 contain detailed disclosure requirements for lessors and lessees under operating and capital leases, respectively.

## NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

(Dollar amounts in thousands except per share data, unless otherwise stated.)

### 12. Leases (in part)

The Company leases substantially all of its stores and other facilities, as well as certain information technology equipment and transportation equipment. The majority of the Company's lease obligations relate to real properties with remaining terms ranging from less than one year to twenty-one years. Many of the Company's leases contain renewal options after the initial term. In addition to minimum rents, certain store leases require contingent rental payments if sales volumes exceed specified amounts.

#### Lease Commitments

As of June 30, 2010, future contractual minimum lease payments under both capital and operating leases that have remaining terms in excess of one year are:

|                                             | Capital  | Operating | Subleases | Net       |
|---------------------------------------------|----------|-----------|-----------|-----------|
| Fiscal Year:                                |          |           |           |           |
| 2011                                        | \$11,171 | \$209,231 | \$(1,658) | \$218,744 |
| 2012                                        | 8,536    | 192,371   | (1,397)   | 199,510   |
| 2013                                        | 6,780    | 176,927   | (1,126)   | 182,581   |
| 2014                                        | 5,122    | 163,944   | (311)     | 168,755   |
| 2015                                        | 917      | 142,506   | (41)      | 143,382   |
| Thereafter                                  | 2,019    | 540,829   | (30)      | 542,818   |
| Total minimum lease payments                | 34,545   | 1,425,808 | (4,563)   | 1,455,790 |
| Less: amount representing interest          | 5,073    |           |           |           |
| Present value of net minimum lease payments | \$29,472 |           |           |           |

The carrying amount of the Company's capital lease obligations of \$29.5 million and \$35.3 million approximates fair value as of June 30, 2010, and June 24, 2009, respectively.

YUM! BRANDS, INC. (DEC)

## NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

(Tabular amounts in millions, except share data)

### Note 2—Summary of Significant Accounting Policies (in part)

**Leases and Leasehold Improvements.** The Company leases land, buildings or both for more than 6,000 of its restaurants worldwide. Lease terms, which vary by country and often include renewal options, are an important factor in determining the appropriate accounting for leases including the initial classification of the lease as capital or operating and the tim-

ing of recognition of rent expense over the duration of the lease. We include renewal option periods in determining the term of our leases when failure to renew the lease would impose a penalty on the Company in such an amount that a renewal appears to be reasonably assured at the inception of the lease. The primary penalty to which we are subject is the economic detriment associated with the existence of leasehold improvements which might be impaired if we choose not to continue the use of the leased property. Leasehold improvements, which are a component of buildings and improvements described above, are amortized over the shorter of their estimated useful lives or the lease term. We generally do not receive leasehold improvement incentives upon opening a store that is subject to a lease.

We expense rent associated with leased land or buildings while a restaurant is being constructed whether rent is paid or we are subject to a rent holiday. Additionally, certain of the Company's operating leases contain predetermined fixed escalations of the minimum rent during the lease term. For leases with fixed escalating payments and/or rent holidays, we record rent expense on a straight-line basis over the lease term, including any option periods considered in the determination of that lease term. Contingent rentals are generally based on sales levels in excess of stipulated amounts, and thus are not considered minimum lease payments and are included in rent expense when attainment of the contingency is considered probable.

### Note 11—Leases (in part)

At December 25, 2010 we operated more than 7,200 restaurants, leasing the underlying land and/or building in more than 6,000 of those restaurants with the vast majority of our commitments expiring within 20 years from the inception of the lease. Our longest lease expires in 2151. We also lease office space for headquarters and support functions, as well as certain office and restaurant equipment. We do not consider any of these individual leases material to our operations. Most leases require us to pay related executory costs, which include property taxes, maintenance and insurance.

Future minimum commitments and amounts to be received as lessor or sublessor under non-cancelable leases are set forth below:

|            | Commitments |           | Lease Receivables |           |
|------------|-------------|-----------|-------------------|-----------|
|            | Capital     | Operating | Direct Financing  | Operating |
| 2011       | \$ 26       | \$ 550    | \$ 12             | \$ 49     |
| 2012       | 63          | 514       | 12                | 42        |
| 2013       | 23          | 483       | 17                | 38        |
| 2014       | 23          | 447       | 16                | 37        |
| 2015       | 23          | 405       | 13                | 34        |
| Thereafter | 222         | 2,605     | 58                | 151       |
|            | \$380       | \$5,004   | \$128             | \$351     |

At December 25, 2010 and December 26, 2009, the present value of minimum payments under capital leases was \$236 million and \$249 million, respectively. At December 25, 2010 and December 26, 2009, unearned income associated with direct financing lease receivables was \$50 million and \$61 million, respectively.

**2.175****BRINKER INTERNATIONAL, INC. (JUN)****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS****1. Nature of Operations and Summary of Significant Accounting Policies (in part)****(j) Operating Leases**

Rent expense for leases that contain scheduled rent increases is recognized on a straight-line basis over the lease term, including cancelable option periods where failure to exercise such options would result in an economic penalty such that the renewal appears reasonably assured. The straight-line rent calculation and rent expense includes the rent holiday period, which is the period of time between taking control of a leased site and the rent commencement date.

Contingent rents are generally amounts due as a result of sales in excess of amounts stipulated in certain restaurant leases and are included in rent expense as they are incurred. Landlord contributions are recorded when received as a deferred rent liability and amortized as a reduction of rent expense on a straight-line basis over the lesser of the lease term, including renewal options, or 20 years.

**10. Leases (in part)****(b) Operating Leases**

We lease restaurant facilities, office space, and certain equipment under operating leases having terms expiring at various dates through fiscal 2093. The restaurant leases have renewal clauses of 1 to 35 years at our option and, in some cases, have provisions for contingent rent based upon a percentage of sales in excess of specified levels, as defined in the leases. Rent expense for fiscal 2010, 2009, and 2008 was \$102.5 million, \$117.5 million, and \$131.9 million, respectively. Contingent rent included in rent expense for fiscal 2010, 2009, and 2008 was \$4.7 million, \$6.5 million, and \$8.8 million, respectively.

**(c) Commitments**

As of June 30, 2010, future minimum lease payments on capital and operating leases were as follows (in thousands):

| <b>Fiscal Year</b>                          | <b>Capital Leases</b> | <b>Operating Leases</b> |
|---------------------------------------------|-----------------------|-------------------------|
| 2011                                        | \$ 5,262              | \$100,152               |
| 2012                                        | 5,367                 | 94,049                  |
| 2013                                        | 5,473                 | 86,810                  |
| 2014                                        | 5,581                 | 77,337                  |
| 2015                                        | 5,692                 | 65,562                  |
| Thereafter                                  | 59,205                | 178,836                 |
| Total minimum lease payments <sup>(a)</sup> | 86,580                | \$602,746               |
| Imputed interest (average rate of 7%)       | (34,608)              |                         |
| Present value of minimum lease payments     | 51,972                |                         |
| Less current installments                   | (1,866)               |                         |
|                                             | \$ 50,106             |                         |

<sup>(a)</sup> Future minimum lease payments have not been reduced by minimum sublease rentals due in the future under non-cancelable subleases. Sublease rentals are approximately \$34.5 million and \$66.8 million for capital and operating subleases, respectively.

**2.176****WENDY'S/ARBY'S GROUP, INC. (DEC)****COMBINED NOTES TO CONSOLIDATED FINANCIAL STATEMENTS**

(In thousands except per share amounts)

**(1) Summary of Significant Accounting Policies (in part)****Leases**

We operate restaurants that are located on sites owned by us and sites leased by us from third parties. At inception, each lease is evaluated to determine whether the lease will be accounted for as an operating or capital lease based on lease terms. When determining the lease term, we include option periods for which failure to renew the lease imposes a significant economic detriment. The primary penalty to which we may be subject is the economic detriment associated with the existence of unamortized leasehold improvements which might be impaired if we choose not to exercise the available renewal options.

For operating leases, minimum lease payments, including minimum scheduled rent increases, are recognized as rent expense on a straight line basis ("Straight-Line Rent") over the applicable lease terms. Lease terms are generally initially for 20 years and, in most cases, provide for rent escalations and renewal options. The term used for Straight-Line Rent expense is calculated initially from the date we obtain possession of the leased premises through the expected lease termination date. We expense rent from possession date to the restaurant opening date. There is a period under certain lease agreements referred to as a rent holiday ("Rent Holiday") that generally begins on the possession date and ends on the rent commencement date. During the Rent Holiday period, no cash rent payments are typically due under the terms of the lease; however, expense is recorded for that period on a straight-line basis consistent with the Straight-Line Rent policy.

For leases that contain rent escalations, we record the rent payable during the lease term, as determined above, on the straight-line basis over the term of the lease (including the rent holiday period beginning upon possession of the premises), and record the excess of the Straight-Line Rent over the minimum rents paid as a deferred lease liability included in "Other liabilities." Certain leases contain provisions, referred to as contingent rent ("Contingent Rent"), that require additional rental payments based upon restaurant sales volume. Contingent Rent is expensed each period as the liability is incurred.

Favorable and unfavorable lease amounts, when we purchase restaurants, are recorded as components of "Other intangible assets" and "Other liabilities," respectively, and are amortized to "Cost of sales"—both on a straight-line basis over the remaining term of the leases. When the expected term of a lease is determined to be shorter than the original amortization period, the favorable or unfavorable lease balance associated with the lease is adjusted to reflect the revised lease term and a gain or loss recognized.

Management makes certain estimates and assumptions regarding each new lease agreement, lease renewal, and lease amendment, including, but not limited to, property values, market rents, property lives, discount rates, and

probable term, all of which can impact (1) the classification and accounting for a lease as capital or operating, (2) the rent holiday and escalations in payment that are taken into consideration when calculating straight-line rent, (3) the term over which leasehold improvements for each restaurant are amortized, and (4) the values and lives of favorable and unfavorable leases. Different amounts of depreciation and amortization, interest and rent expense would be reported if different estimates and assumptions were used.

*(22) Lease Commitments (in part)*

The Companies lease real property, leasehold interests, and restaurant, transportation, and office equipment. Some leases which relate to restaurant operations provide for contingent rentals based on sales volume.

The Companies' future minimum rental payments and rental receipts, for non-cancelable leases, including rental receipts for leased properties owned by the Companies, having an initial lease term in excess of one year as of January 2, 2011, are as follows:

| Fiscal Year                                                                   | Rental Payments            |                    |                                 | Rental Receipts            |                    |                                 |                  |
|-------------------------------------------------------------------------------|----------------------------|--------------------|---------------------------------|----------------------------|--------------------|---------------------------------|------------------|
|                                                                               | Sale-Leaseback Obligations | Capitalized Leases | Operating Leases <sup>(a)</sup> | Sale-Leaseback Obligations | Capitalized Leases | Operating Leases <sup>(a)</sup> | Owned Properties |
| 2011                                                                          | \$ 14,948                  | \$ 15,856          | \$ 150,465                      | \$ 966                     | \$ 291             | \$12,501                        | \$ 7,064         |
| 2012                                                                          | 15,406                     | 12,372             | 140,592                         | 966                        | 291                | 11,271                          | 7,001            |

<sup>(a)</sup> In addition to the amounts presented in the table above, Wendy's/Arby's has rental payments of \$1,605 and \$673, and rental receipts of \$1,360 and \$567 in 2011 and 2012, both respectively, under the lease for Wendy's/Arby's former corporate headquarters and of the sublease for office space on two of the floors covered under the lease to personnel from a management company formed by our Chairman, who was our former Chief Executive Officer, and our Vice Chairman, who was our former President and Chief Operating Officer, and a director, who was our former Vice Chairman (the "Management Company").

## Lessor Leases

### 2.177

BURGER KING HOLDINGS, INC. (JUN)

#### NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

##### Note 18. Leases (in part)

As of June 30, 2010, the Company leased or subleased 1,145 restaurant properties to franchisees and non-restaurant properties to third parties under capital and operating leases. The building and leasehold improvements of the leases with franchisees are usually accounted for as direct financing leases and recorded as a net investment in property leased to franchisees, while the land is recorded as operating leases. Most leases to franchisees provide for fixed payments with contingent rent when sales exceed certain levels. Lease terms generally range from 10 to 20 years. The franchisees bear the cost of maintenance, insurance and property taxes.

Property and equipment, net leased to franchisees and other third parties under operating leases was as follows (in millions):

|                            | As of June 30 |         |
|----------------------------|---------------|---------|
|                            | 2010          | 2009    |
| Land                       | \$198.3       | \$195.8 |
| Buildings and improvements | 79.6          | 114.0   |
| Restaurant equipment       | 8.1           | 5.1     |
|                            | \$286.0       | \$314.9 |
| Accumulated depreciation   | (70.5)        | (40.9)  |
|                            | \$215.5       | \$274.0 |

Net investment in property leased to franchisees and other third parties under direct financing leases was as follows (in millions):

|                                                   | As of June 30 |          |

#### NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

(Millions of dollars, except for share data)

##### 1. Major Accounting Policies (in part)

###### Revenue Recognition (in part)

Certain contracts associated with facilities that are built to provide product to a specific customer are required to be accounted for as leases. In cases where operating lease treatment is necessary, there is no difference in revenue recognition over the life of the contract as compared to accounting for the contract as product sales. In cases where capital lease treatment is necessary, the timing of revenue and expense recognition is impacted. Revenue and expense are recognized up front for the sale of equipment component of the contract as compared to revenue recognition over the life of the arrangement under contracts not qualifying as capital leases. Additionally, a portion of the revenue representing interest income from the financing component of the lease receivable is reflected as sales over the life of the contract.

tion over the life of the contract as compared to accounting for the contract as product sales. Additionally, a portion of the revenue representing interest income from the financing component of the lease receivable is reflected as sales over the life of the contract.

## 12. Leases (in part)

### Lessor Accounting

As discussed under Revenue Recognition in Note 1, Major Accounting Policies, certain contracts associated with facilities that are built to provide product to a specific customer are required to be accounted for as leases. Lease receivables, net, were included principally in noncurrent capital lease receivables on the Company's consolidated balance sheets. The components of lease receivables were as follows:

| 30 September                            | 2010      | 2009      |
|-----------------------------------------|-----------|-----------|
| Gross minimum lease payments receivable | \$1,195.5 | \$1,068.9 |
| Unearned interest income                | (386.0)   | (349.3)   |
| Net lease receivable                    | \$ 809.5  | \$ 719.6  |

Lease payments collected in 2010, 2009, and 2008 were \$68.0, \$53.6, and \$33.7, respectively.

At 30 September 2010, minimum lease payments to be collected are as follows:

|            |                  |
|------------|------------------|
| 2011       | \$ 93.2          |
| 2012       | 95.6             |
| 2013       | 93.9             |
| 2014       | 92.3             |
| 2015       | 90.0             |
| Thereafter | 730.5            |
|            | <u>\$1,195.5</u> |

## OTHER NONCURRENT LIABILITIES

### PRESENTATION

**2.179** FASB ASC 210 indicates that liabilities classified as noncurrent (that is, beyond the operating cycle) include long-term deferrals of the delivery of goods or services, such as the issuance of a long-term warranty or the advance receipt by a lessor of rental for the final period of a 10-year lease. Similarly, a loan on a life insurance policy with the intent that it will not be paid but will be liquidated by deduction from the proceeds of the policy upon maturity or cancellation should be excluded from current liabilities.

**2.180** FASB ASC 480, *Distinguishing Liabilities from Equity*, requires that an issuer classify certain financial instruments with characteristics of both liabilities and equity as liabilities. Some issuances of stock, such as mandatorily redeemable preferred stock, impose unconditional obligations requiring the issuer to transfer assets or issue its equity shares. FASB ASC 480 requires an issuer to classify such financial instruments as liabilities, not present them between the "Liabilities" and "Equity" sections of the balance sheet. Rule 5-02 of Regulation S-X includes matters related to redeemable preferred stocks to be stated on the face of the balance sheet or included in the notes.

**2.181** Rule 5-02 of Regulation S-X requires that any item not classed in another Regulation S-X liability caption and in excess of 5 percent of total liabilities be stated separately on the balance sheet or disclosed in the notes. Regulation S-X also

requires that deferred income taxes, deferred tax credits, and deferred income be stated separately in the balance sheet.

**2.182** Rule 5-02 of Regulation S-X includes a balance sheet caption for commitments and contingent liabilities. When commitments or contingent liabilities exist and are disclosed in footnotes, registrants customarily include a caption on the balance sheet without an amount but with a reference to the related footnote.

### 2.183

**TABLE 2-14: OTHER NONCURRENT LIABILITIES\***

Table 2-14 summarizes the nature of such noncurrent liabilities and deferred credits.

## NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

## Note 1. Description of Business and Summary of Significant Accounting Policies (in part)

**Income Taxes.** Deferred income taxes are provided for the tax effect of temporary differences between the tax basis of assets and liabilities and their reported amounts in the financial statements. The liability method is used to account for income taxes, which requires deferred taxes to be recorded at the statutory rate expected to be in effect when the taxes are paid.

We recognize liabilities for uncertain income tax positions based on a two-step process. The first step is to evaluate the tax position for recognition by determining if the weight of available evidence indicates that it is more likely than not that the position will be sustained on audit, including resolution of related appeals or litigation processes, if any. The second step requires us to estimate and measure the tax benefit as the largest amount that is more than 50% likely to be realized upon ultimate settlement. It is inherently difficult and subjective to estimate such amounts, as we must determine the probability of various possible outcomes. We reevaluate these uncertain tax positions on a quarterly basis or when new information becomes available to management. These reevaluations are based on factors including, but not limited to, changes in facts or circumstances, changes in tax law, successfully settled issues under audit and new audit activity. Such a change in recognition or measurement could result in the recognition of a tax benefit or an increase to the related provision.

We classify interest related to income tax liabilities as interest expense, and if applicable, penalties are recognized as a component of income tax expense. The income tax liabilities and accrued interest and penalties that are due within one year of the balance sheet date are presented as current liabilities. The remaining portion of our income tax liabilities and accrued interest and penalties are presented as noncurrent liabilities because payment of cash is not anticipated within one year of the balance sheet date. These noncurrent income tax liabilities are recorded in the caption "Other liabilities" in our consolidated balance sheets.

## Note 10. Income Taxes (in part)

The significant components of deferred tax assets and liabilities as of May 31 were as follows (in millions):

|                                             | 2010                |                          | 2009                |                          |
|---------------------------------------------|---------------------|--------------------------|---------------------|--------------------------|
|                                             | Deferred Tax Assets | Deferred Tax Liabilities | Deferred Tax Assets | Deferred Tax Liabilities |
| Property, equipment, leases and intangibles | \$ 377              | \$2,157                  | \$ 406              | \$1,862                  |
| Employee benefits                           | 783                 | 36                       | 384                 | 143                      |
| Self-insurance accruals                     | 416                 | —                        | 392                 | —                        |
| Other                                       | 490                 | 238                      | 491                 | 222                      |
| Net operating loss/credit carryforwards     | 142                 | —                        | 131                 | —                        |
| Valuation allowances                        | (139)               | —                        | (137)               | —                        |
|                                             | \$2,069             | \$2,431                  | \$1,667             | \$2,227                  |

The net deferred tax liabilities as of May 31 have been classified in the balance sheets as follows (in millions):

|                                   | 2010           | 2009            |
|-----------------------------------|----------------|-----------------|
| Current deferred tax asset        | \$ 529         | \$ 511          |
| Noncurrent deferred tax liability | (891)          | (1,071)         |
|                                   | <u>\$(362)</u> | <u>\$ (560)</u> |

#### NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

##### 1. Basis of Presentation and Significant Accounting Policies (in part)

##### Significant Accounting Policies (in part)

##### Income Taxes

Deferred income tax assets and liabilities are computed annually for differences between the consolidated financial statement and tax bases of assets and liabilities that will result in taxable or deductible amounts in the future based on enacted tax laws and rates applicable to the periods in which the differences are expected to affect taxable income. Valuation allowances are established when necessary to reduce deferred tax assets to the amount more likely than not to be realized. Income tax expense is the tax payable or refundable for the period plus or minus the change during the period in deferred tax assets and liabilities.

##### 5. Income Taxes (in part)

Significant components of our deferred tax assets and liabilities are as follows:

Our net current deferred income tax asset of \$4.6 million as of December 31, 2010 is recorded in Prepaid expenses and other in the consolidated balance sheet. Our net current deferred income tax liability of \$22,000 as of December 31, 2009 is recorded in Accrued expenses in the consolidated balance sheet.

Our net deferred tax assets and liabilities are summarized as follows (in thousands):

|                                     | December 31        |                    |
|-------------------------------------|--------------------|--------------------|
| (In thousands of U.S. dollars)      | 2010               | 2009               |
| Total deferred tax assets           | \$ 76,432          | \$ 75,379          |
| Total deferred tax liabilities      | (150,614)          | (163,315)          |
| Net deferred income tax liabilities | <u>\$ (74,182)</u> | <u>\$ (87,936)</u> |

For financial statement purposes, the tax benefits of net operating/capital loss and tax credit carryforwards are recognized as deferred tax assets, subject to appropriate valuation allowances, when we determine that the likelihood of recovering the deferred tax asset falls below the "more likely than not" threshold. We evaluate our net operating loss and credit carryforwards on an ongoing basis. As of December 31, 2010, the expiration periods for \$6.0 million of deferred

tax assets related to net operating/capital loss and tax credit carryforwards are as follows: \$0.7 million between calendar years 2011 and 2015; \$0.4 million between calendar years 2016 and 2025; \$0.9 million between calendar years 2026 and 2030 and \$4.0 million can be carried forward indefinitely. We have provided valuation allowances on these deferred tax assets of approximately \$0.4 million for deferred tax assets expiring between calendar years 2011 and 2015, \$0.2 million between calendar years 2016 and 2025, \$0.8 million between calendar years 2026 and 2030 and \$3.2 million for deferred tax assets with an indefinite life. A valuation allowance of \$13.3 million exists for capitalized costs associated with the ADVO acquisition.

We recognize tax benefits only for tax positions that are more-likely-than-not to be sustained based solely on its technical merits as of the reporting date. The more-likely-than-not threshold represents a positive assertion by management that a company is entitled to the economic benefit of a tax position. If a tax position is not considered more-likely-than-not to be sustained based solely on its technical merits, the company cannot recognize any benefit for the tax position. In addition, the tax position must continue to meet the more-likely-than-not threshold in each reporting period after initial recognition in order to support continued recognition of a benefit.

#### NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

### 3. Other Significant Transactions and Events (in part)

#### A. Tax Audit Settlements

During the fourth quarter of 2010, we reached a settlement with the U.S. Internal Revenue Service (IRS) related to issues

we had appealed with respect to the audits of the Pfizer Inc. tax returns for the years 2002 through 2005, as well as the Pharmacia audit for the year 2003 through the date of merger with Pfizer (April 16, 2003). The IRS concluded its examination of the aforementioned tax years and issued a final Revenue Agent's Report (RAR). We agreed with all of the adjustments and computations contained in the RAR. As a result of settling these audit years, in the fourth quarter of 2010, we reduced our unrecognized tax benefits by approximately \$1.4 billion and reversed the related interest accruals by approximately \$600 million. During 2010, we also recognized \$320 million in tax benefits and reversed the related interest accruals of \$140 million resulting from the resolution of certain tax positions pertaining to prior years with various foreign tax authorities as well as from the expiration of the statute of limitations. The aforementioned amounts had been classified in *Other taxes payable*, and the corresponding tax benefit was recorded in *Provision for taxes on income* (see Note 7. *Taxes on Income*). In the second quarter of 2008, we effectively settled certain issues common among multinational corporations with various foreign tax authorities primarily relating to tax years 2000 to 2005. As a result, we recognized \$305 million in tax benefits in *Provision for taxes on income*.

### 7. Taxes on Income (in part)

#### D. Tax Contingencies (in part)

A reconciliation of the beginning and ending amounts of gross unrecognized tax benefits is as follows:

| (Millions of dollars)                                                           | 2010      | 2009      |
|---------------------------------------------------------------------------------|-----------|-----------|
| Balance, January 1                                                              | \$(7,657) | \$(5,372) |
| Acquisition of Wyeth                                                            | (49)      | (1,785)   |
| Increases based on tax positions taken during a prior period <sup>(a)</sup>     | (513)     | (79)      |
| Decreases based on tax positions taken during a prior period <sup>(a),(b)</sup> | 2,384     | 38        |
| Decreases based on cash payments for a prior period                             | 280       | —         |
| Increases based on tax positions taken during the current period <sup>(a)</sup> | (1,396)   | (941)     |
| Decreases based on tax positions taken during the current period                | —         | 712       |
| Impact of foreign exchange                                                      | 104       | (284)     |
| Other, net <sup>(c)</sup>                                                       | 88        | 54        |
| Balance, December 31 <sup>(d)</sup>                                             | \$(6,759) | \$(7,657) |

(a) Primarily included in *Provision for taxes on income*.

(b) Decreases are primarily a result of effectively settling certain issues with the U.S. and foreign tax authorities for a net benefit of \$1.7 billion, reflecting the reversal of the related tax assets associated with the competent authority process and state and local taxes and are primarily included in *Provision for taxes on income*.

(c) Primarily includes decreases as a result of a lapse of applicable statutes of limitations.

(d) In 2010, included in *Income taxes payable* (\$421 million), *Taxes and other current assets* (\$279 million), *Taxes and other noncurrent assets* (\$169 million), *Noncurrent deferred tax liabilities* (\$369 million) and *Other taxes payable* (\$5.5 billion). In 2009, included in *Income taxes payable* (\$144 million), *Taxes and other current assets* (\$78 million), *Noncurrent deferred tax liabilities* (\$208 million) and *Other taxes payable* (\$7.2 billion).

- Interest related to our unrecognized tax benefits is recorded in accordance with the laws of each jurisdiction and is recorded in *Provision for taxes on income* in our Consolidated Statements of Income. In 2010, we recorded net interest income of \$545 million, primarily as a result of settling certain issues with the U.S. and various foreign tax authorities, which are discussed below. In 2009 and 2008, we recorded net interest expense of \$191 million and \$106 million. Gross accrued interest totaled \$952 million as of December 31, 2010 and \$1.9 billion as of December 31, 2009 (including \$300 million recorded upon the acquisition of Wyeth). In 2010, these amounts were included in *Income taxes payable* (\$112 million), *Taxes and other current assets* (\$122 million) and *Other taxes payable* (\$718 million). In 2009, these amounts were included in *Income taxes payable* (\$90 million), *Taxes and other current assets* (\$55 million) and *Other taxes payable* (\$1.8 billion). Accrued penalties are not significant.

(Tabular dollars in thousands, except per share data)

### 9. Income Taxes (in part)

#### Uncertain Tax Positions

A reconciliation of the amount of unrecognized tax benefits at December 31, 2010, 2009 and 2008 is as follows:

|                                                                            | 2010      | 2009      | 2008      |
|----------------------------------------------------------------------------|-----------|-----------|-----------|
| Balance at beginning of year                                               | \$515,565 | \$434,164 | \$398,878 |
| Increases from prior period positions                                      | 17,775    | 65,540    | 21,623    |
| Decreases from prior period positions                                      | (27,669)  | (7,741)   | (8,899)   |
| Increases from current period positions                                    | 43,804    | 42,696    | 33,028    |
| Decreases from current period positions                                    | (8,689)   | —         | —         |
| Decreases relating to settlements with tax authorities                     | (1,434)   | (3,173)   | (7,426)   |
| Reductions as a result of a lapse of the applicable statute of limitations | (7,562)   | (15,921)  | (3,040)   |
| Balance at end of year                                                     | \$531,790 | \$515,565 | \$434,164 |

The amount of the unrecognized tax benefits at December 31, 2010, 2009 and 2008 that would affect the effective tax rate if recognized was \$434 million, \$411 million and \$371 million, respectively.

Tax authorities continually examine our tax filings. On a regular basis, we conclude tax return examinations, statutes of limitations expire, and court decisions interpret tax law. We regularly assess tax uncertainties in light of these developments. As a result, it is reasonably possible that the amount of our unrecognized tax benefits will decrease in the next 12 months, and we expect this change could be up to one-third of our unrecognized tax benefits. Any such change will likely be arising from the completion of tax return examinations, including the resolution of certain issues related to our former Capital Services third party leasing business. We recognize interest and penalties related to uncertain tax positions in our provision for income taxes or discontinued operations as appropriate. During the years ended December 31, 2010, 2009 and 2008, we recorded \$9 million, \$23 million and \$26 million, respectively, in interest and penalties primarily in discontinued operations. We had \$202 million and \$186 million accrued for the payment of interest and penalties at December 31, 2010 and 2009, respectively.

##### NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

#### Note 1. Operations and Summary of Significant Accounting Policies (in part)

##### Self-Insurance Reserves

We maintain reserves for the self-funded portions of employee medical insurance benefits. The employer's portion of employee medical claims is limited by stop-loss insurance coverage each year to \$0.3 million per person for Lance. At January 1, 2011 and December 26, 2009, the accruals for our portion of medical insurance benefits were \$3.1 million and \$2.9 million, respectively. As part of the Merger, we also assumed additional reserves of \$1.9 million. Snyder's portion of employee medical claims is limited by stop-loss coverage each year to \$0.2 million per person, and the accrual at January 1, 2011 was \$1.9 million.

For certain casualty insurance obligations, we maintain self-insurance reserves for workers' compensation and auto liability for individual losses up to the \$0.3 million insurance deductible, and in some cases, up to a \$0.5 million insurance deductible. In addition, certain general and product liability claims are self-funded for individual losses up to the \$0.1 million insurance deductible. Claims in excess of the deductible are fully insured up to \$100 million per individual claim. We evaluate input from a third-party actuary in the estimation of the casualty insurance obligation on an annual basis. In determining the ultimate loss and reserve requirements, we use various actuarial assumptions including compensation trends, healthcare cost trends and discount rates. We also use historical information for claims frequency and severity in order to establish loss development factors. The esti-

mate of discounted loss reserves ranged from \$14.3 million to \$19.3 million in 2010. In 2009, the estimate of discounted loss reserves ranged from \$11.6 million to \$14.4 million. This increase was the result of assuming Snyder's workers' compensation liabilities and other factors as described below.

During 2010, we determined that no other point within the range of loss reserves was more probable than another. Accordingly, we selected the midpoint of the range as our estimated liability. In 2009, we estimated the claims liability to be at the 75 th percentile. This change decreased the estimated claims liability by approximately \$0.5 million. In addition, we lowered the discount rate from 3.5% in 2009 to 2.5% in 2010 based on projected investment returns over the estimated future payout period, which increased the estimated claims liability by approximately \$0.2 million.

In December 2010, we assumed a liability for workers' compensation relating to claims that had originated prior to 1992 and been insured by a third-party insurance company. Due to the uncertainty of that insurer's ability to continue paying claims, we entered into an agreement where we assumed the full liability of approximately \$3.6 million of insurance claims under the pre-existing workers' compensation policies and received \$1.5 million in cash consideration to be placed in an escrow account to pay these specific claims. Therefore, we have recognized the net liability of \$2.1 million as of January 1, 2011.

## NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

## Note 9: Discontinued Operations (in part)

## Reserve for Discontinued Operations at December 31, 2010 and 2009

The reserve for discontinued operations totaled \$38.6 million and \$41.7 million at December 31, 2010 and 2009, respectively. The liability at December 31, 2010, was comprised of \$6.0 million for workers' compensation and product liability, \$10.8 million for other postretirement medical and life insurance benefits provided to former employees of discontinued businesses and \$21.8 million of reserves for legal proceedings associated with discontinued operations. The discontinued postretirement medical and life insurance benefits liability equals the accumulated postretirement benefit obligation. Associated with this liability is a net pretax actuarial gain and prior service credit of \$14.0 million (\$9.1 million after-tax) and \$15.4 million (\$10.3 million after-tax) at December 31, 2010 and 2009, respectively. The estimated net actuarial gain and prior service credit that will be amortized from accumulated other comprehensive income into discontinued operations during 2011 are \$1.7 million and \$0.1 million, respectively.

The liability at December 31, 2009, was comprised of \$7.3 million for workers' compensation and product liability, \$11.8 million for other postretirement medical and life insurance benefits provided to former employees of discontinued businesses and \$22.6 million of reserves for legal proceedings associated with discontinued operations.

We use actuarial methods, to the extent practicable, to monitor the adequacy of product liability, workers' compensation and other postretirement benefit reserves on an ongoing basis. While the amounts required to settle our liabilities for discontinued operations could ultimately differ materially from the estimates used as a basis for recording these liabilities, we believe that changes in estimates or required expenditures for any individual cost component will not have a material adverse effect on our liquidity or financial condition in any single year and that, in any event, such costs will be satisfied over the course of several years.

Spending in 2010, 2009 and 2008 was \$0.7 million, \$1.1 million and \$0.6 million, respectively, for workers' compensation, product liability and other claims; \$1.6 million, \$1.2 million and \$1.5 million, respectively, for other postretirement benefits; and \$25.8 million, \$17.6 million and \$15.5 million, respectively, related to reserves for legal proceedings associated with discontinued operations.

## Warranty

## 2.190

DELL INC. (JAN)

## NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

## Note 7—Warranty and Deferred Extended Warranty Revenue

Dell records liabilities for its standard limited warranties at the time of sale for the estimated costs that may be incurred. The liability for standard warranties is included in accrued and

other current and other non-current liabilities on Dell's Consolidated Statements of Financial Position. Revenue from the sale of extended warranties is recognized over the term of the contract or when the service is completed, and the costs associated with these contracts are recognized as incurred. Deferred extended warranty revenue is included in deferred services revenue on Dell's Consolidated Statements of Financial Position. Changes in Dell's liabilities for standard limited warranties and deferred services revenue related to extended warranties are presented in the following tables:

|                                                                                                                 | Fiscal Year Ended |                  |                  |

##### NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

##### Note 1—Summary of Significant Accounting Policies (in part)

##### Environmental Reserves

The Company recognizes an environmental liability when it is probable the liability exists and the amount is reasonably estimable. The Company estimates the duration and extent of its remediation obligations based upon reports of outside consultants; internal analyses of clean-up costs, and ongoing monitoring costs; communications with regulatory agencies; and changes in environmental law. If the Company were to determine that its estimates of the duration or extent of its environmental obligations were no longer accurate, the Company would adjust its environmental liabilities accordingly in the period that such determination is made. Estimated future expenditures for environmental remediation are not discounted to their present value. Accrued environmental liabilities are not reduced by potential insurance reimbursements.

Environmental expenses that relate to ongoing operations are included as a component of cost of goods sold. Environmental expenses related to non-operating properties are included in other (expense) income, net in the Consolidated Statements of Income.

##### Note 10—Commitments and Contingencies (in part)

##### Environmental

The Company is subject to environmental standards imposed by federal, state, local, and foreign environmental laws and regulations. For all properties, the Company has provided and charged to expense \$5.4 million in 2010, \$1.1 million in 2009, and \$15.4 million in 2008 for pending environmental matters. Environmental costs related to non-operating properties are classified as a component of other (expense) in-

come, net and costs related to operating properties are classified as cost of goods sold. Environmental reserves totaled \$23.9 million at December 25, 2010 and \$23.3 million at December 26, 2009. As of December 25, 2010, the Company expects to spend on existing environmental matters \$1.6 million in 2011, \$1.0 million in 2012, \$1.0 million in 2013, \$1.0 million in 2014, \$0.5 million in 2015, and \$9.3 million thereafter. The timing of a potential payment for a \$9.5 million settlement offer has not yet been determined.

## Asset Retirement Obligations

| Non-current tax-related liabilities | \$160             | \$ 477  |
| Environmental liabilities           | 103               | 102     |
| Asset retirement obligations        | 57                | 62      |
| Deferred compensation               | 29                | 39      |
| Other                               | 276               | 325     |
| Total                               | \$625             | \$1,005 |

The Other component above consists of other miscellaneous long-term liabilities that, individually, were less than 5% of the total liabilities component in the accompanying Consolidated Statement of Financial Position, and therefore, have been aggregated in accordance with Regulation S-X.

##### Note 10. Commitments and Contingencies (in part)

##### Asset Retirement Obligations

As of December 31, 2010 and 2009, the Company has recorded approximately \$57 million and \$62 million, respectively, of asset retirement obligations within Other long-term liabilities in the accompanying Consolidated Statement of Financial Position. The Company's asset retirement obligations primarily relate to asbestos contained in buildings that the Company owns. In many of the countries in which the Company operates, environmental regulations exist that require the Company to handle and dispose of asbestos in a special manner if a building undergoes major renovations or is demolished. Otherwise, the Company is not required to remove the asbestos from its buildings. The Company records a liability equal to the estimated fair value of its obligation to perform asset retirement activities related to the asbestos, computed using an expected present value technique, when sufficient information exists to calculate the fair value. The Company does not have a liability recorded related to every building that contains asbestos because the Company cannot estimate the fair value of its obligation for certain buildings due to a lack of sufficient information about the range of time over which the obligation may be settled through demolition, renovation or sale of the building.

The following table provides asset retirement obligation activity:

| (In millions)                                  | For the Year Ended<br>December 31 |       |      |

##### NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

Note 17—Litigation: (claims not in thousands) (in part)

##### Litigation (in part)

The Corporation and its subsidiaries are involved in various claims and lawsuits incidental to their businesses. In addition, it is also subject to asbestos litigation as described below.

##### Asbestos Litigation

Claims have been asserted alleging personal injury from exposure to asbestos-containing components historically used in some products of predecessors of the Corporation's Air & Liquid Systems Corporation subsidiary ("Asbestos Liability") and of an inactive subsidiary in dissolution and another former division of the Corporation. Those subsidiaries, and in some cases the Corporation, are defendants (among a number of defendants, typically over 50) in cases filed in various state and federal courts.

##### Asbestos Claims

The following table reflects approximate information about the claims for Asbestos Liability against the subsidiaries and the Corporation, along with certain asbestos claims asserted against the inactive subsidiary in dissolution and the former division, for the three years ended December 31, 2010, 2009 and 2008:

|                                               | 2010                 | 2009                 | 2008                 |
|-----------------------------------------------|----------------------|----------------------|----------------------|
| Open claims at end of period                  | 8,081 <sup>(1)</sup> | 8,168 <sup>(1)</sup> | 9,354 <sup>(1)</sup> |
| Gross settlement and defense costs (in 000's) | \$18,085             | \$28,744             | \$19,102             |
| Claims resolved                               | 1,377                | 3,336                | 1,015                |

<sup>(1)</sup> Included as "open claims" are approximately 1,791 claims in 2010, 1,938 claims in 2009 and 3,243 claims in 2008 classified in various jurisdictions as "inactive" or transferred to a state or federal judicial panel on multi-district litigation, commonly referred to as the MDL.

A substantial majority of the settlement and defense costs reflected in the above table were reported and paid by insurers. Because claims are often filed and can be settled or dismissed in large groups, the amount and timing of settlements, as well as the number of open claims, can fluctuate significantly from period to period. In 2006, for the first time, a claim for Asbestos Liability against one of the Corporation's subsidiaries was tried to a jury. The trial resulted in a defense verdict. Plaintiffs appealed that verdict and in 2008 the California Court of Appeals reversed the jury verdict and remanded the case back to the trial court.

##### Asbestos Insurance

Certain of the Corporation's subsidiaries and the Corporation have an arrangement (the "Coverage Arrangement") with insurers responsible for historical primary and some first-layer excess insurance coverage for Asbestos Liability (the "Paying Insurers"). Under the Coverage Arrangement, the Paying Insurers accept financial responsibility, subject to the limits of the policies and based on fixed defense percentages and specified indemnity allocation formulas, for pending and future claims for Asbestos Liability. The claims against the Corporation's inactive subsidiary that is in dissolution proceedings, numbering approximately 400 as of December 31, 2010, are not included within the Coverage Arrangement. The one claim filed against the former division also is not included within the Coverage Arrangement. The Corporation believes that the claims against the inactive subsidiary in dissolution and the former division are immaterial.

The Coverage Arrangement includes an acknowledgment that Howden North America, Inc. ("Howden") is entitled to coverage under policies covering Asbestos Liability for claims arising out of the historical products manufactured or distributed by Buffalo Forge, a former subsidiary of the Corporation (the "Products"). The Coverage Arrangement does not provide for any prioritization on access to the applicable policies or monetary cap other than the limits of the policies, and, accordingly, Howden may access the policies at any time for any covered claim arising out of a Product. In general, access by Howden to the policies covering the Products will erode the coverage under the policies available to the Corporation and the relevant subsidiaries for Asbestos Liability alleged to arise out of not only the Products but also other

historical products of the Corporation and its subsidiaries covered by the applicable policies.

On August 4, 2009, Howden filed a lawsuit in the United States District Court for the Western District of Pennsylvania. In the lawsuit, Howden raised claims against certain insurance companies that allegedly issued policies to Howden that do not cover the Corporation or its subsidiaries, and also raised claims against the Corporation and two other insurance companies that issued excess insurance policies covering certain subsidiaries of the Corporation (the "Excess Policies"), but that were not part of the Coverage Arrangement. In the lawsuit, Howden seeks, as respects the Corporation, a declaratory judgment from the court as to the respective rights and obligations of Howden, the Corporation and the insurance carriers under the Excess Policies. One of the excess carriers and the Corporation filed cross-claims against each other seeking declarations regarding their respective rights and obligations under Excess Policies issued by that carrier. The Corporation's cross-claim also sought damages for the carrier's failure to pay certain defense and indemnity costs. The Corporation and that carrier concluded a settlement generally consistent with the Coverage Arrangement, and all claims between that carrier and the Corporation were dismissed with prejudice on December 8, 2010. The litigation remains pending with respect to the other carrier that issued one of the Excess Policies.

On February 24, 2011, the Corporation and its Air & Liquid Systems Corporation subsidiary filed a lawsuit in the United States District Court for the Western District of Pennsylvania against thirteen domestic insurance companies, certain underwriters at Lloyd's, London and certain London market insurance companies, and Howden. The lawsuit seeks a declaratory judgment regarding the respective rights and obligations of the parties under excess insurance policies not included within the Coverage Arrangement that were issued to the Corporation from 1981 through 1984 as respects claims against the Corporation and its subsidiary for Asbestos Liability and as respects asbestos bodily-injury claims against Howden arising from the Products.

#### *Asbestos Valuations*

In 2006, the Corporation retained Hamilton, Rabinovitz & Associates, Inc. ("HR&A"), a nationally recognized expert in the valuation of asbestos liabilities, to assist the Corporation in estimating the potential liability for pending and unasserted future claims for Asbestos Liability. HR&A was not requested to estimate asbestos claims against the inactive subsidiary in dissolution or the former division, which the Corporation believes are immaterial. Based on this analysis, the Corporation recorded a reserve for Asbestos Liability claims pending or projected to be asserted through 2013 as at December 31, 2006. HR&A's analysis was updated in 2008, and additional reserves were established by the Corporation as at December 31, 2008 for Asbestos Liability claims pending or projected to be asserted through 2018. HR&A's analysis was most recently updated in 2010, and additional reserves were established by the Corporation as at December 31, 2010 for Asbestos Liability claims pending or projected to be asserted through 2020. The methodology used by HR&A in its projection in 2010 of the operating subsidiaries' liability for pending and unasserted potential future claims for Asbestos Liability, which is substantially the same as the methodology employed by HR&A in the 2006 and 2008 estimates, relied upon and included the following factors:

- HR&A's interpretation of a widely accepted forecast of the population likely to have been exposed to asbestos;
- Epidemiological studies estimating the number of people likely to develop asbestos-related diseases;
- HR&A's analysis of the number of people likely to file an asbestos-related injury claim against the subsidiaries and the Corporation based on such epidemiological data and relevant claims history from January 1, 2008 to August 30, 2010;
- An analysis of pending cases, by type of injury claimed and jurisdiction where the claim is filed;
- An analysis of claims resolution history from January 1, 2008 to August 30, 2010 to determine the average settlement value of claims, by type of injury claimed and jurisdiction of filing; and
- An adjustment for inflation in the future average settlement value of claims, at an annual inflation rate based on the Congressional Budget Office's ten year forecast of inflation.

Using this information, HR&A estimated in 2010 the number of future claims for Asbestos Liability that would be filed through the year 2020, as well as the settlement or indemnity costs that would be incurred to resolve both pending and future unasserted claims through 2020. This methodology has been accepted by numerous courts.

In conjunction with developing the aggregate liability estimate referenced above, the Corporation also developed an estimate of probable insurance recoveries for its Asbestos Liabilities. In developing the estimate, the Corporation considered HR&A's projection for settlement or indemnity costs for Asbestos Liability and management's projection of associated defense costs (based on the current defense to indemnity cost ratio), as well as a number of additional factors. These additional factors included the Coverage Arrangement, self-insured retentions, policy exclusions, policy limits, policy provisions regarding coverage for defense costs, attachment points, prior impairment of policies and gaps in the coverage, policy exhaustions, insolvencies among certain of the insurance carriers, the nature of the underlying claims for Asbestos Liability asserted against the subsidiaries and the Corporation as reflected in the Corporation's asbestos claims database, as well as estimated erosion of insurance limits on account of claims against Howden arising out of the Products. In addition to consulting with the Corporation's outside legal counsel on these insurance matters, the Corporation retained in 2010 a nationally-recognized insurance consulting firm to assist the Corporation with certain policy allocation matters that also are among the several factors considered by the Corporation when analyzing potential recoveries from relevant historical insurance for Asbestos Liabilities. Based upon all of the factors considered by the Corporation, and taking into account the Corporation's analysis of publicly available information regarding the credit-worthiness of various insurers, the Corporation estimated the probable insurance recoveries for Asbestos Liability and defense costs through 2020. Although the Corporation believes that the assumptions employed in the insurance valuation were reasonable and previously consulted with its outside legal counsel and insurance consultant regarding those assumptions, there are other assumptions that could have been employed that would have resulted in materially lower insurance recovery projections.

Based on the analyses described above, the Corporation's reserve at December 31, 2010 for the total costs, including defense costs, for Asbestos Liability claims pending or

projected to be asserted through 2020 was \$218,303 of which approximately 85% was attributable to settlement costs for unasserted claims projected to be filed through 2020 and future defense costs. While it is reasonably possible that the Corporation will incur additional charges for Asbestos Liability and defense costs in excess of the amounts currently reserved, the Corporation believes that there is too much uncertainty to provide for reasonable estimation of the number of future claims, the nature of such claims and the cost to resolve them beyond 2020. Accordingly, no reserve has been recorded for any costs that may be incurred after 2020.

The Corporation's receivable at December 31, 2010 for insurance recoveries attributable to the claims for which the Corporation's Asbestos Liability reserve has been established, including the portion of incurred defense costs covered by the Coverage Arrangement, and the probable payments and reimbursements relating to the estimated indemnity and defense costs for pending and unasserted future Asbestos Liability claims, was \$141,839 (\$115,430 as of December 31, 2009). The insurance receivable recorded by the Corporation does not assume any recovery from insolvent carriers, and substantially all of the insurance recoveries deemed probable were from insurance companies rated A—(excellent) or better by A.M. Best Corporation. There can be no assurance, however, that there will not be further insolvencies among the relevant insurance carriers, or that the assumed percentage recoveries for certain carriers will prove correct. The \$76,464 million difference between insurance recoveries and projected costs at December 31, 2010 is not due to exhaustion of all insurance coverage for Asbestos Liability. The Corporation and the subsidiaries have substantial additional insurance coverage which the Corporation expects to be available for Asbestos Liability claims and defense costs the subsidiaries and it may incur after 2020. However, this insurance coverage also can be expected to have gaps creating significant shortfalls of insurance recoveries as against claims expense, which could be material in future years.

The amounts recorded by the Corporation for Asbestos Liabilities and insurance receivables rely on assumptions that are based on currently known facts and strategy. The Corporation's actual expenses or insurance recoveries could be significantly higher or lower than those recorded if assumptions used in the Corporation's or HR&A's calculations vary significantly from actual results. Key variables in these assumptions are identified above and include the number and type of new claims to be filed each year, the average cost of disposing of each such new claim, average annual defense costs, the resolution of coverage issues with insurance carriers, and the solvency risk with respect to the relevant insurance carriers. Other factors that may affect the Corporation's Asbestos Liability and ability to recover under its insurance policies include uncertainties surrounding the litigation process from jurisdiction to jurisdiction and from case to case, reforms that may be made by state and federal courts, and the passage of state or federal tort reform legislation.

The Corporation intends to evaluate its estimated Asbestos Liability and related insurance receivables as well as the underlying assumptions on a regular basis to determine whether any adjustments to the estimates are required. Due to the uncertainties surrounding asbestos litigation and insurance, these regular reviews may result in the Corporation incurring future charges; however, the Corporation is currently

unable to estimate such future charges. Adjustments, if any, to the Corporation's estimate of its recorded Asbestos Liability and/or insurance receivables could be material to operating results for the periods in which the adjustments to the liability or receivable are recorded, and to the Corporation's liquidity and consolidated financial position.
